Aptabase aptabase/aptabase ★ 1.9k · AGPL AGPL-3.0 · App · Fit 4/5	Privacy-first simple analytics for mobile, desktop and web apps with SDKs *Replaces:* Mixpanel, Firebase Analytics, Amplitude, PostHog	Indie app developers wanting simple usage stats	Managed hosting Vertical SaaS Premium plugins/add-ons	• Analytics for indie iOS apps • Usage stats for desktop tool makers • Privacy-first metrics for game studios *Angle:* Privacy app analytics for mobile and desktop	$8-49/mo per app *Effort:* Low (Multi-app ready, SDKs exist, ClickHouse needed) ⚠ AGPL: publish server-side changes; Aptabase trademark
Highlight highlight/highlight ★ 9.4k · Check NOASSERTION · Platform · Fit 3/5	Full-stack monitoring with errors, session replay, logs and traces *Replaces:* Datadog, LogRocket, Sentry, FullStory	Startup engineering teams	Managed hosting Setup + support retainer Vertical SaaS	• Observability for Next.js agencies • Replay plus errors for fintech apps • Monitoring for SaaS startups *Angle:* Session replay and error monitoring SaaS	$50-300/mo by volume *Effort:* Medium (Acquired by LaunchDarkly, project winding down) ⚠ Acquired and sunsetting; license NOASSERTION
Flagger fluxcd/flagger ★ 5.4k · Permissive Apache-2.0 · Tool · Fit 3/5	Kubernetes operator that automates canary, A/B and blue-green progressive delivery rollouts. *Replaces:* Argo Rollouts hosted support, LaunchDarkly progressive delivery, Harness CD	Platform engineering teams, Kubernetes-heavy SaaS companies	Consulting/implementation Setup + support retainer	• Canary rollouts for fintech APIs • Blue-green deploys for retail web stores • Release gating for healthcare SaaS	$8k-25k per platform setup; $2k/mo support *Effort:* Medium (Kubernetes operator; needs cluster and mesh expertise) ⚠ Apache-2.0 permissive; Flux and Kubernetes are CNCF brands; cluster ops required
Flipt flipt-io/flipt ★ 4.9k · Check NOASSERTION · Platform · Fit 3/5	Git-native feature management with flags, segments and an audit-friendly workflow *Replaces:* LaunchDarkly, Unleash, ConfigCat	Platform teams, GitOps shops	Managed hosting Setup + support retainer Consulting/implementation	• Git-backed flags for infrastructure teams • Compliance-friendly flags for fintech • Flags for Kubernetes-heavy platforms *Angle:* Git-native feature flags service	$50-250/mo per team *Effort:* Medium (Self-contained, FCL license) ⚠ Fair Core License limits competing hosted service; NOASSERTION
RudderStack rudderlabs/rudder-server ★ 4.5k · Check NOASSERTION · Platform · Fit 3/5	Privacy-focused Segment alternative written in Go for event routing *Replaces:* Segment, mParticle, Snowplow, Jitsu	Data engineers routing customer events	Managed hosting API/usage-based Consulting/implementation	• Event routing for fintech apps • Customer data pipeline for retailers • CDP for health startups *Angle:* Customer data platform as managed service	$100-1000/mo by events *Effort:* High (Go services plus Postgres, ops heavy) ⚠ NOASSERTION: Elastic-style license limits hosted competition; trademark
Uptrain uptrain-ai/uptrain ★ 2.4k · Permissive Apache-2.0 · Platform · Fit 3/5	Open-source platform that grades generative AI app outputs with 20+ preconfigured evaluation checks. *Replaces:* Arize AI, Galileo, Braintrust	AI product teams, LLM app developers, evaluation consultants	Managed hosting Consulting/implementation	• Eval suite for legal AI assistants • Quality checks for support chatbots • Output grading for educational chatbots	$499/mo managed eval platform; $5k setup *Effort:* Medium (eval platform; add dashboards, SSO and alerts) ⚠ Apache-2.0 permissive; LLM judge costs and check reliability
Trench FrigadeHQ/trench ★ 1.7k · Permissive MIT · Platform · Fit 3/5	Docker image for event analytics on ClickHouse, Kafka and Node.js, for product analytics. *Replaces:* Segment, Mixpanel, Amplitude	Product teams, startups tracking events, privacy-first buyers	Managed hosting Setup + support retainer	• Event analytics for B2B SaaS onboarding • Usage tracking for mobile game studios • Product analytics for EU fintech apps	$199/mo managed cluster; $2k setup *Effort:* Medium (Docker stack; ops and dashboards need work) ⚠ MIT permissive; ClickHouse and Kafka ops are heavy; event privacy laws
Ollama-grid-search dezoito/ollama-grid-search ★ 958 · Permissive MIT · App · Fit 3/5	Desktop app that evaluates and compares local LLM models side by side. *Replaces:* Promptfoo Cloud, Vellum evaluations	AI engineers, prompt teams, model evaluation consultancies	Premium plugins/add-ons Consulting/implementation	• Model bake-offs for legal drafting teams • Local LLM comparisons for privacy-first clinics • Prompt tests for support teams	$49 one-time desktop license; $1,500 eval setup *Effort:* Medium (desktop app; branding, connectors and docs) ⚠ MIT permissive; depends on Ollama; model weights carry their own licenses
rrweb rrweb-io/rrweb ★ 20.4k · Permissive MIT · Library · Fit 2/5	JavaScript library to record and replay web page sessions via DOM snapshots *Replaces:* FullStory, Hotjar, LogRocket, Smartlook	Developers building replay features	API/usage-based Consulting/implementation Vertical SaaS	• Session replay for support-ticket tools • Replay for ecommerce funnels • UX replay for usability labs *Angle:* Build branded session-recording SaaS	$29-149/mo by sessions *Effort:* High (Recorder only, no backend) ⚠ MIT; privacy and consent obligations for recordings

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Split splitrb/split ★ 2.7k · **Permissive** MIT · Library · Fit 2/5	Rack-based Ruby A/B testing framework for running and measuring experiments. *Replaces:* Optimizely, VWO, LaunchDarkly experiments	Rails product teams, growth teams	Consulting/implementation Setup + support retainer	• Experiments for Rails ecommerce checkouts • Pricing page tests for SaaS • Onboarding tests for fitness apps	$5k-15k per experimentation setup; $1k/mo support *Effort:* Medium (library; needs dashboard and reporting UI) ⚠ MIT permissive; statistical mistakes in test design are common
Shadow shadow/shadow ★ 1.7k · **Check** NOASSERTION · Tool · Fit 2/5	Discrete-event network simulator that runs real application code to test distributed systems at scale. *Replaces:* Commercial network emulators like Keysight, Ixia	Distributed systems researchers, infra teams, network R&D	Consulting/implementation Training/courses	• Failure testing for blockchain node operators • Network simulation for telecom vendors • Partition tests for fintech infrastructure	$10k-30k per simulation engagement *Effort:* High (research simulator; deep systems expertise needed) ⚠ NOASSERTION license, read first; research-grade tool with steep learning curve
Gitops-istio stefanprodan/gitops-istio ★ 669 · **Permissive** Apache-2.0 · Starter · Fit 2/5	Reference GitOps recipe combining Flux, Flagger and Istio for progressive delivery. *Replaces:* Consulting-led GitOps setups, managed Istio support	Platform engineering teams, Kubernetes consultancies	Consulting/implementation Training/courses	• GitOps setup for insurance platform teams • Progressive delivery labs for DevOps bootcamps • Istio rollout kit for retail engineers	$6k-18k per GitOps rollout setup *Effort:* Medium (reference recipe; tailor to each cluster) ⚠ Apache-2.0 permissive; Flux, Flagger and Istio are separate projects
Countly-sdk-ios Countly/countly-sdk-ios ★ 628 · **Permissive** MIT · Library · Fit 2/5	SDK for iOS, macOS, watchOS and tvOS that sends product analytics events to Countly. *Replaces:* Mixpanel iOS SDK, Amplitude SDK, Firebase Analytics	iOS app developers, mobile product teams	Consulting/implementation Setup + support retainer	• Analytics for Apple TV streaming apps • Event tracking for watch fitness apps • Usage analytics for iOS clinic apps	$300-800 per-app SDK integration *Effort:* Low (SDK; tied to Countly server) ⚠ MIT permissive; App Store privacy labels and consent rules apply
Omnitool omnitool-ai/omnitool ★ 452 · **Check** NOASSERTION · Tool · Fit 2/5	unclear project: official repository for Omnitool, description gives no details.	AI workflow builders, creative and ad teams	Consulting/implementation Premium plugins/add-ons	• Visual AI pipelines for ad agencies • Image workflow builders for ecommerce teams • Automation canvas for content studios	$2k-6k workflow setup; verify product scope first *Effort:* Medium (scope unclear; verify features and license) ⚠ NOASSERTION license, read first; scope unknown, verify before any build
Ai-decision-system BichengWang/ai-decision-system ★ 440 · **Permissive** MIT · Tool · Fit 2/5	Records AI-assisted go/no-go decisions with replayable, offline-verifiable logs and approval gates. *Replaces:* Credo AI, governance logging tools	Regulated firms using AI in decisions, release managers	Setup + support retainer Consulting/implementation	• Audit logs for bank AI credit decisions • Release gates for healthcare software teams • Decision records for insurers' AI underwriting	$1,500/mo governance plan; $10k setup *Effort:* Medium (decision-log framework; needs domain policies) ⚠ MIT permissive; regulatory claims need legal review; logs hold personal data
Genaiops-promptflow-template microsoft/genaiops-promptflow-template ★ 369 · **Check** NOASSERTION · Starter · Fit 2/5	Microsoft template and guidance for building LLM apps with Prompt Flow and GenAIOps practices. *Replaces:* Consulting-led LLMOps setups, Databricks MLflow services	Azure-based enterprise AI teams, consultancies	Consulting/implementation Training/courses	• LLMOps setup for Azure insurers • Prompt Flow training for enterprise dev teams • GenAI pipeline kit for public agencies	$15k-40k per GenAIOps setup *Effort:* Medium (Azure template; tied to Microsoft services) ⚠ NOASSERTION license, read first; Azure lock-in; Microsoft is a brand
Tea-tasting e10v/tea-tasting ★ 338 · **Permissive** MIT · Library · Fit 2/5	Python package for statistical analysis of A/B test results. *Replaces:* Optimizely Stats Engine, Statsig analysis	Data scientists, growth analysts, experimentation teams	Consulting/implementation Training/courses	• A/B analysis for fintech signup flows • Experiment reviews for ecommerce growth teams • Statistics course for product analysts	$2k-6k per experiment analysis engagement *Effort:* Medium (stats library; build reports and UI) ⚠ MIT permissive; statistical errors if misused; small maintainer base

Q&A Sites · 16

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Apache Answer apache/answer ★ 15.7k · Permissive Apache-2.0 · App · Fit 4/5	Q&A platform for community forums, help centers and team knowledge bases *Replaces:* StackOverflow for Teams, Quora, Zendesk Community, Discourse	Product teams running Q&A communities	Managed hosting Setup + support retainer Vertical SaaS	• Customer Q&A for SaaS vendors • Internal Q&A for engineering teams • Help community for hardware makers *Angle:* Branded Q&A knowledge base for product communities	$20-79/mo per site *Effort:* Low (Single Go binary, plugins, themable) ⚠ Apache-2.0 permissive; Apache trademark rules
Scoold Erudika/scoold ★ 920 · Permissive Apache-2.0 · App · Fit 4/5	Stack Overflow style Q&A for teams, self-hosted or hosted *Replaces:* StackOverflow for Teams, Confluence Questions, Slack Q&A	Internal teams sharing technical answers	Managed hosting Setup + support retainer White-label reseller	• Internal Q&A for engineering teams • Q&A for IT support desks • Knowledge sharing for consultancies *Angle:* Internal Q&A for enterprise teams	$3-6/user/mo or $49/mo flat *Effort:* Low (Java app with Para backend, multi-space support) ⚠ Apache-2.0 permissive; Scoold trademark; Pro edition upstream
R2R SciPhi-AI/R2R ★ 8.1k · Permissive MIT · Platform · Fit 3/5	Production-ready retrieval-augmented generation system with agentic retrieval and a RESTful API. *Replaces:* Vectara, Glean, Pinecone Assistant	Enterprises with internal documents, legal and support teams	Managed hosting Setup + support retainer	• Contract Q&A for procurement teams • Support answers for SaaS help centers • Policy search for municipal staff	$499/mo managed RAG; $8k-20k setup *Effort:* Medium (RAG backend; add UI, auth and connectors) ⚠ MIT permissive; data privacy and hallucination risks; vector database costs
Question2Answer q2a/question2answer ★ 1.7k · GPL GPL-3.0 · App · Fit 3/5	PHP and MySQL platform for Q&A sites with voting, points and plugins *Replaces:* StackOverflow, Quora, Yahoo Answers, Discourse	Niche expert communities	Managed hosting Premium plugins/add-ons Setup + support retainer	• Q&A site for hobby woodworkers • Tutor questions board for schools • Support Q&A for software shops *Angle:* Niche Stack Overflow clones with ad revenue	$10-40/mo per site *Effort:* Low (Mature PHP, plugin and theme ecosystem) ⚠ GPL-3.0 fine for hosting; dated UI
Askbot ASKBOT/askbot-devel ★ 1.6k · Check NOASSERTION · App · Fit 3/5	Django Python Q&A forum with tags, voting and reputation *Replaces:* StackOverflow, Quora, Discourse	Communities running Q&A sites	Managed hosting Setup + support retainer Premium plugins/add-ons	• Q&A for Python user groups • Internal Q&A for support teams • Question board for universities *Angle:* Hosted Q&A with Python support	$10-40/mo per site *Effort:* Medium (Django app, hosted edition exists upstream, upkeep slowed) ⚠ NOASSERTION: GPL-style, read license; Askbot trademark
QPixel codidact/qpixel ★ 442 · AGPL AGPL-3.0 · Platform · Fit 3/5	Q&A community knowledge-sharing software with communities and moderation *Replaces:* StackExchange, Quora, Discourse	Expert communities building Q&A sites	Managed hosting Setup + support retainer Content/membership	• Q&A site for chess players • Expert answers for hobby electronics • Knowledge community for gardeners *Angle:* Community-run Q&A networks with sponsorships	$20-60/mo per community *Effort:* Medium (Rails app, multi-community support, community-run) ⚠ AGPL: publish server-side changes; Codidact trademark
DeepPavlov deeppavlov/DeepPavlov ★ 7.0k · Permissive Apache-2.0 · Library · Fit 2/5	Open-source library for building end-to-end deep learning dialog systems and chatbots. *Replaces:* Dialogflow, Rasa Pro, Amazon Lex	Chatbot developers, NLP teams, research groups	Consulting/implementation Setup + support retainer	• Chatbot for regional government service lines • Dialog systems for call-center pilots • Russian-language support bots	$10k-30k per dialog system build *Effort:* High (NLP library; needs data, tuning and deployment) ⚠ Apache-2.0 permissive; models may need retraining; Dialogflow and Lex are brands
Agriculture_KnowledgeGraph qq547276542/Agriculture_KnowledgeGraph ★ 4.4k · GPL GPL-3.0 · Platform · Fit 2/5	Chinese agriculture knowledge graph with entity recognition, relation extraction and Q&A for advisory. *Replaces:* Farm advisory consultancies, agri data platforms	Agricultural extension services, agritech startups, cooperatives	Setup + support retainer Consulting/implementation	• Crop advice bot for county cooperatives • Pest knowledge base for agritech apps • Advisory Q&A for seed companies	$15k-40k per knowledge graph build; $2k/mo support *Effort:* High (domain data and expert curation needed) ⚠ GPL-3.0 must ship source; agronomy advice carries liability; Chinese-language data

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
AdalFlow SylphAI-Inc/AdalFlow ★ 4.2k · **Permissive** MIT · Library · Fit 2/5	Library for building and automatically optimizing LLM applications with prompt and pipeline tuning. *Replaces:* LangSmith optimization features, DSPy-style hosted tooling	AI engineers, LLM app teams	Consulting/implementation Training/courses	• Prompt optimization for support chatbots • Pipeline tuning for legal document tools • LLM app workshops for dev teams	$5k-15k per LLM app optimization project *Effort:* Medium (library; needs productized tooling and docs) ⚠ MIT permissive; LLM provider costs and model version drift
Spark-nlp JohnSnowLabs/spark-nlp ★ 4.2k · **Permissive** Apache-2.0 · Library · Fit 2/5	Apache Spark library for scalable natural language processing pipelines and pretrained models. *Replaces:* Azure AI Language, AWS Comprehend, John Snow Labs healthcare NLP	Data engineering teams, healthcare analytics, enterprise NLP groups	Consulting/implementation Setup + support retainer	• Clinical note extraction for hospital analytics • Contract clause tagging for legal teams • Review classification for e-discovery vendors	$15k-50k per NLP pipeline; $3k/mo support *Effort:* High (Spark ops and model expertise needed) ⚠ Apache-2.0 permissive; some healthcare models have separate commercial license
Rust-bert guillaume-be/rust-bert ★ 3.1k · **Permissive** Apache-2.0 · Library · Fit 2/5	Rust library with ready-made NLP pipelines and transformer models such as BERT and GPT-2. *Replaces:* Hugging Face Inference API, AWS Comprehend	Rust backend engineers, embedded NLP teams	Consulting/implementation Setup + support retainer	• Text classification for Rust-based ticketing systems • Entity tagging for on-prem legal tools • Low-latency NLP for edge devices	$8k-25k per Rust NLP integration *Effort:* High (Rust library; model conversion and ops needed) ⚠ Apache-2.0 permissive; pretrained model weights carry their own licenses
Spago nlpodyssey/spago ★ 1.9k · **Permissive** BSD-2-Clause · Library · Fit 2/5	Self-contained machine learning and NLP library written in Go. *Replaces:* Python NLP service vendors, cloud NLP APIs	Go backend engineers, data teams avoiding Python	Consulting/implementation Training/courses	• Text classification inside Go backends • Embedding search for Go-based CMS • Go NLP workshops for backend teams	$6k-15k per Go NLP integration *Effort:* High (niche Go ML library; limited model ecosystem) ⚠ BSD-2-Clause permissive; small community; verify maintenance activity
NeuronBlocks microsoft/NeuronBlocks ★ 1.5k · **Permissive** MIT · Library · Fit 2/5	NLP deep learning toolkit that builds models from reusable blocks, like assembling Lego pieces. *Replaces:* Commercial NLP model builders, Amazon SageMaker built-ins	NLP researchers, data science teams prototyping models	Consulting/implementation Training/courses	• Text classifier prototypes for insurance claims • Intent models for support teams • NLP model lab for university courses	$5k-15k per NLP prototype; $1.5k course seat *Effort:* High (toolkit; models need training and deployment work) ⚠ MIT permissive; Microsoft brand; project activity may be limited
GraphGen InternScience/GraphGen ★ 1.2k · **Permissive** Apache-2.0 · Tool · Fit 2/5	Generates synthetic supervised fine-tuning data for LLMs from knowledge graphs. *Replaces:* Scale AI data labeling, Surge AI data services	AI teams fine-tuning domain LLMs, data vendors	API/usage-based Consulting/implementation	• Synthetic training data for medical QA teams • Fine-tuning data for legal assistants • Domain Q&A sets for industrial manuals	$0.10 per generated sample; $8k-20k data project *Effort:* High (data generation pipeline; quality checks and licensing needed) ⚠ Apache-2.0 permissive; synthetic data licensing and source-document rights
Questgen.ai ramsrigouthamg/Questgen.ai ★ 952 · **Permissive** MIT · Library · Fit 2/5	NLP library that generates questions from text, for quizzes and study material. *Replaces:* Quizlet AI question generation, Quizgecko	Edtech teams, quiz builders, test prep companies	API/usage-based Consulting/implementation	• Quiz generator for corporate compliance training • Practice questions for exam prep apps • Review questions for textbook publishers	$199/mo question API; $3k integration *Effort:* Medium (library; add UI, content checks and grading) ⚠ MIT permissive; generated question quality needs human review
PIXIU The-FinAI/PIXIU ★ 894 · **Permissive** MIT · Model · Fit 2/5	Open financial language models, instruction tuning data and benchmarks for finance tasks. *Replaces:* BloombergGPT API, Refinitiv text analytics	Fintech AI teams, bank research groups, financial analysts	Consulting/implementation API/usage-based	• Filing summarizer for equity research desks • Sentiment tools for fund analysts • Earnings Q&A for retail brokers	$10k-30k per finance fine-tune; usage API *Effort:* High (research model; compliance and data licensing needed) ⚠ MIT code; financial advice rules and dataset licenses vary

Real Estate Listings · 19

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
PropertyWebBuilder etewiah/property_web_builder ★ 649 · **Permissive** MIT · App · Fit 4/5	Rails real estate website builder with listings, search and multi-tenant support *Replaces:* Wix, Squarespace, Zillow-style portals, Placester, AgentFire	Small real estate agencies and agents	Managed hosting Vertical SaaS White-label reseller	• Websites for independent realtors • Rental listing sites for villa agents • Property sites for Spanish estate agents *Angle:* Multi-tenant realtor website SaaS	$19-79/mo per site *Effort:* Low (Multi-tenant ready, themeable, Rails) ⚠ MIT; MLS integrations and data licensing separate
Visura-api zornade/visura-api ★ 677 · **AGPL** AGPL-3.0 · Platform · Fit 3/5	API that automates Italian cadastral data extraction from the SISTER land registry portal. *Replaces:* Visure catastali agencies, manual SISTER lookups	Italian notaries, surveyors, real estate lawyers	API/usage-based Setup + support retainer	• Cadastral checks for notary offices • Due diligence feeds for property lawyers • Land data for surveyor firms	€0.50-2 per cadastral lookup; €149/mo API plan *Effort:* Medium (API service; needs SISTER access and legal review) ⚠ AGPL-3.0 publishes hosted changes; SISTER terms and government data rules
Ai-real-estate-assistant AleksNeStu/ai-real-estate-assistant ★ 321 · **Permissive** MIT · App · Fit 3/5	AI assistant that answers questions over your own property listings using RAG and vector search. *Replaces:* Lofty AI, Ylopo, Structurely	Real estate brokerages, agents with listing libraries, proptech startups	Managed hosting Setup + support retainer	• Listing chatbot for boutique brokerages • Q&A bot for property management firms • Buyer assistant for new-build developers	$199/mo per brokerage site; $2,500 setup *Effort:* Medium (RAG app; needs auth, listing import and branding) ⚠ MIT permissive; listing data and MLS rules; LLM costs and provider choice
Hdb-price-predictor seehiong/hdb-price-predictor ★ 271 · **Check** NONE · App · Fit 3/5	In-browser Singapore HDB and condo valuation using XGBoost models, with transaction maps. *Replaces:* PropertyGuru, 99.co, EdgeProp	Singapore property agents, mortgage brokers, first-time HDB buyers	Vertical SaaS White-label reseller	• HDB valuation widget for estate agents • Condo price checker for mortgage brokers • Resale valuation lead magnet for agencies	$49-199/mo per agency, embeddable widget free *Effort:* Medium (data pipeline and models need retraining) ⚠ Data sourced from HDB and URA; check their terms
Fredy orangecoding/fredy ★ 1.6k · **Permissive** Apache-2.0 · Tool · Fit 2/5	Searches European property portals for new apartment listings and sends alerts. *Replaces:* ImmoScout24 premium alerts, Immowelt Pro	Apartment seekers in Germany, relocation agencies	Premium plugins/add-ons Agency service	• Alerts for students relocating to Berlin • Listing scouts for relocation agencies • Flat hunting for expat families	€5/mo alert service; €300 agency setup *Effort:* Medium (scraper; portal terms and anti-bot blocking) ⚠ Apache-2.0 permissive; portal scraping breaks terms; ImmoScout24 and Immowelt are brands
Streamlit-geospatial opengeos/streamlit-geospatial ★ 1.0k · **Permissive** MIT · Starter · Fit 2/5	Multi-page Streamlit app for exploring and mapping geospatial data. *Replaces:* ArcGIS Online, Carto dashboards	GIS analysts, data science teams, planning departments	Consulting/implementation Premium plugins/add-ons	• Mapping dashboards for urban planners • Geospatial demos for climate NGOs • Map tools for real estate analysts	$2k-6k per geo dashboard build *Effort:* Medium (Streamlit app; add data sources and auth) ⚠ MIT permissive; geodata sources carry their own licenses
HomeHarvest ZacharyHampton/HomeHarvest ★ 762 · **Permissive** MIT · Library · Fit 2/5	Python package that scrapes property listing data from real estate websites into tables. *Replaces:* ATTOM Data, CoreLogic property data feeds	Real estate analysts, investors, data teams	API/usage-based Consulting/implementation	• Comparable sales data for appraisers • Rental yield reports for small investors • Listing research for mortgage brokers	$99-299/mo hosted data feed; $1k integration *Effort:* Medium (scraper library; build data pipeline and feeds) ⚠ MIT permissive; listing sites' terms often forbid scraping; personal data rules

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Building-sunlight-simulator SeanWong17/building-sunlight-simulator ★ 490 · **Permissive** MIT · Tool · Fit 2/5	Browser-only tool that simulates building sunlight from plan annotations and 3D shadows. *Replaces:* Autodesk Insight, Trimble Sefaira	Architects, developers, urban planning consultants	Consulting/implementation Premium plugins/add-ons	• Daylight studies for apartment developers • Sun-path reports for school planners • Shadow analysis for solar installers	$300-800 per daylight study report; $49/mo pro tool *Effort:* Medium (browser tool; accuracy validation and branding) ⚠ MIT permissive; simulation accuracy must be validated before client use
PHRETS troydavisson/PHRETS ★ 457 · **Permissive** MIT · Library · Fit 2/5	PHP client library for pulling real estate listings and photos from RETS servers *Replaces:* Spark API, Bridge API, Zillow feeds, Realtor.com feeds	Developers building real estate listing sites	Consulting/implementation Agency service API/usage-based	• MLS feed sync for realtor sites • IDX integration for brokerages • Listing import for regional portals *Angle:* MLS-powered broker listing sites	$1500-5000 per integration *Effort:* High (RETS is aging, needs MLS access agreements) ⚠ MIT; MLS data rules, RETS being replaced by RESO Web API
Skills-for-architects AlpacaLabsLLC/skills-for-architects ★ 404 · **Permissive** MIT · Starter · Fit 2/5	Claude Code skill pack for architecture, real estate and workplace strategy tasks. *Replaces:* Paid AI design assistants, architecture consulting templates	Architecture firms, real estate brokers, workplace consultants	Premium plugins/add-ons Consulting/implementation	• Skill pack for architecture studios • Listing copy skills for brokerages • Workplace strategy skills for facilities consultants	$29/mo per team skill pack; $1,500 onboarding *Effort:* Low (skill files; add firm-specific playbooks) ⚠ MIT permissive; Claude is an Anthropic brand; verify skill outputs for accuracy
Real-estate-mcp tae0y/real-estate-mcp ★ 379 · **Permissive** MIT · Tool · Fit 2/5	MCP server that lets Claude query Korean apartment transaction prices from a government open API. *Replaces:* KB Land, Hogangnono	Korean real estate agents, property analysts, proptech builders	API/usage-based Premium plugins/add-ons	• Price-check bot for Korean brokers • Apartment price reports for investors • MCP add-on for proptech chatbots	$19/mo premium data pack; $800 MCP integration *Effort:* Low (MCP server; add data, auth and UI) ⚠ MIT permissive; government open-data terms and attribution apply
Pyfunda 0xMH/pyfunda ★ 206 · **AGPL** AGPL-3.0 · Library · Fit 2/5	Python wrapper for Funda.nl Dutch property listings via its mobile API. *Replaces:* Property data feed vendors, scraping services	Dutch real estate analysts, brokers, data teams	API/usage-based Consulting/implementation	• Funda listing alerts for Dutch expat buyers • Dutch rental yield dashboards for investors • Funda price-drop tracker for brokers	$20-100/mo API access for data-hungry brokers *Effort:* High (relies on undocumented mobile API) ⚠ AGPL publishes server changes; Funda name and terms risk
Daftlistings AnthonyBloomer/daftlistings ★ 194 · **Permissive** MIT · Library · Fit 2/5	Python library to query, filter and analyse Daft.ie property listings. *Replaces:* Property data feed vendors	Irish property analysts, letting agents, data teams	API/usage-based Consulting/implementation	• Daft.ie rent trend reports for landlords • Irish letting agent listing monitor • Dublin rental yield dashboard for investors	$15-79/mo per analyst seat, data export free *Effort:* High (depends on Daft.ie site structure, fragile) ⚠ Daft.ie terms likely restrict scraping; check before commercial use
Real-estate-ai-agent brightdata/real-estate-ai-agent ★ 161 · **Check** NONE · Starter · Fit 2/5	Python AI agent pipeline extracting structured property JSON via Bright Data MCP. *Replaces:* Manual listing research, data scraping services	PropTech startups, property data analysts, lead generators	Consulting/implementation Setup + support retainer	• Commercial lease listing extractor for brokers • Rental listing JSON feed for proptech • Auction property data collector for investors	$500-2000 setup, plus usage costs *Effort:* High (depends on Bright Data and Nebius accounts) ⚠ NONE license; read it before reuse; Bright Data is paid
Real-Estate-Website AAYUSH412/Real-Estate-Website ★ 142 · **Permissive** MIT · Starter · Fit 2/5	MERN real estate website and admin panel, runs locally in one command. *Replaces:* Wix real estate templates, Squarespace listing sites	Small agencies needing a listings website, student developers	Setup + support retainer Premium plugins/add-ons	• Listings site for Mumbai rental brokers • Vacation rental portal for Caribbean hosts • Agent website kit for solo realtors	$300-1500 setup plus $30/mo hosting *Effort:* Medium (MERN stack needs hosting and polish) ⚠ MIT, safe to rebrand; no trademark issues

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Cre-agent-skills ahacker-1/cre-agent-skills ★ 134 · Permissive Apache-2.0 · Tool · Fit 2/5	Standalone AI prompts for commercial real estate underwriting, diligence, financing, and closing. *Replaces:* Argus Enterprise, manual underwriting models	CRE brokers, acquisitions analysts, commercial lenders	Vertical SaaS Premium plugins/add-ons	• Multifamily acquisition underwriting prompts for syndicators • Retail lease due diligence checklist for brokers • Industrial loan packaging assistant for lenders	$39-149/mo per seat, or one-time prompt pack *Effort:* Medium (prompts need domain tuning and disclaimers) ⚠ Apache-2.0; financial and legal advice needs disclaimers
Property Web Scraper RealEstateWebTools/property_web_scraper ★ 132 · Permissive MIT · Tool · Fit 2/5	Web UI for processing scraped real estate listing data into usable formats *Replaces:* PropStream, Reonomy, Zillow data feeds	Small agents and analysts collecting listings	Setup + support retainer API/usage-based Consulting/implementation	• Listing scraper for rental investors • Market data for small brokerages • Competitor tracking for agents *Angle:* Listing import service for agency sites	$29-99/mo per account *Effort:* Medium (Rails tool, scraping breaks with site changes) ⚠ MIT; scraping may breach listing site terms of service
Cre-acquisition-orchestrator ahacker-1/cre-acquisition-orchestrator ★ 125 · Permissive Apache-2.0 · Framework · Fit 2/5	AI-native agent workflows for commercial real estate acquisitions, from diligence through closing. *Replaces:* Dealpath, Juniper Square, manual underwriting	CRE acquisition firms, private real estate funds, syndicators	Consulting/implementation Vertical SaaS	• Acquisition workflow agents for small multifamily funds • Closing checklist automation for CRE brokerages • Loan packaging agent for mid-market lenders	$2k-8k setup, then $300/mo per deal team *Effort:* High (many agents, integrations, compliance review needed) ⚠ Apache-2.0; AI underwriting errors create liability, need human review
OpenHouse 3D yunfanye/openhouse-3d ★ 61 · Permissive MIT · Tool · Fit 2/5	Turns real estate listing photos into a 3D house model and walkthrough video *Replaces:* Matterport, Zillow 3D Home, CubiCasa	Real estate agents and photographers	API/usage-based Agency service Vertical SaaS	• 3D walkthroughs for home listings • Virtual tours for short-term rentals • Marketing videos for property developers *Angle:* 3D listing tours for agents	$15-49 per listing *Effort:* High (Research-style project with heavy ML dependencies) ⚠ MIT; 61 stars, quality unproven, GPU needed

Archie athul/archie ★ 1.4k · Permissive MIT · Starter · Fit 2/5	Minimal Hugo theme for simple sites. *Replaces:* Squarespace templates	Hugo beginners, personal bloggers	Premium plugins/add-ons Setup + support retainer	• Minimal Hugo site for freelance designers • Hugo page for small clinics • Personal portfolio theme for students	Free theme; $50-150 setup per site *Effort:* Low (minimal MIT theme, little to change) ⚠ MIT; minimal value; easy to copy

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Ananke gohugo-ananke/ananke ★ 1.4k · **Permissive** MIT · Starter · Fit 2/5	Default-style Hugo theme for blog and content sites.	Hugo beginners, small agencies, blog owners	Setup + support retainer Consulting/implementation	• Hugo starter site for local clubs • Blog setup for solo authors • Hugo site for small event organizers	Free theme; $100-300 Hugo site setup *Effort:* Low (mature MIT theme, easy to customize) ⚠ MIT; widely used default, little differentiation
Hermit Track3/hermit ★ 1.1k · **Permissive** MIT · Starter · Fit 2/5	Minimal, fast Hugo theme for bloggers. *Replaces:* Squarespace blog templates	Bloggers, Hugo writers, small publishers	Premium plugins/add-ons Setup + support retainer	• Fast blog theme for newsletter writers • Hugo theme for travel bloggers • Speed-focused blog for food writers	Free theme; $100-250 custom blog setup *Effort:* Low (MIT theme, small and fast) ⚠ MIT; minimal commercial risk; theme credits
FixIt hugo-fixit/FixIt ★ 1.1k · **Permissive** MIT · Starter · Fit 2/5	Clean, elegant and advanced Hugo blog theme, Chinese-language project. *Replaces:* Ghost themes, Squarespace blog templates	Chinese-speaking bloggers, Hugo agencies, tech writers	Premium plugins/add-ons Setup + support retainer	• Hugo blog theme for Chinese tech writers • Blog theme for Chinese travel bloggers • Hugo site for Chinese language schools	Free theme; $100-300 Chinese-market blog setup *Effort:* Low (MIT theme, configuration-driven) ⚠ MIT; Chinese-language docs; check theme origin credits
Hugo-profile gurusabarish/hugo-profile ★ 1.1k · **Permissive** MIT · Starter · Fit 2/5	Customizable mobile-first Hugo template for personal portfolios and blogs. *Replaces:* Squarespace portfolio templates, Wix	Freelancers, creatives, job seekers, bloggers	Premium plugins/add-ons Setup + support retainer	• Portfolio site for freelance designers • Portfolio theme for graduate job seekers • Hugo portfolio for architects	Free template; $80-200 custom portfolio setup *Effort:* Low (customizable template, mobile-first) ⚠ MIT; sample content and images may carry licenses
Mainroad Vimux/Mainroad ★ 1.0k · **GPL** GPL-2.0 · Starter · Fit 2/5	Responsive, content-focused Hugo theme adapted from a WordPress magazine theme. *Replaces:* WordPress magazine themes	Hugo publishers, magazine-style blogs, news sites	Premium plugins/add-ons Setup + support retainer	• Hugo magazine layout for local news blogs • Content-first theme for recipe magazines • Magazine theme for university student press	Free theme; $150-500 magazine site setup *Effort:* Low (GPL theme, adaptable layouts) ⚠ GPL-2.0 theme: distributed derivatives ship source; WP origin
Hugo-theme-jane xianmin/hugo-theme-jane ★ 969 · **Permissive** MIT · Starter · Fit 2/5	Readable, concise Hugo blog theme with selectable color schemes. *Replaces:* Ghost themes, Squarespace blog templates	Hugo bloggers, writers, small publishers	Premium plugins/add-ons Setup + support retainer	• Hugo blog for personal essay writers • Hugo theme for tech blog startups • Readable blog for legal commentary	Free theme; $100-250 blog setup per client *Effort:* Low (mature MIT theme, easy to personalize) ⚠ MIT; long-lived theme, check Hugo compatibility

Static Site Generators · 31

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Mkdocs mkdocs/mkdocs ★ 22.5k · **Permissive** BSD-2-Clause · Tool · Fit 3/5	Static site generator for project documentation written in Markdown. *Replaces:* GitBook, ReadMe, Confluence	Software teams, internal docs teams, open-source maintainers	Setup + support retainer Training/courses	• MkDocs knowledge base for IT teams • Docs site for API startups • Engineering handbook for remote teams	Free tool; $1-3k docs setup, $20/mo hosting *Effort:* Low (BSD tool, themes easy to brand) ⚠ BSD-2-Clause; permissive, low risk; theme licenses vary
Quartz jackyzha0/quartz ★ 13.5k · **Permissive** MIT · Tool · Fit 3/5	Publishes Obsidian notes and Markdown as a linked digital garden website *Replaces:* Obsidian Publish, Notion Sites, Substack	Obsidian users, researchers, students	Managed hosting Setup + support retainer Premium plugins/add-ons	• Digital gardens for PhD students • Public lecture notes for teachers • Team wikis from Obsidian vaults *Angle:* Hosted digital-garden publishing for Obsidian users	$5-12/mo hosted per garden *Effort:* Medium (Config-file theming, needs build pipeline per user) ⚠ Quartz branding in footer by convention; static only

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Astrowind arthelokyo/astrowind ★ 6.1k · **Permissive** MIT · Starter · Fit 3/5	Free Astro starter template with Tailwind CSS styling. *Replaces:* Tailwind UI, Framer templates	Astro developers, marketing agencies, indie makers	Premium plugins/add-ons Setup + support retainer	• Astro landing kit for SaaS launches • Astro site for local restaurants • Astro starter for consultant portfolios	Free template; $300-900 custom Astro site *Effort:* Low (MIT template, Tailwind-based, easy edits) ⚠ MIT; Astro and Tailwind major upgrades may break layouts
Zensical zensical/zensical ★ 6.1k · **Permissive** MIT · Tool · Fit 3/5	Modern static site generator from the Material for MkDocs team. *Replaces:* GitBook, ReadMe	Docs teams, open-source maintainers, developer-tool startups	Consulting/implementation Setup + support retainer	• Docs sites for open-source SDK teams • Product docs for API startups • Internal knowledge base for dev teams	Free tool; $1-3k docs site migration *Effort:* Low (new tool, docs content mostly portable) ⚠ MIT; newer project, check Material theme trademarks
Docfx dotnet/docfx ★ 4.5k · **Permissive** MIT · Tool · Fit 3/5	Static site generator that builds API documentation for .NET projects. *Replaces:* Redocly, ReadMe, Sandcastle	.NET library vendors, enterprise dev teams, SDK publishers	Setup + support retainer Consulting/implementation	• API docs for .NET SaaS SDKs • Internal .NET API docs for banks • Docs site for .NET open-source libraries	Free tool; $2-6k .NET docs site setup *Effort:* Low (mature MIT tool, config-driven) ⚠ MIT; Microsoft-origin project; .NET version compatibility
Lektor lektor/lektor ★ 4.0k · **Permissive** BSD-3-Clause · Tool · Fit 3/5	Static file content management system written in Python. *Replaces:* Contentful, WordPress	Python developers, static site agencies, technical writers	Setup + support retainer Consulting/implementation	• Python static sites for research groups • Lektor site for architecture studios • Static portfolio sites for scientists	Free tool; $800-2500 static site setup *Effort:* Low (BSD tool, small scope) ⚠ BSD-3-Clause; permissive, low risk; project activity uncertain
next.js vercel/next.js ★ 143.4k · **Permissive** MIT · Framework · Fit 2/5	React framework for full-stack web apps with server rendering and routing.	Frontend agencies, SaaS teams, e-commerce brands	Consulting/implementation Training/courses	• Next.js build team for ecommerce brands • Next.js rebuild for legacy SaaS dashboards • Next.js training for agency developers	Free framework; $5-20k app build or training *Effort:* Low (app layer is your own code) ⚠ MIT; Vercel trademarks; frequent breaking releases
Hugo gohugoio/hugo ★ 90.4k · **Permissive** Apache-2.0 · Framework · Fit 2/5	Very fast static site generator framework for building websites *Replaces:* WordPress, Squarespace, Gatsby, Jekyll	Developers and agencies building static sites	Agency service Consulting/implementation Training/courses	• Static sites for law firms • Docs sites for SaaS teams • Hugo migration for slow WordPress blogs *Angle:* Fast static site hosting with paid theme packs	$1000-5000 per site build *Effort:* Medium (CLI generator, hosting and CMS are separate) ⚠ Apache-2.0 permissive; Hugo trademark; no editing UI
Astro withastro/astro ★ 63.8k · **Check** NOASSERTION · Framework · Fit 2/5	Web framework for content-driven websites with islands architecture and many integrations *Replaces:* WordPress, Next.js, Gatsby, Webflow	Agencies and developers building fast content sites	Agency service Consulting/implementation Training/courses	• Marketing sites for SaaS startups • Content sites for publishers • Docs portals for open source teams *Angle:* Sell Astro starter templates and managed deployments	$2000-8000 per site build *Effort:* Medium (Framework, needs design, hosting and CMS) ⚠ NOASSERTION: MIT, Astro trademark policy applies
Nuxt nuxt/nuxt ★ 61.0k · **Permissive** MIT · Framework · Fit 2/5	Full-stack Vue framework for building web apps with server rendering.	Vue agencies, SaaS teams, content sites	Consulting/implementation Training/courses	• Nuxt rebuild for Vue e-commerce brands • Nuxt sites for local government portals • Nuxt training for Vue developers	Free framework; $5-15k Nuxt build or training *Effort:* Low (framework only; app code is yours) ⚠ MIT; Nuxt trademark; major version upgrades cost time
Gatsby gatsbyjs/gatsby ★ 55.9k · **Permissive** MIT · Framework · Fit 2/5	React static site and web app framework with GraphQL data layer *Replaces:* WordPress themes, Squarespace, Webflow	Agencies building marketing sites	Agency service Consulting/implementation Training/courses	• Gatsby sites for local restaurants • Headless storefronts for boutique shops • Docs portals for SaaS startups *Angle:* Migrate legacy Gatsby sites to managed hosting	$3-8k per site build *Effort:* High (Framework not product, momentum declined) ⚠ Netlify owns Gatsby Cloud; ecosystem shrinking, plugins stale

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Jekyll jekyll/jekyll ★ 51.7k · Permissive MIT · Framework · Fit 2/5	Ruby static site generator that turns Markdown and templates into blogs *Replaces:* WordPress, Squarespace, Medium	Developers, GitHub Pages bloggers	Agency service Content/membership Training/courses	• Jekyll portfolios for freelance photographers • Docs sites for open-source maintainers • Church websites on free hosting *Angle:* GitHub Pages-style hosting with premium themes	$500-2k per site, $20/mo upkeep *Effort:* High (Generator only, no editor or hosting) ⚠ Ruby toolchain friction for non-developers
Hexo hexojs/hexo ★ 41.8k · Permissive MIT · Framework · Fit 2/5	Node.js blog framework generating static sites from Markdown with themes *Replaces:* Medium, WordPress.com, Ghost	Developers, technical bloggers	Agency service Premium plugins/add-ons Content/membership	• Hexo blogs for Chinese-language devs • Theme packs for developer portfolios • Tech blog setup for bootcamp grads *Angle:* Blog hosting for Asian developer markets	$300-1500 per site or $29 themes *Effort:* High (Generator only, needs hosting and editing UI) ⚠ Plugin quality varies; most community is Chinese-language
Vuepress vuejs/vuepress ★ 22.7k · Permissive MIT · Framework · Fit 2/5	Minimalistic Vue-powered static site generator for documentation and blogs. *Replaces:* GitBook, ReadMe	Vue teams, open-source projects, documentation writers	Consulting/implementation Setup + support retainer	• Docs sites for Vue component libraries • Internal handbook site for dev teams • Vue docs hosting for SaaS API teams	Free tool; $1-4k docs site setup *Effort:* Medium (theme customization needed, simple core) ⚠ MIT; VuePress v1 legacy, v2 migration effort
Zola getzola/zola ★ 17.6k · Weak copyleft EUPL-1.2 · Framework · Fit 2/5	Single-binary Rust static site generator with Sass, search, and shortcodes built in *Replaces:* Squarespace, WordPress, Webflow	Developers, docs teams	Agency service Premium plugins/add-ons Setup + support retainer	• Fast docs sites for Rust crates • Zola portfolios for architects • Multilingual landing pages for small exporters *Angle:* Single-binary site hosting for privacy-focused clients	$800-3k per site build *Effort:* High (Developer tool, no client-facing editor) ⚠ EUPL-1.2 is copyleft for modifications, rarely a problem for sites
Pelican getpelican/pelican ★ 13.4k · AGPL AGPL-3.0 · Framework · Fit 2/5	Python static site generator supporting Markdown and reStructuredText *Replaces:* WordPress, Ghost, Squarespace	Python developers, bloggers	Agency service Training/courses Setup + support retainer	• Pelican blogs for data scientists • Static docs for Python consultancies • Archival sites for researchers *Angle:* Python static blog hosting with theme marketplace	$400-1500 per site *Effort:* High (Generator only, no UI for clients) ⚠ AGPL-3.0: publish server-side changes if offered as a service
Core stenciljs/core ★ 13.2k · Check NOASSERTION · Framework · Fit 2/5	TypeScript toolchain for building web component libraries used across React, Angular and Vue.	Enterprise design system teams, component library builders	Consulting/implementation Training/courses	• Design system build for banking portals • Shared component library for insurance apps • Web component kit for health tech teams	Free toolchain; $20-60k design system build *Effort:* High (toolchain, component architecture work needed) ⚠ NOASSERTION license; read first; Stencil name trademark
Gridsome gridsome/gridsome ★ 8.5k · Permissive MIT · Framework · Fit 2/5	Jamstack framework for building fast static sites with Vue.js.	Vue agencies, marketing site builders, content sites	Consulting/implementation Setup + support retainer	• Vue marketing sites for local dentists • Gridsome docs site for SaaS startups • Static blog builds for Vue agencies	Free framework; $1-4k static site builds *Effort:* Low (framework only, site code yours) ⚠ MIT; project pace uncertain; check maintenance before commits
Metalsmith metalsmith/metalsmith ★ 7.8k · Permissive MIT · Tool · Fit 2/5	Extremely simple, pluggable static site generator for Node.js.	Node developers, static site agencies, build tool engineers	Consulting/implementation Training/courses	• Plugin-based builds for docs teams • Node static pipeline for brochure sites • Metalsmith build chain for agencies	Free tool; $1-3k build pipeline setup *Effort:* Low (minimal core, plugins do the work) ⚠ MIT; plugin ecosystem quality varies; check maintenance
Middleman middleman/middleman ★ 7.1k · Permissive MIT · Framework · Fit 2/5	Ruby static site generator for hand-crafted frontend development.	Ruby agencies, frontend prototypers, static site builders	Consulting/implementation Setup + support retainer	• Static prototypes for design agencies • Ruby static docs for internal teams • Frontend build for pitch sites	Free tool; $1-3k static site build *Effort:* Low (framework only; site code is yours) ⚠ MIT; Ruby dependency; low trademark risk

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Vike vikejs/vike ★ 5.8k · **Permissive** MIT · Framework · Fit 2/5	Vite-based meta framework alternative to Next.js and Nuxt, with development freedom. *Replaces:* Next.js, Nuxt, Remix	React and Vue agencies, SaaS teams, mission-critical app builders	Consulting/implementation Training/courses	• Vike app for regulated fintech portals • Vite framework for legacy React migrations • Vike rebuild for healthcare booking apps	Free framework; $8-25k migration and support *Effort:* High (framework choice; migration effort is high) ⚠ MIT; competes with Next.js and Nuxt; ecosystem smaller
Beautiful-jekyll daattali/beautiful-jekyll ★ 5.8k · **Permissive** MIT · Starter · Fit 2/5	Jekyll theme for building a simple, beautiful website in minutes. *Replaces:* Squarespace, Wix	Jekyll beginners, small businesses, personal bloggers	Premium plugins/add-ons Setup + support retainer	• Jekyll site for local bakeries • Jekyll landing page for freelancers • Jekyll site for school clubs	Free theme; $150-400 Jekyll site setup *Effort:* Low (MIT theme, simple config, easy to brand) ⚠ MIT; GitHub Pages limits; Jekyll-based hosting constraints
Actions-gh-pages peaceiris/actions-gh-pages ★ 5.4k · **Permissive** MIT · Tool · Fit 2/5	GitHub Action that deploys static site files to GitHub Pages. *Replaces:* Netlify deploys, Vercel deploys	Developers with static sites, CI consultants, docs teams	Consulting/implementation Training/courses	• GitHub Pages deploys for docs teams • CI setup for static marketing sites • Pages publishing for research labs	Free action; $300-800 CI deploy setup *Effort:* Low (small action, config only) ⚠ MIT; GitHub Pages usage terms apply to hosted sites
React-snap stereobooster/react-snap ★ 5.1k · **Permissive** MIT · Tool · Fit 2/5	Zero-config static prerendering tool for single-page apps, to help SEO. *Replaces:* Prerender.io, prerender cloud services	SPA agencies, React marketing sites, SEO freelancers	Consulting/implementation Setup + support retainer	• Prerendered React pages for real estate listings • Prerendering for React restaurant sites • SPA prerender setup for SaaS landing pages	Free tool; $500-1500 prerender setup per site *Effort:* Low (small tool, mostly configuration) ⚠ MIT; maintenance uncertain; prerender edge cases
Publish JohnSundell/Publish ★ 5.0k · **Permissive** MIT · Tool · Fit 2/5	Static site generator written in Swift for developer blogs and sites. *Replaces:* Ghost, Medium	Swift developers, iOS bloggers, dev-focused agencies	Training/courses Consulting/implementation	• Swift developer blog setup for indie devs • Static docs for iOS SDK vendors • Swift tutorial site for coding bootcamps	Free tool; $300-900 blog setup for iOS devs *Effort:* Low (small Swift tool, easy to fork) ⚠ MIT; Swift-only audience; project activity uncertain
Dumi umijs/dumi ★ 3.8k · **Permissive** MIT · Tool · Fit 2/5	Static site generator for documenting and developing React component libraries. *Replaces:* Storybook hosting, Zeroheight	Design system teams, React library authors, frontend agencies	Consulting/implementation Setup + support retainer	• Component docs for fintech design systems • React library docs for healthcare UI kits • Storybook alternative for agency design systems	Free tool; $3-10k design system docs setup *Effort:* Low (umi ecosystem ties, MIT tool) ⚠ MIT; tied to umi ecosystem; check version support
Analog analogjs/analog ★ 3.2k · **Permissive** MIT · Framework · Fit 2/5	Full-stack meta-framework for Angular, built on Vite and Nitro. *Replaces:* Angular Universal, Next.js	Angular agencies, enterprise frontend teams, SaaS builders	Consulting/implementation Training/courses	• Angular SSR rebuild for insurance portals • Angular full-stack base for B2B dashboards • Angular training for enterprise frontend teams	Free framework; $10-30k Angular migration *Effort:* High (framework-level, needs Angular expertise) ⚠ MIT; Angular and Nitro version coupling; early-stage risk
Hugo-coder luizdepra/hugo-coder ★ 3.1k · **Permissive** MIT · Starter · Fit 2/5	Minimalist Hugo blog theme for personal writing sites. *Replaces:* Medium-style blogs, Squarespace blog templates	Hugo bloggers, developer writers, personal site owners	Premium plugins/add-ons Setup + support retainer	• Minimal Hugo blog for developer newsletters • Personal writing site for poets • Hugo blog for solo consultants	Free theme; $80-200 custom Hugo blog setup *Effort:* Low (MIT theme, minimal, easy to restyle) ⚠ MIT; theme credits; little commercial value
Nikola getnikola/nikola ★ 2.7k · **Permissive** MIT · Tool · Fit 2/5	Static website and blog generator written in Python. *Replaces:* WordPress, Ghost, Squarespace	Python developers, blog owners, small agencies	Setup + support retainer Consulting/implementation	• Python blog setup for academic writers • Static blog for science communicators • Nikola sites for small consultancies	Free tool; $150-400 blog setup and hosting *Effort:* Low (mature MIT tool, plugin ecosystem) ⚠ MIT; plugin quality varies; Python version updates

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Docmd docmd-io/docmd ★ 2.6k · Permissive MIT · Tool · Fit 2/5	Documentation compiler turning one Markdown source into a website, search index and AI context. *Replaces:* GitBook, Mintlify, ReadMe	Docs teams, developer-tool startups, API product teams	Consulting/implementation Setup + support retainer	• AI-ready docs for API startups • Docs site plus search for SDK teams • Knowledge base builds for onboarding teams	Free core; $49-199/mo hosted docs with AI *Effort:* Medium (many output formats, testing needed) ⚠ MIT; newer project; AI context outputs need review
Eleventy 11ty/eleventy ★ ? · Check NONE · Framework · Fit 2/5	Flexible JavaScript static site generator with many template languages *Replaces:* Squarespace, WordPress, Webflow	Front-end developers, agencies	Agency service Consulting/implementation Training/courses	• Eleventy sites for law firms • Fast brochure sites for plumbers • Blog starters for newsletter writers *Angle:* Performance-focused agency builds with flat hosting fee	$1-4k per site build *Effort:* High (Framework needs custom build per client) ⚠ Star count missing and license NONE in metadata; actual repo is MIT, verify

Subscription Billing · 16

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Invoice Ninja invoiceninja/invoiceninja ★ 10.5k · Check NOASSERTION · App · Fit 5/5	Invoicing, quotes, expenses and time-tracking app with client portal and payment gateways *Replaces:* FreshBooks, QuickBooks, Wave, Zoho Invoice, Harvest	Freelancers, small agencies	Managed hosting White-label reseller Mobile app on top	• Invoicing for Spanish-speaking freelancers • Billing for contractors and trades • Branded invoicing for accountants *Angle:* White-label invoicing for freelancers and accountants	$10-30/mo per account *Effort:* Low (Built-in white-label license option) ⚠ Elastic-style license: not OSI, white-label key is paid
Lago getlago/lago ★ 10.8k · AGPL AGPL-3.0 · Platform · Fit 4/5	Usage-based metering and subscription billing API with invoices and plans *Replaces:* Stripe Billing, Chargebee, Orb, Metronome	SaaS and API companies	Managed hosting Setup + support retainer Vertical SaaS	• Usage billing for AI API startups • Metered billing for IoT platforms • Billing for GPU cloud resellers *Angle:* Usage-based billing as managed service	$200-1500/mo managed *Effort:* Medium (API-first, multi-tenant via orgs) ⚠ AGPL requires publishing modifications; Lago trademark
Polar polarsource/polar ★ 10.5k · Permissive Apache-2.0 · Platform · Fit 4/5	Billing and payments platform for developers selling subscriptions and digital products as merchant of record *Replaces:* Gumroad, Paddle, Lemon Squeezy, Stripe Billing, Patreon	Indie developers and open-source maintainers	Managed hosting Vertical SaaS White-label reseller	• Billing for Discord bot sellers • Licensing for indie game modders • Sponsorship checkout for newsletters *Angle:* Merchant-of-record for developer products	4% + 40c per transaction *Effort:* High (Merchant-of-record needs tax and payout compliance) ⚠ Merchant-of-record means tax, KYC, and payout regulation; Polar name is a brand
Crater crater-invoice-inc/crater ★ 8.4k · AGPL AGPL-3.0 · App · Fit 3/5	Open-source invoicing and expense tracking app *Replaces:* FreshBooks, Wave, Invoice Ninja, Zoho Invoice	Freelancers, small businesses	Managed hosting Setup + support retainer Mobile app on top	• Invoicing for plumbers • Estimates for contractors • Invoices for photographers *Angle:* Invoicing SaaS for small businesses	$9-19/mo *Effort:* Medium (Laravel app, project effectively abandoned) ⚠ AGPL, publish modifications; upstream stopped, forks like InvoiceShelf exist
Flexprice flexprice/flexprice ★ 6.9k · AGPL AGPL-3.0 · Platform · Fit 3/5	Usage-based pricing and billing engine for developers, self-hostable *Replaces:* Stripe Billing, Orb, Metronome, Chargebee	AI and API startups	Managed hosting API/usage-based Setup + support retainer	• Metered billing for LLM wrappers • Credit-based pricing for AI agents • Usage invoicing for API marketplaces *Angle:* Usage billing for AI startups with hosted plan	$99-800/mo managed *Effort:* Medium (Young API-first project) ⚠ AGPL requires publishing modifications; young project
Kill Bill killbill/killbill ★ 5.8k · Permissive Apache-2.0 · Platform · Fit 3/5	Subscription billing and payments platform with plugins, invoicing and catalog *Replaces:* Chargebee, Recurly, Zuora, Stripe Billing	Subscription businesses, telcos	Managed hosting Consulting/implementation Setup + support retainer	• Subscription billing for telecom MVNOs • Billing core for SaaS vendors • Recurring billing for utilities *Angle:* Billing platform hosting for telcos and SaaS	$500-3000/mo managed *Effort:* High (Java core, API-only, plugins needed) ⚠ Kill Bill trademark; no UI beyond Kaui

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
OpenMeter openmeterio/openmeter ★ 2.4k · **Permissive** Apache-2.0 · Platform · Fit 3/5	Usage metering and billing for AI, API and infrastructure with event ingestion *Replaces:* Stripe Billing, Orb, Metronome, Amberflo	SaaS and AI companies	Managed hosting API/usage-based Setup + support retainer	• Token metering for LLM apps • Usage-based billing for CDN resellers • Quota enforcement for API products *Angle:* Metering for AI and API products	$100-1000/mo managed *Effort:* Medium (Go and Kafka stack, API-driven) ⚠ Apache-2; Kafka and ClickHouse operations
Laravel-soulbscription lucasdotvin/laravel-soulbscription ★ 710 · **Permissive** MIT · Library · Fit 3/5	Laravel package for subscription plans and feature usage tracking. *Replaces:* Chargebee, Recurly, Paddle Billing	Laravel SaaS builders, agencies, membership sites	Consulting/implementation Setup + support retainer	• Usage limits for Laravel coworking booking apps • Feature tiers for Laravel fitness platforms • Plan limits for Laravel team tools	Free package; $1-3k billing feature setup *Effort:* Low (MIT package, plan logic is configurable) ⚠ MIT; billing compliance and tax handling still your job
Djaodjin-saas djaodjin/djaodjin-saas ★ 602 · **Check** NOASSERTION · Framework · Fit 3/5	Django application framework for software-as-a-service and subscription businesses. *Replaces:* Chargebee, Recurly, Stripe Billing	Django SaaS founders, subscription startups, agencies	Consulting/implementation Managed hosting	• Subscription portal for Django membership clubs • Django billing base for software vendors • Subscription admin for Django event platforms	Free core; $5-15k Django subscription build *Effort:* High (billing logic needs heavy customization) ⚠ NOASSERTION license; read first; billing tax and compliance on you
Gqlgen 99designs/gqlgen ★ 10.8k · **Permissive** MIT · Library · Fit 2/5	Go library that generates a GraphQL server from a schema using go generate.	Go backend teams, API platform builders, SaaS engineers	Consulting/implementation Training/courses	• GraphQL API for Go logistics platforms • Schema-first API for Go fintech backends • GraphQL layer for Go marketplace APIs	Free library; $5-15k GraphQL API build *Effort:* Medium (schema design and codegen expertise needed) ⚠ MIT; low risk; generated code maintenance needs care
Graphql graphql-go/graphql ★ 10.1k · **Permissive** MIT · Library · Fit 2/5	GraphQL implementation library for Go applications.	Go backend engineers, API platform teams	Consulting/implementation Training/courses	• GraphQL API for Go inventory systems • Go GraphQL backend for mobile apps • Schema service for Go analytics tools	Free library; $4-10k GraphQL API build *Effort:* Medium (manual schema work, fewer generators) ⚠ MIT; maintenance pace varies; compare alternatives like gqlgen
Pay pay-rails/pay ★ 2.3k · **Permissive** MIT · Library · Fit 2/5	Rails gem for Stripe, Paddle, Braintree subscriptions and receipts *Replaces:* Chargebee, Recurly, Stripe Billing	Rails developers building SaaS	Consulting/implementation Agency service Premium plugins/add-ons	• Rails billing setup for SaaS founders • Usage metering add-on for Pay • Dunning email packs for Rails apps *Angle:* Rails subscription billing setup service	$2-6k per integration project *Effort:* High (Library inside a Rails app, not standalone) ⚠ Handles Stripe flows only; tax compliance is yours
Graphql-ws enisdenjo/graphql-ws ★ 1.9k · **Permissive** MIT · Library · Fit 2/5	Zero-dependency GraphQL over WebSocket server and client library.	GraphQL app developers, realtime feature teams	Consulting/implementation Training/courses	• Live GraphQL updates for trading apps • Realtime chat backend for Node teams • Live order feeds for delivery platforms	Free library; $3-8k realtime integration *Effort:* Low (small, zero-dependency, drop-in) ⚠ MIT; protocol-level library, low commercial risk
AdaptySDK-iOS adaptyteam/AdaptySDK-iOS ★ 491 · **Permissive** MIT · Library · Fit 2/5	iOS SDK for growing in-app purchase revenue. *Replaces:* RevenueCat, Superwall, Apphud	iOS app developers, mobile subscription apps, indie studios	API/usage-based Consulting/implementation	• Subscription paywalls for iOS fitness apps • IAP setup for iOS language learning apps • Revenue tracking for indie iOS games	Free SDK; usage fees by monthly revenue tier *Effort:* Low (SDK, integration is per-app) ⚠ MIT SDK; backend service and Apple IAP terms apply
Graphql-sse enisdenjo/graphql-sse ★ 461 · **Permissive** MIT · Library · Fit 2/5	Zero-dependency GraphQL over Server-Sent Events server and client library.	GraphQL API teams, realtime app developers	Consulting/implementation Training/courses	• Live GraphQL feeds for sports scores • SSE updates for logistics dashboards • Live status feeds for delivery apps	Free library; $3-8k realtime API integration *Effort:* Low (small zero-dep library, drop-in) ⚠ MIT; SSE proxy buffering and HTTP/1 connection limits

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Asc-cli tddworks/asc-cli ★ 393 · Permissive Apache-2.0 · Tool · Fit 2/5	Swift command-line tool for App Store Connect submissions, screenshots and builds. *Replaces:* App Store Connect web workflows, Fastlane pipelines	iOS release engineers, app studios, indie iOS developers	Consulting/implementation Setup + support retainer	• Release automation for iOS indie studios • App Store submissions for game studios • Screenshot automation for iOS agencies	Free CLI; $300-1000 release pipeline setup *Effort:* Low (CLI, per-team scripts and auth setup) ⚠ Apache-2.0; Apple API terms and credentials handling risk

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Qrbtf latentcat/qrbtf ★ 7.0k · GPL GPL-3.0 · Tool · Fit 2/5	AI and parametric QR code generator for custom-styled codes. *Replaces:* QR Tiger, QR Code Generator Pro	Brands, event organizers, marketing agencies	Premium plugins/add-ons API/usage-based	• Branded QR codes for cafe loyalty cards • Art-style QR codes for museum shops • Styled QR codes for real estate signs	Freemium; $9-29/mo for AI styles and API *Effort:* Medium (AI generation costs and checks needed) ⚠ GPL-3.0: distributed builds ship source; QR scan reliability needs testing
QR-Code-generator nayuki/QR-Code-generator ★ 6.8k · Check NONE · Library · Fit 2/5	High-quality QR code generator library in several languages. *Replaces:* QR generator SDKs, Scandit	Developers building QR features in many languages	Consulting/implementation Training/courses	• QR generation for Java payment apps • QR labels for Python warehouse systems • QR generator for TypeScript booking apps	Free library; $2-5k QR feature integration *Effort:* Low (small library, embed as-is) ⚠ NONE license; read first; license terms unclear
EFQRCode EFPrefix/EFQRCode ★ 4.8k · Permissive MIT · Library · Fit 2/5	Swift library for creating and handling QR codes on Apple platforms.	iOS app developers, Apple platform teams	Consulting/implementation Training/courses	• QR ticket passes for iOS event apps • QR loyalty cards for Apple Watch apps • QR check-in for iOS clinic apps	Free library; $2-6k iOS QR feature build *Effort:* Low (Swift package, drop-in for Apple apps) ⚠ MIT; Apple platform versions drift; low legal risk
JsQR cozmo/jsQR ★ 4.0k · Permissive Apache-2.0 · Library · Fit 2/5	Pure JavaScript library that finds and decodes QR codes in raw images. *Replaces:* Scandit Web SDK, Dynamsoft	Web app developers, kiosk builders, logistics web teams	Consulting/implementation Setup + support retainer	• Browser QR check-in for conference badges • Web QR scanner for warehouse tablets • QR ticket checks in mobile web apps	Free library; $2-5k web scanner integration *Effort:* Low (pure JS, embeds in browsers) ⚠ Apache-2.0; keep notices; camera access and privacy rules
ZXingLite jenly1314/ZXingLite ★ 3.4k · Permissive Apache-2.0 · Library · Fit 2/5	Lightweight, faster Android ZXing version for QR and barcode scanning. *Replaces:* Scandit, Dynamsoft	Chinese Android developers, app studios, retail apps	Consulting/implementation Setup + support retainer	• Scanner UI for Chinese retail Android apps • Payment QR scanning for Android merchants • Warehouse barcode scans for Android tablets	Free library; $2-6k scanner UI integration *Effort:* Low (Android library, Chinese-language docs) ⚠ Apache-2.0; WeChat and Alipay style names raise trademark risk
Simple-qrcode SimpleSoftwareIO/simple-qrcode ★ 2.9k · Permissive MIT · Library · Fit 2/5	Easy-to-use PHP QR code generator with first-party Laravel support.	Laravel developers, PHP agencies, e-commerce teams	Consulting/implementation Setup + support retainer	• QR tickets for Laravel event platforms • QR menus for Laravel restaurant apps • QR product labels for Laravel warehouses	Free package; $500-1500 QR feature install *Effort:* Low (MIT Laravel package, easy to adopt) ⚠ MIT; Laravel version support; QR standards are public
Php-qrcode chillerlan/php-qrcode ★ 2.4k · Permissive Apache-2.0 · Library · Fit 2/5	PHP library that generates and reads QR codes with a friendly API.	PHP developers, PHP agencies, enterprise backend teams	Consulting/implementation Setup + support retainer	• QR reader for PHP ticketing backends • QR labels for PHP inventory tools • QR scanning for PHP attendance apps	Free library; $1-4k PHP QR feature build *Effort:* Low (Apache PHP library, drop-in) ⚠ Apache-2.0; keep notices; QR standard is public
BoofCV lessthanoptimal/BoofCV ★ 1.2k · Check NONE · Library · Fit 2/5	Java computer vision library for calibration, fiducials, tracking and image processing. *Replaces:* MATLAB Computer Vision Toolbox, Cognex VisionPro	Robotics firms, industrial vision teams, research labs	Consulting/implementation Training/courses	• Fiducial tracking for warehouse robots • Camera calibration for industrial inspection • Java vision apps for medical imaging labs	Free library; $10-30k vision system build *Effort:* High (vision expertise needed; license unclear) ⚠ NONE license; read first; check terms before commercial use

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Code-scanner yuriy-budiyev/code-scanner ★ 1.2k · **Permissive** MIT · Library · Fit 2/5	Android library for scanning QR and barcodes, built on ZXing.	Android developers, retail and ticketing app teams	Consulting/implementation Setup + support retainer	• Scanner screens for Android ticket apps • Barcode checkout for Android retail apps • QR badge scanning for Android conferences	Free library; $2-5k Android scanner screens *Effort:* Low (MIT library, drop-in for Android) ⚠ MIT; ZXing dependency license applies; camera permission rules
React-qr-reader JodusNodus/react-qr-reader ★ 1.2k · **Permissive** MIT · Library · Fit 2/5	React component that reads QR codes from a webcam feed.	React developers, web app teams, event check-in apps	Consulting/implementation Setup + support retainer	• Webcam QR check-in for React event apps • QR login screens for React kiosks • Ticket scanning in React web apps	Free component; $800-2000 scanner integration *Effort:* Low (small component, drop-in React) ⚠ MIT; webcam privacy and browser permission handling
WeChatQRCode jenly1314/WeChatQRCode ★ 899 · **Permissive** Apache-2.0 · Library · Fit 2/5	QR recognition library ported from WeChat's open-source OpenCV QR engine. *Replaces:* Scandit, Dynamsoft	Chinese Android developers, mobile app teams	Consulting/implementation Setup + support retainer	• Hard-to-read QR scanning for Chinese retail apps • Damaged-label QR reading for logistics apps • Low-light QR scans for Chinese kiosks	Free library; $2-5k scanner upgrade for apps *Effort:* Low (Apache library, WeChat-derived engine) ⚠ Apache-2.0; WeChat name and derived engine raise trademark risk
React-qr-code rosskhanas/react-qr-code ★ 895 · **Permissive** MIT · Library · Fit 2/5	QR code generator component for React and React Native apps.	React developers, mobile app teams, e-commerce frontends	Consulting/implementation Setup + support retainer	• QR pass screens for React Native events • QR payment codes for React checkout pages • Product QR labels in React admin tools	Free component; $1-3k QR feature integration *Effort:* Low (MIT component, drop-in for React) ⚠ MIT; React Native version support lags upgrades
QRCode ricmoo/QRCode ★ 823 · **Check** NOASSERTION · Library · Fit 2/5	C library generating QR codes for low-power devices like Arduino.	Embedded device makers, IoT hardware teams, maker shops	Consulting/implementation Hardware kits/assembly	• QR labels for Arduino inventory displays • QR pairing for IoT sensor kits • QR setup screens for embedded gadgets	Free library; $2-5k embedded firmware work *Effort:* Low (small C library, firmware embedding) ⚠ NOASSERTION license; read first; embedded licensing needs review

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Restreamer datarhei/restreamer ★ 5.2k · **Permissive** Apache-2.0 · App · Fit 4/5	Self-hosted streaming server that restreams live video to YouTube, Twitch, and RTMP targets *Replaces:* Restream.io, StreamYard, Castr, OBS.live	Churches, event producers, small broadcasters	Managed hosting Setup + support retainer White-label reseller	• Restreaming for church livestreams • Multi-platform streaming for esports teams • Live event relay for wedding videographers *Angle:* Live streaming to multiple platforms for venues	$19-79/mo per channel *Effort:* Medium (Docker image with UI, single-tenant per instance) ⚠ Needs bandwidth and transcoding capacity; datarhei is a trademark
MediaCMS mediacms-io/mediacms ★ 5.2k · **AGPL** AGPL-3.0 · App · Fit 4/5	Video and media CMS with transcoding, playlists, categories and user uploads *Replaces:* Vimeo, Wistia, YouTube, Kaltura	Organizations hosting internal or public video libraries	Managed hosting White-label reseller Setup + support retainer	• Video portal for training companies • Media library for school districts • Video hosting for fitness studios *Angle:* Video portal for enterprises and schools	$49-249/mo per portal *Effort:* Medium (Django app, theming and storage tuning required) ⚠ AGPL: publish server-side changes; MediaCMS trademark

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
AVideo WWBN/AVideo ★ 2.1k · Check NOASSERTION · Platform · Fit 4/5	Self-hosted video sharing and live streaming platform with plugins and monetization *Replaces:* YouTube, Vimeo, Wistia, Twitch	Course creators, niche video communities	Managed hosting White-label reseller Premium plugins/add-ons	• Video portals for fitness trainers • Private video hosting for churches • Membership video sites for chefs *Angle:* White-label video and live streaming platform	$29-149/mo per site *Effort:* Medium (Plugin-based, theming works, PHP multi-site possible) ⚠ AVideo license metadata unclear; some plugins paid; storage and bandwidth costs
FreeTube FreeTubeApp/FreeTube ★ 22.3k · AGPL AGPL-3.0 · App · Fit 3/5	Open-source YouTube desktop app focused on privacy. *Replaces:* YouTube Premium, YouTube official app	Privacy-minded viewers, schools with filtered video, families	Premium plugins/add-ons White-label reseller	• Filtered YouTube for school libraries • Privacy video viewer for family households • YouTube client for newsroom research teams	Free app; $3-8 one-time enterprise support *Effort:* Medium (tied to YouTube data access, fragile) ⚠ AGPL: publish modifications; YouTube and Google trademarks; ToS risk
LibreTube libre-tube/LibreTube ★ 13.0k · GPL GPL-3.0 · App · Fit 3/5	Open-source alternative YouTube frontend app for Android. *Replaces:* YouTube official app, YouTube Premium	Privacy-minded Android users, families, schools	Premium plugins/add-ons White-label reseller	• Ad-free YouTube app for Android tablets • Filtered YouTube for Android classrooms • Privacy video app for Android seniors	Free app; $3-8 one-time support or setup *Effort:* Medium (relies on third-party APIs, fragile) ⚠ GPL-3.0: distributed builds ship source; YouTube trademark and ToS risk
AI-Youtube-Shorts-Generator Anil-matcha/AI-Youtube-Shorts-Generator ★ 5.8k · Permissive MIT · App · Fit 3/5	Turns long YouTube videos into vertical shorts using LLM highlights and Whisper transcripts. *Replaces:* Opus Clip, Vidyo.ai, Klap, SubMagic	Creators, social media agencies, podcast teams	Managed hosting API/usage-based	• Shorts repurposing for podcast networks • Clip generator for gaming streamers • Vertical shorts for course creators	$29-79/mo per creator, usage-based GPU costs *Effort:* Medium (GPU and LLM costs, cropping tuning) ⚠ MIT; YouTube download terms and creator copyright risk
Postiz-cheap SamurAIGPT/postiz-cheap ★ 1.4k · Permissive MIT · App · Fit 3/5	Self-hosted social media scheduler with an AI post writer and content calendar. *Replaces:* Hootsuite, Buffer, Later	Social media agencies, small brands, creators	Managed hosting White-label reseller	• Scheduler for Shopify brand social accounts • Post calendar for local restaurant chains • AI post writer for coaching businesses	$29-79/mo managed hosting per workspace *Effort:* Medium (platform API approvals, many integrations) ⚠ MIT; Meta, TikTok, X API terms and approvals required
Hotclip xixihhhh/hotclip ★ 437 · AGPL AGPL-3.0 · App · Fit 3/5	AI clipping tool turning long videos and podcasts into vertical short videos for Chinese platforms. *Replaces:* Opus Clip, Vizard	Chinese short-video creators, MCN agencies, livestream teams	Managed hosting Vertical SaaS	• Douyin clip tool for MCN agencies • Livestream replay cutter for e-commerce hosts • Podcast-to-shorts for Chinese audio creators	$19-59/mo per creator, AI usage extra *Effort:* Medium (AI costs, platform publishing rules) ⚠ AGPL: publish server changes; auto-posting may breach platform rules
ClipBucket ARCHIVED arslancb/clipbucket ★ 423 · Check NOASSERTION · Platform · Fit 3/5	PHP video sharing script for building YouTube-style sites *Replaces:* YouTube, Vimeo, Dailymotion	Hobbyist video site owners	Managed hosting Premium plugins/add-ons Setup + support retainer	• Video sites for local film students • Private video library for gyms • Short-clip site for gamers *Angle:* YouTube-style site with ad revenue	$99-299 per setup *Effort:* Medium (Dated PHP codebase, themeable) ⚠ License unclear; legacy PHP, copyright content moderation duties
ArtPlayer zhw2590582/ArtPlayer ★ 4.2k · Permissive MIT · Library · Fit 2/5	Full-featured HTML5 video player library for websites. *Replaces:* JW Player, Vidyard, Brightcove	Web developers, video SaaS teams, course platforms	Consulting/implementation Premium plugins/add-ons	• Video player for online course platforms • Embedded player for real estate tours • Lecture player for university video archives	Free library; $2-5k player integration *Effort:* Low (MIT library, themable player) ⚠ MIT; codec and DRM support limits; overlaps Video.js

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Browser_extension libredirect/browser_extension ★ 4.1k · GPL GPL-3.0 · Tool · Fit 2/5	Browser extension redirecting popular sites to privacy-friendly alternative frontends.	Privacy-minded browser users, IT security teams	Premium plugins/add-ons White-label reseller	• Privacy browser setup for journalist teams • Anti-tracking extension for family laptops • Privacy redirects for school IT fleets	Free extension; $3-6 enterprise policy pack *Effort:* Low (extension rules community-maintained) ⚠ GPL-3.0: distributed builds ship source; store policy and frontend reliability
Cinetry gstory0404/Cinetry ★ 3.0k · Check NONE · App · Fit 2/5	Chinese multi-server media player client that aggregates Jellyfin, Emby and similar libraries. *Replaces:* Plex, Infuse, Emby client apps	Chinese home media users, self-hosting enthusiasts	Premium plugins/add-ons White-label reseller	• Media client for Chinese home servers • Multi-server library app for family households • Audiobook player for Jellyfin users	Free app; $3-8 one-time per platform *Effort:* Medium (many cross-platform builds, Chinese UI) ⚠ NONE license; Jellyfin, Emby, Plex trademarks; check permissions
NewPipeExtractor TeamNewPipe/NewPipeExtractor ★ 2.0k · GPL GPL-3.0 · Library · Fit 2/5	Java library extracting video and audio data from streaming sites.	Android app developers, media tool builders, research teams	Consulting/implementation Training/courses	• Video metadata extraction for research labs • Audio extraction tool for Android podcast apps • Stream metadata feed for media monitoring	Free library; $5-15k extraction service build *Effort:* High (scrapes sites, breaks when sites change) ⚠ GPL-3.0: distributed apps ship source; site ToS and copyright risk
Viewtube ViewTube/viewtube ★ 1.5k · AGPL AGPL-3.0 · App · Fit 2/5	Open-source privacy-conscious YouTube viewer app with a documentation site. *Replaces:* YouTube Premium, official YouTube app	Privacy-minded viewers, families, schools	Premium plugins/add-ons Setup + support retainer	• Ad-free YouTube viewer for family tablets • Filtered YouTube client for classrooms • Privacy video app for seniors' devices	Free app; $5-15 per device setup help *Effort:* Low (fork-ready, YouTube dependency) ⚠ AGPL: publish modifications; YouTube trademark and ToS risk
Tv algora-io/tv ★ 1.2k · Check NOASSERTION · App · Fit 2/5	Open-source live-streaming platform aimed at developers. *Replaces:* Twitch, YouTube Live	Developer communities, coding streamers, dev-tool companies	Managed hosting White-label reseller	• Live coding streams for bootcamps • Developer conference streams for tech events • Hosted streaming for open-source projects	$49-199/mo per community, hosting extra *Effort:* High (video streaming infrastructure is heavy) ⚠ NOASSERTION license; read first; streaming costs and content moderation
Youtube-local user234683/youtube-local ★ 781 · AGPL AGPL-3.0 · Tool · Fit 2/5	Browser-based YouTube client for anonymous, faster page viewing.	Privacy-minded viewers, small web tool users	Setup + support retainer Premium plugins/add-ons	• Private YouTube viewer for school libraries • Ad-free browser viewer for family laptops • Lightweight viewer for low-bandwidth users	Free tool; $5-10 setup help per device *Effort:* Low (small web client, easy to deploy) ⚠ AGPL: publish modifications; YouTube ToS and trademark risk
Make-my-server tomMoulard/make-my-server ★ 591 · Check NONE · Starter · Fit 2/5	Docker Compose stack bundling Traefik with many self-hosted services for homelabs. *Replaces:* Cloudron, Umbrel	Homelab hobbyists, small IT consultants	Setup + support retainer Consulting/implementation	• Self-hosted server setup for small offices • Homelab stack for family photo archives • Docker server kits for podcast studios	Free stack; $200-600 remote server setup *Effort:* Medium (many services, each needs upkeep) ⚠ NONE license; each bundled service has its own license
Square Lelonio/Square ★ 492 · GPL GPL-3.0 · App · Fit 2/5	Android client for YouTube Music and Spotify Premium with audio effects and history. *Replaces:* YouTube Music Premium, Spotify Premium	Android music fans, privacy-minded listeners	Premium plugins/add-ons White-label reseller	• Ad-free music client for Android commuters • Spotify Connect player for Android hobbyists • Audio-effects player for Android DJs	Free app; $3-6 one-time, donations *Effort:* High (unofficial API clients, fragile) ⚠ GPL-3.0: distributed builds ship source; Spotify and YouTube ToS violations

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Handy cjpais/Handy ★ 37.9k · Permissive MIT · App · Fit 4/5	Free, offline, extensible speech-to-text desktop application. *Replaces:* Otter.ai, Dragon NaturallySpeaking	Writers, medical dictation users, lawyers, offline workers	Premium plugins/add-ons White-label reseller	• Offline dictation for clinical note-takers • Private transcription for law firms • Voice notes for field service technicians	Free app; $15-40 one-time pro or enterprise license *Effort:* Medium (desktop builds, signing, model packaging) ⚠ MIT; speech model licenses vary; medical claims need review
Opendataloader-pdf opendataloader-project/opendataloader-pdf ★ 30.2k · Permissive Apache-2.0 · Tool · Fit 3/5	PDF parser that turns documents into AI-ready data and automates PDF accessibility. *Replaces:* Adobe Acrobat Pro accessibility checks, ABBYY FineReader	Legal and government publishers, RAG teams, accessibility consultants	Consulting/implementation Setup + support retainer	• PDF accessibility fixes for public universities • RAG-ready PDF ingest for legal teams • Accessible PDFs for government agencies	Free tool; $5-20k accessibility remediation projects *Effort:* Medium (messy PDF layouts need accuracy checks) ⚠ Apache-2.0; accessibility compliance claims need expert review
Darkreader darkreader/darkreader ★ 22.6k · Permissive MIT · App · Fit 3/5	Browser extension that applies a dark theme to any website. *Replaces:* Night Eye, Midnight Lizard, paid dark-mode extensions	Night readers, accessibility users, office workers	Premium plugins/add-ons White-label reseller	• Dark mode for eye-strain at call centers • Accessibility theme for low-vision users • Enterprise dark mode for internal portals	Free extension; $2-5 enterprise policy license *Effort:* Low (extension, mature theming engine) ⚠ MIT; Chrome and Firefox store policies; site-breaking edge cases
MathJax mathjax/MathJax ★ 10.9k · Permissive Apache-2.0 · Library · Fit 3/5	JavaScript engine that renders accessible mathematical notation in web browsers. *Replaces:* MathType, Wolfram embeds	Universities, online course platforms, scientific publishers	Consulting/implementation Training/courses	• Math rendering for online physics courses • Equation display for journal publishers • Accessible math for STEM tutoring sites	Free library; $3-10k math rendering integration *Effort:* Low (mature, configurable, widely used) ⚠ Apache-2.0; keep notices; large library, performance tuning
Skeleton skeletonlabs/skeleton ★ 6.1k · Permissive MIT · Library · Fit 3/5	Adaptive design system and component kit built on Tailwind CSS. *Replaces:* Tailwind UI, Flowbite Pro	Svelte and Tailwind teams, agencies, SaaS startups	Premium plugins/add-ons Consulting/implementation	• Design system kit for SvelteKit SaaS startups • Theme kit for local government portals • Admin dashboard theme for Tailwind agencies	Free core; $150-400 premium theme pack *Effort:* Low (themable design system, MIT) ⚠ MIT; Tailwind version upgrades; Skeleton brand name
Gluestack-ui gluestack/gluestack-ui ★ 5.3k · Check NONE · Library · Fit 3/5	Copy-paste React and React Native component library styled with Tailwind. *Replaces:* Tamagui, NativeBase, Tailwind UI	Mobile app agencies, React Native teams, startups	Premium plugins/add-ons Consulting/implementation	• Component kit for React Native fintech apps • Cross-platform UI for restaurant ordering apps • Mobile UI kit for gym booking apps	Free library; $2-8k cross-platform UI build *Effort:* Low (copy-paste components, Tailwind-based) ⚠ NONE license; read first; NativeWind and React Native version churn
OptiKey OptiKey/OptiKey ★ 4.4k · GPL GPL-3.0 · App · Fit 3/5	Eye-controlled keyboard and speech app for full computer control. *Replaces:* Tobii Dynavox, Eyegaze systems	People with motor disabilities, speech therapists, care homes	Setup + support retainer Hardware kits/assembly	• Eye-control setup for ALS care homes • AAC setup for speech therapy clinics • Eye-tracking kits for disability charities	Free app; $300-800 setup and eye-tracker kit *Effort:* Medium (eye-tracker hardware and training needed) ⚠ GPL-3.0: distributed builds ship source; medical device claims need care

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Gkd gkd-kit/gkd ★ 44.2k · GPL GPL-3.0 · App · Fit 2/5	Android app automating screen taps via accessibility services and subscribable rule sets. *Replaces:* Tasker, AutoTouch	Android power users, automation hobbyists, QA testers	Premium plugins/add-ons Consulting/implementation	• Accessibility automation for Android QA testers • Scripted screen taps for mobile game testers • Rule-based tapping for kiosk tablets	Free app; $5-15 one-time premium rule packs *Effort:* High (rule ecosystem raises legal and policy issues) ⚠ GPL-3.0: distributed apps ship source; ad-skip rules may violate app terms
Headlessui tailwindlabs/headlessui ★ 28.8k · Permissive MIT · Library · Fit 2/5	Unstyled, accessible UI components designed to work with Tailwind CSS.	React and Vue developers, design system teams, agencies	Consulting/implementation Training/courses	• Accessible menus for React SaaS apps • Accessible dropdowns for Tailwind marketing sites • Accessible modals for fintech web apps	Free library; $3-8k accessible UI build *Effort:* Low (unstyled, you own styling) ⚠ MIT; Tailwind Labs trademark; check framework support
Primitives radix-ui/primitives ★ 19.5k · Permissive MIT · Library · Fit 2/5	Open-source unstyled React component primitives for accessible design systems.	React design system teams, SaaS frontend teams, agencies	Consulting/implementation Training/courses	• Accessible tooltips for React e-commerce UIs • Design system base for healthcare portals • Accessible forms kit for insurance apps	Free library; $5-15k design system build *Effort:* Medium (many primitives, design system work) ⚠ MIT; WorkOS maintainer; check long-term support commitments
Agent-desktop vercel-labs/agent-desktop ★ 18.6k · Permissive Apache-2.0 · Tool · Fit 2/5	Computer-use CLI letting AI agents control a desktop environment. *Replaces:* UiPath, Automation Anywhere	RPA teams, QA automation teams, AI agent builders	Consulting/implementation API/usage-based	• Desktop QA bots for software testers • Form-filling agents for back-office teams • Desktop automation for legal document teams	Free CLI; $5-15k agent automation projects *Effort:* High (security risk, desktop control complexity) ⚠ Apache-2.0; desktop control risks; experimental vercel-labs status
Hyperui markmead/hyperui ★ 12.3k · Permissive MIT · Library · Fit 2/5	Free copy-paste Tailwind CSS v4 UI components for web projects.	Frontend freelancers, Tailwind agencies, indie devs	Premium plugins/add-ons Consulting/implementation	• Tailwind pricing blocks for SaaS launches • Contact forms for local service sites • Hero sections for real estate landing pages	Free components; $99-299 premium block pack *Effort:* Low (copy-paste components, restyle freely) ⚠ MIT; widely copied components; low differentiation
Base-ui mui/base-ui ★ 11.3k · Permissive MIT · Library · Fit 2/5	Unstyled accessible React UI components from the Material UI team.	React teams, design system builders, agencies	Consulting/implementation Training/courses	• Accessible select menus for React fintech apps • Base components for React admin dashboards • Accessible date pickers for booking apps	Free library; $4-10k design system build *Effort:* Low (unstyled, you own styling) ⚠ MIT; Material UI brand; API still evolving
Themes radix-ui/themes ★ 8.8k · Permissive MIT · Library · Fit 2/5	Styled React component library focused on fast development and accessibility. *Replaces:* Chakra UI, Mantine, Tailwind UI	React startups, internal tool teams, SaaS builders	Consulting/implementation Premium plugins/add-ons	• Design system base for B2B SaaS startups • React admin theme for logistics dashboards • Themed UI kit for healthcare portals	Free library; $5-12k themed design system *Effort:* Low (MIT, themable, ships defaults) ⚠ MIT; WorkOS maintainer; theming changes between versions
hint.css chinchang/hint.css ★ 8.4k · Permissive MIT · Library · Fit 2/5	CSS-only tooltip library for adding hover tooltips to any website.	Web designers, small agencies, legacy site owners	Consulting/implementation Setup + support retainer	• Tooltips for legacy restaurant menus • Hover help for insurance quote forms • Tooltips for small business websites	Free library; $150-400 tooltip setup per site *Effort:* Low (tiny CSS file, trivially restyled) ⚠ MIT; dated library; CSS-only tooltips limited accessibility

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Mika wangzan101/Mika ★ 7.5k · Permissive Apache-2.0 · App · Fit 2/5	On-device Android AI agent that operates apps and the web to complete tasks. *Replaces:* Tasker, Bixby Routines	Android power users, accessibility users, field workers	Premium plugins/add-ons Consulting/implementation	• Hands-free phone tasks for field technicians • Task automation for elderly Android users • App automation for small logistics teams	Free app; $5-10 one-time pro or team setup *Effort:* High (device model limits, permission risk) ⚠ Apache-2.0; app-control permissions and privacy rules; security review
Reka-ui unovue/reka-ui ★ 6.9k · Permissive MIT · Library · Fit 2/5	Accessible, unstyled Vue component library for design systems and web apps.	Vue teams, design system builders, agencies	Consulting/implementation Training/courses	• Accessible dropdowns for Vue fintech dashboards • Vue design system base for HR software • Accessible modals for Nuxt marketing sites	Free library; $4-10k Vue design system build *Effort:* Low (unstyled, you own styling) ⚠ MIT; formerly Radix Vue; check API changes on upgrades
NoUiSlider leongersen/noUiSlider ★ 5.8k · Permissive MIT · Library · Fit 2/5	Lightweight, accessible JavaScript range slider with touch and keyboard support.	Web developers, ecommerce filter teams, booking sites	Consulting/implementation Premium plugins/add-ons	• Price range filter for ecommerce catalogs • Budget slider for travel booking sites • Date range slider for event ticketing	Free library; $300-900 filter UI integration *Effort:* Low (small MIT slider, drop-in) ⚠ MIT; mature, low risk; attribution required
Phpinsights nunomaduro/phpinsights ★ 5.6k · Permissive MIT · Tool · Fit 2/5	Console tool giving instant PHP code quality checks and scores. *Replaces:* SonarQube, Code Climate	PHP agencies, Laravel teams, CI pipeline owners	Consulting/implementation Setup + support retainer	• Code quality gates for Laravel agencies • PHP quality audits for legacy codebases • CI checks for PHP startup teams	Free tool; $1-3k code audit per project *Effort:* Low (CLI config, quick to adopt) ⚠ MIT; scores are opinionated; mild commercial risk
Zag chakra-ui/zag ★ 5.2k · Permissive MIT · Library · Fit 2/5	State-machine UI component primitives for React, Solid, Vue, Svelte and vanilla JavaScript.	Design system teams, multi-framework agencies, component authors	Consulting/implementation Training/courses	• Multi-framework widgets for SaaS embeds • State-machine dropdowns for fintech forms • Shared UI logic across Vue and React	Free library; $5-12k design system build *Effort:* High (state-machine model has learning curve) ⚠ MIT; Chakra UI origin; multi-framework maintenance costs

Swetrix Swetrix/swetrix ★ 1.2k · AGPL AGPL-3.0 · Platform · Fit 4/5	Privacy-first web analytics with error tracking and performance monitoring, self-hostable or cloud *Replaces:* Google Analytics, Plausible, Fathom, Sentry	Privacy-conscious startups, EU agencies	Managed hosting White-label reseller Vertical SaaS	• Analytics for EU fintech sites • Client-branded reports for SEO agencies • Error plus traffic tracking for indie SaaS *Angle:* Analytics plus uptime and errors SaaS	$9-49/mo by pageview tier *Effort:* Medium (Multi-project dashboards, rebranding needs frontend work) ⚠ AGPL-3.0: publish server-side changes; Swetrix is a trademark
Modin modin-project/modin ★ 10.4k · Permissive Apache-2.0 · Library · Fit 3/5	Library scaling pandas workflows across cores or clusters with a one-line change. *Replaces:* Databricks, Snowpark pandas	Data scientists, analytics engineers, ML teams	Consulting/implementation Training/courses	• Pandas speedups for retail sales analysts • Large CSV workflows for insurance actuaries • Pandas scaling for ad-tech reporting teams	Free library; $5-15k data pipeline migration *Effort:* Low (drop-in replacement for pandas) ⚠ Apache-2.0; keep notices; backend cluster costs and compat gaps
Oceanbase oceanbase/oceanbase ★ 10.4k · Permissive Apache-2.0 · Platform · Fit 3/5	Open-source distributed multi-model database for demanding transactional and analytical workloads. *Replaces:* Oracle, Snowflake, Amazon Aurora	Banks, large enterprises, fintech platforms	Managed hosting Consulting/implementation	• Core banking database for regional lenders • Payments ledger backend for fintech startups • Multi-model store for logistics platforms	$5-30k/yr support contracts, cloud usage extra *Effort:* High (distributed DB operations, deep expertise) ⚠ Apache-2.0; OceanBase trademark; banking regulators may require approvals
Snowplow snowplow/snowplow ★ 7.0k · Permissive Apache-2.0 · Platform · Fit 3/5	Customer data infrastructure for collecting, modeling and routing event data. *Replaces:* Segment, mParticle, Google Analytics 360	Data teams, e-commerce analytics, enterprise marketing teams	Managed hosting Consulting/implementation	• Event tracking for Shopify brand analytics • Clickstream pipeline for media publishers • Product analytics pipeline for SaaS teams	$1-5k/mo managed pipeline, plus event volume costs *Effort:* High (pipeline ops, cloud infrastructure, modeling) ⚠ Apache-2.0; Snowplow trademark; GDPR tracking consent rules
Age apache/age ★ 4.9k · Permissive Apache-2.0 · Tool · Fit 3/5	Graph database extension for PostgreSQL, built for fast analysis and real-time data processing. *Replaces:* Neo4j, Amazon Neptune	Backend teams, fraud analytics teams, PostgreSQL shops	Consulting/implementation Managed hosting	• Fraud ring graphs for payment processors • Supplier network graphs for manufacturers • Social graph queries for community apps	Free extension; $5-15k graph data modeling *Effort:* Medium (graph modeling skills, PostgreSQL version ties) ⚠ Apache-2.0; Apache trademark; PostgreSQL extension upgrade care
Ahoy ankane/ahoy ★ 4.5k · Permissive MIT · Library · Fit 3/5	First-party analytics gem for Rails apps that stores visits and events in your database. *Replaces:* Google Analytics, Mixpanel, Plausible	Rails SaaS teams, privacy-focused publishers, agencies	Consulting/implementation Setup + support retainer	• Privacy analytics for Rails clinic sites • First-party tracking for Rails course platforms • Event tracking for Rails e-commerce stores	Free gem; $800-2500 analytics setup per app *Effort:* Low (MIT gem, drop-in for Rails) ⚠ MIT; analytics consent and GDPR rules still apply
Crate crate/crate ★ 4.5k · Permissive Apache-2.0 · Platform · Fit 3/5	Distributed SQL database for storing and analyzing massive, near real-time data. *Replaces:* Elasticsearch, Snowflake, TimescaleDB	IoT data teams, industrial monitoring firms, log analytics teams	Managed hosting Consulting/implementation	• Sensor data store for factory monitoring • Telemetry backend for smart-meter utilities • Time-series analytics for energy traders	$500-3000/mo managed cluster, support extra *Effort:* High (distributed DB ops and cluster sizing) ⚠ Apache-2.0; CrateDB trademark; check enterprise add-on terms
Lmnr lmnr-ai/lmnr ★ 3.5k · Permissive Apache-2.0 · Platform · Fit 3/5	Open-source observability platform purpose-built for AI agents. *Replaces:* LangSmith, Arize, Braintrust	AI product teams, agent startups, LLM ops engineers	Managed hosting Setup + support retainer	• Agent tracing for customer support bots • LLM monitoring for legal AI tools • Agent evals dashboard for ed-tech startups	$49-299/mo managed cloud per team, self-host free *Effort:* Medium (fast-moving stack, data privacy needs) ⚠ Apache-2.0; prompt data is sensitive; trace retention rules

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Shynet milesmcc/shynet ★ 3.2k · **Permissive** Apache-2.0 · App · Fit 3/5	Cookie-free web analytics with optional JavaScript-free tracking pixel *Replaces:* Google Analytics, Fathom, Plausible, Simple Analytics	Privacy-focused small sites and agencies	Managed hosting White-label reseller Setup + support retainer	• Analytics for EU law firms • Reports for freelance web agencies • Tracking for newsletter publishers *Angle:* Cookieless analytics for agencies	$5-19/mo per site bundle *Effort:* Medium (Django app, multi-service support, limited theming) ⚠ Apache-2.0 fine; GDPR lawful-basis still your duty
Counterscale benvinegar/counterscale ★ 2.2k · **Permissive** MIT · App · Fit 3/5	Simple web analytics running on Cloudflare Workers and Analytics Engine *Replaces:* Google Analytics, Plausible, Fathom, Simple Analytics	Indie developers, hobby site owners	Managed hosting Setup + support retainer Vertical SaaS	• Analytics for indie game devs • Traffic stats for Cloudflare-hosted blogs • Lightweight metrics for personal portfolios *Angle:* Cloudflare-hosted analytics deployed for clients	$3-9/mo per site *Effort:* Medium (Cloudflare-only deployment, single-tenant) ⚠ Tied to Cloudflare; limited features, no multi-user teams
Offen offen/offen ★ 982 · **Permissive** Apache-2.0 · App · Fit 3/5	Fair web analytics giving visitors access to and deletion of their own data *Replaces:* Google Analytics, Matomo, Fathom	GDPR-sensitive publishers, nonprofits	Managed hosting Setup + support retainer Consulting/implementation	• Consent-friendly analytics for German publishers • Analytics for health blogs • Compliance-first stats for public agencies *Angle:* Fair analytics with user consent for EU publishers	$10-30/mo per site *Effort:* Medium (Go binary, multi-account supported, limited theming) ⚠ Project activity slowed; check maintenance before building on it
Medama medama-io/medama ★ 641 · **Check** NONE · App · Fit 3/5	Lightweight cookie-free website analytics in a single self-hosted binary *Replaces:* Plausible, Fathom, Simple Analytics, Google Analytics	Developers and small site owners	Managed hosting Setup + support retainer White-label reseller	• Cookie-free stats for static blogs • Analytics bundle for Hugo hosts • Simple traffic reports for small shops *Angle:* Lightweight cookieless analytics hosting	$4-12/mo per site *Effort:* Medium (Single binary, simple, single-tenant) ⚠ License shows NONE in metadata; actual repo is Apache-2.0, verify
Partytown QwikDev/partytown ★ 13.8k · **Permissive** MIT · Library · Fit 2/5	Library moving heavy third-party scripts off the main thread into web workers.	Ecommerce performance teams, Shopify agencies, SEO agencies	Consulting/implementation Setup + support retainer	• Script offloading for Shopify storefronts • Faster ad tags for news publishers • Analytics script tuning for SaaS marketing	Free library; $1-3k page-speed audit and setup *Effort:* Low (drop-in, config per site) ⚠ MIT; some third-party scripts break in workers; test carefully
React-native-firebase invertase/react-native-firebase ★ 12.3k · **Check** NOASSERTION · Library · Fit 2/5	React Native wrapper providing Firebase services for iOS and Android apps.	React Native agencies, mobile app startups, Firebase teams	Consulting/implementation Setup + support retainer	• Push and auth for React Native gyms • Firebase backend for React Native shops • Analytics setup for React Native travel apps	Free library; $3-8k Firebase mobile integration *Effort:* Low (well-tested, standard integration) ⚠ NOASSERTION license; Firebase and Google trademarks; read first
UPlot leeoniya/uPlot ★ 10.6k · **Permissive** MIT · Library · Fit 2/5	Small, fast JavaScript chart library for time series, lines, areas and bars. *Replaces:* Highcharts, Amcharts, Grafana embeds	Dashboard developers, trading tool builders, IoT monitoring teams	Consulting/implementation Premium plugins/add-ons	• Live sensor charts for IoT dashboards • Price charts for trading tool builders • Server metric graphs for DevOps tools	Free library; $3-8k dashboard charting work *Effort:* Low (small MIT library, CSS styling) ⚠ MIT; minimal risk; keep attribution and check chart types needed
Ua-parser-js faisalman/ua-parser-js ★ 10.2k · **AGPL** AGPL-3.0 · Library · Fit 2/5	JavaScript library detecting browsers, OS, devices, bots and AI crawlers from user-agent strings. *Replaces:* DeviceAtlas, 51Degrees, WURFL	Web analytics teams, ad-tech companies, SaaS developers	API/usage-based Consulting/implementation	• Bot detection for ad-tech networks • Device stats for mobile publishers • Crawler detection for news paywalls	Free for OSS; $99-499/mo commercial license *Effort:* Low (AGPL, commercial license needed) ⚠ AGPL: publish server changes; commercial license needed for closed use

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Amplify-js aws-amplify/amplify-js ★ 9.6k · **Permissive** Apache-2.0 · Library · Fit 2/5	Declarative JavaScript library for building apps on AWS cloud services. *Replaces:* Firebase SDKs, Azure Mobile Apps	Frontend teams on AWS, agencies, SaaS startups	Consulting/implementation Training/courses	• AWS auth and storage for React startups • Amplify backend for Vue event apps • AWS-hosted forms for insurance portals	Free library; $5-15k AWS app build *Effort:* Medium (AWS lock-in, service setup needed) ⚠ Apache-2.0; AWS and Amplify trademarks; AWS costs and lock-in
Delta delta-io/delta ★ 9.1k · **Permissive** Apache-2.0 · Framework · Fit 2/5	Open-source table storage framework for building lakehouse architectures on Spark and more. *Replaces:* Databricks managed lakehouse, Snowflake storage	Data engineering teams, analytics platform builders	Consulting/implementation Training/courses	• Lakehouse setup for retail data teams • Streaming tables for fintech event logs • Data lake rebuild for logistics firms	Free framework; $20-80k lakehouse build *Effort:* High (heavy data engineering, many engines) ⚠ Apache-2.0; Delta Lake and Databricks trademarks; compute costs
AgenticResourceRegistry AgenticResourceRegistry/AgenticResourceRegistry ★ 4.3k · **Permissive** Apache-2.0 · Tool · Fit 2/5	Self-hosted registry for sharing coding agent resources across a team.	Engineering teams using AI coding agents, platform teams	Managed hosting Setup + support retainer	• Shared agent skill library for dev agencies • Internal AI tooling catalog for banks • Team prompt registry for SaaS engineers	$15-40/seat/mo managed registry, or setup fee *Effort:* Medium (young project, team auth needed) ⚠ Apache-2.0; agent vendor names are trademarks; check tool terms
Preswald StructuredLabs/preswald ★ 4.3k · **Permissive** Apache-2.0 · Tool · Fit 2/5	Packages Python data apps into single files that run fully in the browser.	Data scientists, analysts, edu teams	Consulting/implementation Training/courses	• Browser-only dashboards for research labs • Offline data tools for field analysts • Shareable Python reports for consultants	Free tool; $2-5k custom data app build *Effort:* Medium (browser Python limits, package support) ⚠ Apache-2.0; Pyodide and package licenses vary; browser limits
Maestro Netflix/maestro ★ 3.9k · **Permissive** Apache-2.0 · Platform · Fit 2/5	Netflix's open-source workflow orchestrator for scheduling large pipelines. *Replaces:* Apache Airflow, Prefect Cloud, Dagster Cloud	Data platform teams, ML infrastructure teams, large enterprises	Consulting/implementation Training/courses	• Pipeline scheduling for ad-tech data teams • Workflow platform for ML feature pipelines • Orchestration rebuild for insurance analytics	Free tool; $20-60k platform setup and support *Effort:* High (heavy infrastructure, Netflix-scale design) ⚠ Apache-2.0; Netflix brand; operational complexity for small teams
GraphScope alibaba/GraphScope ★ 3.6k · **Permissive** Apache-2.0 · Platform · Fit 2/5	One-stop large-scale graph computing system for analytics and queries. *Replaces:* Neo4j, TigerGraph	Fraud analytics teams, telco network analysts, research labs	Consulting/implementation Training/courses	• Fraud ring graph analytics for banks • Telecom network graph analysis for carriers • Graph research platform for universities	Free system; $30-80k graph platform setup *Effort:* High (cluster ops and graph modeling expertise) ⚠ Apache-2.0; Alibaba-origin project; Chinese-first docs in places
Roapi roapi/roapi ★ 3.4k · **Permissive** Apache-2.0 · Tool · Fit 2/5	Creates full APIs over slowly changing datasets without writing code. *Replaces:* Retool, Airtable APIs	Data teams publishing public datasets, government data offices	Setup + support retainer Consulting/implementation	• Open data API for city government files • Dataset API for regional research archives • Read-only API for product catalog CSVs	Free tool; $1-3k dataset API setup per client *Effort:* Low (config-driven, little code to adapt) ⚠ Apache-2.0; read-only datasets; security review for exposed data
Laravel-analytics spatie/laravel-analytics ★ 3.2k · **Permissive** MIT · Library · Fit 2/5	Laravel package fetching pageviews and other data from Google Analytics. *Replaces:* Databox, Swydo	Laravel agencies, marketing dashboard builders, SaaS teams	Consulting/implementation Setup + support retainer	• GA dashboards inside Laravel client portals • Pageview stats for Laravel news sites • Traffic reports for Laravel agency clients	Free package; $500-1500 dashboard integration *Effort:* Low (MIT package, Google API setup needed) ⚠ MIT; Google Analytics API quotas and terms; Spatie brand

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Vue-data-ui graphieros/vue-data-ui ★ 2.5k · **Permissive** MIT · Library · Fit 2/5	Vue 3 data visualization component library for charts and data stories. *Replaces:* Highcharts, ApexCharts Pro, Syncfusion	Vue dashboard developers, BI tool builders, agencies	Consulting/implementation Premium plugins/add-ons	• Charts for Vue fintech dashboards • Data stories for Vue newsroom sites • KPI widgets for Vue HR dashboards	Free library; $3-8k dashboard chart build *Effort:* Low (MIT Vue components, themable) ⚠ MIT; Vue 3 only; check chart-type licenses and assets
Liwan explodingcamera/liwan ★ 221 · **Permissive** Apache-2.0 · App · Fit 2/5	Lightweight self-hosted web analytics written in Rust with a simple dashboard *Replaces:* Plausible, Fathom, Google Analytics	Hobbyists and tiny sites	Setup + support retainer Managed hosting Consulting/implementation	• Analytics for personal blogs • Stats for Raspberry Pi hosters • Traffic counters for hobby forums *Angle:* Single-binary analytics for indie sites	$3-5/mo per site *Effort:* Medium (Small project, single-tenant) ⚠ Small team and young project; feature set is limited

Web Push & Notifications · 18

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Bark Finb/Bark ★ 9.5k · **Permissive** MIT · App · Fit 3/5	iOS app for pushing custom notifications to an iPhone. *Replaces:* Pushover, Pushcut, IFTTT notifications	Developers, sysadmins, home-automation users	Premium plugins/add-ons Managed hosting	• Server alerts for small hosting firms • Home alarm pings for smart-home installers • Build status alerts for indie app teams	Free app; $3-10/mo hosted push relay *Effort:* Medium (Apple push infrastructure, server backend) ⚠ MIT; Apple Push Notification terms and App Store review apply
webhook.site webhooksite/webhook.site ★ 6.8k · **Check** NOASSERTION · Tool · Fit 3/5	Tool for testing HTTP webhooks by showing incoming requests instantly. *Replaces:* RequestBin, Postman Mock, Beeceptor	Backend developers, integration engineers, QA testers	Managed hosting Premium plugins/add-ons	• Webhook debugging for payment integrators • Test endpoints for Shopify app developers • Webhook inspector for SaaS QA teams	$9-29/mo team plan, private instance $99+ *Effort:* Low (web app, mostly deploy and config) ⚠ NOASSERTION license; read first; hosted data privacy concerns
Mercure dunglas/mercure ★ 5.4k · **AGPL** AGPL-3.0 · Tool · Fit 3/5	Open real-time push server for sending updates to browsers over HTTP. *Replaces:* Pusher, Ably, PubNub	Web app developers, SaaS teams, live dashboard builders	Managed hosting API/usage-based	• Live order updates for restaurant apps • Live dashboard feeds for logistics teams • Live score push for sports sites	$29-199/mo hosted Mercure, per connection tier *Effort:* Medium (AGPL hosting, scaling and ops work) ⚠ AGPL: publish server changes, including hosted modifications
Bark-server Finb/bark-server ★ 3.7k · **Permissive** MIT · Platform · Fit 3/5	Self-hosted server backend that relays push notifications for the Bark iOS app. *Replaces:* Pushover, OneSignal	Bark app self-hosters, IT teams, smart-home builders	Managed hosting Setup + support retainer	• Private push relay for home-lab alerts • Self-hosted alerts for small IT firms • Private push relay for school IT teams	$5-15/mo managed relay; setup $200-500 *Effort:* Medium (Apple certificates, server ops needed) ⚠ MIT; Apple push certificate handling; App Store dependency
Uniqush-push uniqush/uniqush-push ★ 1.6k · **Permissive** Apache-2.0 · Platform · Fit 3/5	Go push notification server covering APNs, FCM and Web Push. *Replaces:* OneSignal, Pusher Beams	Go backend teams, mobile platform teams, messaging startups	Managed hosting Consulting/implementation	• Multi-platform push for Go delivery apps • Web and mobile alerts for Go newsrooms • Push backend for Go fintech alerts	$49-199/mo managed push relay per app *Effort:* Medium (maintenance pace, APNs and FCM setup) ⚠ Apache-2.0; APNs and FCM credential handling; project activity uncertain
GmsCore microg/GmsCore ★ 15.2k · **Permissive** Apache-2.0 · Platform · Fit 2/5	Free open-source replacement for Google Play Services on Android devices.	Custom Android ROM users, privacy-focused phone users, de-Googled device makers	Consulting/implementation Hardware kits/assembly	• Google-free phone setup for privacy shops • Play services layer for custom Android ROMs • De-Googled tablets for schools	Free core; $50-150 device setup service *Effort:* High (deep Android integration, Google API gaps) ⚠ Apache-2.0; Google trademarks; Play Store and API terms risk

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Ntfy dschep/ntfy ★ 5.0k · GPL GPL-3.0 · Tool · Fit 2/5	Command-line utility for sending notifications on demand or when commands finish. *Replaces:* Pushover, Pushbullet	Developers, sysadmins, long-running job operators	Premium plugins/add-ons Setup + support retainer	• Job-finish alerts for data science teams • Build finish pings for CI-heavy teams • Backup job alerts for small IT shops	Free tool; $5-15/mo hosted push relay *Effort:* Low (small CLI, configuration only) ⚠ GPL-3.0: distributed builds ship source; ntfy name used elsewhere
Django-push-notifications jazzband/django-push-notifications ★ 2.4k · Permissive MIT · Library · Fit 2/5	Django library sending push notifications to mobile devices via APNS and GCM. *Replaces:* OneSignal, Pusher Beams	Django app developers, mobile backend teams, agencies	Consulting/implementation Setup + support retainer	• Push alerts for Django class-booking apps • Order push for Django delivery apps • Mobile alerts for Django clinic apps	Free library; $1-4k push setup per app *Effort:* Low (MIT library, Django-native) ⚠ MIT; GCM is legacy; FCM and APNS migrations need attention
Rpush rpush/rpush ★ 2.2k · Permissive MIT · Library · Fit 2/5	Ruby push notification service for mobile devices. *Replaces:* OneSignal, Pusher Beams	Rails app developers, mobile backend teams	Consulting/implementation Setup + support retainer	• Push service for Rails fitness apps • Rails push alerts for delivery platforms • Push backend for Rails event apps	Free library; $2-5k Rails push integration *Effort:* Low (MIT gem, service-style setup) ⚠ MIT; APNS and FCM certificate handling; Rails version support
Notifme-sdk notifme/notifme-sdk ★ 2.0k · Permissive MIT · Library · Fit 2/5	Node.js library sending transactional notifications across several channels. *Replaces:* Twilio SendGrid bundles, Courier, Knock	Node backend teams, SaaS product teams, e-commerce apps	Consulting/implementation Setup + support retainer	• Order updates for Node e-commerce stores • Appointment reminders for Node clinics • Shipping alerts for Node logistics apps	Free library; $2-5k notification integration *Effort:* Low (MIT library, provider configs needed) ⚠ MIT; SMS and email compliance rules; provider API terms
Web-push-php web-push-libs/web-push-php ★ 1.9k · Permissive MIT · Library · Fit 2/5	PHP library for sending browser Web Push notifications. *Replaces:* OneSignal, PushEngage	PHP developers, WordPress plugin makers, e-commerce teams	Consulting/implementation Setup + support retainer	• Browser alerts for WordPress news sites • Price-drop pushes for PHP shops • Web Push for PHP booking reminders	Free library; $1-3k browser push setup *Effort:* Low (MIT library, small API surface) ⚠ MIT; browser push permission rules; VAPID key handling
Pushy jchambers/pushy ★ 1.9k · Permissive MIT · Library · Fit 2/5	Java library sending iOS, macOS and Safari push notifications via APNs. *Replaces:* OneSignal, Airship	Java backend teams, iOS app vendors, enterprise mobile teams	Consulting/implementation Setup + support retainer	• APNs sends for Java banking apps • iOS alerts for Java logistics platforms • Safari push for Java news sites	Free library; $3-8k APNs integration *Effort:* Low (MIT Java library, straightforward) ⚠ MIT; APNs certificate and token handling; Apple policy changes
Wecomchan easychen/wecomchan ★ 1.8k · Permissive MIT · Tool · Fit 2/5	Open-source alternative to Server酱 that pushes WeChat messages through WeCom. *Replaces:* Server酱, PushPlus	Chinese developers, sysadmins, monitoring teams	Premium plugins/add-ons Setup + support retainer	• WeChat alerts for Chinese server monitoring • WeCom bot for Chinese dev teams • Order notices for Chinese small shops	Free tool; $50-150 WeCom setup per client *Effort:* Low (small service, configuration-only) ⚠ MIT; WeChat and WeCom platform rules; Server酱 name trademark
Mailrise YoRyan/mailrise ★ 1.6k · Permissive MIT · Tool · Fit 2/5	SMTP gateway that turns incoming emails into Apprise notifications.	Homelab admins, sysadmins, small IT teams	Setup + support retainer Consulting/implementation	• Email alert bridge for homelab servers • Email-to-chat alerts for small IT firms • Printer email alerts to phones	Free tool; $200-600 alert setup per client *Effort:* Low (small gateway, config-driven) ⚠ MIT; email and chat service API limits; low commercial value
React-native-onesignal OneSignal/react-native-onesignal ★ 1.6k · Check NOASSERTION · Library · Fit 2/5	React Native plugin connecting apps to the OneSignal messaging service. *Replaces:* Braze, Airship SDKs	React Native app developers, mobile marketing teams	Consulting/implementation Setup + support retainer	• Push campaigns for React Native retail apps • Alerts for React Native gym apps • Engagement messages for React Native news apps	Free plugin; $1-3k OneSignal setup per app *Effort:* Low (plugin, configured via vendor account) ⚠ NOASSERTION license; OneSignal service terms and pricing tiers

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Android gotify/android ★ 1.5k · **Permissive** MIT · App · Fit 2/5	Android app receiving push notifications from a Gotify server. *Replaces:* Pushover, Pushbullet	Homelab users, self-hosting sysadmins, small IT teams	Premium plugins/add-ons Setup + support retainer	• Server alert app for homelab admins • Build alerts on Android for CI teams • Monitoring pings for small hosting firms	Free app; $200-500 alert setup per client *Effort:* Low (small MIT Android client) ⚠ MIT; Gotify server dependency; Android store policy
Mercure symfony/mercure ★ 444 · **Permissive** MIT · Library · Fit 2/5	Symfony component pushing updates to browsers using the Mercure protocol.	Symfony agencies, PHP SaaS teams	Consulting/implementation Setup + support retainer	• Live notifications for Symfony helpdesks • Live order status for Symfony shops • Real-time dashboards for Symfony clinics	Free component; $1-4k Symfony realtime setup *Effort:* Low (MIT component, Symfony-specific) ⚠ MIT; depends on Mercure hub, which is AGPL
Mercure-bundle symfony/mercure-bundle ★ 309 · **Permissive** MIT · Library · Fit 2/5	Symfony bundle that pushes live updates to browsers via the Mercure protocol.	Symfony agencies, PHP real-time app teams	Consulting/implementation Setup + support retainer	• Realtime chat updates for Symfony communities • Live auction bids for Symfony marketplaces • Order tracking push for Symfony shops	Free bundle; $1-4k Symfony realtime install *Effort:* Low (MIT bundle, Symfony-specific) ⚠ MIT; requires a Mercure hub, which is AGPL-licensed

Website Builders · 20

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Webstudio webstudio-is/webstudio ★ 9.2k · **AGPL** AGPL-3.0 · Platform · Fit 4/5	Open-source visual website builder with full CSS control and headless CMS support *Replaces:* Webflow, Framer, Wix, Squarespace	Designers, agencies, marketing teams	Managed hosting White-label reseller Agency service	• Client sites for freelance designers • Landing pages for SaaS startups • Agency site factory for studios *Angle:* Self-hosted visual builder sold to agencies as Webflow alternative	$15-49/mo per site *Effort:* Medium (Self-hostable builder, needs multi-tenant hosting) ⚠ AGPL-3.0: publish modified server code; Webstudio is a trademark
Frappe Builder frappe/builder ★ 2.5k · **Permissive** MIT · App · Fit 4/5	Visual website builder for the Frappe stack with pages, components, and publishing *Replaces:* Webflow, Wix, Squarespace	Frappe ERPNext users, small businesses	Managed hosting White-label reseller Agency service	• Landing pages for ERPNext shops • Event pages for training centers • Product pages for small manufacturers *Angle:* Low-cost website builder bundled with Frappe hosting	$12-30/mo per site *Effort:* Medium (Frappe-based multi-site, needs bench setup) ⚠ Frappe stack hosting is complex; Frappe is a trademark
Onlook onlook-dev/onlook ★ 27.1k · **Permissive** Apache-2.0 · Tool · Fit 3/5	Open-source visual editor that designs and edits React code with AI *Replaces:* Webflow, Framer, Lovable, Figma Dev Mode	Designers and front-end developers	Vertical SaaS Managed hosting Training/courses	• Visual editing for Next.js agencies • AI redesign tool for startup landing pages • Design-to-code for solo founders *Angle:* AI-assisted visual React editing service for designers	$20-40/mo per seat *Effort:* High (Complex dev tool, hosted infra needed) ⚠ Apache-2.0; Onlook is a trademark; fast-moving codebase
GrapesJS GrapesJS/grapesjs ★ 26.4k · **Check** NOASSERTION · Framework · Fit 3/5	Embeddable web builder framework for drag-and-drop template editors *Replaces:* Mailchimp builder, Wix, Unlayer, Webflow	SaaS builders adding page editors	Premium plugins/add-ons Consulting/implementation Vertical SaaS	• Email template editor for CRMs • Landing page builder for realtors • Newsletter designer for agencies *Angle:* Embed white-label drag-and-drop builder into your SaaS	$99-499/mo embedded licensing *Effort:* Medium (Embeddable and themeable, you build the product) ⚠ BSD-3-Clause per repo; metadata shows NOASSERTION, confirm
Puck puckeditor/puck ★ 13.6k · **Permissive** MIT · Library · Fit 3/5	Visual editor component for React that lets editors build pages from your components *Replaces:* Builder.io, Storyblok Visual Editor, Webflow	React developers adding page editing	Consulting/implementation Agency service Vertical SaaS	• Page builder for Next.js SaaS • Marketing site editor for startups • Landing editor for e-commerce brands *Angle:* React visual editor embedded in vertical site-builder SaaS	$2-6k per integration *Effort:* Medium (Embeddable React library, you build the app) ⚠ Cloud/AI features may be paid; core is MIT

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Kit HugoBlox/kit ★ 9.8k · Permissive MIT · Platform · Fit 3/5	AI-assisted site builder producing Markdown sites from Tailwind blocks, deployable anywhere. *Replaces:* Wix, Squarespace, Framer	Freelance designers, small agencies, startup founders	Premium plugins/add-ons Managed hosting	• Landing page kit for SaaS launches • Portfolio builder for freelance photographers • Docs and blog kit for open-source projects	Free kit; $9-19/mo managed hosting and AI credits *Effort:* Medium (AI output quality needs review) ⚠ MIT; AI-generated content review; HugoBlox brand in template
Builder.io SDK BuilderIO/builder ★ 8.9k · Permissive MIT · Platform · Fit 3/5	Visual headless CMS and page builder for React, Vue, Svelte, Qwik *Replaces:* Contentful, Webflow, Storyblok, Optimizely	Product and marketing teams on code stacks	Consulting/implementation Managed hosting Agency service	• Visual CMS for DTC brands • Landing editors for fintech marketers • Content tools for e-commerce teams *Angle:* Visual CMS integration services for ecommerce brands	$5-15k per integration *Effort:* High (Hosted platform, self-host limited) ⚠ Open-source SDKs; full platform is mostly Builder.io hosted
Plasmic plasmicapp/plasmic ★ 7.2k · Permissive MIT · Platform · Fit 3/5	Visual builder for React that integrates with your codebase and CMS *Replaces:* Webflow, Builder.io, Framer, Retool	Design and marketing teams on React	Consulting/implementation Managed hosting Agency service	• Marketing page builder for dev-led startups • Visual editor for SaaS dashboards • Landing pages for e-commerce agencies *Angle:* Visual page building for marketing teams on headless stacks	$20-60/mo per editor seat *Effort:* High (Large hosted platform, self-host effort heavy) ⚠ Plasmic is a trademark; self-hosting has less support
Silex silexlabs/Silex ★ 3.0k · AGPL AGPL-3.0 · App · Fit 3/5	Online visual builder for static sites with dynamic data from headless CMS *Replaces:* Wix, Webflow, Squarespace	Freelance designers, small organizations	Managed hosting Agency service Setup + support retainer	• Sites for French nonprofits • Portfolio builder for illustrators • Static landing pages for freelancers *Angle:* No-code static site builder hosted for freelancers	$9-25/mo per site *Effort:* Medium (Self-hosted builder, plugin-based, single-tenant) ⚠ AGPL-3.0: publish modified server code; Silex name is French nonprofit's
Vvveb givanz/Vvveb ★ 1.3k · AGPL AGPL-3.0 · Platform · Fit 3/5	Open-source CMS for building websites, blogs and ecommerce stores. *Replaces:* Shopify, WordPress, Wix	Small agencies, ecommerce founders, bloggers	Managed hosting Setup + support retainer	• Small store builder for local artisans • Blog-and-shop CMS for food brands • Site builder for local service sellers	$10-30/mo managed hosting, $300-900 setup *Effort:* Medium (ecommerce features need testing) ⚠ AGPL: publish server changes for hosted use; payment compliance

Wikmd Linbreux/wikmd ★ 423 · Permissive MIT · App · Fit 3/5	File-based Markdown wiki with web editor, search, and Git sync *Replaces:* Confluence, Notion, GitBook, MediaWiki	Small teams, hobbyists, home labs	Managed hosting Setup + support retainer White-label reseller	• Wikis for tabletop RPG groups • Knowledge base for small clinics • Docs hubs for makerspaces *Angle:* File-based markdown wiki hosting	$5-15/mo per wiki *Effort:* Medium (Simple Flask app, single-tenant, light theming) ⚠ Basic permissions only; not a farm, one wiki per install
Gollum gollum/gollum ★ 14.3k · Permissive MIT · Tool · Fit 2/5	Git-powered wiki with local frontend and many markup formats *Replaces:* Confluence, GitHub Wiki, GitBook	Developers keeping docs in git	Setup + support retainer Managed hosting Consulting/implementation	• Git-backed docs for dev teams • Wiki for technical writers • Doc hosting for hardware makers *Angle:* Git-backed wikis for engineering teams	$5-10/mo per team *Effort:* Medium (Ruby gem, minimal auth and UI) ⚠ MIT; no built-in user management
TiddlyWiki TiddlyWiki/TiddlyWiki5 ★ 8.7k · Check NOASSERTION · Tool · Fit 2/5	Self-contained JavaScript wiki and notebook that runs in a single HTML file *Replaces:* Notion, Evernote, Confluence	Personal knowledge workers and tinkerers	Content/membership Training/courses Consulting/implementation	• Template packs for researchers • Course notebooks for self-learners • Digital garden kits for writers *Angle:* Personal wiki hosting and sync	$19-79 per template pack *Effort:* Medium (Unique non-standard UX, no multi-user hosting) ⚠ NOASSERTION: BSD-style, read license; TiddlyWiki trademark
Mwparserfromhell earwig/mwparserfromhell ★ 907 · Permissive MIT · Library · Fit 2/5	Python library parsing MediaWiki wikicode into editable structures.	Wiki bot developers, data engineers, research teams	Consulting/implementation Training/courses	• Wiki data pipelines for research archives • Template cleanup bots for wiki editors • Wikicode extraction for dataset builders	Free library; $2-5k wiki data pipeline *Effort:* Low (mature MIT library, Python-only) ⚠ MIT; MediaWiki parsing edge cases; low commercial risk
Pywikibot wikimedia/pywikibot ★ 780 · Permissive MIT · Library · Fit 2/5	Python library for interfacing with the MediaWiki API for bots and tools.	Wiki bot operators, Wikimedia-affiliated teams, wiki admins	Consulting/implementation Setup + support retainer	• Editing bots for corporate knowledge wikis • Batch wiki cleanup for documentation teams • Wiki reporting bots for Wikimedia chapters	Free library; $2-5k wiki automation build *Effort:* Low (mature MIT library, bot-focused) ⚠ MIT; mirror repo, submit patches upstream; Wikimedia bot policies

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Pytablewriter thombashi/pytablewriter ★ 631 · **Permissive** MIT · Library · Fit 2/5	Python library writing tables to many formats, including CSV, Excel, Markdown and HTML.	Data engineers, report generators, documentation teams	Consulting/implementation Setup + support retainer	• Report table exports for finance teams • Markdown tables for documentation pipelines • Excel exports for analytics dashboards	Free library; $1-4k export pipeline build *Effort:* Low (MIT Python library, drop-in) ⚠ MIT; format coverage varies; check Excel output needs
Wptools siznax/wptools ★ 595 · **Permissive** MIT · Library · Fit 2/5	Python library extracting structured data from Wikipedia, Wikidata and other MediaWikis.	Data researchers, journalists, knowledge graph builders	Consulting/implementation API/usage-based	• Wikipedia fact sheets for newsrooms • Wikidata enrichment for museum catalogs • Entity data pulls for market research	Free library; $2-5k data extraction pipeline *Effort:* Low (MIT Python library, simple API) ⚠ MIT; scraped content carries CC BY-SA attribution duties
Zhconv gumblex/zhconv ★ 566 · **Permissive** MIT · Library · Fit 2/5	Python library converting between simplified and traditional Chinese text. *Replaces:* OpenCC, localization agencies	Chinese localization teams, publishers, subtitle makers	Consulting/implementation Setup + support retainer	• Traditional Chinese conversion for Taiwan publishers • Simplified-to-traditional for web apps • Subtitle conversion for video studios	Free library; $1-3k localization pipeline *Effort:* Low (MIT Python library, simple tables) ⚠ MIT; regional vocabulary differences; check output quality
WikiDocs Zavy86/WikiDocs ★ 533 · **Permissive** MIT · App · Fit 2/5	Databaseless markdown flat-file wiki for simple team documentation. *Replaces:* Confluence, Notion, MediaWiki	Small dev teams, internal IT teams, hobby documenters	Setup + support retainer Premium plugins/add-ons	• Internal wiki for small dev teams • Markdown docs site for IT runbooks • Knowledge base for small law offices	Free app; $300-800 internal wiki setup *Effort:* Low (small MIT app, simple setup) ⚠ MIT; limited access control and search; weak collaboration
Mwoffliner openzim/mwoffliner ★ 495 · **GPL** GPL-3.0 · Tool · Fit 2/5	Scraper that packages MediaWiki articles into one compressed ZIM file for offline use. *Replaces:* Kiwix hosting services	Schools, NGOs, offline education providers	Setup + support retainer Consulting/implementation	• Offline wiki packs for rural schools • Offline medical reference for clinics • Offline encyclopedia for field NGOs	Free tool; $800-2500 offline ZIM package build *Effort:* Medium (scraping setup, wiki-specific operations) ⚠ GPL-3.0: distributed builds ship source; wiki content licenses apply
Mycorrhiza bouncepaw/mycorrhiza ★ 379 · **AGPL** AGPL-3.0 · Tool · Fit 2/5	Git and filesystem wiki engine written in Go with its own markup. *Replaces:* Confluence, GitBook	Developers keeping notes in git, independent web fans	Managed hosting Setup + support retainer	• Git wiki for indie developer notes • Documentation wiki for small open-source projects • Git-backed team handbook for startups	$5-12/mo managed git wiki, setup $200-500 *Effort:* Medium (custom markup, small community) ⚠ AGPL: publish server changes for hosted wikis
Moin moinwiki/moin ★ 375 · **Check** NOASSERTION · Tool · Fit 2/5	Python wiki engine in unstable 2.0 development; production uses 1.9.x. *Replaces:* Confluence, DokuWiki, Wiki.js	Legacy wiki admins, Python developers	Consulting/implementation Setup + support retainer	• MoinMoin 1.9 support for legacy intranets • Wiki migration for university departments • Python wiki hosting for small clubs	Free engine; $1-3k legacy wiki support *Effort:* High (unstable dev branch, legacy Python) ⚠ NOASSERTION license; read first; 2.0 is unstable, use 1.9.x
Mwclient mwclient/mwclient ★ 348 · **Permissive** MIT · Library · Fit 2/5	Python client library for talking to the MediaWiki API.	Wiki bot developers, wiki admins, data teams	Consulting/implementation Training/courses	• Automation for corporate knowledge bases • Wiki update bots for research groups • Batch page edits for documentation teams	Free library; $1-4k wiki automation work *Effort:* Low (MIT Python client, simple) ⚠ MIT; bot policies differ per wiki; API rate limits
Wikitextparser 5j9/wikitextparser ★ 333 · **GPL** GPL-3.0 · Library · Fit 2/5	Python library parsing MediaWiki wikitext into objects for editing and extraction.	Wiki data teams, bot developers, research groups	Consulting/implementation Training/courses	• Wikitext cleanup tools for editors • Infobox extraction for research datasets • Template audits for wiki maintainers	Free library; $1-4k wikitext pipeline *Effort:* Low (GPL Python library, focused scope) ⚠ GPL-3.0: distributed derivatives ship source; wiki content licenses

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
OpenNAMU openNAMU/openNAMU ★ 252 · **Permissive** BSD-3-Clause · App · Fit 2/5	Feature-rich wiki engine for hosting community and documentation wikis. *Replaces:* Fandom, Wikia-style hosting	Korean community operators, fan wiki admins, documentation teams	Managed hosting Setup + support retainer	• Fan wiki hosting for Korean game communities • Community wiki for Korean hobby clubs • Documentation wiki for small Korean startups	$5-15/mo hosted wiki, setup $200-600 *Effort:* Medium (Korean docs, community moderation needed) ⚠ BSD-3-Clause; Korean-language docs; user content moderation duties
Nodemw macbre/nodemw ★ 249 · **Permissive** BSD-2-Clause · Library · Fit 2/5	Node.js client for the MediaWiki API and Wikidata.	Node developers, wiki bot builders, data teams	Consulting/implementation Training/courses	• Wiki bot tools for Node dev shops • Wikidata sync for Node museum catalogs • MediaWiki automation for Node publishers	Free library; $1-4k wiki API integration *Effort:* Low (BSD Node client, simple wrapper) ⚠ BSD-2-Clause; wiki API rate limits and bot policies apply
Amusewiki melmothx/amusewiki ★ 221 · **Check** NOASSERTION · App · Fit 2/5	Publishing platform built on Text::Amuse for turning wiki text into printable books. *Replaces:* Lulu, Blurb, Calibre workflows	Independent publishers, public-domain libraries, small presses	Setup + support retainer Consulting/implementation	• Public-domain book press for library projects • Ebook workflow for small poetry presses • Print-on-demand pipeline for local authors	Free platform; $1-3k publishing workflow setup *Effort:* High (Perl stack, niche markup, print workflows) ⚠ NOASSERTION license; read first; public-domain and copyright checks

3D & Rendering · 19

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Cesium CesiumGS/cesium ★ 15.9k · Permissive Apache-2.0 · Library · Fit 3/5	Open-source JavaScript library for 3D globes and maps in the browser. *Replaces:* Google Earth Web API, ArcGIS JS SDK	GIS firms, utility analysts, smart-city teams	Consulting/implementation Setup + support retainer	• 3D site viewer for real estate developers • Utility network globes for energy firms • Smart-city 3D map portal for councils	Free library; $10-40k 3D globe app build *Effort:* Medium (GIS data pipelines and tile hosting) ⚠ Apache-2.0; Cesium ion tokens and imagery licensing terms apply
BlenderGIS domlysz/BlenderGIS ★ 9.6k · GPL GPL-3.0 · Tool · Fit 3/5	Blender add-ons connecting Blender to geographic data for 3D map scenes. *Replaces:* ArcGIS 3D Analyst, QGIS 3D view	Architects, GIS analysts, 3D map artists, visualization studios	Consulting/implementation Training/courses	• 3D terrain models for urban planners • Map-based 3D scenes for film studios • Site visualization for civil engineering firms	Free add-on; $1-3k terrain visualization service *Effort:* Low (Blender add-on, GIS data-specific) ⚠ GPL-3.0: distributed add-ons ship source; map data licenses vary
Modly lightningpixel/modly ★ 8.6k · Check NOASSERTION · App · Fit 3/5	Desktop app generating 3D models from images or text prompts using local AI. *Replaces:* Meshy, Tripo3D, Luma Genie	Indie game devs, 3D printing hobbyists, product designers	Premium plugins/add-ons Hardware kits/assembly	• Local 3D prop maker for indie devs • Offline 3D model generator for print shops • Model generator for product mockup studios	$49-149 one-time license, GPU-heavy usage *Effort:* Medium (GPU needs, model licenses, packaging) ⚠ NOASSERTION license; underlying AI model licenses may restrict commercial use
Vanta tengbao/vanta ★ 7.3k · Permissive MIT · Library · Fit 3/5	JavaScript library adding animated 3D backgrounds to websites. *Replaces:* Spline, Unicorn Studio	Landing page designers, agencies, SaaS marketing teams	Consulting/implementation Premium plugins/add-ons	• Animated hero backgrounds for SaaS launches • 3D backgrounds for fintech landing pages • Animated sites for creative agencies	Free library; $800-2500 landing page effects *Effort:* Low (drop-in JS effects, configurable) ⚠ MIT; relies on three.js; performance and mobile battery concerns
Blockbench JannisX11/blockbench ★ 6.2k · GPL GPL-3.0 · Tool · Fit 3/5	Desktop editor for low-poly 3D models, textures and animations. *Replaces:* Maya, 3ds Max, Sketchfab Studio	Indie game studios and voxel-art creators	Training/courses Premium plugins/add-ons	• Low-poly models for Minecraft server builders • Asset tooling for classroom game design • Prop creation for hobbyist mobile studios	Free core; $10-30 per course or plugin *Effort:* High (Desktop app, GPL, well-known brand) ⚠ GPL-3.0: distributed builds ship source; Blockbench is a known brand, avoid it
Meshlab cnr-isti-vclab/meshlab ★ 5.9k · GPL GPL-3.0 · Tool · Fit 3/5	Desktop system for processing, cleaning and editing 3D triangle meshes. *Replaces:* Geomagic Wrap, MeshMixer, Artec Studio	Scanning labs, heritage digitizers and 3D print shops	Consulting/implementation Training/courses	• Mesh cleanup for dental scan labs • Artifact digitization for small museums • Print-ready repair service for makers	$50-150 per mesh repair job, free tool *Effort:* Medium (Mature C++ desktop app, GPL licensing) ⚠ GPL-3.0: distributed builds ship source; MeshLab is a known brand
React-bits DavidHDev/react-bits ★ 51.4k · Check NOASSERTION · Library · Fit 2/5	Large library of animated, interactive React and Next.js components for web products. *Replaces:* Aceternity UI, Magic UI, Framer Motion templates	React agencies, SaaS landing page builders, marketing teams	Premium plugins/add-ons Consulting/implementation	• Animated hero sections for SaaS landing pages • Interactive product tours for fintech sites • Motion UI kit for ecommerce storefronts	Free library; $99-299 premium component pack *Effort:* Low (copy-paste components, restyle freely) ⚠ NOASSERTION license; read before reuse; component licenses vary

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Hunyuan3D-2 Tencent-Hunyuan/Hunyuan3D-2 ★ 15.3k · Check NOASSERTION · Model · Fit 2/5	Diffusion models generating high-resolution 3D assets at scale. *Replaces:* Meshy, Tripo3D	Game studios, 3D asset marketplaces, product visualization firms	API/usage-based Premium plugins/add-ons	• Prop generation for indie mobile games • Product 3D models for ecommerce sellers • Asset packs for Blender hobby creators	Usage-based API, $0.20-1 per model *Effort:* High (GPU-heavy, license terms restrict uses) ⚠ NOASSERTION license; Tencent community license may restrict commercial use and regions
TRELLIS microsoft/TRELLIS ★ 14.2k · Permissive MIT · Model · Fit 2/5	Research code for scalable 3D asset generation using structured 3D latents. *Replaces:* Meshy, Tripo3D	3D research labs, AI product teams, game prototypers	API/usage-based Consulting/implementation	• Prototype 3D assets for indie game teams • Product mockup 3D models for retailers • 3D asset pipeline for AR apps	Free research code; $5-15k model integration *Effort:* High (research code, GPU-heavy, not productized) ⚠ MIT code; model weights and training data terms may differ
Open3D isl-org/Open3D ★ 14.2k · Check NOASSERTION · Library · Fit 2/5	Modern library for processing 3D data, including point clouds and meshes. *Replaces:* CloudCompare, MATLAB Lidar Toolbox	Robotics teams, surveying firms, 3D scanning studios	Consulting/implementation Training/courses	• Point cloud pipelines for surveying firms • 3D scan cleanup for heritage projects • Mesh processing for robotics labs	Free library; $5-15k 3D data pipeline build *Effort:* High (3D data expertise, heavy dependencies) ⚠ NOASSERTION license; read first; check license terms before use
Mapbox-gl-js mapbox/mapbox-gl-js ★ 12.5k · Check NOASSERTION · Library · Fit 2/5	Browser library for interactive, customizable vector-tile maps using WebGL. *Replaces:* Google Maps Platform, ArcGIS JS API	Store locator builders, logistics apps, real estate map teams	Consulting/implementation API/usage-based	• Store locator maps for retail chains • Property map search for real estate sites • Delivery route maps for logistics apps	Free library; $3-10k map feature build *Effort:* Medium (license changes, token billing dependency) ⚠ NOASSERTION; Mapbox v2 proprietary license; token billing applies
Nerfstudio nerfstudio-project/nerfstudio ★ 12.2k · Permissive Apache-2.0 · Framework · Fit 2/5	Collaboration-friendly studio for NeRF research and 3D scene reconstruction. *Replaces:* Luma AI, Polycam	Research labs, 3D capture studios, AR developers	Consulting/implementation Training/courses	• NeRF scans for real estate virtual tours • Heritage site 3D capture for museums • Product scene capture for ecommerce studios	Free framework; $3-10k NeRF capture pipeline *Effort:* High (GPU-heavy, research-grade tooling) ⚠ Apache-2.0; NeRF research code; GPU costs and capture rights
Zdog metafizzy/zdog ★ 10.7k · Check NONE · Library · Fit 2/5	Small JavaScript pseudo-3D engine drawing flat, rounded shapes on canvas and SVG.	Web designers, creative coders, marketing sites	Consulting/implementation Training/courses	• Animated logo badges for brand sites • Interactive product icons for ecommerce • Playful 3D illustrations for kids' apps	Free library; $800-2500 animated logo build *Effort:* Low (small engine, art-direction heavy) ⚠ NONE license; read first; dated library, check license terms
3d-force-graph vasturiano/3d-force-graph ★ 6.5k · Permissive MIT · Library · Fit 2/5	Embeddable 3D force-directed graph component built on ThreeJS and WebGL. *Replaces:* Gephi Web, Kumu, KeyLines	Data teams building network visualization dashboards	Consulting/implementation Premium plugins/add-ons	• Knowledge graph viewers for legal research teams • Supply chain network dashboards for logistics • Citation network explorers for academic publishers	$2-8k per custom graph integration project *Effort:* Low (MIT, embeddable, minimal config needed)
Git-city srizzon/git-city ★ 6.0k · AGPL AGPL-3.0 · App · Fit 2/5	Renders a GitHub profile as an interactive 3D pixel-art city.	Developer communities and technical recruiting teams	Premium plugins/add-ons Agency service	• Pixel city badges for hackathon organizers • Developer profile widgets for recruiting agencies • Engineering team showcase pages for conferences	$19-49/mo per team branded city page *Effort:* Medium (GitHub API limits, branding, AGPL hosting) ⚠ AGPL: publish server-side modifications; GitHub API terms apply

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Engine galacean/engine ★ 5.9k · **Permissive** MIT · Framework · Fit 2/5	TypeScript WebGL engine for 2D and 3D apps with physics and animation. *Replaces:* Unity WebGL, PlayCanvas, Cocos Creator	Web game studios and interactive marketing teams	Consulting/implementation Agency service	• Product configurators for furniture retailers • WebGL ad experiences for car brands • Browser game prototypes for indie studios	$3-15k per interactive 3D web project *Effort:* Medium (Engine needs editor and tooling built around it) ⚠ MIT fine; project name is a known brand, avoid it
Spritejs spritejs/spritejs ★ 5.4k · **Permissive** MIT · Library · Fit 2/5	Cross-platform 2D graphics library for high-performance canvas and WebGL scenes. *Replaces:* Konva, PixiJS, Fabric.js	Frontend teams building interactive 2D data graphics	Consulting/implementation Agency service	• Floor plan editors for property managers • Animated charts for fintech dashboards • Canvas map overlays for logistics teams	$2-6k per canvas integration project *Effort:* Medium (Library needs UI layer and docs)
Silk.NET dotnet/Silk.NET ★ 5.3k · **Permissive** MIT · Library · Fit 2/5	C# bindings for OpenGL, Vulkan, OpenAL, SDL, WebGPU and other native APIs.	.NET developers building games or graphics tools	Consulting/implementation Training/courses	• Vulkan rendering layers for .NET game studios • OpenXR tooling for industrial training • WebGPU bindings for .NET visualization tools	$3-10k per native graphics integration *Effort:* Medium (Bindings only, engine must be built atop)
Magnum mosra/magnum ★ 5.2k · **Check** NOASSERTION · Library · Fit 2/5	Lightweight modular C++11 graphics middleware for games and visualization. *Replaces:* Ogre3D, bgfx	C++ studios building custom renderers or visualization tools	Consulting/implementation Setup + support retainer	• Embedded 3D viewers for industrial equipment makers • Scientific visualization tools for research labs • Lightweight game prototype renderers for indie studios	$5-20k per custom renderer integration *Effort:* High (C++ middleware, needs graphics expertise) ⚠ NOASSERTION: read license first; C++ build and platform complexity

AI Agent Frameworks · 34

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Langflow langflow-ai/langflow ★ 156.4k · **Permissive** MIT · Platform · Fit 4/5	Visual drag-and-drop builder for AI agents and RAG workflows *Replaces:* Zapier, Voiceflow, Relevance AI, Flowise	AI teams and agencies prototyping agents	Managed hosting Consulting/implementation Agency service	• Agent builders for marketing agencies • RAG chatbots for law firms • Workflow templates for HR teams *Angle:* Visual AI workflow hosting for agencies	$30-150/mo per workspace *Effort:* Medium (Docker app, UI branding possible, multi-user maturing) ⚠ Langflow is owned by IBM/DataStax; trademark applies
OpenHands OpenHands/OpenHands ★ 92.9k · **Permissive** MIT · Platform · Fit 4/5	AI software development agent platform with sandboxed runtime and web UI *Replaces:* Devin, GitHub Copilot Agent, Cursor	Software teams and engineering managers	Managed hosting Setup + support retainer Consulting/implementation	• Issue-fixing agents for small dev shops • Legacy code migration for agencies • Automated PR reviewer for startups *Angle:* Hosted AI coding agent for dev teams	$30-99/mo per seat *Effort:* Medium (Docker-based, needs sandbox infra and LLM keys) ⚠ Core is MIT but enterprise directory is separate license; LLM costs
Hermes-agent NousResearch/hermes-agent ★ 261.4k · **Permissive** MIT · Framework · Fit 3/5	Personal AI agent framework with memory and self-improvement, per its tagline. *Replaces:* Lindy, Rabbit, custom GPTs	Individuals and teams wanting a private personal agent	Managed hosting Setup + support retainer	• Private agents for solo consultants • Research assistants for journalists • Self-hosted agents for small law firms	$15-30/mo per user, managed private agent *Effort:* Medium (Agent framework, needs UX and onboarding work) ⚠ Hermes and Nous are known brands; avoid naming them in rebrand
AutoGPT Significant-Gravitas/AutoGPT ★ 187.9k · **Check** NOASSERTION · Platform · Fit 3/5	Platform for building, deploying, and running autonomous AI agents and workflows *Replaces:* Zapier, Make, n8n, Relevance AI	Developers and automation-focused teams	Managed hosting Consulting/implementation Setup + support retainer	• Agent workflows for marketing agencies • Lead research agents for recruiters • Back-office automations for e-commerce *Angle:* Hosted autonomous agent marketplace	$29-99/mo per workspace *Effort:* High (Heavy multi-service stack, polymorphic license) ⚠ Mixed licensing: Polyform Shield for platform parts; read before commercial use; AutoGPT is a brand

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Browser Use browser-use/browser-use ★ 120.2k · **Permissive** MIT · Library · Fit 3/5	Python library letting AI agents control a web browser *Replaces:* Zapier, UiPath, Selenium services, Apify	Automation developers and agencies	API/usage-based Consulting/implementation Agency service	• Web research agents for recruiters • Price monitors for e-commerce sellers • Form-filling bots for insurance brokers *Angle:* Browser automation agents for data entry	$0.05-0.50 per agent task *Effort:* High (Library, needs hosted browsers and queueing) ⚠ Anti-bot blocking and site terms; Browser Use is a brand
Orca stablyai/orca ★ 118.3k · **Permissive** MIT · App · Fit 3/5	Desktop and mobile app to run and manage a fleet of coding agents. *Replaces:* Devin, Cursor background agents, Factory	Developers running several coding agents in parallel	Managed hosting Premium plugins/add-ons	• Agent fleet dashboards for dev agencies • Parallel coding agents for QA teams • Remote agent control for solo founders	$20-60/mo per developer seat *Effort:* High (Desktop, mobile and remote runtime to maintain) ⚠ MIT fine; agents use users' own subscriptions, provider terms apply
Gemini-cli google-gemini/gemini-cli ★ 108.8k · **Permissive** Apache-2.0 · Tool · Fit 3/5	Open-source terminal AI agent powered by Google's Gemini models. *Replaces:* Claude Code, OpenAI Codex CLI, Cursor CLI	Developers wanting a terminal coding agent	White-label reseller Premium plugins/add-ons	• Terminal agent for internal engineering teams • Gemini CLI for data analysts • Coding agent setups for Google Cloud partners	$15-40/mo per seat, bring your own key *Effort:* Medium (Apache, but tied to Gemini API and branding) ⚠ Google trademarks in name; Gemini API terms apply to customers
Archify tt-a1i/archify ★ 94.4k · **Permissive** Apache-2.0 · Tool · Fit 3/5	Agent skill that turns ideas, plans or codebases into interactive diagrams. *Replaces:* Lucidchart, Miro, Whimsical	Engineering leads documenting systems and architectures	Premium plugins/add-ons Consulting/implementation	• Architecture diagrams for legacy migration consultants • Onboarding maps for SaaS engineering teams • System diagrams for security audit firms	$10-25/mo per seat; free open-source tier *Effort:* Low (Skill files, Apache, easy to repackage) ⚠ Apache: keep notices; Claude Code and Codex names are trademarks
OmniRoute cheaper-inference/OmniRoute ★ 85.3k · **Permissive** MIT · Platform · Fit 3/5	Self-hosted AI gateway routing one endpoint to hundreds of model providers with fallback. *Replaces:* OpenRouter, LiteLLM hosted, Portkey	Developers and teams cutting multi-model LLM costs	Managed hosting API/usage-based	• Multi-model gateway for indie SaaS builders • LLM cost routing for dev agencies • Quota-aware gateway for coding bootcamps	$49-199/mo per team, free self-host tier *Effort:* Medium (Multi-provider config, needs billing and auth layer) ⚠ Provider terms vary; verify free-tier and model claims before selling
Hyperframes heygen-com/hyperframes ★ 80.4k · **Permissive** Apache-2.0 · Tool · Fit 3/5	Renders HTML into video files, designed for AI agents to drive. *Replaces:* Creatomate, Synthesia, Remotion Cloud	Marketing teams automating templated video output	API/usage-based Managed hosting	• Templated social video for ecommerce brands • Automated product demo videos for SaaS • Localized promo videos for real estate agencies	$0.05-0.20 per rendered minute, usage-based *Effort:* Medium (Apache, but rendering needs queueing and scaling) ⚠ HeyGen is a known brand; avoid implying affiliation
Ai-job-search ai-job-search-dev/ai-job-search ★ 70.2k · **Permissive** MIT · Tool · Fit 3/5	Local Claude Code framework for evaluating jobs, tailoring CVs and prepping interviews. *Replaces:* Teal, Jobscan, Resume.io	Job seekers and career coaches tailoring applications	Setup + support retainer Premium plugins/add-ons	• CV tailoring for nurses changing careers • Interview prep for junior software engineers • Application pipelines for executive recruiters	$29-79/mo per job seeker, or $299 setup *Effort:* Medium (Needs Claude Code; non-technical onboarding required) ⚠ MIT; needs Claude subscription; personal data handling rules apply
CrewAI crewAIInc/crewAI ★ 60.6k · **Permissive** MIT · Framework · Fit 3/5	Python framework for orchestrating role-playing autonomous AI agent teams *Replaces:* Zapier, Relevance AI, Lindy, Make	AI developers and automation agencies	Consulting/implementation Managed hosting Agency service	• Content crews for marketing agencies • Lead research crews for B2B sales • Report-writing crews for consultants *Angle:* Packaged AI crews for marketing tasks	$2-8k per agent crew build *Effort:* High (Framework, enterprise platform is hosted separately) ⚠ CrewAI is a trademark; enterprise features are paid
Nanobot HKUDS/nanobot ★ 49.9k · **Permissive** MIT · App · Fit 3/5	Lightweight open-source personal AI agent you run on your own machine. *Replaces:* Poe, custom GPTs	Developers wanting a self-hosted personal assistant	Managed hosting Setup + support retainer	• Private assistants for solo consultants • Self-hosted agents for small clinics • Operations bots for real estate agents	$10-20/mo per user, managed hosting *Effort:* Medium (Lightweight core, needs multi-user auth and billing) ⚠ MIT: keep notices; generic name, trademark risk low

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
CowAgent zhayujie/CowAgent ★ 47.8k · **Permissive** MIT · App · Fit 3/5	Multi-channel personal AI assistant that plans tasks, runs tools and remembers. *Replaces:* Intercom Fin, Chatbase, Poe	SMBs deploying chat assistants across messaging apps	Managed hosting White-label reseller	• Multi-channel support bots for dental clinics • Internal knowledge assistants for law firms • Lead-capture assistants for real estate agencies	$29-99/mo per business, managed hosting *Effort:* Medium (Channel setup, branding and onboarding needed) ⚠ MIT: keep notices; messaging channel APIs have own terms and approvals
Agno agno-agi/agno ★ 43.1k · **Permissive** Apache-2.0 · Framework · Fit 3/5	Python framework and runtime for building and serving multi-agent AI systems *Replaces:* Relevance AI, Zapier, Lindy	AI developers, small product teams	Consulting/implementation Managed hosting Agency service	• Support agents for e-commerce brands • Research agents for hedge funds • Internal copilots for HR teams *Angle:* Agent-as-a-service for vertical niches	$3-10k per agent project *Effort:* High (Framework with runtime, own frontend required) ⚠ Fast-changing project; Agno name was formerly Phidata
Mastra mastra-ai/mastra ★ 29.4k · **Check** NOASSERTION · Framework · Fit 3/5	TypeScript framework for building AI agents, workflows, and RAG apps *Replaces:* LangChain, Vercel AI SDK, Relevance AI	TypeScript product teams	Consulting/implementation Agency service Training/courses	• Agent features for Next.js SaaS • Internal copilots for ops teams • Chat agents for fintech startups *Angle:* TypeScript agent hosting for SaaS builders	$3-10k per agent build *Effort:* High (Framework, no packaged end product) ⚠ Elastic-style license on enterprise folders; verify before resale
Letta letta-ai/letta ★ 25.4k · **Permissive** Apache-2.0 · Platform · Fit 3/5	Server for stateful AI agents with long-term memory and tool use *Replaces:* Character.ai, Replika, OpenAI Assistants	AI app developers	Managed hosting API/usage-based Consulting/implementation	• Memory-enabled tutors for language schools • Companion bots for wellness apps • Long-term assistants for sales reps *Angle:* Memory-backed AI companions platform	$0.01-0.05 per agent message *Effort:* High (API server, no end-user UI to rebrand) ⚠ Letta is a brand; project formerly MemGPT
ECC affaan-m/ECC ★ 298.9k · **Permissive** MIT · Tool · Fit 2/5	Curated skills, memory and security configs for Claude Code, Codex and Cursor. *Replaces:* Cursor rules marketplaces, Claude Code training packs	Engineering teams standardizing AI coding agent setups	Training/courses Consulting/implementation	• Claude Code setup kits for agencies • AI coding standards for fintech teams • Agent config packs for bootcamp graduates	$29-99/mo per team, config updates included *Effort:* Low (Plain markdown and config, easy to repackage) ⚠ MIT: keep notices; Claude, Codex, Cursor names are trademarks; check bundled content
Deepseek-harness deepseek-ai/deepseek-harness ★ 275.5k · **Permissive** MIT · Framework · Fit 2/5	unclear project; plugin-based agent harness, per its one-line description.	Developers wanting a plugin-based agent runtime	Consulting/implementation Setup + support retainer	• Plugin-based agent runtime for SaaS support teams • Internal assistants for accounting firms • Customer service agents for ecommerce stores	$1-3k per agent integration project *Effort:* Medium (Scope unclear, verify architecture before planning) ⚠ DeepSeek is a known brand; official-looking org name, trademark risk
Ponytail DietrichGebert/ponytail ★ 186.2k · **Permissive** MIT · Tool · Fit 2/5	Prompt plugin pushing AI coding agents toward minimal, lean code output.	Teams wanting leaner AI-generated code	Premium plugins/add-ons Training/courses	• Lean code rules for startup engineering teams • Review tuning for software agencies • Minimal-output presets for bootcamps	$9-19/mo per seat, team presets *Effort:* Low (Prompt and plugin content, easy to rebrand) ⚠ MIT terms to verify; agent platform names are trademarks
LangChain langchain-ai/langchain ★ 149.2k · **Permissive** MIT · Framework · Fit 2/5	Python and JS framework for building LLM-powered agents and chains *Replaces:* OpenAI Assistants API, Dust, Voiceflow	AI developers	Consulting/implementation Training/courses Agency service	• LLM app development for insurance firms • Agent audits for SaaS startups • LangChain workshops for enterprise teams *Angle:* Agent development agency services	$150-250/hr consulting *Effort:* High (Framework, you write the product) ⚠ LangChain is a trademark; fast-changing APIs

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Ruflo ruvnet/ruflo ★ 81.1k · Permissive MIT · Platform · Fit 2/5	Multi-agent swarm platform with memory, federation and vector RAG, per its README. *Replaces:* CrewAI hosted, LangGraph Cloud	Teams building multi-agent AI workflows	Consulting/implementation Setup + support retainer	• Multi-agent workflows for accounting firms • Agent swarms for ecommerce catalog operations • Vector RAG assistants for law practices	$2-5k per agent deployment setup *Effort:* High (Large feature surface, needs scoping and hardening) ⚠ Marketing-heavy README; verify features before promising customers
Ai-agents-for-beginners microsoft/ai-agents-for-beginners ★ 79.1k · Permissive MIT · Content · Fit 2/5	Free 18-lesson course teaching how to build AI agents, from Microsoft. *Replaces:* Paid AI agent bootcamps, Udemy agent courses	Developers and bootcamps learning AI agent building	Training/courses Content/membership	• Agent-building course for bootcamp graduates • AI agent training for corporate IT staff • Agent workshops for Azure partner firms	$199-499 per seat, cohort course *Effort:* Low (Lessons are content, rewrite needed for rebrand) ⚠ MIT; remove Microsoft and Azure marks and references
Ai-engineering-from-scratch rohitg00/ai-engineering-from-scratch ★ 77.3k · Permissive MIT · Content · Fit 2/5	Open course building AI engineering concepts from scratch, with code. *Replaces:* Paid AI engineering courses, Coursera ML tracks	Career-changing developers learning practical AI engineering	Training/courses Content/membership	• Hands-on AI course for career changers • AI engineering training for corporate teams • AI engineering cohort for bootcamp grads	$99-299 per learner, or $19/mo membership *Effort:* Low (Course content, rewrite lessons to rebrand) ⚠ MIT: keep attribution; content easy to copy, little moat
MetaGPT FoundationAgents/MetaGPT ★ 71.2k · Permissive MIT · Framework · Fit 2/5	Multi-agent framework that simulates a software company with role-based AI agents *Replaces:* Devin, Cursor, Replit Agent	AI researchers and developers	Consulting/implementation Training/courses Agency service	• Prototype-generation service for founders • Multi-agent workshops for universities • Spec-to-app MVPs for agencies *Angle:* AI software team service for prototypes	$2-5k per MVP *Effort:* High (Research framework, output quality inconsistent) ⚠ Heavy LLM token costs; results need human review
Oh-my-openagent code-yeongyu/oh-my-openagent ★ 70.8k · Check NOASSERTION · Tool · Fit 2/5	unclear project; keyword-triggered agent orchestration plugin, per its tagline.	Developers using agent harnesses for coding	Premium plugins/add-ons Consulting/implementation	• Keyword-triggered agent presets for dev shops • Graph-based workflows for software consultancies • Agent setup for coding bootcamps	$10-25/mo per seat for preset packs *Effort:* Medium (Vague scope; NOASSERTION license needs review) ⚠ NOASSERTION: read license first; vague scope, verify before use
AutoGen microsoft/autogen ★ 61.7k · Permissive CC-BY-4.0 · Framework · Fit 2/5	Microsoft framework for building multi-agent AI applications *Replaces:* OpenAI Assistants, Copilot Studio, Relevance AI	Enterprise AI developers	Consulting/implementation Training/courses Agency service	• Agent pipelines for finance ops • Multi-agent research for consultancies • Support triage agents for SaaS *Angle:* Multi-agent automation for back offices	$180-300/hr consulting *Effort:* High (Framework, maintenance mode shift to Microsoft Agent Framework) ⚠ Repo in maintenance; CC-BY-4.0 on docs, code MIT; Microsoft trademark
Herdr herdrdev/herdr ★ 49.0k · Permissive Apache-2.0 · Platform · Fit 2/5	unclear project; runtime for running coding agents, per its tagline. *Replaces:* Devin, Factory Droids	Teams running long-lived coding agents	Managed hosting Consulting/implementation	• Hosted coding-agent runtimes for dev shops • Long-running agents for QA automation teams • Sandboxed agent runners for bootcamps	$50-300/mo per team runtime hosting *Effort:* Medium (Vague scope, verify features before planning) ⚠ Apache: keep notices; scope unclear, verify before promising
LangGraph langchain-ai/langgraph ★ 44.6k · Permissive MIT · Framework · Fit 2/5	Library for building stateful, long-running agent workflows as graphs *Replaces:* Zapier, Relevance AI, OpenAI Assistants	AI engineers	Consulting/implementation Training/courses Agency service	• Approval-flow agents for insurance firms • Customer support agents for telcos • Research agents for law firms *Angle:* Managed stateful agent hosting	$180-280/hr consulting *Effort:* High (Framework, you build UI and hosting) ⚠ LangGraph Platform hosting is commercial; LangChain trademark
Openhuman tinyhumansai/openhuman ★ 42.6k · GPL GPL-3.0 · Platform · Fit 2/5	Low-cost agent harness that claims 500 agents on a small VPS. *Replaces:* Relevance AI, Lindy	Teams running many cheap automated agents	Managed hosting Setup + support retainer	• Cheap agent hosting for small ecommerce shops • Automated support agents for indie SaaS • Agent fleets for market research agencies	$29-99/mo per hosted agent workspace *Effort:* Medium (GPL, performance claims unverified, needs hardening) ⚠ GPL-3.0: distributed apps ship source; performance claims unverified

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Agents wshobson/agents ★ 42.3k · Permissive MIT · Library · Fit 2/5	Markdown library of agent plugins and skills adapted to many coding tools. *Replaces:* Cursor rules marketplaces, paid prompt packs	Developers standardizing agent plugins across tools	Marketplace Premium plugins/add-ons	• Agent plugin packs for dev agencies • Cross-tool skill kits for engineering teams • Eval-tested prompt packs for consultancies	$15-49/mo per team premium pack *Effort:* Low (Markdown generators, MIT, easy to repackage) ⚠ MIT: keep notices; many tool names are trademarks
Oh-my-claudecode Yeachan-Heo/oh-my-claudecode ★ 40.7k · Permissive MIT · Tool · Fit 2/5	Multi-agent orchestration layer for Claude Code, aimed at teams. *Replaces:* Factory Droids, Cursor background agents	Engineering teams using Claude Code at scale	Premium plugins/add-ons Consulting/implementation	• Claude Code orchestration for dev agencies • Multi-agent review pipelines for fintech teams • Agent setup services for startups	$25-75/mo per team orchestration license *Effort:* Medium (Depends on Claude Code; needs docs and support) ⚠ Claude is Anthropic's trademark; depends on Claude Code terms
Ai-website-cloner-template JCodesMore/ai-website-cloner-template ★ 38.8k · Permissive MIT · Starter · Fit 2/5	Template that clones a website's layout with AI coding agents in one command. *Replaces:* Website migration agencies, Webflow migration services	Agencies migrating legacy sites to modern frontends	Agency service Setup + support retainer	• Site migration for dentists retiring old sites • Modern rebuilds for independent restaurant websites • Rebuilds for local nonprofit organizations	$500-2000 per migrated site, fixed fee *Effort:* Low (One-command template, MIT, easy to wrap) ⚠ Cloning live sites raises copyright and trademark issues; get permission
Pydantic AI pydantic/pydantic-ai ★ 21.1k · Permissive MIT · Framework · Fit 2/5	Typed Python agent framework built by the Pydantic team *Replaces:* LangChain, OpenAI Assistants	Python AI developers	Consulting/implementation Training/courses Agency service	• Typed agent APIs for banks • Structured extraction pipelines for logistics • Agent code review for startups *Angle:* Typed agent builds for fintech clients	$180-250/hr consulting *Effort:* High (Library, no product layer) ⚠ Pydantic is a trademark; fast-changing APIs

AI Chat Interfaces · 25

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Open WebUI open-webui/open-webui ★ 158.0k · Check NOASSERTION · App · Fit 5/5	Self-hosted AI chat interface supporting Ollama and OpenAI-compatible APIs *Replaces:* ChatGPT Team, Claude Team, Copilot, Perplexity	Teams, enterprises, privacy-minded firms	Managed hosting Setup + support retainer White-label reseller	• Private AI chat for law firms • Secure AI workspace for clinics • Multilingual AI portal for schools *Angle:* Branded ChatGPT for enterprises with SSO	$8-25/user/mo *Effort:* High (Branding clause bars rebranding beyond 50 users) ⚠ Custom license restricts removing branding over 50 users; read first
LibreChat LibreChat-AI/LibreChat ★ 46.8k · Permissive MIT · App · Fit 5/5	Self-hosted ChatGPT-style interface supporting many AI providers, agents and MCP *Replaces:* ChatGPT Team, Claude Team, Poe, Copilot	Teams, enterprises, universities	Managed hosting White-label reseller Setup + support retainer	• Multi-model AI chat for universities • Private AI workspace for law firms • AI portal for agencies *Angle:* Multi-model chat SaaS with usage billing	$10-25/user/mo *Effort:* Medium (MIT, multi-user, auth and theming) ⚠ MIT; keep attribution, provider API costs apply
NextChat ChatGPTNextWeb/NextChat ★ 88.9k · Permissive MIT · App · Fit 4/5	Cross-platform multi-model AI chat client with prompt templates and self-hosting *Replaces:* ChatGPT Team, Poe, TypingMind, Claude.ai	Small teams, resellers of LLM access	White-label reseller Managed hosting Mobile app on top	• Branded ChatGPT for law firms • Shared AI chat for schools • Prepaid AI chat for Chinese-speaking users *Angle:* Resell API access via branded chat UI	$5-20/mo per user *Effort:* Low (Easy rebrand, deploys in one click, single-tenant) ⚠ MIT; LLM provider terms apply; mention of GPT trademarks
LobeChat lobehub/lobehub ★ 84.3k · Check NOASSERTION · Platform · Fit 4/5	AI chat workspace with agents, plugins, knowledge base, and multi-user support *Replaces:* ChatGPT Team, Poe, Claude Projects, Glean	Teams wanting a branded AI workspace	Managed hosting White-label reseller Setup + support retainer	• Branded AI workspace for agencies • Private AI hub for law firms • Agent marketplace for creators *Angle:* Consumer AI chat app with subscriptions	$10-30/mo per seat *Effort:* Medium (Polished app, Docker deploy, license limits rebranding) ⚠ LobeHub license adds commercial restrictions beyond Apache; read terms; trademark

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Gpt4all nomic-ai/gpt4all ★ 77.3k · Permissive MIT · App · Fit 4/5	Desktop app for running open-source LLMs privately on consumer hardware. *Replaces:* ChatGPT Plus, LM Studio, Jan	Privacy-focused teams running offline chat assistants	White-label reseller Setup + support retainer	• Offline document chat for law firms • Private chat for clinical staff • Local assistant for field engineers	$15-30 per seat per month, offline license *Effort:* Medium (Desktop app, needs branding and model curation) ⚠ Nomic is a known brand; bundled model licenses vary, check each
Cherry Studio CherryHQ/cherry-studio ★ 53.3k · AGPL AGPL-3.0 · App · Fit 3/5	Desktop AI client supporting many LLM providers, agents, and knowledge bases *Replaces:* ChatGPT Desktop, TypingMind, Poe	Power users and small teams	Mobile app on top Setup + support retainer Premium plugins/add-ons	• Branded AI desktop for consultants • Localized AI client for Korean teams • Prompt library bundles for marketers *Angle:* Branded desktop AI client for teams	$5-15/mo per seat *Effort:* Medium (Electron desktop app, rebrand needs builds per OS) ⚠ AGPL-3.0: distributed modifications must publish source; Cherry Studio is a brand
Text Generation WebUI oobabooga/textgen ★ 47.7k · AGPL AGPL-3.0 · App · Fit 3/5	Gradio-based web UI for running local LLMs with many backends *Replaces:* LM Studio, ChatGPT, Ollama UIs	Privacy-focused hobbyists and developers	Setup + support retainer Managed hosting Consulting/implementation	• Private LLM boxes for clinics • GPU hosting for local-LLM hobbyists • On-prem chat for small law firms *Angle:* Hosted GPU chat instances for hobbyists	$500-2k per private setup *Effort:* Medium (Python install, single-user, minimal multi-tenant) ⚠ AGPL-3.0: publish server-side changes; formerly text-generation-webui
Jan janhq/jan ★ 45.6k · Check NOASSERTION · App · Fit 3/5	Offline desktop app that runs local LLMs as a ChatGPT alternative *Replaces:* LM Studio, ChatGPT Desktop, Ollama	Privacy-focused individuals and teams	Mobile app on top Setup + support retainer Hardware kits/assembly	• Offline AI for journalists • Preinstalled AI laptops for lawyers • Local AI for medical offices *Angle:* Offline AI desktop app for regulated industries	$5-15/mo or one-time $49 *Effort:* Medium (Desktop app, rebrand needs builds per OS) ⚠ Metadata NOASSERTION; actual is Apache-2.0/AGPL mixed, check; Jan is a brand
Chatbox chatboxai/chatbox ★ 42.3k · GPL GPL-3.0 · App · Fit 3/5	Cross-platform desktop AI chat client for many LLM providers *Replaces:* TypingMind, ChatGPT Desktop, Poe	Individuals and small teams	Mobile app on top White-label reseller Premium plugins/add-ons	• Branded AI client for language tutors • Prompt-packaged chat for sales teams • Desktop AI for translators *Angle:* Desktop AI client with pro features	$5-12/mo per user *Effort:* Medium (Electron app, rebrand requires builds per platform) ⚠ GPL-3.0: distributed apps must ship source; Chatbox is a brand
Chatbot UI mckaywrigley/chatbot-ui ★ 33.3k · Permissive MIT · App · Fit 3/5	Next.js multi-model AI chat interface with Supabase backend *Replaces:* ChatGPT Team, TypingMind, Poe	Small teams, resellers	White-label reseller Managed hosting Setup + support retainer	• AI chat for private tutors • Branded assistant for realtors • Prepaid chat for freelancers *Angle:* White-label AI chat for agencies' clients	$8-25/mo per user *Effort:* Medium (Next.js and Supabase, rebrandable, needs auth hardening) ⚠ MIT; repo no longer actively maintained; Supabase setup required
Ekko-studio EKKOLearnAI/ekko-studio ★ 11.7k · Check NOASSERTION · App · Fit 3/5	Local-first AI workspace for multi-agent chat, coding and visual workflows. *Replaces:* Notion AI, Cursor, Flowise Cloud	Teams wanting private multi-agent AI workspaces	White-label reseller Setup + support retainer	• Private AI workspace for legal teams • Visual agent workflows for marketing agencies • Local coding assistant for small dev shops	$20-40/mo per seat, desktop license *Effort:* High (Desktop and web builds, multi-agent, heavy scope) ⚠ NOASSERTION: read license first; desktop and web add complexity
Hugging Face Chat UI huggingface/chat-ui ★ 11.0k · Permissive Apache-2.0 · App · Fit 3/5	SvelteKit chat interface powering HuggingChat, supports many models and tools *Replaces:* ChatGPT, Poe, Claude.ai	Teams hosting open-model chat	Managed hosting White-label reseller Setup + support retainer	• Open-model chat for universities • Private chat for biotech labs • Branded assistant for government agencies *Angle:* Hosted open-model chat for privacy-conscious firms	$10-25/mo per seat *Effort:* Medium (SvelteKit app, MongoDB needed, themable) ⚠ HuggingChat branding and trademark; needs inference backend
Rikkahub rikkahub/rikkahub ★ 8.7k · AGPL AGPL-3.0 · App · Fit 3/5	Android app for chatting with multiple LLM providers using your own keys. *Replaces:* ChatGPT mobile, Poe, Chatbox	Android users wanting one app for many AI models	Setup + support retainer Premium plugins/add-ons	• Multi-model chat app for Android power users • Model-switching assistant for translators • Branded AI chat for language schools	$4.99 one-time on Play Store, or $3/mo sync *Effort:* Medium (Android app, needs own branding and backend) ⚠ AGPL: publish modifications; app store and trademark rules apply

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Big-AGI enricoros/big-AGI ★ 7.2k · **Permissive** MIT · App · Fit 3/5	Multi-model AI chat suite with personas, side-by-side Beam answers, and voice *Replaces:* ChatGPT Team, TypingMind, Poe	Power users and small AI-forward teams	White-label reseller Managed hosting Setup + support retainer	• Beam multi-model comparison for researchers • Branded AI chat for consultancies • Persona assistants for coaches *Angle:* Power-user AI workspace subscriptions	$10-25/mo per seat *Effort:* Medium (Next.js app, themable, single-tenant) ⚠ MIT with cloud features separate; big-AGI is a brand
Chatgpt-web-midjourney-proxy Dooy/chatgpt-web-midjourney-proxy ★ 6.8k · **Permissive** MIT · App · Fit 3/5	Web and desktop chat UI aggregating ChatGPT, Midjourney and other AI services. *Replaces:* Poe, ChatGPT Plus, Midjourney subscriptions	Creators wanting multiple AI tools in one place	White-label reseller Setup + support retainer	• Multi-AI workspace for small marketing agencies • Image and chat bundles for design freelancers • Branded AI portal for bilingual clients	$10-20/mo per user, bring your own keys *Effort:* Medium (Many proxies, needs cleanup and auth layer) ⚠ Midjourney and Suno ToS restrict proxying; trademarks of bundled services
Locally-uncensored PurpleDoubleD/locally-uncensored ★ 3.6k · **AGPL** AGPL-3.0 · App · Fit 3/5	Free desktop app for local chat, image and video generation, and a coding agent. *Replaces:* ChatGPT Plus, Midjourney, Runway	Privacy-minded creators wanting offline AI tools	Setup + support retainer Premium plugins/add-ons	• Offline image generation for indie game artists • Private AI studio for freelance copywriters • Local video drafts for small agencies	Free core; $29 one-time setup license *Effort:* Medium (Desktop app, AGPL, needs branding and signing) ⚠ AGPL: publish server-side changes; model weights carry separate licenses
Clawpanel qingchencloud/clawpanel ★ 2.9k · **Check** NOASSERTION · App · Fit 3/5	Tauri desktop panel for managing OpenClaw and Hermes agents, with built-in assistant. *Replaces:* Agent management consoles, hosted agent dashboards	Chinese-speaking teams managing local AI agents	Setup + support retainer White-label reseller	• Agent control panels for Chinese SMB operators • Local agent install services for Mandarin users • Multi-language agent dashboards for regional resellers	$39-99 per license, or setup service *Effort:* Medium (Desktop app, 11 languages built in, needs rebrand) ⚠ NOASSERTION: read license first; OpenClaw and Hermes names are brands
Atomic-Chat AtomicBot-ai/Atomic-Chat ★ 2.0k · **Check** NOASSERTION · App · Fit 3/5	Local desktop AI app and inference engine for running open-weight LLMs offline. *Replaces:* LM Studio, Ollama desktop, Jan	Privacy-focused users running local models offline	Setup + support retainer White-label reseller	• Offline assistants for clinical staff • Local document review for legal teams • Private chat tools for remote field crews	$15-35 per seat, offline license *Effort:* Medium (Inference engine plus app, hardware support varies) ⚠ NOASSERTION: read license first; model weights carry their own licenses
Neo-chat u14app/neo-chat ★ 1.9k · **Permissive** MIT · App · Fit 3/5	Local-first AI chat workspace with agents, RAG, voice, memory and artifacts. *Replaces:* ChatGPT Team, Notion AI, Poe	Teams wanting a private ChatGPT-style workspace	White-label reseller Setup + support retainer	• Private RAG chat for regional law firms • Voice-first assistants for field technicians • Memory-enabled chat for consultant practices	$15-30/mo per seat, self-hosted or managed *Effort:* Medium (Feature-rich, needs RAG setup and onboarding) ⚠ MIT: keep notices; avoid competitor trademarks in marketing
Dive OpenAgentPlatform/Dive ★ 1.8k · **Permissive** MIT · App · Fit 3/5	Desktop app that hosts MCP servers and connects them to function-calling LLMs. *Replaces:* Claude Desktop, Cherry Studio, Chatbox	Developers and teams using MCP tools with LLMs	Setup + support retainer Premium plugins/add-ons	• MCP desktop client for accounting teams • Tool-connected chat for logistics dispatchers • MCP setup kits for IT helpdesks	$10-25/mo per seat, or $1.5k setup *Effort:* Medium (Desktop app, MCP config and support needed) ⚠ MIT: keep notices; MCP and Claude names may be trademarks
X ant-design/x ★ 4.8k · **Check** NONE · Library · Fit 2/5	React UI components for building AI chat and assistant interfaces. *Replaces:* Vercel AI SDK UI kits, Stream Chat UI	React developers building AI chat interfaces	Consulting/implementation Premium plugins/add-ons	• Chat widgets for insurance quoting sites • Assistant UIs for hospital intake desks • Support chat kits for ecommerce teams	$2-8k per custom chat UI build *Effort:* Low (Component library, theming built in) ⚠ NONE license flagged; verify MIT; Ant Design is a known brand

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Langui CommandCodeAI/langui ★ 3.1k · **Permissive** MIT · Library · Fit 2/5	Open-source Tailwind components for building GPT and LLM app interfaces. *Replaces:* Tailwind UI, shadcn AI kits	Frontend developers building LLM app interfaces	Premium plugins/add-ons Consulting/implementation	• Chat component packs for SaaS startups • AI output widgets for analytics vendors • Tailwind kits for healthcare intake portals	$49-149 one-time premium component pack *Effort:* Low (Tailwind components, MIT, easy to restyle) ⚠ MIT: keep notices; components easy to copy, weak moat
Markstream-vue Simon-He95/markstream-vue ★ 3.1k · **Permissive** MIT · Library · Fit 2/5	Streaming Markdown renderers for AI apps, with Mermaid, KaTeX and code blocks. *Replaces:* Streamdown, react-markdown wrappers	Frontend teams rendering streamed LLM responses	Consulting/implementation Premium plugins/add-ons	• Streaming chat renderers for legal research tools • Math-heavy tutoring chat for edtech • Code explanation panels for documentation sites	$2-6k per chat rendering integration *Effort:* Low (Multi-framework, configurable, MIT, reusable)
Solid-glass deeplethe/solid-glass ★ 2.0k · **Permissive** MIT · Library · Fit 2/5	Design system for AI applications with glass-style material and tactile visuals. *Replaces:* Material UI, Chakra UI themes	Product teams styling AI apps with a distinct look	Premium plugins/add-ons Consulting/implementation	• Glass-style theme packs for fintech dashboards • Tactile UI kits for AI writing tools • Material design systems for AI meeting apps	$29-99 one-time theme pack license *Effort:* Low (Design tokens and components, theming needed) ⚠ MIT: keep notices; design system visuals may need custom work
Ant-design-x-vue wzc520pyfm/ant-design-x-vue ★ 1.8k · **Permissive** MIT · Library · Fit 2/5	Vue port of Ant Design X components for building AI chat interfaces. *Replaces:* Vuetify AI kits, Stream Chat Vue UI	Vue developers building AI chat interfaces	Consulting/implementation Premium plugins/add-ons	• Chat panels for Vue-based banking portals • AI assistant widgets for Nuxt agencies • Conversation UIs for Vue-based edtech tools	$2-6k per Vue chat UI integration *Effort:* Low (Component port, MIT, Ant Design theming needed) ⚠ Unofficial port; Ant Design is a known brand, check naming

AI Coding Assistants · 28

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Tabby TabbyML/tabby ★ 33.9k · **Check** NOASSERTION · App · Fit 4/5	Self-hosted AI code completion and chat server with IDE plugins *Replaces:* GitHub Copilot, Codeium, Tabnine	Companies wanting on-prem code AI	Managed hosting Setup + support retainer White-label reseller	• On-prem Copilot for banks • Code AI for European software firms • Private completion for agencies *Angle:* Self-hosted Copilot for regulated firms	$10-25/mo per seat *Effort:* Medium (Rust server and IDE plugins, needs GPU hosting) ⚠ Open-core: enterprise ee folder is non-OSS; Tabby is a trademark
Rtk rtk-ai/rtk ★ 85.8k · **Permissive** Apache-2.0 · Tool · Fit 3/5	CLI proxy that filters dev command output to cut LLM token usage. *Replaces:* Helicone, LLM cost middleware	Teams cutting AI coding agent token costs	Setup + support retainer Premium plugins/add-ons	• Token trimming for agencies on Claude Code • Cost controls for offshore dev teams • Output filters for CI-heavy shops	$15-40/mo per seat, support extra *Effort:* Low (Single Rust binary, easy to package) ⚠ Apache: keep notices; savings claims need your own measurement
Cline cline/cline ★ 71.4k · **Permissive** Apache-2.0 · Tool · Fit 3/5	Autonomous coding agent running inside VS Code and CLI with tool permissions *Replaces:* Cursor, GitHub Copilot, Windsurf	Developers and dev teams	Setup + support retainer Training/courses Premium plugins/add-ons	• Cline setup for enterprise dev teams • Agent training for bootcamps • Compliance-ready coding agents for banks *Angle:* Agentic coding workflows for agencies	$20-40/mo per seat *Effort:* Medium (VS Code extension, rebrand needs marketplace publisher) ⚠ Cline is a trademark; LLM token costs borne by user
Goose aaif-goose/goose ★ 56.3k · **Permissive** Apache-2.0 · Tool · Fit 3/5	Extensible open-source AI agent that installs, executes, edits, and tests code with any LLM *Replaces:* Cursor, Devin, GitHub Copilot	Developers and platform engineering teams	Setup + support retainer Consulting/implementation Training/courses	• Goose workflows for DevOps teams • Agent extensions for data engineers • On-prem coding agent for regulated firms *Angle:* Developer agent deployments	$25-60/mo per seat *Effort:* Medium (Rust app with extension system, CLI and desktop) ⚠ Goose is now under Linux Foundation AAIF; trademark rules apply

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Aider Aider-AI/aider ★ 50.0k · **Permissive** Apache-2.0 · Tool · Fit 3/5	Terminal AI pair programmer that edits code in your Git repo *Replaces:* Cursor, GitHub Copilot, Windsurf	Command-line developers	Training/courses Consulting/implementation Setup + support retainer	• Aider workshops for dev teams • Legacy refactor service for agencies • Aider onboarding for CS bootcamps *Angle:* AI pair-programming consulting	$150-300 per training seat *Effort:* High (CLI tool, no UI to brand) ⚠ Aider is a brand; LLM costs paid by user
Continue continuedev/continue ★ 36.4k · **Permissive** Apache-2.0 · Tool · Fit 3/5	Open-source coding assistant for VS Code and JetBrains with custom models *Replaces:* GitHub Copilot, Cursor, Codeium	Dev teams wanting model control	Setup + support retainer Managed hosting Consulting/implementation	• Private Continue for banks • Air-gapped coding assistant for defense contractors • Custom model rollout for dev shops *Angle:* Private code assistant for enterprises	$15-30/mo per seat *Effort:* Medium (IDE extension with config, rebrand needs publisher accounts) ⚠ Continue is a trademark; hub features hosted by vendor
DeepSeek-Reasonix esengine/DeepSeek-Reasonix ★ 36.1k · **Permissive** MIT · Tool · Fit 3/5	Coding agent aimed at complex software engineering tasks, DeepSeek-oriented per name. *Replaces:* Claude Code, Cursor, Codex CLI	Developers wanting a cheaper model-backed coding agent	Premium plugins/add-ons Setup + support retainer	• Low-cost coding agent for offshore agencies • Reasoning-model coding tool for data science teams • Agent setup for Chinese-speaking dev shops	$15-30/mo per seat, bring your own API *Effort:* Medium (Agent tuning needed, model API dependency) ⚠ DeepSeek is a known brand; MIT fine, avoid implying endorsement
Code-review-graph tirth8205/code-review-graph ★ 32.6k · **Permissive** MIT · Tool · Fit 3/5	Local code graph that gives AI coding tools only the relevant parts of a repo. *Replaces:* Sourcegraph Cody context, Greptile	Engineering teams running AI code reviews on large repos	Premium plugins/add-ons Consulting/implementation	• Review context tools for monorepo teams • Code graph audits for legacy modernization firms • Large-repo onboarding maps for contractors	$20-50/mo per developer seat, team license *Effort:* Medium (Local CLI and MCP, needs CI integration) ⚠ MIT: keep notices; benchmark claims need your own verification
Serena oraios/serena ★ 31.2k · **Check** NOASSERTION · Tool · Fit 3/5	MCP toolkit giving coding agents semantic code retrieval and editing. *Replaces:* Sourcegraph, Cursor code search	Teams wiring semantic code tools into AI agents	Consulting/implementation Premium plugins/add-ons	• Semantic code editing for legacy PHP shops • Agent code tools for embedded firmware teams • Refactor assistants for mid-size SaaS teams	$1-3k per agent tooling integration *Effort:* Medium (MCP toolkit, needs docs and hosted option) ⚠ NOASSERTION: read license first; agent edits need human review
Qwen-code QwenLM/qwen-code ★ 29.1k · **Permissive** Apache-2.0 · Tool · Fit 3/5	Open-source terminal coding agent built for Qwen models. *Replaces:* Claude Code, Gemini CLI, Codex CLI	Developers wanting a terminal coding agent on Qwen	White-label reseller API/usage-based	• Terminal agent for Asia-Pacific dev teams • Qwen-powered code review for agencies • Coding CLI for cost-sensitive startups	$10-25/mo per seat, bring your own key *Effort:* Medium (Tied to Qwen models; needs branding and support) ⚠ Apache: keep notices; Qwen is an Alibaba brand, avoid naming
Kilocode Kilo-Org/kilocode ★ 27.9k · **Permissive** MIT · Tool · Fit 3/5	All-in-one open-source agentic coding platform for building and shipping software. *Replaces:* Cursor, Windsurf, GitHub Copilot agent	Developers and teams adopting agentic coding	Premium plugins/add-ons Managed hosting	• Agentic coding seats for fintech teams • Custom coding agent setups for agencies • Managed coding agents for solo SaaS founders	$20-40/mo per seat, managed team hosting *Effort:* High (Large platform, brand and hosting work needed) ⚠ Kilo and Kilo Code are brand names; MIT fine, rename needed
Bolt.diy stackblitz-labs/bolt.diy ★ 20.1k · **Permissive** MIT · App · Fit 3/5	Community fork of Bolt that builds and deploys full-stack web apps from prompts with any LLM *Replaces:* Bolt.new, Lovable, v0, Replit Agent	Non-technical founders and small agencies	Managed hosting White-label reseller Agency service	• Prompt-to-app builder for local agencies • Landing page generator for coaches • MVP builder for solo founders *Angle:* AI app builder SaaS	$20-50/mo per builder *Effort:* Medium (WebContainer app, needs auth and billing layer) ⚠ Bolt trademark is StackBlitz; WebContainers need commercial license for hosting

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Paradev ParadevAI/Paradev ★ 16.1k · **Permissive** MIT · App · Fit 3/5	Open-source desktop app to run many coding agents in parallel on your own subscriptions. *Replaces:* Conductor, OpenAI Codex app	Developers wanting parallel AI coding agents locally	Setup + support retainer Premium plugins/add-ons	• Parallel agent workflows for agency dev teams • Local agent orchestration for consultants • Coding agent setups for bootcamp cohorts	$15-40/mo per seat, desktop license *Effort:* High (Parallel orchestration, desktop packaging, heavy QA) ⚠ MIT: keep notices; agent subscriptions have their own provider terms
Agent-orchestrator OrchestratorInc/agent-orchestrator ★ 14.2k · **Permissive** Apache-2.0 · App · Fit 3/5	Plans, runs and supervises coding agent fleets from task to merged pull request. *Replaces:* Devin, Factory, Cursor background agents	Engineering managers running many agents at once	Managed hosting Premium plugins/add-ons	• Agent PR pipelines for outsourcing firms • Supervised agent fleets for QA-heavy teams • Mobile agent monitoring for on-call engineers	$30-80/mo per team, managed hosting extra *Effort:* High (Desktop, iOS and Android apps to maintain) ⚠ Apache: keep notices; app store and agent provider terms to check
Codeburn getagentseal/codeburn ★ 11.7k · **Permissive** MIT · Tool · Fit 3/5	Free local tracker of AI coding token use and cost across many agents and tools. *Replaces:* Helicone, Langfuse cost dashboards, Datadog LLM	Engineering leads tracking AI coding spend	Premium plugins/add-ons Setup + support retainer	• AI spend reports for agencies billing clients • Coding cost audits for startup CFOs • Token budgets for bootcamp cohorts	Free core; $15-30/mo per team dashboard *Effort:* Low (Local CLI, MIT, easy to brand and extend) ⚠ MIT: keep notices; tracks many third-party tools, check each
Openrig mvschwarz/openrig ★ 8.7k · **Permissive** Apache-2.0 · Platform · Fit 3/5	Builds persistent teams of Claude Code and Codex agents with roles and shared context. *Replaces:* CrewAI, Relevance AI teams	Teams running multi-agent coding workflows	Managed hosting Consulting/implementation	• Agent teams for software outsourcing shops • Persistent review squads for fintech teams • Shared-context agents for small product studios	$25-60/mo per team workspace *Effort:* High (Multi-agent coordination, needs hardening and docs) ⚠ Apache: keep notices; Claude and Codex are trademarks
Kaku tw93/Kaku ★ 6.2k · **Permissive** MIT · App · Fit 3/5	Fast Mac terminal app designed to work well with AI coding tools. *Replaces:* iTerm2, Warp	Mac developers using AI coding tools in terminals	Premium plugins/add-ons White-label reseller	• Terminal presets for Mac pair programmers • AI-ready shells for macOS bootcamps • Terminal setup kits for Mac-based agencies	$10-20 one-time, or free with support plan *Effort:* Medium (Mac-only app, signing and notarization needed) ⚠ MIT: keep notices; Warp and iTerm2 are trademarks
Mirrord metalbear-co/mirrord ★ 5.4k · **Permissive** MIT · Tool · Fit 3/5	Runs local processes or agent environments as if inside a Kubernetes pod. *Replaces:* Telepresence, Tilt, Okteto	Platform and backend teams debugging Kubernetes services	Premium plugins/add-ons Consulting/implementation	• Local debugging for Kubernetes shops • Agent sandbox testing for AI platform teams • Staging alternatives for mid-size SaaS	$30-80/mo per engineer, team tier *Effort:* Medium (Works well, but needs K8s setup and support) ⚠ MIT: keep notices; cluster access and traffic data need security review
Desktop-cc-gui zhukunpenglinyutong/desktop-cc-gui ★ 4.6k · **Permissive** MIT · App · Fit 3/5	Tauri desktop client for Claude Code, Codex, Gemini and other coding engines. *Replaces:* Cursor, Warp AI, Chatbox	Developers switching between several coding engines	Premium plugins/add-ons Setup + support retainer	• Multi-engine client for agency dev teams • Coding GUI for non-terminal developers • Engine comparison desk for CTO evaluations	$12-25/mo per seat, desktop license *Effort:* Medium (Tauri app, many engines to test and maintain) ⚠ MIT: keep notices; Claude, Codex, Gemini names are trademarks
OpenBitFun GCWing/OpenBitFun ★ 3.9k · **Permissive** MIT · App · Fit 3/5	Rust agent runtime with a desktop app for general work beyond software development. *Replaces:* Manus, Claude Desktop	Knowledge workers wanting a general desktop agent	Premium plugins/add-ons Setup + support retainer	• Desktop agents for small accounting offices • Document workflow agents for consultants • Research agent desks for market analysts	$15-30/mo per user, desktop license *Effort:* High (Rust runtime plus desktop app, big maintenance load) ⚠ MIT: keep notices; OpenBitFun name is new, check trademark

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Lean-ctx yvgude/lean-ctx ★ 3.9k · **Permissive** Apache-2.0 · Tool · Fit 3/5	Context gateway that selects task-relevant context and records evidence for AI tools. *Replaces:* Helicone, Langfuse, Portkey	Teams managing context costs for AI coding tools	Premium plugins/add-ons API/usage-based	• Context gateway for legal document review teams • Evidence logs for AI compliance audits • Context controls for regulated fintech AI	$20-60/mo per team, usage-based add-on *Effort:* Medium (CLI, MCP and proxy paths need support docs) ⚠ Apache: keep notices; proxy handling of client data needs review
Loop-engineering cobusgreyling/loop-engineering ★ 11.7k · **Permissive** MIT · Starter · Fit 2/5	Patterns, starters and CLI tools for designing agent loops in AI coding.	Developers designing autonomous agent workflows	Training/courses Consulting/implementation	• Agent loop training for engineering managers • Loop audit services for AI-heavy startups • Starter kits for bootcamp capstone projects	$500-2000 per loop design workshop *Effort:* Low (Patterns and CLIs, MIT, easy to repackage) ⚠ MIT: keep notices; named people inspired it, avoid implied endorsement
Superplane superplanehq/superplane ★ 8.8k · **Check** NOASSERTION · Platform · Fit 2/5	unclear project; open-source factory for one-shot engineering, per its tagline.	Teams wanting automated one-shot engineering pipelines	Consulting/implementation Setup + support retainer	• One-shot feature pipelines for agencies • Automated refactor runs for legacy shops • Ticket-to-PR automation for outsourcing firms	$1-4k per automation pipeline setup *Effort:* High (Vague scope, NOASSERTION license needs review) ⚠ NOASSERTION: read license first; scope unclear, verify before promising
Superpowers-zh jnMetaCode/superpowers-zh ★ 8.5k · **Permissive** MIT · Tool · Fit 2/5	Chinese-localized skill pack that makes many AI coding tools more capable.	Chinese-speaking developers using AI coding tools	Premium plugins/add-ons Training/courses	• Mandarin skill packs for coding bootcamps • Localized agent rules for Chinese dev agencies • Chinese AI coding guides for university courses	Free core; $10-20/mo for premium skills *Effort:* Low (Skill files and docs, easy to localize further) ⚠ MIT: keep notices; upstream superpowers credit required
Thinkrail JetBrains/thinkrail ★ 7.9k · **Permissive** Apache-2.0 · App · Fit 2/5	unclear project; JetBrains agentic IDE that claims to improve with use. *Replaces:* Cursor, Windsurf, Kiro	Developers wanting an agentic IDE that learns	Premium plugins/add-ons Setup + support retainer	• Agentic IDE setups for enterprise dev teams • Learning-based code assistants for mid-size SaaS • IDE agent rollouts for regulated banks	$20-40/mo per developer seat *Effort:* High (IDE build, JetBrains brand and plugin ecosystem) ⚠ JetBrains is a known brand; Apache fine, avoid trademark use
MonkeyCode chaitin/MonkeyCode ★ 5.1k · **AGPL** AGPL-3.0 · Platform · Fit 2/5	unclear project; enterprise AI office workbench per Chinese one-line description. *Replaces:* Microsoft 365 Copilot, Notion AI	Chinese enterprises wanting AI office tools	Setup + support retainer White-label reseller	• AI office suites for small accounting firms • Internal AI workbench for manufacturers • Document AI desks for law offices	$2-8k per enterprise deployment, plus support *Effort:* High (Enterprise features, AGPL, docs mostly non-English) ⚠ AGPL: publish server-side changes; Chinese-language docs need localization
TokenEconomizer microsoft/TokenEconomizer ★ 4.9k · **Permissive** Apache-2.0 · Tool · Fit 2/5	Black-box cost controller for coding agents, driven by past experience. *Replaces:* Helicone, Portkey budget controls	Teams capping spend on coding agents	Premium plugins/add-ons API/usage-based	• Agent spend caps for outsourcing firms • Budget guardrails for mid-size dev teams • Cost guardrails for startup engineering	$15-30/mo per team, usage-based add-on *Effort:* Medium (Research-grade, needs productization and testing) ⚠ Apache: keep notices; Microsoft name is a brand; avoid implying endorsement
Python flypythoncom/python ★ 4.2k · **Check** NOASSERTION · Content · Fit 2/5	Open-source Python challenge courses where an AI coding agent teaches and checks answers. *Replaces:* Codecademy, Python bootcamps	Beginners learning Python with AI tutoring	Training/courses Content/membership	• Python drills for bootcamp students • AI-tutored Python for office staff • Coding challenges for corporate upskilling	$29-99 per learner, or $15/mo membership *Effort:* Low (Course content, easy to rebrand and localize) ⚠ NOASSERTION: read license first; course content may have separate rights

AI Evaluation & Testing · 14

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
IFixAi ifixai-ai/iFixAi ★ 43.8k · **Permissive** Apache-2.0 · Tool · Fit 3/5	Independent auditing tool that checks whether an AI agent does what it should. *Replaces:* Patronus AI, Galileo, Arize	Companies deploying AI agents needing audits	Agency service Setup + support retainer	• Agent audits for fintech compliance teams • Pre-launch agent checks for SaaS vendors • Audit reports for insurance agencies	$1-5k per agent audit report *Effort:* Medium (Audit logic and reporting need productization) ⚠ Apache: keep notices; audit claims need legal care and disclaimers
Garak NVIDIA/garak ★ 9.9k · **Permissive** Apache-2.0 · Tool · Fit 3/5	Open-source scanner that probes LLMs for vulnerabilities and unsafe behavior. *Replaces:* Protect AI, HiddenLayer, Lakera Red Team	Security teams testing LLM apps before launch	Agency service Consulting/implementation	• LLM security audits for fintech startups • Red-team testing for healthcare chatbots • Pre-launch scans for AI support vendors	$3-10k per red-team engagement *Effort:* Low (CLI scanner, Apache, service-ready with reporting) ⚠ NVIDIA is a known brand; avoid implying affiliation in rebrand
AI-Infra-Guard Tencent/AI-Infra-Guard ★ 7.4k · **Permissive** Apache-2.0 · Platform · Fit 3/5	Full-stack AI red-teaming platform scanning agents, MCP servers and jailbreak risks. *Replaces:* Protect AI, Lakera, Mindgard	Enterprises securing AI agents and MCP deployments	Managed hosting Agency service	• MCP security scans for bank IT teams • Agent red-team reports for SaaS vendors • Jailbreak audits for public-sector chatbots	$2-6k per scan report, or $300/mo platform *Effort:* Medium (Full-stack deployment, needs hardening and docs) ⚠ Apache: keep notices; Tencent is a brand, rename and remove marks
Future-agi future-agi/future-agi ★ 2.3k · **Permissive** Apache-2.0 · Platform · Fit 3/5	Self-hostable platform for tracing, evals, guardrails and datasets across LLM apps. *Replaces:* LangSmith, Braintrust, Arize	Companies running LLM apps in production	Managed hosting Setup + support retainer	• Guardrail monitoring for insurance chatbots • Eval pipelines for customer support SaaS • Trace audits for regulated healthcare AI	$300-1500/mo managed, self-host free *Effort:* High (Many services, heavy ops, multi-component stack) ⚠ Apache: keep notices; Future AGI name is a brand, rename
Aisheets huggingface/aisheets ★ 1.7k · **Permissive** Apache-2.0 · Tool · Fit 3/5	No-code tool to build, enrich and transform datasets using AI models. *Replaces:* Scale AI data labeling, Labelbox	Data teams cleaning and labeling datasets without code	Setup + support retainer Consulting/implementation	• Dataset enrichment for market research firms • Labeling pipelines for small AI startups • Text cleanup for legal document archives	$500-2000 per dataset project, or $49/mo *Effort:* Medium (Hugging Face ecosystem, needs hosting and auth) ⚠ Hugging Face is a known brand; avoid implying affiliation
FuzzyAI cyberark/FuzzyAI ★ 1.6k · **Permissive** Apache-2.0 · Tool · Fit 3/5	Automated fuzzing tool that finds jailbreaks in LLM APIs for security teams. *Replaces:* Lakera Red Team, Protect AI	Security teams testing LLM APIs for jailbreaks	Agency service Consulting/implementation	• Jailbreak audits for banking chatbots • API fuzzing for AI startups before launch • Red-team retainers for public-sector AI vendors	$3-8k per fuzzing assessment report *Effort:* Low (CLI tool, Apache, easy to package services) ⚠ Apache: keep notices; CyberArk is a known brand, rename
Deepeval confident-ai/deepeval ★ 19.3k · **Permissive** Apache-2.0 · Framework · Fit 2/5	Open-source framework for evaluating LLM apps with test-style metrics. *Replaces:* Confident AI, Braintrust, LangSmith	AI teams testing LLM app quality before release	Managed hosting Consulting/implementation	• LLM regression testing for legal chatbots • Eval suites for customer support bots • Quality checks for medical summarization tools	$2-8k per evaluation setup, or $99/mo hosted *Effort:* Medium (Framework needs hosted dashboard and onboarding) ⚠ Apache: keep notices; Confident AI is the sponsoring company's brand
Gepa gepa-ai/gepa ★ 7.3k · **Permissive** MIT · Library · Fit 2/5	Library that optimizes prompts and code using AI-driven reflective search. *Replaces:* DSPy optimizers, manual prompt tuning services	AI teams optimizing prompts for production tasks	Consulting/implementation Setup + support retainer	• Prompt tuning for insurance claim classifiers • Code optimization for AI-assisted dev teams • Prompt tuning for legal document extraction	$3-12k per prompt optimization project *Effort:* Medium (Research library, needs eval harness and docs) ⚠ MIT: keep notices; research-origin code, validate before production

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Lmms-eval EvolvingLMMs-Lab/lmms-eval ★ 4.5k · Check NOASSERTION · Tool · Fit 2/5	Evaluation toolkit for testing multimodal models across text, image, video and audio tasks. *Replaces:* Scale AI evaluation services, Weights & Biases evals	ML teams evaluating multimodal models	Consulting/implementation Setup + support retainer	• Video model evals for ad creative studios • Audio model benchmarking for call center vendors • Vision model testing for retail inspection teams	$3-10k per custom evaluation suite *Effort:* Medium (Research toolkit, many datasets with mixed licenses) ⚠ NOASSERTION: read license first; benchmark datasets have own licenses
Trulens truera/trulens ★ 3.6k · Permissive MIT · Framework · Fit 2/5	Evaluation and tracking toolkit for LLM experiments and AI agents. *Replaces:* LangSmith, Arize Phoenix hosted	ML teams tracking LLM app experiments	Consulting/implementation Managed hosting	• RAG evaluation for legal research tools • Agent tracing for logistics automation • Experiment tracking for ecommerce search teams	$2-6k per tracing setup, or $199/mo hosted *Effort:* Medium (Library needs hosted dashboard and onboarding) ⚠ MIT: keep notices; TruLens is a known project name, avoid it
Agentic_security msoedov/agentic_security ★ 2.0k · Permissive Apache-2.0 · Tool · Fit 2/5	Vulnerability scanner and red-teaming kit for agentic LLM applications. *Replaces:* Lakera Red Team, Protect AI Guardian	Security consultants testing agentic LLM apps	Agency service Consulting/implementation	• Pen testing for agent-based customer apps • LLM security checks for fintech vendors • Red-team reports for AI startup audits	$2-5k per red-team assessment *Effort:* Low (Small Apache toolkit, easy to package services) ⚠ Apache: keep notices; use only on systems you are authorized to test
Prompty microsoft/prompty ★ 1.3k · Permissive MIT · Tool · Fit 2/5	Format and toolkit for creating, debugging and evaluating LLM prompts as portable assets. *Replaces:* PromptLayer, Humanloop	Developers managing prompts across AI applications	Consulting/implementation Training/courses	• Prompt versioning for legal document teams • Prompt audits for SaaS support bots • Prompt training for corporate AI teams	$2-5k per prompt management setup *Effort:* Medium (Format plus tooling, needs UI and hosting) ⚠ MIT: keep notices; Microsoft name is a brand, avoid implying endorsement
ClawBench TIGER-AI-Lab/ClawBench ★ 1.2k · Permissive Apache-2.0 · Tool · Fit 2/5	Open benchmark that tests browser AI agents on everyday web tasks. *Replaces:* Internal QA services for browser agent teams	Teams building and comparing browser AI agents	Consulting/implementation Setup + support retainer	• Browser agent QA for ecommerce automation vendors • Agent comparison reports for RPA buyers • Task benchmarks for travel booking bots	$2-6k per agent benchmark report *Effort:* Low (Benchmark code and tasks, easy to repackage) ⚠ Apache: keep notices; benchmark tasks may target real sites' terms
Uqlm cvs-health/uqlm ★ 1.2k · Permissive Apache-2.0 · Library · Fit 2/5	Python library that flags LLM hallucinations using uncertainty quantification. *Replaces:* Vectara HHEM hosted, Galileo hallucination index	AI teams checking LLM outputs for hallucinations	Consulting/implementation Setup + support retainer	• Hallucination checks for healthcare summaries • Answer verification for insurance claims bots • Output scoring for legal research assistants	$3-10k per hallucination audit integration *Effort:* Low (Python package, Apache, easy to wrap) ⚠ Apache: keep notices; CVS Health is a brand, avoid implying endorsement

AI Image Generation · 33

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
ComfyUI Comfy-Org/ComfyUI ★ 145.5k · GPL GPL-3.0 · App · Fit 4/5	Node-graph interface and backend for building diffusion image and video workflows *Replaces:* Midjourney, Runway, Leonardo.ai, Adobe Firefly	Artists, studios, workflow builders	Managed hosting Marketplace Consulting/implementation	• Workflow hosting for ad agencies • Product shoot pipelines for e-commerce • Workflow marketplace for game artists *Angle:* Workflow-based image generation API service	$15-60/mo GPU-hours *Effort:* High (Single-user nodes UI, needs auth and queueing) ⚠ GPL-3.0; checkpoint licenses vary and may bar commercial use
InvokeAI invoke-ai/InvokeAI ★ 29.0k · Permissive Apache-2.0 · Platform · Fit 4/5	Creative engine and web UI for Stable Diffusion with canvas, workflows, and teams features *Replaces:* Midjourney, Adobe Firefly, Leonardo.ai	Studios, designers, game artists	Managed hosting Setup + support retainer White-label reseller	• Private image studio for game studios • Brand-safe generation for ad agencies • Concept tool for architecture firms *Angle:* Creative studio AI image tool for agencies	$20-60/mo per seat *Effort:* Medium (Polished UI, multi-user in commercial edition) ⚠ Multi-user features are in paid Invoke edition; Invoke is a trademark

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Stable Diffusion WebUI AUTOMATIC1111/stable-diffusion-webui ★ 165.3k · AGPL AGPL-3.0 · App · Fit 3/5	Gradio web UI for running Stable Diffusion with a huge extension ecosystem *Replaces:* Midjourney, DALL-E, Leonardo.ai, Canva AI	Hobbyists, artists, small studios	Managed hosting Setup + support retainer Consulting/implementation	• GPU hosting for tabletop artists • Product photo generator for Etsy sellers • Concept art tool for game studios *Angle:* Hosted GPU image generation subscriptions	$10-30/mo GPU-hours bundle *Effort:* High (Single-user Gradio app, no accounts or billing) ⚠ AGPL-3.0: publish server-side changes; model licenses restrict commercial use
Unsloth unslothai/unsloth ★ 79.2k · Permissive Apache-2.0 · App · Fit 3/5	Local UI for running and fine-tuning LLMs and diffusion models on your own GPU. *Replaces:* Hugging Face AutoTrain, Replicate fine-tunes, Together AI fine-tuning	ML teams fine-tuning models on local GPUs	Consulting/implementation Training/courses	• Local fine-tuning for clinic note models • Custom LLM tuning for small legal firms • Training workshops for data science bootcamps	$2-5k per fine-tuning setup, or $99/mo support *Effort:* Medium (Heavy GPU dependencies, needs packaging and support) ⚠ Apache: keep notices; Unsloth is a known brand; model weights vary
OpenMontage calesthio/OpenMontage ★ 78.1k · AGPL AGPL-3.0 · Tool · Fit 3/5	Agentic video production system with pipelines and skills that turns coding assistants into video studios. *Replaces:* Synthesia, Descript, Runway	Marketing agencies producing explainer videos at scale	Agency service Setup + support retainer	• Explainer videos for SaaS onboarding teams • Product demo videos for ecommerce brands • Training video production for HR consultancies	$1-3k per finished video, or $99/mo tool *Effort:* Medium (AGPL, many pipelines, needs packaging and docs) ⚠ AGPL: publish server-side changes; video tool APIs have usage terms
Fooocus lllyasviel/Fooocus ★ 53.8k · GPL GPL-3.0 · App · Fit 3/5	Simplified Stable Diffusion XL image generator with minimal settings *Replaces:* Midjourney, DALL-E, Canva AI	Casual creators and small marketers	Managed hosting Setup + support retainer Mobile app on top	• Easy AI art for Etsy sellers • Poster generator for local events • Social image maker for restaurants *Angle:* Simple consumer AI art app	$8-20/mo credits *Effort:* High (In limited maintenance, single-user, GPU needed) ⚠ GPL-3.0; project in limited long-term support mode
Diffusionbee-stable-diffusion-ui divamgupta/diffusionbee-stable-diffusion-ui ★ 13.6k · AGPL AGPL-3.0 · App · Fit 3/5	One-click Mac app for running Stable Diffusion locally on Apple Silicon. *Replaces:* Midjourney, DALL-E, Adobe Firefly	Mac creators wanting private image generation	Premium plugins/add-ons Setup + support retainer	• Private image tools for Mac-based photo studios • Offline concept art for indie game designers • Local thumbnail generation for YouTube editors	$19-49 one-time pro license, or free core *Effort:* Medium (Mac-only, signing and model licensing needed) ⚠ AGPL: publish modifications; Stable Diffusion model licenses vary
Krita AI Diffusion Acly/krita-ai-diffusion ★ 10.8k · GPL GPL-3.0 · Tool · Fit 3/5	Krita plugin for AI image generation, inpainting, and outpainting *Replaces:* Photoshop Generative Fill, Midjourney, Adobe Firefly	Digital artists and illustrators	Premium plugins/add-ons Managed hosting Training/courses	• Hosted backend for Krita artists • AI painting courses for illustrators • Concept tool for tabletop publishers *Angle:* AI painting plugin bundles for illustrators	$10-20/mo cloud GPU *Effort:* Medium (Krita plugin, backend ComfyUI separate) ⚠ GPL-3.0: distributed derivatives must publish source; Krita trademark
StabilityMatrix LykosAI/StabilityMatrix ★ 9.0k · AGPL AGPL-3.0 · App · Fit 3/5	Desktop package manager that installs and updates Stable Diffusion tools and models. *Replaces:* Pinokio, manual ComfyUI installs	Creators installing Stable Diffusion tools easily	Setup + support retainer Premium plugins/add-ons	• Install services for Mac photo studios • Stable Diffusion setup kits for art schools • Model manager for indie game studios	$29-79 per setup visit, or free core *Effort:* Medium (Multi-platform desktop app, AGPL, needs branding) ⚠ AGPL: publish modifications; Stability brand and model licenses apply
Dream-textures carson-katri/dream-textures ★ 8.2k · GPL GPL-3.0 · Tool · Fit 3/5	Blender add-on that brings Stable Diffusion texture and image generation into Blender. *Replaces:* Adobe Substance Sampler, DreamStudio plugins	3D artists texturing models with AI	Premium plugins/add-ons Training/courses	• AI texture packs for indie game artists • Blender courses on generative textures • Texture tools for architectural visualization studios	$15-39 one-time add-on, or course bundle *Effort:* Medium (Blender add-on, needs upkeep as Blender changes) ⚠ GPL-3.0: distributed add-on ships source; Blender trademark usage applies

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
MochiDiffusion MochiDiffusion/MochiDiffusion ★ 8.0k · GPL GPL-3.0 · App · Fit 3/5	Native Mac app for running Stable Diffusion on Apple hardware. *Replaces:* DiffusionBee, Draw Things	Mac users wanting native image generation	Premium plugins/add-ons Setup + support retainer	• Native image tools for Mac design studios • Offline concept art for indie comic artists • Private image generation for Mac-based marketing teams	Free core; $20-40 one-time support license *Effort:* Medium (Mac-only app, GPL, needs signing and branding) ⚠ GPL-3.0: distributed Mac builds ship source; Apple trademarks apply
Auto-Photoshop-StableDiffusion-Plugin AbdullahAlfaraj/Auto-Photoshop-StableDiffusion-Plugin ★ 7.3k · Permissive MIT · Tool · Fit 3/5	Photoshop plug-in that generates Stable Diffusion images using Automatic or ComfyUI backends. *Replaces:* Adobe Firefly in Photoshop, Generative Fill	Photo retouchers and designers using AI fills	Premium plugins/add-ons Consulting/implementation	• Generative fill for real estate photo editors • AI retouch add-on for wedding photographers • Product background swaps for ecommerce studios	$29-79 one-time plugin license *Effort:* Medium (Photoshop plugin, Adobe SDK updates, backend setup) ⚠ Adobe Photoshop is a trademark; plug-in SDK terms apply
Aidea mylxsw/aidea ★ 6.9k · Permissive MIT · App · Fit 3/5	Flutter app that combines mainstream LLM chat and image generation in one client. *Replaces:* Poe, ChatGPT mobile, Midjourney mobile	Mobile users wanting multiple AI models in one app	Premium plugins/add-ons White-label reseller	• Multi-model chat app for Chinese-speaking users • Image and chat app for design freelancers • Branded AI assistant for language tutors	$3-8/mo subscription, or $30 one-time *Effort:* Medium (Flutter app, store listings and API keys) ⚠ MIT: keep notices; model providers and image APIs have their own terms
Jaaz 11cafe/jaaz ★ 6.7k · Check NOASSERTION · App · Fit 3/5	Local multimodal creative assistant for design and image work, privacy-first. *Replaces:* Canva, Manus, Figma AI	Designers wanting private AI creative tools	Setup + support retainer White-label reseller	• Private design assistant for small print shops • Local social graphics tools for nonprofits • Offline creative assistant for architecture studios	$15-30/mo per seat, or $499 setup *Effort:* Medium (Local app with many providers, needs branding) ⚠ NOASSERTION: read license first; Canva and Figma are trademarks
Lora-scripts Akegarasu/lora-scripts ★ 6.2k · AGPL AGPL-3.0 · Tool · Fit 3/5	GUI and scripts for training LoRA and DreamBooth models on diffusion models. *Replaces:* Replicate fine-tuning, Scenario, Civitai training	Studios training custom image models in-house	Setup + support retainer Consulting/implementation	• In-house LoRA training for ecommerce photo teams • Character model training for animation studios • Style training for brand design agencies	$300-1000 per model training setup *Effort:* Medium (AGPL, GUI and scripts, needs packaging and support) ⚠ AGPL: publish server-side changes; uses kohya-ss trainer, check its license
Clarity-upscaler philz1337x/clarity-upscaler ★ 5.2k · AGPL AGPL-3.0 · Tool · Fit 3/5	Open-source AI image upscaler and enhancer, positioned as an alternative to Magnific. *Replaces:* Magnific, Topaz Gigapixel, Let's Enhance	Ecommerce sellers and designers needing sharper images	API/usage-based Managed hosting	• Upscaling for print-on-demand sellers • Sharper listing photos for real estate • Enhancement service for old printed catalogs	$0.02-0.10 per image, usage-based *Effort:* Medium (AGPL, needs GPU hosting and billing) ⚠ AGPL: publish server-side changes; Magnific and Topaz are trademarks
SwarmUI mcmonkeyprojects/SwarmUI ★ 4.8k · Permissive MIT · App · Fit 3/5	Modular Stable Diffusion web UI with multi-GPU support and ComfyUI backend *Replaces:* Midjourney, Leonardo.ai, Runway	Artists, studios with multiple GPUs	Managed hosting Setup + support retainer Consulting/implementation	• Multi-GPU image farm for studios • Template UI for ad creatives • Private generation for toy companies *Angle:* Multi-GPU image generation farm	$20-60/mo GPU access *Effort:* Medium (Has user roles, still single-organization) ⚠ MIT; model weights have own licenses
Diffusers huggingface/diffusers ★ 34.9k · Permissive Apache-2.0 · Library · Fit 2/5	Hugging Face PyTorch library for diffusion models for image, video, and audio *Replaces:* Midjourney API, Replicate, Stability API	ML engineers and AI startups	API/usage-based Consulting/implementation Managed hosting	• Image API for print-on-demand shops • Custom model fine-tuning for brands • Generation backend for design apps *Angle:* Custom fine-tuned image models for brands	$0.01-0.05 per image *Effort:* High (Library, build serving and billing yourself) ⚠ Model weights have separate licenses; Hugging Face trademark
FaceFusion facefusion/facefusion ★ 30.6k · Check NOASSERTION · Tool · Fit 2/5	Face swapping and enhancement tool for images and video *Replaces:* Reface, Akool, HeyGen face swap	Video editors, content creators	Managed hosting Premium plugins/add-ons Setup + support retainer	• Face swap for film VFX studios • Dubbing face match for localization • Avatar mapping for ad agencies *Angle:* Licensed face swap for film production	$10-30/mo credits *Effort:* High (Single-user tool, ethical and moderation burden) ⚠ OpenRAIL-style license; deepfake misuse and consent regulation

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Stable Diffusion WebUI Forge lllyasviel/stable-diffusion-webui-forge ★ 13.1k · AGPL AGPL-3.0 · App · Fit 2/5	Optimized fork of AUTOMATIC1111 web UI for faster Stable Diffusion and Flux *Replaces:* Midjourney, Leonardo.ai, DALL-E	Hobbyist artists with limited GPUs	Managed hosting Setup + support retainer Consulting/implementation	• Low-VRAM image generation hosting • Flux workflow rental for artists • GPU rental for LoRA creators *Angle:* Low-VRAM image gen cloud plans	$10-25/mo GPU bundle *Effort:* High (Single-user Gradio fork, sparse maintenance) ⚠ AGPL-3.0: publish server changes; weights have own licenses
Kohya SS bmaltais/kohya_ss ★ 12.7k · Permissive Apache-2.0 · Tool · Fit 2/5	GUI for training and fine-tuning Stable Diffusion LoRA and DreamBooth models *Replaces:* Leonardo.ai training, Scenario, Civitai trainer	Model trainers and character artists	Managed hosting Consulting/implementation Setup + support retainer	• LoRA training service for game studios • Brand style models for ad agencies • Character LoRAs for comic artists *Angle:* LoRA training service for product photos	$15-60 per trained model *Effort:* High (GUI over scripts, single-user GPU job tool) ⚠ Training-data copyright and model license risks
Paper2gui Baiyuetribe/paper2gui ★ 10.7k · Permissive MIT · Tool · Fit 2/5	Turns AI research papers into usable graphical interfaces for non-experts.	Researchers and educators sharing AI models	Consulting/implementation Training/courses	• GUI wrappers for university research labs • Demo apps for AI startup sales teams • Model front ends for science journalists	$1-3k per paper-to-GUI conversion *Effort:* Medium (Mostly Chinese-language docs, varies per paper) ⚠ MIT: keep notices; wrapped papers carry their own model licenses
StableStudio Stability-AI/StableStudio ★ 9.0k · Permissive MIT · App · Fit 2/5	Open community web interface for generative AI image tools, from Stability AI. *Replaces:* Midjourney web, DreamStudio, Leonardo	Teams wanting a hosted image generation front end	Setup + support retainer White-label reseller	• Image generator portals for ad agencies • Branded image tools for stock photo sellers • Client image front ends for interior designers	$300-1000 setup, $29/mo hosting *Effort:* Medium (Web app, needs API keys and billing) ⚠ Stability AI is a known brand; model API terms apply
Stable-dreamfusion ashawkey/stable-dreamfusion ★ 8.9k · Permissive Apache-2.0 · Tool · Fit 2/5	Research code that generates 3D meshes from text or images using diffusion. *Replaces:* Meshy, Luma Genie, Tripo	Game studios prototyping 3D assets from text	Consulting/implementation API/usage-based	• Text-to-3D props for mobile game prototypes • 3D product mockups for furniture sellers • Quick 3D assets for AR marketing teams	$0.50-3 per generated mesh, usage-based *Effort:* High (Research-grade code, GPU heavy, needs productizing) ⚠ Apache: keep notices; generated assets may need rights checks
stable-diffusion.cpp leejet/stable-diffusion.cpp ★ 7.9k · Permissive MIT · Library · Fit 2/5	Pure C and C++ inference library for diffusion models like SD, Flux and Qwen Image. *Replaces:* Replicate hosted inference, fal.ai	Developers embedding image generation in apps	Consulting/implementation API/usage-based	• On-device image generation for mobile apps • Embedded image models for kiosks • Offline thumbnail generators for desktop tools	$3-12k per embedded inference integration *Effort:* High (C++ library, needs deep inference expertise) ⚠ MIT: keep notices; model weights carry separate, sometimes restrictive licenses
Fast-stable-diffusion TheLastBen/fast-stable-diffusion ★ 7.9k · Permissive MIT · Starter · Fit 2/5	Colab and cloud notebooks for running Stable Diffusion and DreamBooth training fast. *Replaces:* Dreambooth SaaS, Scenario.gg	Creators training custom faces and styles	Setup + support retainer Training/courses	• DreamBooth training for portrait photographers • Custom style models for fashion brands • Character models for indie comic artists	$49-149 per custom model training package *Effort:* Low (Notebooks, MIT, easy to package and support) ⚠ MIT: keep notices; DreamBooth face training raises likeness consent issues
Lora cloneofsimo/lora ★ 7.6k · Permissive Apache-2.0 · Library · Fit 2/5	Library for fast LoRA fine-tuning of diffusion models with low-rank adapters. *Replaces:* Replicate fine-tuning, Scenario training	Studios customizing image models for clients	Consulting/implementation API/usage-based	• Brand-style LoRAs for ecommerce photographers • Character LoRAs for game studios • Product style models for furniture retailers	$500-2000 per custom LoRA model *Effort:* Medium (Research code, needs wrapping and UI) ⚠ Apache: keep notices; training data rights and likeness consent matter
SD.Next vladmandic/sdnext ★ 7.4k · Permissive Apache-2.0 · App · Fit 2/5	All-in-one web UI for AI image and video generation, captioning, and processing *Replaces:* Midjourney, Leonardo.ai, Runway	Hobbyists and power users	Managed hosting Setup + support retainer Consulting/implementation	• Shared GPU studio for design students • Video generation hosting for creators • Captioning service for dataset builders *Angle:* Multi-backend image gen hosting	$10-30/mo GPU bundle *Effort:* High (Single-user Python app, no tenancy) ⚠ Fast-moving fork; weights carry separate commercial terms

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Civitai civitai/civitai ★ 7.3k · **Permissive** Apache-2.0 · Platform · Fit 2/5	unclear project; repository of models, textual inversions and related AI assets. *Replaces:* Civitai hosted, Hugging Face model hub	Creators sharing and hosting custom image models	Managed hosting Marketplace	• Private model libraries for design agencies • Custom LoRA marketplaces for game studios • Model hubs for photo studios	$29-99/mo per private model library *Effort:* High (Unclear codebase scope, model hosting heavy) ⚠ Civitai is a known brand; model uploads raise copyright and likeness issues
Stable-diffusion-webui-docker AbdBarho/stable-diffusion-webui-docker ★ 7.3k · **Check** NOASSERTION · Starter · Fit 2/5	Docker setup that runs Stable Diffusion with a user-friendly web UI. *Replaces:* Managed SD hosting, RunPod templates	Teams self-hosting Stable Diffusion on servers	Setup + support retainer Managed hosting	• Internal SD servers for design agencies • Docker SD stacks for small game studios • Self-hosted image tools for photo schools	$300-800 per server setup, plus monthly support *Effort:* Low (Docker config, easy to wrap and brand) ⚠ NOASSERTION: read license first; bundled model licenses vary
ChatAny ChatAnyTeam/ChatAny ★ 6.5k · **Permissive** MIT · App · Fit 2/5	One-click app bundling ChatGPT and many AI web services into one client. *Replaces:* Poe, Chatbox, Sider	Users wanting many AI web tools in one window	White-label reseller Setup + support retainer	• Branded AI bundles for Chinese-speaking professionals • AI tool hub for coaching firms • Multi-AI desktop for small ad agencies	$5-15/mo per user, or $300 branded build *Effort:* Medium (Wraps web services, needs branding and ToS checks) ⚠ Wraps third-party web services; their terms may forbid reselling access
SUPIR Fanghua-Yu/SUPIR ★ 5.7k · **Check** NOASSERTION · Tool · Fit 2/5	Research model for restoring degraded photos into photo-realistic images. *Replaces:* Topaz Photo AI, Remini, Magnific	Photo studios restoring old or damaged images	API/usage-based Consulting/implementation	• Old family photo restoration for funeral homes • Damaged archive restoration for historical societies • Photo repair for real estate listing sites	$3-10 per restored photo, batch discounts *Effort:* High (Research model, heavy GPU, weights licensing unclear) ⚠ NOASSERTION: read license first; restoring faces raises consent and deepfake risks
ComfyUI-Copilot ATH-MaaS/ComfyUI-Copilot ★ 5.6k · **Permissive** MIT · Tool · Fit 2/5	Custom ComfyUI node that uses AI to help automate and build workflows. *Replaces:* Comfy Cloud assistants, ComfyICU	ComfyUI users building image workflows faster	Premium plugins/add-ons Training/courses	• Workflow builder add-on for product photo studios • ComfyUI copilot training for design schools • Automated workflow setup for ecommerce creatives	$15-35/mo per seat, or $10 one-time add-on *Effort:* Low (Custom node, MIT, easy to package) ⚠ MIT: keep notices; ComfyUI is a known project, avoid implied endorsement

Hurl Orange-OpenSource/hurl ★ 19.3k · **Permissive** Apache-2.0 · Tool · Fit 3/5	Command-line tool that runs and tests HTTP requests written in plain text files. *Replaces:* Postman, Insomnia, Bruno	Developers and QA engineers testing HTTP APIs in CI	Training/courses Consulting/implementation	• API test suites for CI pipelines • Plain-text API checks for embedded device teams • Smoke tests for ecommerce checkout APIs	$1-3k per CI test suite setup *Effort:* Low (Mature CLI, Apache, easy to package) ⚠ Apache: keep notices; Hurl is an Orange OpenSource project name
Metersphere metersphere/metersphere ★ 13.6k · **Check** NOASSERTION · Platform · Fit 3/5	Open-source continuous testing platform with a built-in AI assistant for test management. *Replaces:* TestRail, Katalon, Postman Enterprise	QA teams running continuous test pipelines	Managed hosting Setup + support retainer	• Test management for Chinese fintech QA teams • Continuous testing setups for SaaS release teams • AI test-case tools for outsourcing QA shops	$500-3000/mo per team, or self-host free *Effort:* Medium (Full platform, Chinese-first UI, needs localization) ⚠ NOASSERTION: read license first; MeterSphere is a known brand, avoid it
WireMock wiremock/wiremock ★ 7.4k · **Permissive** Apache-2.0 · Library · Fit 3/5	Java HTTP mock server for stubbing and testing APIs *Replaces:* Postman Mock Servers, Mocky, Beeceptor	Java and QA teams	Consulting/implementation Managed hosting Training/courses	• Hosted WireMock for QA teams • API sandboxing for banks • Mock-service setup for payment integrators *Angle:* Cloud API mocking service	$20-100/mo hosted mocks *Effort:* Medium (Java library and standalone, multi-tenant hosting is custom) ⚠ WireMock is a trademark; WireMock Cloud is a commercial vendor
Desktop httpie/desktop ★ 4.1k · **Check** NOASSERTION · App · Fit 3/5	Cross-platform desktop client for testing REST, GraphQL and HTTP APIs. *Replaces:* Postman, Insomnia, Bruno	API developers wanting a visual testing client	Premium plugins/add-ons Setup + support retainer	• Visual API clients for mobile dev teams • Team API workspaces for agencies • GraphQL testing kits for SaaS startups	$8-15/mo per seat, team plan *Effort:* High (Desktop app, brand tied to HTTPie, licensing unclear) ⚠ NOASSERTION: read license first; HTTPie is a known brand, rename
Schemathesis schemathesis/schemathesis ★ 3.8k · **Permissive** MIT · Tool · Fit 3/5	Test tool that finds API bugs by generating tests from OpenAPI and GraphQL schemas. *Replaces:* Postman, Dredd, Apigee testing	API teams running contract and fuzz tests	Consulting/implementation Training/courses	• Schema fuzzing for fintech API vendors • Contract tests for logistics platforms • API testing courses for backend teams	$2-6k per API test setup, plus training *Effort:* Low (Mature Python tool, MIT, easy to wrap) ⚠ MIT: keep notices; Schemathesis is a known project name, avoid it
Apidash foss42/apidash ★ 3.0k · **Permissive** Apache-2.0 · App · Fit 3/5	Flutter desktop and mobile API client that builds and inspects HTTP and GraphQL requests. *Replaces:* Postman, Insomnia, Hoppscotch	Mobile and desktop developers testing APIs visually	Premium plugins/add-ons Setup + support retainer	• Mobile API clients for app developer shops • Integration code generators for SDK vendors • Visual API tools for Flutter agencies	$6-12/mo per seat, or $199 team license *Effort:* Medium (Flutter client, needs branding and sync features) ⚠ Apache: keep notices; AI features may send requests to model providers
APIAuto TommyLemon/APIAuto ★ 2.2k · **Permissive** Apache-2.0 · Tool · Fit 3/5	Chinese-language API tool with no-code ML testing, AI Q&A and code and doc generation. *Replaces:* Apifox, Postman, Eolink	Chinese dev teams testing and documenting APIs	Setup + support retainer Premium plugins/add-ons	• API testing setup for Chinese fintech teams • Docs generation for SaaS integration teams • AI test assistants for outsourcing dev shops	$8-20/mo per seat, or $1000 enterprise setup *Effort:* Medium (Chinese-first UI, many features to localize) ⚠ Apache: keep notices; big-brand usage claims are marketing, not endorsement
Resterm unkn0wn-root/resterm ★ 2.0k · **Permissive** Apache-2.0 · Tool · Fit 3/5	Terminal API client for HTTP, GraphQL, gRPC and WebSocket using versionable plain files. *Replaces:* Postman, Insomnia, Bruno	Backend engineers keeping API tests in version control	Training/courses Consulting/implementation	• API test kits for gRPC microservice teams • Terminal API workshops for backend bootcamps • CI API checks for payment integrators	$1-3k per CI test workflow setup *Effort:* Low (Single terminal tool, Apache, easy to package) ⚠ Apache: keep notices; low trademark risk, generic project name

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Swagger UI swagger-api/swagger-ui ★ 29.1k · **Permissive** Apache-2.0 · Library · Fit 2/5	Generates interactive API documentation from OpenAPI specs in the browser *Replaces:* ReadMe, Stoplight, Redocly, Postman Docs	API teams and developer-relations staff	Consulting/implementation Agency service Managed hosting	• Branded API portals for fintechs • Doc hosting for API startups • SDK docs for healthcare vendors *Angle:* Branded API docs portals	$29-99/mo per doc portal *Effort:* Medium (Static assets, easy theming, no hosting built in) ⚠ Swagger is a SmartBear trademark; UI is basic
Http-prompt httpie/http-prompt ★ 9.1k · **Permissive** MIT · Tool · Fit 2/5	Interactive command-line HTTP client built on HTTPie, with autocomplete and highlighting. *Replaces:* Postman CLI, Insomnia CLI	Developers exploring REST APIs interactively	Training/courses Consulting/implementation	• Interactive API training for bootcamps • Shell API tools for DevOps teams • Exploratory API audits for consultancies	$500-2000 per team workshop *Effort:* Low (Small MIT tool, easy to package) ⚠ MIT: keep notices; HTTPie brand, avoid implied affiliation
Xh ducaale/xh ★ 8.2k · **Permissive** MIT · Tool · Fit 2/5	Friendly, fast command-line tool for sending HTTP requests. *Replaces:* curl, HTTPie	Developers wanting a fast terminal HTTP client	Training/courses Consulting/implementation	• Terminal API tutorials for bootcamp students • Quick API checks for IT support teams • Scripting kits for data engineers	Free tool; $300-800 per training session *Effort:* Low (Single binary tool, MIT, easy to package)
Newman postmanlabs/newman ★ 7.3k · **Permissive** Apache-2.0 · Tool · Fit 2/5	Command-line runner that executes Postman collections in CI and scripted tests. *Replaces:* Postman CI runners, Katalon	Teams running Postman tests in CI pipelines	Consulting/implementation Training/courses	• CI test setups for agencies using Postman • Collection migration for legacy API teams • Test suites for payment API integrators	$1-3k per CI integration setup *Effort:* Low (Apache CLI, easy to wrap as a service) ⚠ Apache: keep notices; Postman is a trademark, avoid implied affiliation
Arjun s0md3v/Arjun ★ 6.4k · **AGPL** AGPL-3.0 · Tool · Fit 2/5	Security tool that discovers hidden HTTP parameters on web endpoints. *Replaces:* Burp Suite Pro, Param Miner	Security consultants doing web app pentests	Agency service Consulting/implementation	• Parameter discovery for bug bounty hunters • Pentest add-on for web agencies • Endpoint audits for e-commerce security teams	$1-4k per web pentest engagement *Effort:* Low (CLI tool, AGPL, small and focused) ⚠ AGPL: publish server-side changes; use only with authorized targets
Prism stoplightio/prism ★ 5.1k · **Permissive** Apache-2.0 · Tool · Fit 2/5	CLI that turns an OpenAPI or Postman collection into a mock and validation server *Replaces:* Postman Mock Servers, Mockoon, Beeceptor	API designers and front-end teams	Managed hosting Consulting/implementation Setup + support retainer	• Hosted mocks from OpenAPI for partners • Contract-testing service for banks • Sandbox APIs for logistics vendors *Angle:* OpenAPI mock servers as a service	$15-50/mo per project *Effort:* Medium (CLI tool, hosted layer needed) ⚠ SmartBear owns Stoplight; project maintenance reduced
Restfox flawiddsouza/Restfox ★ 2.8k · **Permissive** MIT · App · Fit 2/5	Offline-first HTTP and socket testing client that runs on the web and desktop. *Replaces:* Postman, Insomnia, Hoppscotch	Developers wanting a light offline API client	Premium plugins/add-ons Setup + support retainer	• Offline API tools for field engineers • Lightweight API clients for IoT firmware teams • Socket testing tools for chat app developers	$5-10/mo per seat, or $79 one-time license *Effort:* Low (Small MIT app, easy to brand) ⚠ MIT: keep notices; Postman and Insomnia are trademarks in comparisons
Insomnia-mockbin Kong/insomnia-mockbin ★ 2.1k · **Check** NOASSERTION · Platform · Fit 2/5	Backend service that powers API mocks for the Insomnia client, built by Kong. *Replaces:* Postman Mock Servers, Mockoon hosted	Teams needing hosted API mock servers	Managed hosting Setup + support retainer	• Hosted API mocks for fintech partner onboarding • Mock servers for mobile app QA teams • Sandbox mock APIs for logistics integrators	$50-300/mo per team mock hosting *Effort:* Medium (Tied to Insomnia and Kong brands, needs rebuild) ⚠ NOASSERTION: read license first; Kong and Insomnia are brand names

Tilesfx HanSolo/tilesfx ★ 1.5k · **Permissive** Apache-2.0 · Library · Fit 2/5	JavaFX library of tile widgets for building dashboards. *Replaces:* Syncfusion JavaFX, Gluon controls	Java desktop developers building kiosk dashboards	Consulting/implementation Training/courses	• Factory floor monitors for manufacturing plants • Trading desk widgets for small brokers • Energy dashboards for utility control rooms	$2-6k per JavaFX dashboard build *Effort:* Medium (JavaFX-only, needs UI polish and maintenance) ⚠ Apache: keep notices; JavaFX runtime has its own license terms

Chatbot & Voice Assistants · 19

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Home Assistant home-assistant/core ★ 92.0k · **Permissive** Apache-2.0 · Platform · Fit 4/5	Open-source home automation hub with local control and thousands of integrations *Replaces:* SmartThings, Google Home, Apple Home, Crestron, Control4	Smart-home owners and installers	Setup + support retainer Hardware kits/assembly Local service business	• Smart-home installs for retirees • Energy monitoring for solar homeowners • Rental-property automation for Airbnb hosts *Angle:* Smart home installation services	$500-3k per home install *Effort:* Medium (Mature product, rebranding needs hardware images) ⚠ Apache-2.0; Home Assistant name is trademarked, no passing off
Pipecat pipecat-ai/pipecat ★ 17.1k · **Permissive** BSD-2-Clause · Framework · Fit 3/5	Python framework for building realtime voice and multimodal AI agents *Replaces:* Vapi, Retell AI, Bland AI, Synthflow	Voice AI developers and agencies	Consulting/implementation Managed hosting API/usage-based	• Phone receptionist for dental clinics • Voice agents for restaurants • Outbound reminder calls for property managers *Angle:* Voice AI agents for phone lines	$0.08-0.20 per call minute *Effort:* High (Framework, telephony and STT/TTS integrations needed) ⚠ BSD-2-Clause; telephony consent and recording laws apply
LiveKit Agents livekit/agents ★ 15.1k · **Permissive** Apache-2.0 · Framework · Fit 3/5	Framework for building realtime voice and video AI agents on LiveKit *Replaces:* Vapi, Retell AI, Bland AI, Twilio Flex	Voice AI developers and agencies	Consulting/implementation Managed hosting API/usage-based	• AI front desk for law firms • Voice tutor for language apps • Appointment voice agents for salons *Angle:* Real-time voice bots for clinics	$0.07-0.15 per call minute *Effort:* High (Framework needs LiveKit server and telephony) ⚠ LiveKit cloud pushes paid hosting; call recording consent laws
Moltis moltis-org/moltis ★ 2.9k · **Permissive** MIT · Platform · Fit 3/5	Single-binary Rust agent server with memory, voice, sandboxed tools and chat channel support. *Replaces:* Lindy, Poe bots	Teams wanting self-hosted personal agents on chat apps	Managed hosting Setup + support retainer	• Chat-based agents for small law offices • Telegram assistants for field sales teams • Self-hosted team bots for dental clinics	$15-40/mo per team, managed hosting *Effort:* Medium (One binary, but chat approvals and hosting needed) ⚠ MIT: keep notices; WhatsApp, Teams, Discord APIs have own terms
Bailing wwbin2017/bailing ★ 1.8k · **Permissive** MIT · App · Fit 3/5	Chinese voice chatbot pipeline combining ASR, LLM and TTS with interruption support. *Replaces:* Doubao voice, Xiaoai, Vapi	Chinese-speaking SMBs deploying voice bots	Setup + support retainer White-label reseller	• Mandarin phone bots for restaurant bookings • Voice front desks for Chinese clinics • Voice sales agents for Chinese e-commerce	$200-500/mo per voice line, plus setup *Effort:* Medium (Chinese-first, multi-component stack, needs support) ⚠ MIT: keep notices; ASR, TTS and LLM providers have own terms
Metabot xvirobotics/metabot ★ 1.0k · **Permissive** MIT · Platform · Fit 3/5	Chinese-language infrastructure for running Claude Code or Kimi Code agents from Feishu or Telegram. *Replaces:* Slack bots for devs, Zapier AI agents	Chinese dev teams running coding agents from phones	Setup + support retainer Managed hosting	• Feishu agent bots for Chinese dev agencies • Telegram coding assistants for solo founders • Agent task queues for Chinese SaaS teams	$30-80/mo per team, managed setup *Effort:* High (Multi-engine, chat channels, needs security review) ⚠ MIT: keep notices; Feishu, Telegram and Claude/Kimi terms apply
Agentscope agentscope-ai/agentscope ★ 35.6k · **Permissive** Apache-2.0 · Framework · Fit 2/5	Framework for building, running and observing AI agents, aimed at transparency. *Replaces:* LangGraph, CrewAI, OpenAI Agents SDK	Teams building observable multi-step agents	Consulting/implementation Training/courses	• Auditable agents for insurance claims teams • Agent workflow courses for enterprise developers • Observable support bots for banks	$5-15k per agent platform integration *Effort:* Medium (Framework, needs docs, examples and hosting) ⚠ Apache: keep notices; AgentScope is a project brand, avoid it

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
AgenticSeek Fosowl/agenticSeek ★ 27.6k · GPL GPL-3.0 · App · Fit 2/5	Local autonomous agent that browses the web and writes code, with no cloud API needed. *Replaces:* Manus, Devin, Perplexity Comet	Privacy-minded users wanting local autonomous agents	Setup + support retainer Premium plugins/add-ons	• Local research agents for consultants • Browsing agents for small market research firms • Offline coding helpers for hobby developers	$29-79 setup, or hardware-based managed support *Effort:* High (Local models, hardware variability, heavy support) ⚠ GPL-3.0 fine for hosting; Manus is a known brand, avoid naming it
Leon leon-ai/leon ★ 17.6k · Permissive MIT · App · Fit 2/5	Open-source personal assistant with modular skills and local voice control *Replaces:* Siri, Alexa, Google Assistant	Tinkerers and privacy hobbyists	Setup + support retainer Consulting/implementation Training/courses	• Offline assistant for privacy-minded households • Voice skills for makerspaces • Custom assistants for hobby robotics *Angle:* Personal assistant subscriptions	$29-99 per setup *Effort:* High (Rewrite in progress, limited maturity) ⚠ Project in rewrite; skills ecosystem small
Ultravox fixie-ai/ultravox ★ 4.6k · Permissive MIT · Model · Fit 2/5	Multimodal LLM taking speech input directly for low-latency voice agents *Replaces:* Vapi, OpenAI Realtime API, Retell AI	Voice AI developers	API/usage-based Consulting/implementation Managed hosting	• Voice agent backend for telehealth • Speech-native bots for call centers • Voice concierge for hotels *Angle:* Speech-native LLM voice service	$0.05-0.15 per minute *Effort:* High (Model repo, hosted API is Ultravox.ai) ⚠ Llama-based license terms apply; GPU hosting required
Vocode vocodedev/vocode-core ★ 3.8k · Permissive MIT · Framework · Fit 2/5	Modular library for building voice-based LLM agents over phone and web *Replaces:* Vapi, Bland AI, Synthflow, Retell AI	Voice AI developers	Consulting/implementation Managed hosting API/usage-based	• Phone agents for HVAC dispatch • Reservation bots for restaurants • Collections reminder calls for clinics *Angle:* AI phone receptionist SaaS	$0.10-0.20 per call minute *Effort:* High (Library, project slowed, telephony integrations manual) ⚠ Vocode shifted to hosted offering; maintenance uncertain; call consent laws
Jarvis Priler/jarvis ★ 3.0k · Check NOASSERTION · App · Fit 2/5	Offline voice assistant written in Rust, still a work in progress. *Replaces:* Siri, Alexa, Google Assistant	Privacy-focused users wanting offline voice control	Setup + support retainer Premium plugins/add-ons	• Offline voice control for smart workshop tools • Private voice notes for home offices • Voice kiosks for small clinics	$50-150 per home or office setup *Effort:* High (Work in progress, voice engine needs hardening) ⚠ NOASSERTION: read license first; JARVIS is a Marvel-derived name, rename
VoiceMem xzf-thu/VoiceMem ★ 2.9k · Permissive Apache-2.0 · Framework · Fit 2/5	Infrastructure for voice agents with persistent memory and fully streaming responses. *Replaces:* Vapi, Retell AI, Bland AI	Voice AI startups building customer assistants	Managed hosting Consulting/implementation	• Voice agents with memory for dental booking • Streaming phone assistants for property managers • Memory-based voice coaches for wellness clinics	$0.05-0.15 per minute, usage-based *Effort:* High (Streaming and memory design, complex infrastructure) ⚠ Apache: keep notices; voice and emotion data may fall under privacy laws
Dicio-android DicioTeam/dicio-android ★ 1.5k · GPL GPL-3.0 · App · Fit 2/5	Open-source voice assistant app for Android. *Replaces:* Google Assistant, Bixby	Android users wanting an open voice assistant	Premium plugins/add-ons Setup + support retainer	• Voice shortcut apps for Android power users • Offline voice tools for privacy-focused families • Assistant apps for vocational school tech labs	Free core; $2-4 one-time Play Store app *Effort:* Medium (Android app, GPL, store listing and branding) ⚠ GPL-3.0: distributed apps must ship source; Google Assistant is a brand
EchoMuse wilbowes/EchoMuse ★ 1.4k · Permissive MIT · App · Fit 2/5	Local voice assistant for Home Assistant that runs on old Amazon Echo hardware. *Replaces:* Amazon Alexa, Google Nest Assistant	Smart-home hobbyists reusing old Echo speakers	Setup + support retainer Premium plugins/add-ons	• Old Echo repurposing kits for smart-home installers • Local voice control for elder-care homes • Voice panels for hospitality smart rooms	$40-120 per device install, setup service *Effort:* High (Hardware-specific Linux work, device mods, support burden) ⚠ MIT: keep notices; Amazon device modification may breach Amazon terms

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Irene-Voice-Assistant janvarev/Irene-Voice-Assistant ★ 1.2k · Check NOASSERTION · App · Fit 2/5	Russian-language offline voice assistant that supports skills through plugins. *Replaces:* Yandex Alice, Siri, Alexa	Russian-speaking users wanting offline voice control	Setup + support retainer Premium plugins/add-ons	• Russian voice control for small workshops • Offline voice tools for Russian-speaking seniors • Skill packs for Russian home offices	$15-40 per device setup, or $5 skill packs *Effort:* Medium (Russian-only, plugin ecosystem needs curation) ⚠ NOASSERTION: read license first; Yandex and Alice names are brands
Yandex_smart_home dext0r/yandex_smart_home ★ 1.1k · Permissive MIT · Tool · Fit 2/5	Home Assistant integration that lets Yandex Alice and Marusia control smart devices. *Replaces:* Nabu Casa cloud voice links	Russian smart-home users with Home Assistant	Setup + support retainer Premium plugins/add-ons	• Alice setup services for Russian apartment owners • Voice control installs for small rental managers • Smart-home packs for Russian contractors	$30-80 per home integration setup *Effort:* Low (Integration module, MIT, easy to package) ⚠ MIT: keep notices; Yandex Alice and Marusia are trademarks
Jarvis ethanplusai/jarvis ★ 961 · Check NOASSERTION · App · Fit 2/5	Mac voice assistant that brainstorms and builds projects with Claude Code by talking aloud. *Replaces:* Wispr Flow, Superwhisper, Siri	Developers wanting voice-driven coding on macOS	Premium plugins/add-ons Setup + support retainer	• Voice coding tools for Mac developers • Hands-free project planning for consultants • Voice updates for long-running coding jobs	$15-30 one-time Mac license, or $9/mo *Effort:* Medium (Mac-only, depends on Claude subscription terms) ⚠ NOASSERTION: read license; Claude Code terms apply; JARVIS is Marvel-derived
OpenVoiceOS OpenVoiceOS/ovos-core ★ 300 · Permissive Apache-2.0 · Platform · Fit 2/5	Open-source voice assistant platform that runs locally on Linux devices *Replaces:* Alexa, Google Nest, Mycroft	Privacy-focused hobbyists and makers	Hardware kits/assembly Setup + support retainer Training/courses	• Offline voice assistant kits for makers • Privacy smart speaker builds • Voice control for assisted-living rooms *Angle:* Privacy voice assistant hardware	$149-299 per kit *Effort:* High (Linux platform, hardware integration heavy) ⚠ Small community; voice quality below Alexa

Computer Vision · 31

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
CompreFace exadel-inc/CompreFace ★ 8.4k · Permissive Apache-2.0 · App · Fit 4/5	Self-hosted face recognition REST API service with admin UI *Replaces:* AWS Rekognition, Face++, Azure Face, Kairos	Small businesses needing face check-in	Managed hosting Setup + support retainer Vertical SaaS	• Face attendance for private schools • Door entry for gyms • Visitor recognition for hotel lobbies *Angle:* Face recognition API for access control	$30-150/mo per site *Effort:* Medium (Docker app with admin UI, REST API ready) ⚠ Biometric consent laws; Apache-2.0; model licenses worth checking
Ultralytics YOLO ultralytics/ultralytics ★ 63.2k · AGPL AGPL-3.0 · Library · Fit 3/5	YOLO models for object detection, segmentation, classification, and pose estimation *Replaces:* AWS Rekognition, Google Vision, Roboflow, Clarifai	Developers building vision products	Consulting/implementation API/usage-based Vertical SaaS	• Safety helmet detection for construction • Parking occupancy for malls • Retail footfall counting for boutiques *Angle:* Custom object detection for factories	$2-10k per custom model *Effort:* High (Model library, you build the product) ⚠ AGPL-3.0 or paid Enterprise license; Ultralytics trademark; strong copyleft for products
Inference roboflow/inference ★ 2.5k · Check NOASSERTION · Platform · Fit 3/5	Server for deploying computer vision models and workflows on any device *Replaces:* AWS Rekognition, Cognex, Azure Custom Vision	Vision developers and edge integrators	Managed hosting API/usage-based Consulting/implementation	• Edge inference box for warehouses • Vision API for agricultural drones • Camera analytics for retailers *Angle:* Edge vision deployment service	$49-299/mo per site *Effort:* High (Server toolkit, integrated with Roboflow cloud) ⚠ Core Apache-2.0, some models under Roboflow Enterprise license; read license
OpenCV opencv/opencv ★ 91.5k · Permissive Apache-2.0 · Library · Fit 2/5	Standard open-source computer vision library for image and video processing *Replaces:* MATLAB Vision Toolbox, Cognex, AWS Rekognition	Engineers building vision systems	Consulting/implementation Training/courses Agency service	• Vision inspection for small factories • License plate readers for parking lots • Shelf analytics for retailers *Angle:* Vision consulting	$100-200/hr consulting *Effort:* High (Library only, business is custom projects) ⚠ Apache-2.0; some contrib modules have patents or non-free codecs

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Yolov5 ultralytics/yolov5 ★ 58.3k · AGPL AGPL-3.0 · Library · Fit 2/5	PyTorch YOLOv5 toolkit for object detection, segmentation, classification and export. *Replaces:* Roboflow Train, AWS Rekognition Custom Labels, Azure Custom Vision	Computer vision teams training detection models	Consulting/implementation Setup + support retainer	• Defect detection for factory quality teams • Shelf monitoring for retail chains • Animal counting for wildlife research groups	$3-15k per custom detection model project *Effort:* Medium (AGPL, needs productization and inference hosting) ⚠ AGPL: publish server changes; Ultralytics sells separate commercial license
Segment Anything facebookresearch/segment-anything ★ 55.1k · Permissive Apache-2.0 · Model · Fit 2/5	Meta image segmentation model that masks any object from prompts *Replaces:* Adobe Photoshop Select Subject, Remove.bg, Roboflow	Developers and annotation teams	API/usage-based Consulting/implementation Managed hosting	• Background removal API for e-commerce • Segmentation labeling for dataset vendors • Photo cutouts for print shops *Angle:* Auto-masking API for designers	$0.01-0.05 per image *Effort:* High (Model repo, build service and UI) ⚠ Apache-2.0; successor SAM 2 and 3 are preferable; Meta trademark
Supervision roboflow/supervision ★ 51.5k · Permissive MIT · Library · Fit 2/5	Reusable Python utilities for detection, tracking, annotation, and dataset handling *Replaces:* AWS Rekognition, Cognex, Roboflow Platform	Computer vision developers	Consulting/implementation Training/courses Agency service	• People-counting for retail stores • Sports analytics for amateur clubs • Traffic analysis for city planners *Angle:* Video analytics dashboards	$2-8k per vision project *Effort:* High (Library only, no UI or tenancy) ⚠ Roboflow is a trademark; utilities, not a product
MediaPipe google-ai-edge/mediapipe ★ 37.6k · Permissive Apache-2.0 · Framework · Fit 2/5	Google on-device ML solutions for pose, face, hand tracking, and more *Replaces:* Apple Vision, Snapchat Lens tools, Kinect	Mobile and web app developers	Consulting/implementation Mobile app on top Agency service	• Posture coach app for physios • Hand-gesture controls for kiosks • Virtual try-on for jewelry shops *Angle:* Fitness and pose tracking apps	$5-20k per app build *Effort:* High (Framework, you ship the app) ⚠ Apache-2.0; Google trademark; some models have separate terms
Detectron2 facebookresearch/detectron2 ★ 35.0k · Permissive Apache-2.0 · Library · Fit 2/5	Meta PyTorch platform for object detection and segmentation research *Replaces:* AWS Rekognition, Clarifai, Google Vision	ML researchers and engineers	Consulting/implementation API/usage-based Training/courses	• Defect detection for factories • Document layout detection for archives • Wildlife camera analysis for NGOs *Angle:* Segmentation models for agriculture	$100-250/hr consulting *Effort:* High (Research library, build around it) ⚠ Project in maintenance; CUDA setup complexity
Mmdetection open-mmlab/mmdetection ★ 33.0k · Permissive Apache-2.0 · Library · Fit 2/5	Object detection toolbox and benchmark suite for training and evaluating detection models. *Replaces:* Roboflow, Landing AI, Clarifai	Research labs and ML engineers benchmarking detectors	Training/courses Consulting/implementation	• Detector benchmarks for drone inspection firms • Model training courses for CV bootcamps • Custom detection pipelines for logistics parcel sorting	$4-12k per custom detection pipeline project *Effort:* High (Heavy framework, many configs, needs expertise) ⚠ Apache: keep notices; OpenMMLab is a known brand, avoid implying affiliation
InsightFace deepinsight/insightface ★ 30.2k · Check NONE · Library · Fit 2/5	Face recognition and analysis toolkit with 2D and 3D models *Replaces:* Face++, AWS Rekognition, FaceApp, Kairos	Developers building face-recognition systems	API/usage-based Consulting/implementation Managed hosting	• Attendance by face for schools • Door access for coworking spaces • Photo tagging for event photographers *Angle:* Face analytics licensing	$0.002 per face match *Effort:* High (Library, models have non-commercial restrictions) ⚠ Code MIT but pretrained models non-commercial; biometric privacy laws (BIPA, GDPR)
Mask_RCNN matterport/Mask_RCNN ★ 25.6k · Check NOASSERTION · Library · Fit 2/5	Keras and TensorFlow implementation of Mask R-CNN for object detection and segmentation. *Replaces:* AWS Rekognition, Google Vision segmentation	Developers adding segmentation to vision apps	Consulting/implementation Training/courses	• Instance segmentation for agricultural crop counting • Product segmentation for ecommerce photo tools • Pallet segmentation for warehouse inspection	$3-8k per segmentation model project *Effort:* Medium (Older Keras and TensorFlow stack, needs modernizing) ⚠ NOASSERTION: read license first; Matterport is a brand, check weights terms

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
DeepFace serengil/deepface ★ 23.7k · Permissive MIT · Library · Fit 2/5	Python library for face recognition and attribute analysis wrapping many models *Replaces:* AWS Rekognition, Face++, Kairos	Python developers	API/usage-based Consulting/implementation Training/courses	• Photo duplicate finder for studios • Visitor check-in for offices • Face search for event galleries *Angle:* Face verification for KYC	$0.005 per face match *Effort:* High (Wrapper library, you build service) ⚠ Biometric privacy laws; underlying model licenses vary; emotion/race attributes are ethically fraught
PaddleDetection PaddlePaddle/PaddleDetection ★ 14.5k · Permissive Apache-2.0 · Library · Fit 2/5	Detection toolkit covering object detection, segmentation, tracking and keypoint detection. *Replaces:* AWS Rekognition, Roboflow	Teams deploying vision in Chinese cloud stacks	Consulting/implementation Training/courses	• People counting for retail stores • Pose tracking for fitness app makers • Vehicle tracking for parking operators	$3-10k per detection deployment project *Effort:* High (PaddlePaddle-based, needs stack migration or expertise) ⚠ Apache: keep notices; Baidu PaddlePaddle is a brand, avoid implication
Pytorch-grad-cam jacobgil/pytorch-grad-cam ★ 13.0k · Permissive MIT · Library · Fit 2/5	Library that visualizes which image regions drive CNN and transformer predictions. *Replaces:* Fiddler, Arize explainability, WhyLabs	ML teams explaining vision model decisions	Consulting/implementation Training/courses	• Explainability audits for medical imaging vendors • Model review for insurance photo claims • Explainability workshops for ML teams	$3-8k per explainability audit *Effort:* Low (Python library, MIT, easy to package) ⚠ MIT: keep notices; explainability outputs are not proof of compliance
Autogluon autogluon/autogluon ★ 10.8k · Permissive Apache-2.0 · Library · Fit 2/5	AutoML library that trains accurate tabular, text, image and time-series models with few lines. *Replaces:* DataRobot, H2O Driverless AI, Google AutoML	Data teams wanting quick predictive models	Consulting/implementation Training/courses	• Churn models for subscription businesses • Demand forecasts for regional grocers • Credit scoring prototypes for small lenders	$3-10k per predictive model build *Effort:* Medium (Library, needs UI, hosting and support) ⚠ Apache: keep notices; AutoGluon is an AWS-backed name, avoid implying endorsement
GroundingDINO IDEA-Research/GroundingDINO ★ 10.7k · Permissive Apache-2.0 · Model · Fit 2/5	Open-set object detection model that finds objects from free-text prompts. *Replaces:* Google Cloud Vision, AWS Rekognition custom labels	Teams detecting objects without custom training	API/usage-based Consulting/implementation	• Text-prompt detection for warehouse inventory • Shelf product finding for retail audits • Object search for stock photo archives	$0.01-0.05 per image, usage-based *Effort:* Medium (Needs GPU serving and tuning) ⚠ Apache: keep notices; training data includes web sources, check rights
YOLOX Megvii-BaseDetection/YOLOX ★ 10.7k · Permissive Apache-2.0 · Model · Fit 2/5	High-performance anchor-free YOLO detector with export to ONNX, TensorRT and OpenVINO. *Replaces:* Roboflow Inference, AWS Rekognition	Edge teams deploying real-time object detection	Consulting/implementation Setup + support retainer	• On-device detection for drone inspection • Camera analytics for parking lots • Real-time quality checks on packaging lines	$4-12k per edge deployment project *Effort:* Medium (Model code plus export pipelines, needs packaging) ⚠ Apache: keep notices; Megvii and YOLO names are brands, avoid implying endorsement
Yolov3 ultralytics/yolov3 ★ 10.6k · AGPL AGPL-3.0 · Library · Fit 2/5	PyTorch YOLOv3 implementation for real-time detection with training and export. *Replaces:* Roboflow Train, Azure Custom Vision	Teams needing older YOLO models for edge devices	Consulting/implementation Setup + support retainer	• Edge detection for small warehouse robots • Object counting for farm equipment makers • Plate detection for parking operators	$3-10k per custom edge model project *Effort:* Medium (AGPL, older model, needs maintenance) ⚠ AGPL: publish server changes; Ultralytics sells commercial licenses separately
Rf-detr roboflow/rf-detr ★ 10.0k · Permissive Apache-2.0 · Model · Fit 2/5	Real-time detection and segmentation model architecture built for fine-tuning on custom data. *Replaces:* Roboflow Train, AWS Rekognition Custom Labels	Vision teams fine-tuning detectors on own data	Consulting/implementation API/usage-based	• Custom detectors for meat processing plants • Brand logo detection for ad agencies • Defect segmentation for electronics makers	$3-10k per fine-tuned detector project *Effort:* Medium (Roboflow ecosystem ties, needs deployment work) ⚠ Apache: keep notices; Roboflow is a known brand, avoid implied affiliation

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Jetson-inference dusty-nv/jetson-inference ★ 9.0k · **Permissive** MIT · Starter · Fit 2/5	Tutorial and code for deploying deep learning inference on NVIDIA Jetson devices. *Replaces:* AWS Panorama, Edge Impulse	Edge AI developers deploying vision on Jetson	Training/courses Consulting/implementation	• Jetson vision courses for robotics bootcamps • Edge camera deployment for security integrators • Jetson setup services for farm automation firms	$300-800 per edge vision workshop seat *Effort:* Low (Tutorial code, MIT, easy to package as course) ⚠ MIT: keep notices; NVIDIA and Jetson are trademarks
ImageAI OlafenwaMoses/ImageAI ★ 8.9k · **Permissive** MIT · Library · Fit 2/5	Python library giving developers self-contained computer vision features. *Replaces:* Google Vision API, AWS Rekognition	Python developers adding vision features to apps	Consulting/implementation Training/courses	• Image tagging for small photo archives • Object detection for hobby camera projects • Vision course kits for Python bootcamps	$2-5k per vision feature integration *Effort:* Low (Python library, MIT, easy to wrap) ⚠ MIT: keep notices; verify maintenance activity before depending on it
Mmdetection3d open-mmlab/mmdetection3d ★ 6.6k · **Permissive** Apache-2.0 · Library · Fit 2/5	Platform for training and evaluating general 3D object detection models. *Replaces:* Scale AI 3D labeling, Segments.ai	Autonomy and robotics teams training 3D detectors	Consulting/implementation Training/courses	• 3D detectors for warehouse robot fleets • Lidar training courses for autonomy students • Point cloud pipelines for construction survey firms	$8-25k per 3D perception pipeline project *Effort:* High (Heavy research platform, needs GPU and data work) ⚠ Apache: keep notices; OpenMMLab is a known brand, avoid implication
Nanodet RangiLyu/nanodet ★ 6.3k · **Permissive** Apache-2.0 · Model · Fit 2/5	Lightweight anchor-free detection model designed to run in real time on mobile phones. *Replaces:* Google ML Kit object detection, Apple Vision	Mobile app developers adding on-device detection	Consulting/implementation Premium plugins/add-ons	• On-phone product scanning for retail apps • Offline plant detection for gardening apps • Mobile safety checks for construction crews	$3-8k per on-device detection integration *Effort:* Low (Compact model, Apache, mobile-ready) ⚠ Apache: keep notices; speed claims depend on device, test real hardware
Gluon-cv dmlc/gluon-cv ★ 5.9k · **Permissive** Apache-2.0 · Library · Fit 2/5	Deep learning computer vision toolkit built on Apache MXNet Gluon. *Replaces:* Google Vision, AWS Rekognition	Teams maintaining legacy MXNet vision code	Consulting/implementation Setup + support retainer	• MXNet migration services for legacy vision teams • Detection models for retail analytics vendors • Vision courses for university engineering labs	$4-12k per legacy vision migration project *Effort:* High (Aging MXNet stack, needs migration work) ⚠ Apache: keep notices; Apache MXNet is a foundation project name
YOLOv6 meituan/YOLOv6 ★ 5.9k · **GPL** GPL-3.0 · Model · Fit 2/5	Single-stage object detection framework built for industrial vision applications. *Replaces:* Cognex VisionPro, Roboflow Inference	Factory automation teams deploying vision inspection	Consulting/implementation Setup + support retainer	• Defect inspection for PCB assembly lines • Label verification for food packagers • Part counting for automotive suppliers	$5-15k per industrial vision deployment *Effort:* Medium (Model framework, needs industrial integration work) ⚠ GPL-3.0 fine for hosting; distributed inspection software ships source
OpenPCDet open-mmlab/OpenPCDet ★ 5.8k · **Permissive** Apache-2.0 · Library · Fit 2/5	Toolbox for training and running LiDAR-based 3D object detection models. *Replaces:* Scale AI 3D labeling, lidar perception SDKs	Autonomy and mapping teams using lidar data	Consulting/implementation Training/courses	• Lidar detection for warehouse forklifts • Point cloud labeling pipelines for mapping firms • Lidar training labs for autonomy students	$8-25k per lidar perception pipeline project *Effort:* High (Research-grade toolbox, needs GPU and data pipeline) ⚠ Apache: keep notices; lidar datasets like nuScenes have own licenses
Sahi obss/sahi ★ 5.6k · **Permissive** MIT · Library · Fit 2/5	Library for sliced inference on large images, with error analysis plots and UI. *Replaces:* Roboflow Inference slicing, Azure AI Vision	Vision teams detecting small objects in big images	Consulting/implementation Training/courses	• Small defect detection in satellite tiles • Tiny object counting for aerial surveyors • Sliced inference for document page layouts	$2-6k per small-object detection setup *Effort:* Low (Python library, MIT, easy to wrap) ⚠ MIT: keep notices; framework-agnostic, verify results on your own data

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Sports roboflow/sports ★ 5.5k · Permissive MIT · Starter · Fit 2/5	unclear project; computer vision code for sports, per its three-word description. *Replaces:* Sportlogiq, Stats Perform, Hudl	Sports analysts and coaches using video	Consulting/implementation Training/courses	• Player tracking for amateur football clubs • Video analysis courses for coaching staff • Tracking demos for sports tech startups	$3-8k per sports video analysis project *Effort:* Medium (Vague scope, needs clarity before building) ⚠ MIT: keep notices; Roboflow is a known brand, avoid implication
Object-Detection-Metrics rafaelpadilla/Object-Detection-Metrics ★ 5.1k · Permissive MIT · Library · Fit 2/5	Library of standard metrics for evaluating object detection algorithms. *Replaces:* Custom evaluation scripts, Roboflow metrics	Vision teams validating detector accuracy	Consulting/implementation Training/courses	• Detector acceptance tests for medical device vendors • Benchmark reports for computer vision startups • Eval courses for ML bootcamps	$2-5k per model evaluation report *Effort:* Low (Small MIT library, easy to package) ⚠ MIT: keep notices; metric definitions vary by benchmark, state which you use
BEVFormer fundamentalvision/BEVFormer ★ 4.6k · Permissive Apache-2.0 · Model · Fit 2/5	Camera-only model for 3D detection and map segmentation in autonomous driving. *Replaces:* Mobileye perception, Waymo perception stacks	Autonomy teams building camera-based perception	Consulting/implementation Training/courses	• Camera perception for delivery robot makers • Map segmentation for road survey firms • Driving perception courses for autonomy students	$10-30k per perception research integration *Effort:* High (Research model, large data and compute needs) ⚠ Apache: keep notices; driving datasets have separate licenses and safety liability

Chatwoot chatwoot/chatwoot ★ 39.0k · Check NOASSERTION · App · Fit 5/5	Omnichannel customer support desk with live chat, email, WhatsApp and shared inbox *Replaces:* Intercom, Zendesk, Freshdesk, Crisp, Drift	SMB support teams and ecommerce stores	Managed hosting Vertical SaaS Setup + support retainer	• Support inbox for Shopify stores • WhatsApp helpdesk for clinics • Live chat for SaaS startups *Angle:* Omnichannel support inbox SaaS	$19-49/agent/mo, free tier *Effort:* Medium (Multi-account built in, enterprise folder licensed) ⚠ NOASSERTION: MIT core plus commercial enterprise dir; Chatwoot trademark
Typebot baptisteArno/typebot.io ★ 10.6k · Check NOASSERTION · App · Fit 5/5	Visual chatbot and conversational form builder you can self-host *Replaces:* Typeform, Landbot, ManyChat, Intercom	Marketers, agencies, startups	Managed hosting White-label reseller Agency service	• Lead chatbots for real estate • Intake bots for law firms • Quiz funnels for coaches *Angle:* Conversational forms SaaS	$19-79/mo per workspace *Effort:* Medium (Workspaces built in, FSL license) ⚠ Fair Source license, restricts competing hosted service, read first
Zammad zammad/zammad ★ 6.1k · AGPL AGPL-3.0 · App · Fit 5/5	Web-based helpdesk and customer support system *Replaces:* Zendesk, Freshdesk, Help Scout, Intercom	Support teams, SMBs	Managed hosting Setup + support retainer White-label reseller	• Support desk for SaaS startups • Helpdesk for municipalities • Ticketing for e-commerce *Angle:* Helpdesk hosting for SMBs	$5-25/agent/mo *Effort:* Medium (Mature Rails, multi-channel) ⚠ AGPL, publish modifications; Zammad trademark
FreeScout freescout-help-desk/freescout ★ 4.6k · AGPL AGPL-3.0 · App · Fit 5/5	Self-hosted shared mailbox and helpdesk *Replaces:* Help Scout, Zendesk, Front, Freshdesk	Small support teams, agencies	Managed hosting Premium plugins/add-ons Setup + support retainer	• Shared inbox for agencies • Support desk for WooCommerce shops • Helpdesk for local businesses *Angle:* Help Scout alternative reselling	$5-20/agent/mo *Effort:* Medium (Laravel, paid modules, easy hosting) ⚠ AGPL, publish modifications; modules sold separately
Rocket.Chat RocketChat/Rocket.Chat ★ 46.4k · Check NOASSERTION · Platform · Fit 4/5	Team chat and secure communications platform with omnichannel support and federation *Replaces:* Slack, Microsoft Teams, Intercom, Zendesk	Government, defense and large regulated organisations	Managed hosting Setup + support retainer White-label reseller	• Secure chat for law firms • Customer chat for banks • Internal comms for hospitals *Angle:* Omnichannel chat for enterprises	$4-10/user/mo *Effort:* Medium (White label built in, enterprise features need licence) ⚠ NOASSERTION: MIT core, ee folder commercial; Rocket.Chat trademark

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
UVdesk uvdesk/community-skeleton ★ 19.6k · Weak copyleft OSL-3.0 · App · Fit 4/5	Open-source helpdesk and ticketing system *Replaces:* Zendesk, Freshdesk, Help Scout, Intercom	Support teams, e-commerce stores	Managed hosting Premium plugins/add-ons Setup + support retainer	• Helpdesk for Magento stores • Support desk for Shopify apps • Ticketing for agencies *Angle:* Ecommerce helpdesk service	$10-30/agent/mo *Effort:* Medium (Symfony, paid extensions) ⚠ OSL-3.0 copyleft with network clause, read license
Botpress botpress/botpress ★ 15.0k · Permissive MIT · Platform · Fit 4/5	Platform for building and deploying LLM chatbots and agents *Replaces:* Intercom Fin, Voiceflow, Drift, Dialogflow	Businesses, agencies	Agency service Managed hosting White-label reseller	• Chatbots for real estate agents • Booking bots for clinics • Support bots for e-commerce *Angle:* Chatbot builder for agencies	$49-299/mo per bot *Effort:* Medium (Cloud-first, self-host needs setup) ⚠ MIT; Botpress trademark; cloud-first product
osTicket osTicket/osTicket ★ 4.0k · GPL GPL-2.0 · App · Fit 4/5	Ticketing system for customer support *Replaces:* Zendesk, Freshdesk, Help Scout	Support teams, IT desks	Managed hosting Setup + support retainer Premium plugins/add-ons	• Helpdesk for small IT firms • Ticketing for schools • Support desk for hosts *Angle:* Managed ticketing for IT firms	$5-15/agent/mo *Effort:* Medium (Dated PHP, plugin ecosystem) ⚠ GPL, fine for hosting; osTicket trademark
Rasa RasaHQ/rasa ★ 21.4k · Permissive Apache-2.0 · Framework · Fit 3/5	Machine learning framework for text and voice conversational assistants *Replaces:* Dialogflow, Amazon Lex, Botpress, Voiceflow	Developers, enterprises	Consulting/implementation Setup + support retainer Agency service	• Support bots for banks • Voice assistants for clinics • Chatbots for telecoms *Angle:* Conversational AI for call centers	$5k-30k per project *Effort:* High (Framework, heavy ML ops) ⚠ Apache; Rasa Pro is separate commercial product
Tiledesk Tiledesk/tiledesk ★ 327 · Permissive MIT · Platform · Fit 3/5	Open-source conversational platform with live chat, chatbot designer and multichannel inbox *Replaces:* Intercom, Drift, Zendesk, Landbot	Customer service teams wanting bots plus human handoff	Managed hosting White-label reseller Agency service	• Chatbot builder for travel agencies • Support bots for municipal services • Multichannel desk for telecom resellers *Angle:* Chatbot plus live agent platform	$29-149/mo per project *Effort:* Medium (Many microservices, Kubernetes-oriented setup) ⚠ MIT; many services to operate, Tiledesk trademark
v4.0 goautodial/v4.0 ★ 148 · Check NONE · Platform · Fit 3/5	Open-source omni-channel contact center suite built on established open-source technologies. *Replaces:* Five9, Genesys Cloud, Talkdesk	Call centers wanting open-source telephony suites	Managed hosting Setup + support retainer	• Hosted dialers for small collection agencies • Outbound call setups for local insurance brokers • Omnichannel support desks for regional utilities	$150-600/mo per seat, managed hosting *Effort:* High (Telephony stack, compliance and carrier integrations) ⚠ NONE license: read first; telephony regulation and call recording laws apply
AiPBX mahirgul/AiPBX ★ 83 · Check NOASSERTION · Platform · Fit 3/5	Open-source IP PBX with web portal, WebRTC softphone, chat, fax and call center features. *Replaces:* 3CX, RingCentral, Grandstream UCM	Small businesses wanting self-hosted phone systems	Managed hosting Setup + support retainer	• Phone systems for small law offices • Hosted PBX for regional dental groups • Call center setups for local home-service firms	$25-60/mo per extension, managed hosting *Effort:* High (Telephony stack, apps, support and compliance) ⚠ NOASSERTION: read license first; Asterisk is a trademark; telecom rules apply
Brightbean-chat brightbeanxyz/brightbean-chat ★ 83 · AGPL AGPL-3.0 · App · Fit 3/5	Self-hosted chat automation with visual flows across social, messaging and email channels. *Replaces:* ManyChat, Chatfuel, Zendesk Sunshine	Small businesses automating Instagram and WhatsApp sales	Managed hosting Setup + support retainer	• Comment-to-DM campaigns for fitness coaches • WhatsApp order bots for bakeries • Shared inboxes for boutique hotels	$29-99/mo per business, managed hosting *Effort:* High (Many channel APIs with approvals, heavy support) ⚠ AGPL: publish server-side changes; Meta and WhatsApp API policies apply
Cascade-realtime-gateway rasonyang/cascade-realtime-gateway ★ 64 · Permissive Apache-2.0 · Platform · Fit 3/5	Self-hosted voice gateway that runs ASR, LLM and TTS providers behind OpenAI Realtime protocol. *Replaces:* OpenAI Realtime API, Vapi, Retell AI	Voice AI teams avoiding single-vendor lock-in	Managed hosting API/usage-based	• Provider-swappable voice bots for call centers • Realtime voice gateways for telehealth apps • Cost-controlled voice agents for logistics dispatch	$0.02-0.06 per minute, usage-based *Effort:* Medium (Go gateway, needs provider keys and ops work) ⚠ Apache: keep notices; OpenAI Realtime protocol naming may need care

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Amazon-transcribe-live-call-analytics aws-samples/amazon-transcribe-live-call-analytics ★ 133 · Check NOASSERTION · Starter · Fit 2/5	AWS sample solution for live call transcription and analytics using Amazon Transcribe. *Replaces:* CallMiner, Observe.AI, Cresta	Contact centers analyzing calls on AWS	Setup + support retainer Consulting/implementation	• Live call coaching for insurance sales teams • Compliance monitoring for debt collectors • Call quality reports for healthcare scheduling	$2-8k per AWS call analytics deployment *Effort:* Medium (AWS sample, needs productization and AWS expertise) ⚠ NOASSERTION: read license first; call recording consent rules apply
Freeipcc lihaiya/freeipcc ★ 129 · Permissive Apache-2.0 · Platform · Fit 2/5	Open-source AI call center system with ticketing and outbound dialing on FreeSWITCH. *Replaces:* Genesys, Five9, Aircall	Chinese call centers wanting self-hosted AI dialers	Setup + support retainer Managed hosting	• AI outbound calls for real estate agencies • Ticketing desks for regional telecom resellers • Self-hosted dialers for small survey firms	$300-1000/mo per hosted server, plus setup *Effort:* High (Telephony stack, FreeSWITCH expertise, Chinese-first) ⚠ Apache: keep notices; outbound calling rules and FreeSWITCH trademark apply
Voxlock arbazsiddiqui/voxlock ★ 98 · Permissive Apache-2.0 · Library · Fit 2/5	Streaming voice isolator that keeps the main speaker and removes other voices before speech-to-text. *Replaces:* Krisp, Cleanvoice, Adobe Podcast Enhance	Call center and voice AI teams cleaning audio	Consulting/implementation API/usage-based	• Noise removal for call center transcription vendors • Clean dictation for medical scribe apps • Speaker isolation for courtroom transcript tools	$2-6k per audio pipeline integration *Effort:* Low (Python package, Apache, easy to integrate) ⚠ Apache: keep notices; claims of best performance need independent testing
Braze-web-sdk braze-inc/braze-web-sdk ★ 87 · Check NOASSERTION · Library · Fit 2/5	Official JavaScript SDK for connecting websites to the Braze customer engagement platform. *Replaces:* Segment web SDK, OneSignal web SDK	Web teams integrating customer messaging tools	Consulting/implementation Training/courses	• Braze setup services for mid-size retailers • Web push integration for media publishers • Onboarding tracking for SaaS growth teams	$3-8k per Braze web integration project *Effort:* Low (SDK ties to Braze platform, little value alone) ⚠ NOASSERTION: read license first; Braze is a trademark, SDK tied to vendor
Braze-swift-sdk braze-inc/braze-swift-sdk ★ 72 · Check NOASSERTION · Library · Fit 2/5	Official Swift SDK for connecting Apple apps to the Braze engagement platform. *Replaces:* Firebase push SDKs, OneSignal iOS	iOS developers integrating messaging tools	Consulting/implementation Training/courses	• Braze onboarding for iOS fitness apps • Push setup for mobile retail teams • Messaging courses for Swift developers	$3-8k per iOS messaging integration *Effort:* Low (SDK tied to Braze platform, little to brand) ⚠ NOASSERTION: read license first; Braze and Apple names are trademarks
Contact-center mehcsbegzz/contact-center ★ 71 · Permissive Apache-2.0 · Platform · Fit 2/5	Chinese-language microservice customer service system built on Spring Cloud. *Replaces:* Zendesk, Freshdesk, Chatwoot	Chinese dev shops building support desks	Setup + support retainer Consulting/implementation	• Helpdesk builds for Chinese SaaS vendors • Ticket systems for regional logistics firms • Support portals for local schools	$3-10k per helpdesk build, plus support *Effort:* High (Spring microservice stack, heavy to operate) ⚠ Apache: keep notices; Spring is a VMware and Broadcom trademark
Sample-multilingual-ivr-contact-center-for-amazon-connect aws-samples/sample-multilingual-ivr-contact-center-for-amazon-connect ★ 55 · Permissive MIT-0 · Starter · Fit 2/5	AWS CDK stack that deploys a multilingual IVR contact center on Amazon Connect. *Replaces:* Genesys Cloud, Five9, Talkdesk	AWS partners deploying contact centers	Setup + support retainer Consulting/implementation	• Multilingual IVR builds for regional clinics • Voicemail-to-case setups for property managers • Connect deployments for multilingual city services	$3-10k per Amazon Connect deployment *Effort:* Medium (AWS-only, needs customization and support) ⚠ MIT-0: no attribution needed; Amazon Connect and AWS are trademarks

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Omni automagik-dev/omni ★ 49 · Permissive Apache-2.0 · Platform · Fit 2/5	Event-driven omnichannel platform that lets AI agents message across many chat platforms. *Replaces:* Twilio Flex, Sinch, Respond.io	Teams connecting AI agents to customer chat channels	Managed hosting API/usage-based	• Multichannel AI bots for dental practices • Agent messaging gateways for regional retailers • Support routing for SaaS helpdesks	$99-400/mo per workspace, usage fees extra *Effort:* High (Early project, many channel integrations to maintain) ⚠ Apache: keep notices; each messaging platform has its own API terms

Data Catalogs · 23

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
OpenMetadata open-metadata/OpenMetadata ★ 15.7k · Permissive Apache-2.0 · Platform · Fit 4/5	Unified metadata platform for data discovery, lineage, quality, and governance *Replaces:* Collibra, Alation, Atlan, Informatica	Data teams at mid-size companies	Managed hosting Setup + support retainer Consulting/implementation	• Governance catalog for fintechs • Data lineage for healthcare analytics teams • Catalog service for dbt shops *Angle:* Data governance platform hosting	$1-5k/mo managed per team *Effort:* High (Multi-service stack, enterprise ops) ⚠ OpenMetadata is a Collate trademark; heavy infra footprint
DataHub datahub-project/datahub ★ 13.0k · Permissive Apache-2.0 · Platform · Fit 4/5	Metadata platform for data discovery, lineage, and governance *Replaces:* Collibra, Alation, Atlan, Informatica	Data platform teams at mid-large firms	Managed hosting Consulting/implementation Setup + support retainer	• Catalog rollout for retailers • Lineage for banking data teams • Governance setup for SaaS data teams *Angle:* Managed data catalog for enterprises	$2-8k/mo managed per team *Effort:* High (Kafka and Elasticsearch stack, complex ops) ⚠ DataHub is a Acryl trademark; hosting is heavy
CKAN ckan/ckan ★ 5.2k · Check NOASSERTION · Platform · Fit 4/5	Data management system for publishing and sharing open data portals *Replaces:* Socrata, OpenDataSoft, Esri Hub, Junar	Governments, research institutes, NGOs	Managed hosting Consulting/implementation Setup + support retainer	• Open data portals for municipalities • Research data hubs for universities • Dataset portal for health NGOs *Angle:* Open data portals for governments	$500-3k/mo managed portal *Effort:* Medium (Mature, multi-theme, extensions, Python and Solr stack) ⚠ AGPL-3.0 per repo; metadata NOASSERTION, publish changes; CKAN name is trademark
Soda Core sodadata/soda-core ★ 2.5k · Check NOASSERTION · Tool · Fit 3/5	Data contracts and quality checks engine with SodaCL language *Replaces:* Monte Carlo, Great Expectations, Anomalo	Data engineers	Consulting/implementation Managed hosting Training/courses	• Data quality monitoring for ecommerce • Contract checks for fintech pipelines • Quality audits for SaaS analytics *Angle:* Data quality monitoring SaaS	$2-8k per setup *Effort:* High (Library and CLI, Soda Cloud is separate) ⚠ Soda Cloud is the paid product; check Apache license; trademark
Elementary elementary-data/elementary ★ 2.4k · Permissive Apache-2.0 · Tool · Fit 3/5	dbt-native data observability tool that monitors pipelines and tests for data issues. *Replaces:* Monte Carlo, Metaplane, Sifflet	Analytics engineers running dbt in production	Managed hosting Setup + support retainer	• Data monitoring for ecommerce analytics teams • dbt health checks for fintech reporting • Pipeline alerts for logistics BI teams	$300-1500/mo per team, cloud version *Effort:* Medium (Open core with premium features, needs packaging) ⚠ Apache: keep notices; premium cloud features are proprietary, avoid copying
Lakekeeper lakekeeper/lakekeeper ★ 1.5k · Permissive Apache-2.0 · Platform · Fit 3/5	Rust Apache Iceberg REST catalog with access control, credential vending and audit logs. *Replaces:* AWS Glue Catalog, Databricks Unity Catalog, Snowflake Horizon	Data platform teams running Iceberg lakehouses	Managed hosting Consulting/implementation	• Access-controlled lakehouses for regional banks • Audit-ready catalogs for healthcare analytics • Iceberg catalog setups for logistics data teams	$500-2000/mo per managed catalog *Effort:* High (Infrastructure product, needs security review and ops) ⚠ Apache: keep notices; Apache Iceberg is a foundation project name

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Datacontract-cli datacontract/datacontract-cli ★ 1.1k · **Permissive** MIT · Tool · Fit 3/5	CLI for testing data contracts against warehouses and Kafka using the ODCS standard. *Replaces:* Monte Carlo, Soda, Great Expectations Cloud	Data teams enforcing schema agreements	Consulting/implementation Setup + support retainer	• Contract checks for payments data teams • Schema agreements for retail data vendors • Kafka contract tests for logistics platforms	$2-6k per contract testing setup *Effort:* Low (CLI, MIT, easy to package and wrap) ⚠ MIT: keep notices; Snowflake, Databricks, BigQuery, Kafka are trademarks
Marmot marmotdata/marmot ★ 634 · **Permissive** MIT · Platform · Fit 3/5	Open-source catalog of tables, topics, queues and APIs that exposes metadata to AI agents. *Replaces:* Atlan, Alation, Collibra	Data teams giving AI agents safe metadata access	Managed hosting Consulting/implementation	• Agent metadata layers for banking analytics • Catalogs for SaaS AI support bots • Data context for logistics planning agents	$300-1200/mo per managed catalog *Effort:* Medium (Young project, needs hosting, auth and docs) ⚠ MIT: keep notices; Marmot is a known project name, check trademark
Magda magda-io/magda ★ 606 · **Permissive** Apache-2.0 · Platform · Fit 3/5	Federated data catalog and portal that aggregates datasets from many sources *Replaces:* Socrata, OpenDataSoft, CKAN hosting	Government agencies and research bodies	Managed hosting Consulting/implementation Setup + support retainer	• Data portal for state governments • Research catalog for universities • Open data hub for city councils *Angle:* Data catalog for public sector	$1-4k/mo managed portal *Effort:* High (Kubernetes microservices, heavy stack) ⚠ Small community; Australian government origins
Titan Titan-Systems/titan ★ 487 · **Permissive** Apache-2.0 · Tool · Fit 3/5	Infrastructure-as-code tool for provisioning Snowflake environments, roles and access with Python. *Replaces:* Terraform Snowflake provider, Permifrost	Data teams managing Snowflake access as code	Consulting/implementation Setup + support retainer	• Snowflake RBAC setups for healthcare data teams • CI/CD for Snowflake at retail analytics firms • Access audits for fintech warehouses	$3-10k per Snowflake IaC setup *Effort:* Medium (Snowflake-specific, needs docs and support) ⚠ Apache: keep notices; Snowflake is a trademark; tool tied to its API
Tuva-core tuva-health/tuva-core ★ 334 · **Permissive** Apache-2.0 · Starter · Fit 3/5	Core data model, marts, quality tests and terminology sets for analytics pipelines. *Replaces:* Health Catalyst, Innovaccer, Optum analytics	Health analytics teams building claims reporting	Setup + support retainer Consulting/implementation	• Claims analytics for regional health plans • Quality measure reporting for clinics • Terminology mapping for hospital data teams	$5-20k per health data warehouse implementation *Effort:* Medium (Health data domain, needs terminology license checks) ⚠ Apache: keep notices; medical terminology sets may have separate licenses
Halofy halofyai/halofy ★ 319 · **AGPL** AGPL-3.0 · Platform · Fit 3/5	Governance layer for AI agents covering identity, policy, provenance, audit and erasure. *Replaces:* Okta for agents, Credo AI, Holistic AI	Enterprises governing internal AI agent use	Managed hosting Setup + support retainer	• Agent audit trails for regulated insurers • Policy gates for healthcare AI assistants • Erasure workflows for EU-facing SaaS	$1-5k/mo per enterprise governance deployment *Effort:* High (Broad governance scope, needs security and legal review) ⚠ AGPL: publish server-side changes; erasure and identity features raise compliance duties
Geolens geolens-io/geolens ★ 291 · **Permissive** Apache-2.0 · Platform · Fit 3/5	Self-hosted geospatial data catalog with semantic search, OGC and STAC APIs, and a map builder. *Replaces:* ArcGIS Hub, Esri Living Atlas, Felt	Government and utility GIS teams sharing datasets	Managed hosting Setup + support retainer	• Open data portals for county governments • Asset catalogs for utility mapping teams • Geodata hubs for environmental agencies	$300-1500/mo per self-hosted deployment support *Effort:* Medium (Full stack, needs GIS support and docs) ⚠ Apache: keep notices; data holders' licenses govern catalogued datasets
Great Expectations fivetran/great_expectations ★ 11.9k · **Permissive** Apache-2.0 · Library · Fit 2/5	Python data validation library with expectations, checkpoints, and data docs *Replaces:* Monte Carlo, Soda Cloud, Anomalo, Informatica DQ	Data engineers	Consulting/implementation Training/courses Managed hosting	• Data quality audits for fintechs • Validation setup for healthcare analytics • Data docs portals for retailers *Angle:* Data quality testing service	$3-10k per implementation *Effort:* High (Library, UI cloud is vendor-paid) ⚠ Repo moved under Fivetran; GX Cloud is paid; trademark

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Unity Catalog unitycatalog/unitycatalog ★ 3.6k · **Permissive** Apache-2.0 · Platform · Fit 2/5	Open multi-modal data and AI catalog with governance across tables, files, functions *Replaces:* Databricks Unity Catalog, Collibra, Alation	Data platform engineers	Consulting/implementation Managed hosting Setup + support retainer	• Lakehouse catalog for mid-market firms • Governance layer for AI startups • Catalog migration for data teams *Angle:* Lakehouse governance consulting	$150-250/hr consulting *Effort:* High (Young OSS, no rich UI, Java server) ⚠ Databricks trademark and commercial upsell; features lag the managed version
Gravitino apache/gravitino ★ 3.3k · **Permissive** Apache-2.0 · Platform · Fit 2/5	Open data catalog for federated metadata management across geo-distributed data sources. *Replaces:* Collibra, Alation, Atlan	Data platform teams managing many data sources	Consulting/implementation Managed hosting	• Metadata catalogs for regional banks • Governance setup for multi-cloud retailers • Data catalogs for public health agencies	$5-20k per catalog implementation project *Effort:* High (Big data stack, needs deep engineering and support) ⚠ Apache: keep notices; Gravitino is an Apache project name, check trademark use
Marquez MarquezProject/marquez ★ 2.3k · **Permissive** Apache-2.0 · Platform · Fit 2/5	OpenLineage reference server collecting and visualizing data lineage metadata *Replaces:* Collibra, Alation, Atlan, Monte Carlo	Data platform engineers	Consulting/implementation Managed hosting Setup + support retainer	• Pipeline lineage for Airflow shops • Impact analysis for analytics teams • Audit trails for finance data *Angle:* Data lineage service	$3-8k per implementation *Effort:* High (Narrow lineage tool, bare UI) ⚠ Narrow scope; enterprise customers prefer broader catalogs
Apache Atlas apache/atlas ★ 2.2k · **Permissive** Apache-2.0 · Platform · Fit 2/5	Hadoop-era metadata management and governance framework *Replaces:* Collibra, Alation, Informatica EDC	Hadoop-based enterprises	Consulting/implementation Setup + support retainer Managed hosting	• Governance for legacy Hadoop estates • Metadata for regulated banks • Classification for data lakes *Angle:* Hadoop governance consulting	$150-250/hr consulting *Effort:* High (Aging Java stack, Hadoop dependent) ⚠ Aging project; newer catalogs preferred; Apache trademark
Sqllineage reata/sqllineage ★ 1.7k · **Permissive** MIT · Library · Fit 2/5	Python tool that analyzes SQL statements to map table-level data lineage. *Replaces:* Atlan lineage, Collibra lineage	Analytics teams documenting SQL data flows	Consulting/implementation Training/courses	• Lineage audits for legacy warehouse migrations • SQL documentation for finance reporting teams • Lineage training for analytics engineers	$2-6k per lineage mapping project *Effort:* Low (Python library, MIT, easy to package) ⚠ MIT: keep notices; SQL dialect coverage varies, test on your warehouse
Intake intake/intake ★ 1.1k · **Permissive** BSD-2-Clause · Library · Fit 2/5	Lightweight Python package for finding, loading and sharing datasets from catalogs. *Replaces:* Databricks catalogs, Alation search	Data scientists loading shared datasets quickly	Consulting/implementation Training/courses	• Dataset catalogs for university research groups • Shared data loaders for climate analysts • Data access training for public-sector analysts	$2-5k per data catalog setup *Effort:* Low (Python package, BSD-2, easy to package) ⚠ BSD-2: keep notices; generic project name, low trademark risk
Egeria odpi/egeria ★ 926 · **Permissive** Apache-2.0 · Platform · Fit 2/5	unclear project; description reads only Egeria core, so scope unverified.	Enterprise data teams managing metadata	Consulting/implementation Setup + support retainer	• Metadata governance setups for regional banks • Data lineage projects for hospital networks • Metadata catalog pilots for public agencies	$5-15k per metadata governance project *Effort:* High (Vague scope, verify features before planning) ⚠ Apache: keep notices; Egeria is an ODPi project name, check trademark
Recap gabledata/recap ★ 353 · **Permissive** MIT · Library · Fit 2/5	Tool for managing web service, database and streaming schemas in one common format. *Replaces:* Confluent Schema Registry, Apicurio	Engineers managing schemas across many systems	Consulting/implementation Training/courses	• Schema standardization for fintech integration teams • Kafka schema cleanup for logistics platforms • API schema audits for mid-size SaaS	$2-6k per schema standardization project *Effort:* Low (Small MIT tool, easy to package) ⚠ MIT: keep notices; project is small, check maintenance before adopting

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Agentswarms AgentSwarms-fyi/agentswarms ★ 295 · Check NOASSERTION · Platform · Fit 2/5	unclear project; unified agentic AI and data platform, per its one-line description. *Replaces:* Databricks, Palantir AIP	Enterprises wanting one platform for AI and data	Managed hosting Consulting/implementation	• Agent data platforms for regional banks • Unified AI dashboards for logistics firms • Data-plus-agent pilots for hospital networks	Unclear product; no pricing until verified *Effort:* High (Vague scope, verify features before planning) ⚠ NOASSERTION: read license first; scope unclear, verify before promising

Data Labeling · 24

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Label Studio HumanSignal/label-studio ★ 28.6k · Permissive Apache-2.0 · App · Fit 4/5	Multi-type data labeling tool for text, image, audio, video, and time series *Replaces:* Labelbox, Scale AI, SuperAnnotate, V7, Amazon Ground Truth	ML teams and data annotation vendors	Managed hosting Vertical SaaS Consulting/implementation	• Annotation service for medical imaging • Labeling shops for NLP startups • Audio transcription labeling for call centers *Angle:* Managed labeling platform with workforce	$30-99/mo per annotator *Effort:* Medium (Django app, SSO and teams are Enterprise-only) ⚠ Enterprise features paid; HumanSignal trademark; Apache core
CVAT cvat-ai/cvat ★ 17.1k · Permissive MIT · Platform · Fit 4/5	Image, video, audio, and 3D annotation platform with auto-annotation *Replaces:* Labelbox, Scale AI, V7, SuperAnnotate, Roboflow	Computer vision teams, annotation vendors	Managed hosting Vertical SaaS Consulting/implementation	• Annotation shop for drone footage • Labeling service for retail vision • Video annotation for autonomous vehicle startups *Angle:* Image annotation services for autonomy	$20-60/mo per labeler *Effort:* Medium (Docker stack, orgs and roles built in) ⚠ CVAT name belongs to CVAT.ai; some enterprise features paid
Argilla argilla-io/argilla ★ 5.2k · Permissive Apache-2.0 · App · Fit 4/5	Collaboration tool where AI engineers and domain experts build and review datasets *Replaces:* Labelbox, Scale AI, Prodigy, Humanloop	LLM teams and domain-expert reviewers	Managed hosting Consulting/implementation Vertical SaaS	• RLHF data labeling for legal AI • Evaluation datasets for medical LLMs • Review portal for support-bot teams *Angle:* LLM feedback data curation service	$30-80/mo per reviewer *Effort:* Medium (Python server and UI, Hugging Face integrated) ⚠ Owned by Hugging Face; trademark; Apache-2.0
FiftyOne voxel51/fiftyone ★ 11.3k · Permissive Apache-2.0 · Tool · Fit 3/5	Toolkit and app for visualizing, curating, and evaluating computer vision datasets *Replaces:* Roboflow, Labelbox, Encord, V7	CV engineers and ML teams	Managed hosting Consulting/implementation Setup + support retainer	• Dataset curation for drone startups • Model eval reports for vision teams • QA service for annotation vendors *Angle:* Dataset curation consulting for CV teams	$100-500/mo hosted per team *Effort:* Medium (Python tool with app UI, teams features are Enterprise) ⚠ FiftyOne Teams is the paid tier; Voxel51 trademark
Doccano doccano/doccano ★ 10.8k · Permissive MIT · App · Fit 3/5	Web-based text annotation tool for classification, NER, and sequence labeling *Replaces:* Labelbox, Prodigy, Scale AI, Amazon Ground Truth	NLP teams and annotation vendors	Managed hosting Consulting/implementation Vertical SaaS	• Annotation for legal NLP • Labeling for sentiment projects • Multilingual tagging for translation agencies *Angle:* Text annotation service for NLP teams	$20-60/mo per workspace *Effort:* Medium (Django app, text only, slow development) ⚠ Slow maintenance; text-focused; MIT
ISAT_with_segment_anything yatengLG/ISAT_with_segment_anything ★ 2.2k · Check NOASSERTION · Tool · Fit 3/5	Semi-automatic image annotation tool that uses Segment Anything models for fast labeling. *Replaces:* Labelbox, CVAT hosted, Roboflow Annotate	Labeling teams annotating image datasets	Setup + support retainer Consulting/implementation	• Mask labeling for agricultural drone teams • Segmentation labels for medical imaging labs • Product mask labeling for ecommerce photo services	$2-6k per labeling setup, or $150/mo per seat *Effort:* Low (Desktop tool, easy to brand, model weights vary) ⚠ NOASSERTION: read license first; SAM and other model weights have own terms
Universal-data-tool UniversalDataTool/universal-data-tool ★ 2.1k · Permissive MIT · App · Fit 3/5	Collaborative labeling app for images, text and documents in a web or desktop interface. *Replaces:* Labelbox, Scale AI, Prodigy	Small data teams labeling mixed document sets	Setup + support retainer Premium plugins/add-ons	• Document labeling for insurance claim teams • Image tagging for small retail photographers • Text labeling for legal contract reviewers	$29-99/mo per team, or self-host free *Effort:* Medium (Web and desktop builds, needs branding and hosting) ⚠ MIT: keep notices; labeled data may contain personal information

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Diffgram diffgram/diffgram ★ 1.9k · Check NOASSERTION · Platform · Fit 3/5	Training data platform for schemas, annotation, and predictions with human supervision *Replaces:* Labelbox, Scale AI, SuperAnnotate, V7	ML teams and annotation shops	Managed hosting Consulting/implementation Vertical SaaS	• Annotation workflow for drone inspection • Data store for ML startups • Review queue for medical labeling *Angle:* Enterprise training data platform	$40-120/mo per workspace *Effort:* High (Large stack, development slowed) ⚠ Development slowed; NOASSERTION means read license text
Refinery code-kern-ai/refinery ★ 1.5k · Permissive Apache-2.0 · Platform · Fit 3/5	Open-source platform for labeling, assessing and maintaining natural language training data. *Replaces:* Prodigy, Labelbox, Snorkel Flow	NLP teams maintaining labeled training datasets	Managed hosting Consulting/implementation	• Text label QA for support AI vendors • Training data audits for legal NLP tools • Labeling pipelines for medical note classifiers	$500-2000/mo per team, managed hosting *Effort:* Medium (Docker stack, needs hosting and labeler workflows) ⚠ Apache: keep notices; Kern AI is the originating company, avoid implying endorsement
Xtreme1 xtreme1-io/xtreme1 ★ 1.4k · Permissive Apache-2.0 · Platform · Fit 3/5	All-in-one labeling platform for multimodal data including 3D LiDAR point clouds, images and LLM text. *Replaces:* Scale AI, Labelbox, Segments.ai	Autonomy and robotics data teams labeling sensors	Managed hosting Consulting/implementation	• LiDAR labeling for warehouse robot makers • Point cloud QA for mapping startups • Multimodal labeling for drone inspection firms	$1-3k/mo per labeling workspace, managed *Effort:* High (3D tooling and multimodal scope, heavy QA) ⚠ Apache: keep notices; Xtreme1 is a project brand, rename in rebrand
Lost l3p-cv/lost ★ 580 · Permissive MIT · App · Fit 3/5	Web-based image annotation tool where teams design their own smart labeling process. *Replaces:* Labelbox, CVAT hosted, V7 Darwin	Small teams labeling images with custom workflows	Setup + support retainer Managed hosting	• Labeling workflows for drone inspection teams • Image tagging for small ecommerce photo shops • Quality checks for agricultural imaging projects	$29-99/mo per team, managed hosting *Effort:* Medium (Web app, needs auth, hosting and workflows) ⚠ MIT: keep notices; labeled data may include personal images
Cleanlab cleanlab/cleanlab ★ 11.7k · Permissive Apache-2.0 · Library · Fit 2/5	Python library that finds label errors and data issues in ML datasets *Replaces:* Scale AI QA, Labelbox Model Diagnostics, Snorkel	ML engineers	Consulting/implementation Training/courses API/usage-based	• Label-error audits for annotation vendors • Dataset cleaning for medical AI startups • Data QA reports for ML teams *Angle:* Data quality audits for ML datasets	$3-12k per dataset audit *Effort:* High (Library, no UI) ⚠ AGPL-3.0 per repo; commercial Cleanlab Studio is separate
X-AnyLabeling CVHub520/X-AnyLabeling ★ 10.9k · GPL GPL-3.0 · Tool · Fit 2/5	Desktop annotation app with AI-assisted labeling for images, video, and text *Replaces:* Labelbox, Roboflow Annotate, V7	Solo CV practitioners	Setup + support retainer Training/courses Consulting/implementation	• Labeling service for small robotics firms • Model-assisted annotation for agriculture • Training for CV bootcamps *Angle:* AI-assisted labeling service	$500-3k per labeling project *Effort:* High (Desktop app, no multi-user server) ⚠ GPL-3.0: distributed apps must ship source; single-user focus
Make Sense SkalskiP/make-sense ★ 3.6k · GPL GPL-3.0 · Tool · Fit 2/5	Browser-based image labeling tool needing no installation *Replaces:* Labellmg, Roboflow Annotate, Labelbox	Students and solo ML developers	Training/courses Setup + support retainer Consulting/implementation	• Labeling tutorials for CV students • Quick annotation for hobby robotics • Dataset prep for sports clubs *Angle:* Browser labeling tool for agencies	$0.05-0.20 per label *Effort:* High (Client-side app, no backend or teams) ⚠ GPL-3.0; no storage or multi-user features
Gromit-mpx bk138/gromit-mpx ★ 1.4k · GPL GPL-2.0 · App · Fit 2/5	On-screen annotation tool for drawing over the desktop on X11 and XWayland systems. *Replaces:* Epic Pen, ZoomIt, Presentation tools	Presenters and teachers annotating on Linux screens	Setup + support retainer Premium plugins/add-ons	• Screen annotation kits for Linux trainers • Live drawing tools for online teachers • Presentation tools for IT training teams	$5-15 one-time per seat, or support plan *Effort:* Medium (Niche Linux tool, small market, GPL-2 constraints) ⚠ GPL-2.0: distributed builds ship source; Gromit is a Wallace and Gromit brand

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Audino midas-research/audino ★ 1.1k · Check NOASSERTION · App · Fit 2/5	Open-source tool for human audio annotation. *Replaces:* Label Studio, Appen	Speech data teams annotating voice recordings	Setup + support retainer Consulting/implementation	• Speech labeling for call center AI vendors • Audio tagging for podcast ad platforms • Voice dataset QA for assistive tech startups	$2-6k per audio labeling setup *Effort:* Medium (Audio tool, needs workflow and user management) ⚠ NOASSERTION: read license first; voice data consent and privacy rules apply
DrawPen DmytroVasin/DrawPen ★ 1.1k · Permissive MIT · App · Fit 2/5	Simple screen annotation tool for drawing on top of your display on macOS, Windows and Linux. *Replaces:* ZoomIt, Epic Pen, Presentify	Teachers and presenters drawing on screens	Premium plugins/add-ons Setup + support retainer	• Screen drawing tools for online teachers • Annotation add-ons for remote sales demos • Live markup kits for presentation coaches	Free core; $5-10 one-time pro license *Effort:* Low (Small app, MIT, easy to rebrand) ⚠ MIT: keep notices; Mac, Windows and Linux signing needed for distribution
Expressive-code expressive-code/expressive-code ★ 969 · Permissive MIT · Library · Fit 2/5	Library that renders and annotates source code blocks for web documentation sites. *Replaces:* Shiki Twoslash, Carbon hosted, Prism	Documentation sites showing code examples	Consulting/implementation Premium plugins/add-ons	• Code docs styling for API documentation vendors • Tutorial code blocks for developer education sites • Annotated snippets for security advisory blogs	$1-4k per docs site integration *Effort:* Low (Library with theme options, MIT, easy to style) ⚠ MIT: keep notices; little defensible moat, styling work is the main value
Dokieli dokieli/dokieli ★ 894 · Permissive Apache-2.0 · App · Fit 2/5	Browser-based editor for publishing articles and annotations in a decentralised way. *Replaces:* Medium, Substack, Hypothesis	Researchers and publishers testing open annotation	Setup + support retainer Consulting/implementation	• Annotated article publishing for research journals • Open annotation tools for reading groups • Decentralised blogging setups for academic societies	$500-2000 per publishing setup *Effort:* Medium (Client-side editor, needs hosting and branding) ⚠ Apache: keep notices; decentralised web standards may have separate specs
Annotorious annotorious/annotorious ★ 870 · Permissive BSD-3-Clause · Library · Fit 2/5	JavaScript library that adds image annotation to any web page. *Replaces:* Labelbox web SDK, Hypothesis image notes	Web developers adding image annotation features	Consulting/implementation Premium plugins/add-ons	• Image markup for museum online catalogs • Annotated photos for real estate listing sites • Markup tools for medical teaching sites	$2-5k per annotation feature integration *Effort:* Low (Small JavaScript library, BSD, easy to wrap) ⚠ BSD-3: keep notices; no trademark issues beyond project name
Myvision OvidijusParsiunas/myvision ★ 609 · GPL GPL-3.0 · Tool · Fit 2/5	Tool that generates machine learning training data for computer vision projects. *Replaces:* Roboflow Generate, Unity Perception, Synthesis AI	Vision teams short on labeled training images	Consulting/implementation Setup + support retainer	• Synthetic image sets for industrial inspection • Training data for packaging detectors • Augmented image sets for retail shelf models	$3-8k per training data generation project *Effort:* Medium (Needs GUI polish and docs, GPL distribution) ⚠ GPL-3.0: distributed tools ship source; training data licenses vary
Rectlabel-support ryouchinsa/Rectlabel-support ★ 552 · Check NONE · App · Fit 2/5	Offline image annotation app for drawing detection and segmentation labels. *Replaces:* Labelbox, CVAT, V7 Darwin	Solo labelers annotating images offline	Premium plugins/add-ons Setup + support retainer	• Offline labeling for solo drone photographers • Segmentation labels for small agricultural studios • Detection labeling for university vision labs	$30-90 one-time license per seat *Effort:* Medium (Support repo, product is a separate paid app) ⚠ NONE license: read first; RectLabel is a paid product, avoid copying
Compose alteryx/compose ★ 515 · Permissive BSD-3-Clause · Library · Fit 2/5	Python library that structures prediction problems and generates labels for supervised learning. *Replaces:* DataRobot, H2O label tooling	Data scientists labeling historical outcomes	Consulting/implementation Training/courses	• Churn label builds for subscription businesses • Default prediction labels for small lenders • Repeat purchase labels for ecommerce analysts	$3-8k per prediction labeling project *Effort:* Low (Python library, BSD, easy to package) ⚠ BSD-3: keep notices; Alteryx is a known brand, avoid implication

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Prodigy-recipes explosion/prodigy-recipes ★ 511 · Check NONE · Starter · Fit 2/5	Example scripts that extend the Prodigy annotation tool with custom labeling workflows. *Replaces:* Labelbox workflows, Scale AI tasks	Teams customizing Prodigy labeling workflows	Consulting/implementation Premium plugins/add-ons	• Custom labeling recipes for legal NLP teams • Prodigy workflow setup for medical text labeling • Recipe packs for customer support data teams	$2-6k per custom Prodigy recipe build *Effort:* Medium (Depends on paid Prodigy license, NONE license) ⚠ NONE license: read first; Prodigy is a paid commercial product, license needed

Data Visualization Libraries · 24

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Helm helm/helm ★ 30.4k · Permissive Apache-2.0 · Tool · Fit 3/5	Package manager for deploying and managing applications on Kubernetes using charts. *Replaces:* Rancher app catalog, Porter	Platform teams deploying apps to Kubernetes	Consulting/implementation Training/courses	• Helm training for DevOps bootcamps • Chart pipelines for fintech platform teams • Cluster app rollouts for regional hospitals	$2-6k per chart pipeline setup *Effort:* Low (Standard CNCF tool, little to white-label) ⚠ Apache: keep notices; Helm is a CNCF project, avoid trademark use
Livebook livebook-dev/livebook ★ 5.9k · Permissive Apache-2.0 · App · Fit 3/5	Interactive Elixir notebook app for running code and data workflows. *Replaces:* Jupyter hosted, Databricks notebooks, Deepnote	Elixir teams running data and ML workflows	Setup + support retainer Managed hosting	• Elixir notebooks for fintech data teams • Shared analysis apps for research labs • Workflow notebooks for IoT telemetry teams	$29-99/mo per team, managed hosting *Effort:* Medium (Elixir niche, needs hosting and training materials) ⚠ Apache: keep notices; Elixir and Livebook names are project brands
D3 d3/d3 ★ 113.9k · Permissive ISC · Library · Fit 2/5	JavaScript library for binding data to SVG, Canvas and HTML for custom visualizations. *Replaces:* Tableau, Highcharts, Datawrapper	Frontend teams building bespoke data graphics	Consulting/implementation Training/courses	• Custom charts for newsroom data teams • Interactive reports for think tanks • D3 courses for frontend bootcamps	$3-12k per custom visualization build *Effort:* Low (Library, ISC, easy to build services on) ⚠ ISC: keep notices; D3 is a known name, avoid it
plotly.js plotly/plotly.js ★ 18.4k · Permissive MIT · Library · Fit 2/5	Open-source JavaScript charting library for interactive scientific and business charts. *Replaces:* Highcharts, Tableau embedded charts	Frontend teams embedding interactive charts	Consulting/implementation Premium plugins/add-ons	• Chart components for medical device dashboards • Interactive charts for energy trading desks • Custom chart templates for SaaS analytics	$2-6k per chart integration project *Effort:* Low (Library, MIT, mature, easy to brand) ⚠ MIT: keep notices; Plotly is a known brand, avoid it in rebrand
Lightweight-charts tradingview/lightweight-charts ★ 17.8k · Permissive Apache-2.0 · Library · Fit 2/5	Canvas-based library for fast, performant financial price charts in web apps. *Replaces:* TradingView charting library, Highcharts Stock, Amcharts	Fintech teams building trading and price charts	Consulting/implementation Premium plugins/add-ons	• Price charts for crypto portfolio apps • Chart widgets for retail brokerage sites • Price history views for stock research tools	$3-8k per trading chart integration *Effort:* Low (Library, Apache, widely used, easy to style) ⚠ Apache: keep notices; TradingView is a trademark, avoid implied affiliation
apexcharts.js apexcharts/apexcharts.js ★ 15.2k · Check NOASSERTION · Library · Fit 2/5	Interactive JavaScript charting library that renders charts as SVG. *Replaces:* Highcharts, Chart.js Pro, Amcharts	Web developers adding dashboard charts quickly	Consulting/implementation Premium plugins/add-ons	• Dashboard charts for property management apps • Sales charts for small retail analytics • Usage graphs for SaaS admin panels	$2-5k per dashboard charting integration *Effort:* Low (Library with theme options, easy to restyle) ⚠ NOASSERTION: read license first; commercial use terms vary by version
Primeng primefaces/primeng ★ 12.5k · Check NOASSERTION · Library · Fit 2/5	Angular UI component library with tables, forms, charts and dashboard widgets. *Replaces:* Angular Material, Kendo UI for Angular, Syncfusion	Angular teams building enterprise admin apps	Consulting/implementation Premium plugins/add-ons	• Admin panels for logistics operators • Data grid screens for banking back offices • Angular forms for insurance quoting tools	$3-8k per Angular admin UI build *Effort:* Low (Component library, theming built in) ⚠ NOASSERTION: read license first; PrimeTek is a known brand, check terms

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Charts bitnami/charts ★ 10.4k · Check NOASSERTION · Starter · Fit 2/5	Helm charts for deploying many popular open-source services on Kubernetes. *Replaces:* Rancher charts, Artifact Hub packages	DevOps teams deploying common services fast	Setup + support retainer Consulting/implementation	• Redis and Postgres setups for SaaS teams • Helm packs for managed Kubernetes resellers • Chart installs for regional hosting firms	$500-2000 per cluster app setup *Effort:* Medium (Licensing changed, verify chart and image terms) ⚠ NOASSERTION: read license first; Bitnami and VMware trademarks apply
GoJS NorthwoodsSoftware/GoJS ★ 8.5k · Check NOASSERTION · Library · Fit 2/5	JavaScript diagramming library for flowcharts, org charts and planning tools. *Replaces:* Lucidchart embeds, yFiles, JointJS+	Web teams building flowchart and org-chart editors	Consulting/implementation Premium plugins/add-ons	• Workflow editors for logistics planners • Org chart tools for HR software vendors • Process mapping editors for consultancies	$3-10k per diagram editor integration *Effort:* Medium (Commercial license terms, not free open source) ⚠ NOASSERTION: read license first; commercial license may be required for use
Primereact primefaces/primereact ★ 8.3k · Permissive MIT · Library · Fit 2/5	React UI component library with tables, forms, charts and dashboard widgets. *Replaces:* Material UI, Ant Design, Kendo UI for React	React teams building enterprise admin screens	Consulting/implementation Premium plugins/add-ons	• Admin screens for fleet management apps • Data grids for banking back-office tools • Form-heavy portals for insurance agencies	$3-8k per React admin UI build *Effort:* Low (Component library, MIT, theming built in) ⚠ MIT: keep notices; PrimeTek and PrimeReact names are brands
F2 antvis/F2 ★ 8.0k · Permissive MIT · Library · Fit 2/5	Mobile-focused JavaScript charting library for interactive, elegant charts. *Replaces:* Chart.js, ECharts mobile, Highcharts	Mobile web teams showing charts on small screens	Consulting/implementation Premium plugins/add-ons	• Mobile charts for fintech portfolio apps • Fitness progress charts for coaching apps • Sales charts for field service apps	$2-5k per mobile chart integration *Effort:* Low (Library, MIT, easy to style) ⚠ MIT: keep notices; AntV is a project brand, avoid implying affiliation
Go-echarts go-echarts/go-echarts ★ 7.7k · Permissive MIT · Library · Fit 2/5	Golang library for generating interactive charts from Go code. *Replaces:* Grafana panels, Chart.js server builds	Go backend teams generating report charts	Consulting/implementation Setup + support retainer	• Chart reports for Go-based logistics dashboards • Automated monthly charts for fintech back offices • Chart exports for Go-based health reporting tools	$2-5k per reporting chart integration *Effort:* Low (Go library, MIT, easy to wrap) ⚠ MIT: keep notices; wraps ECharts, keep its Apache attribution
Fl_chart imaNNeo/fl_chart ★ 7.6k · Permissive MIT · Library · Fit 2/5	Customizable Flutter chart library with line, bar, pie, scatter, radar and candlestick charts. *Replaces:* Syncfusion Flutter Charts, Google Charts for Flutter	Flutter app teams building mobile dashboards	Consulting/implementation Premium plugins/add-ons	• Price charts for mobile trading apps • Health tracking graphs for wellness apps • Usage charts for field service apps	$2-6k per mobile chart integration *Effort:* Low (Flutter library, MIT, easy to theme) ⚠ MIT: keep notices; Flutter is a Google trademark, avoid implication
React-chartjs-2 reactchartjs/react-chartjs-2 ★ 6.9k · Permissive MIT · Library · Fit 2/5	React wrapper components for Chart.js, a widely used charting library. *Replaces:* Recharts, Victory, Nivo	React developers adding standard charts	Consulting/implementation Premium plugins/add-ons	• Sales charts for small retail dashboards • Patient visit graphs for clinic software • Usage graphs for SaaS admin panels	$1-4k per React chart integration *Effort:* Low (Thin wrapper, MIT, easy to style) ⚠ MIT: keep notices; Chart.js is a separate project, keep its credits
ScottPlot ScottPlot/ScottPlot ★ 6.8k · Permissive MIT · Library · Fit 2/5	Interactive plotting library for .NET applications. *Replaces:* Telerik charts, Syncfusion WinForms charts, OxyPlot	.NET developers building scientific or industrial plots	Consulting/implementation Premium plugins/add-ons	• Lab instrument plots for medical device firms • Process monitor charts for factory software • Sensor graphs for energy analytics vendors	$3-8k per .NET charting integration *Effort:* Low (Library, MIT, easy to embed in products) ⚠ MIT: keep notices; no trademark issues beyond the project name

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Lieflat-charts larashero3-dotcom/lieflat-charts ★ 6.8k · Check NOASSERTION · Tool · Fit 2/5	Agent skill that turns data into polished, interactive HTML charts. *Replaces:* Datawrapper, Flourish, Tableau Public	Analysts sharing charts from AI agents	Premium plugins/add-ons Setup + support retainer	• Chart packs for market research reports • Interactive sales charts for consultants • HTML chart exports for nonprofit annual reports	$10-25/mo per seat, or $99 team skill pack *Effort:* Low (Skill files, easy rebrand, license needs review) ⚠ NOASSERTION: read license first; Datawrapper and Flourish are trademarks
charts.css ChartsCSS/charts.css ★ 6.6k · Permissive MIT · Library · Fit 2/5	CSS framework for data visualization using plain HTML markup. *Replaces:* Chart.js, Highcharts for simple charts	Static site builders needing simple charts	Consulting/implementation Premium plugins/add-ons	• Simple charts for static report sites • Bar charts for internal wiki pages • Chart styles for documentation portals	$1-3k per static report chart setup *Effort:* Low (CSS library, MIT, easy to style) ⚠ MIT: keep notices; little defensible moat, styling is main value
Chartkick ankane/chartkick ★ 6.5k · Permissive MIT · Library · Fit 2/5	Ruby library that creates JavaScript charts with one line of code. *Replaces:* Highcharts Ruby wrappers, Google Charts Rails	Rails developers adding quick charts	Consulting/implementation Setup + support retainer	• Chart dashboards for Rails SaaS admin pages • Reporting charts for small Rails agencies • Usage graphs for Ruby-based booking tools	$1-4k per Rails chart integration *Effort:* Low (Ruby gem, MIT, easy to package) ⚠ MIT: keep notices; chart engines underneath carry their own licenses
Rickshaw shutterstock/rickshaw ★ 6.5k · Permissive MIT · Library · Fit 2/5	JavaScript toolkit for building interactive real-time graphs in web pages. *Replaces:* Grafana live panels, Highcharts streaming	Web developers showing live metric graphs	Consulting/implementation Setup + support retainer	• Live sensor graphs for HVAC monitoring vendors • Real-time traffic graphs for network ops teams • Live graphs for small trading desks	$2-5k per real-time graph integration *Effort:* Low (Small MIT toolkit, easy to restyle) ⚠ MIT: keep notices; check maintenance before choosing it for new work
Helm-charts prometheus-community/helm-charts ★ 6.2k · Permissive Apache-2.0 · Starter · Fit 2/5	Community Helm charts for deploying Prometheus and related monitoring tools on Kubernetes. *Replaces:* Datadog Helm agents, Grafana Cloud setup	Platform teams setting up Kubernetes monitoring	Setup + support retainer Consulting/implementation	• Monitoring installs for small SaaS clusters • Prometheus setups for regional hospital IT • Chart packs for managed Kubernetes resellers	$500-2000 per monitoring setup *Effort:* Low (Charts, Apache, easy to wrap as service) ⚠ Apache: keep notices; Prometheus and CNCF are trademarks
ChartView AppPear/ChartView ★ 5.6k · Permissive MIT · Library · Fit 2/5	SwiftUI chart library for building iOS and macOS charts. *Replaces:* Syncfusion iOS charts, Highcharts iOS	iOS developers adding charts to SwiftUI apps	Consulting/implementation Premium plugins/add-ons	• Health trend charts for fitness apps • Budget charts for personal finance apps • Usage charts for iOS field service tools	$2-5k per iOS charts integration *Effort:* Low (Swift package, MIT, easy to restyle) ⚠ MIT: keep notices; Apple SwiftUI is a trademark, avoid implication
Vega-lite vega/vega-lite ★ 5.5k · Permissive BSD-3-Clause · Library · Fit 2/5	Declarative grammar for building interactive statistical charts from short JSON specs. *Replaces:* Tableau, Power BI chart specs, Highcharts	Analysts and developers specifying charts as code	Consulting/implementation Training/courses	• Chart specs for newsroom data teams • Interactive reports for public health analysts • Vega training for data visualization bootcamps	$2-6k per chart specification project *Effort:* Low (Spec-based, BSD-3, easy to build services on) ⚠ BSD-3: keep notices; Vega and Vega-Lite names are project brands
Plot observablehq/plot ★ 5.4k · Permissive ISC · Library · Fit 2/5	Concise JavaScript API for exploratory data charts using a layered grammar of graphics. *Replaces:* Tableau Desktop, Plotly Express	Data analysts prototyping charts in JavaScript	Training/courses Consulting/implementation	• Exploratory chart courses for analytics teams • Chart prototypes for newsroom data desks • Data viz workshops for JavaScript bootcamps	$1-4k per exploratory chart workshop *Effort:* Low (ISC library, easy to build training around) ⚠ ISC: keep notices; Observable is a known brand, avoid implication
Williamchart diogobernardino/williamchart ★ 5.1k · Check NONE · Library · Fit 2/5	Android library for building attractive charts in mobile apps quickly. *Replaces:* MPAndroidChart, AnyChart Android	Android developers adding charts to apps	Consulting/implementation Premium plugins/add-ons	• Chart views for Android fitness trackers • Expense charts for budgeting apps • Sales charts for Android field sales tools	$1-4k per Android chart integration *Effort:* Low (Small Android library, license must be clarified) ⚠ NONE license: read first; clarify rights before reusing any code

Databases & Analytics Engines · 23

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Supabase supabase/supabase ★ 114.6k · Permissive Apache-2.0 · Platform · Fit 4/5	Postgres-based backend with auth, storage, realtime and edge functions, Firebase alternative *Replaces:* Firebase, AWS Amplify, Heroku Postgres, PlanetScale	Startups, indie developers, agencies	Managed hosting Consulting/implementation Agency service	• Supabase hosting for EU data residency • Backend builds for no-code agencies • Supabase for Latin American startups *Angle:* Managed backend-as-a-service hosting	$25-599/mo per project *Effort:* High (Many services, multi-tenant control plane missing) ⚠ Supabase trademark; self-hosting lacks the cloud dashboard features
ClickHouse ClickHouse/ClickHouse ★ 50.8k · Permissive Apache-2.0 · Platform · Fit 3/5	Real-time columnar analytics database for fast aggregation over large data sets *Replaces:* Snowflake, BigQuery, Redshift, Druid	Data teams, analytics SaaS builders	Managed hosting Consulting/implementation Setup + support retainer	• Managed ClickHouse for ad-tech startups • Product analytics backend for SaaS vendors • Log analytics for game studios *Angle:* Managed real-time analytics database	$300-3000/mo per cluster *Effort:* High (Needs ops and tenant layer) ⚠ ClickHouse Inc trademark; cloud competes
InfluxDB influxdata/influxdb ★ 31.8k · Permissive Apache-2.0 · Platform · Fit 3/5	Time-series database for metrics, events, and real-time analytics *Replaces:* Datadog, TimescaleDB Cloud, AWS Timestream, Prometheus Cloud	DevOps, IoT, and industrial teams	Managed hosting Consulting/implementation Setup + support retainer	• IoT telemetry hosting for farms • Energy monitoring database for solar installers • Metrics hosting for smart factories *Angle:* Metrics storage SaaS	$30-300/mo per cluster *Effort:* High (Database operations, v3 split into editions) ⚠ InfluxDB name trademarked; open-source clustering is limited
TimescaleDB timescale/timescaledb ★ 23.8k · Check NOASSERTION · Platform · Fit 3/5	Postgres extension for time-series storage and real-time analytics *Replaces:* Datadog, InfluxDB Cloud, AWS Timestream	Developers on Postgres, IoT teams	Managed hosting Consulting/implementation Setup + support retainer	• Telemetry store for EV charging operators • Time-series hosting for fleet trackers • Metrics DB for crypto analytics *Angle:* Time-series database hosting for IoT	$50-400/mo per instance *Effort:* High (Postgres extension, hosted ops expertise needed) ⚠ Core split Apache and Timescale License; managed DBaaS offering restricted
QuestDB questdb/questdb ★ 17.5k · Permissive Apache-2.0 · Platform · Fit 3/5	High-performance open-source time-series database with SQL *Replaces:* InfluxDB, TimescaleDB, kdb+, ClickHouse	Fintech and IoT data teams	Managed hosting Consulting/implementation Setup + support retainer	• Tick data store for trading startups • Sensor DB for manufacturing • Market data hosting for quant funds *Angle:* Fast time-series DB for trading firms	$50-500/mo per instance *Effort:* High (Database ops, enterprise features paid) ⚠ QuestDB trademark; Enterprise edition has clustering and security extras
StarRocks StarRocks/starrocks ★ 12.2k · Permissive Apache-2.0 · Platform · Fit 3/5	Fast analytical database and query engine for lakehouse and real-time analytics *Replaces:* Snowflake, ClickHouse Cloud, BigQuery, Redshift	Data teams needing sub-second dashboards	Managed hosting Consulting/implementation Setup + support retainer	• Customer-facing analytics for SaaS • Lakehouse acceleration for retailers • Real-time dashboards for gaming studios *Angle:* Lakehouse analytics consulting	$500-3k/mo managed cluster *Effort:* High (Cluster ops, MPP database) ⚠ StarRocks owned by Linux Foundation, CelerData is commercial vendor
Dinky DataLinkDC/dinky ★ 3.8k · Permissive Apache-2.0 · Platform · Fit 3/5	Platform for developing, deploying and running real-time data jobs on Apache Flink. *Replaces:* Confluent Flink, Ververica Platform, Decodable	Data teams running Flink pipelines in production	Managed hosting Setup + support retainer	• Flink job platforms for ecommerce analytics • Real-time fraud feeds for payments firms • Streaming dashboards for logistics operators	$500-2000/mo per team, managed hosting *Effort:* High (Java stack, Flink ops expertise required) ⚠ Apache: keep notices; Flink and Ververica are trademarks, avoid implication
Cnosdb cnosdb/cnosdb ★ 1.8k · AGPL AGPL-3.0 · Platform · Fit 3/5	Cloud-native distributed time-series database with high performance and compression. *Replaces:* InfluxDB, TimescaleDB, Amazon Timestream	IoT and monitoring teams storing sensor metrics	Managed hosting Setup + support retainer	• Sensor storage for smart-building vendors • Metrics backends for regional utilities • Time-series storage for factory telemetry	$300-1500/mo per managed cluster *Effort:* High (Database ops, AGPL, needs strong engineering) ⚠ AGPL: publish server-side changes; CnosDB is a project brand

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Cloudberry apache/cloudberry ★ 1.4k · **Permissive** Apache-2.0 · Platform · Fit 3/5	Open-source massively parallel analytics database, an alternative to Greenplum. *Replaces:* Greenplum, Teradata, Vertica	Enterprises migrating away from Greenplum	Consulting/implementation Setup + support retainer	• Greenplum migration for regional banks • MPP reporting for insurance analytics • Warehouse support for telecom data teams	$15-50k per migration and support project *Effort:* High (MPP database, migration risk and ops expertise) ⚠ Apache: keep notices; Greenplum and Teradata names are trademarks
Hue cloudera/hue ★ 1.4k · **Permissive** Apache-2.0 · App · Fit 3/5	Web-based SQL editor and query assistant for databases and data warehouses. *Replaces:* DBeaver, DataGrip, Redash	Analysts and data teams querying warehouses from browsers	Setup + support retainer Managed hosting	• Browser SQL portals for regional hospital analysts • Query workspaces for mid-size retail BI teams • SQL training labs for data bootcamps	$15-40/mo per analyst seat, managed hosting *Effort:* Medium (Cloudera brand tied, needs rebrand and support) ⚠ Apache: keep notices; Cloudera and Hue are trademarks, rebrand fully
DuckDB duckdb/duckdb ★ 42.9k · **Permissive** MIT · Library · Fit 2/5	Fast embedded analytical SQL database that runs in-process *Replaces:* Snowflake, BigQuery, Redshift, ClickHouse Cloud	Analysts and data engineers	Consulting/implementation Managed hosting API/usage-based	• Local analytics tools for finance teams • Parquet query service for startups • Embedded analytics for SaaS *Angle:* Embedded analytics consulting	$2-10k per project *Effort:* High (Embedded engine, no hosting layer) ⚠ MIT; DuckDB name is foundation trademark; single-node scaling limits
Apache Druid apache/druid ★ 14.1k · **Permissive** Apache-2.0 · Platform · Fit 2/5	Real-time analytics database for fast aggregation on streaming and batch data *Replaces:* Snowflake, Rockset, Imply, BigQuery	Ad-tech and data-heavy product teams	Consulting/implementation Managed hosting Setup + support retainer	• Real-time ad reporting for ad-tech • Product analytics backend for SaaS • Clickstream analytics for media sites *Angle:* Real-time OLAP hosting	$200-1k/mo managed cluster *Effort:* High (Complex multi-node cluster ops) ⚠ Heavy ops burden; Apache trademark; Imply is primary commercial vendor
Trino trinodb/trino ★ 13.5k · **Permissive** Apache-2.0 · Platform · Fit 2/5	Distributed SQL query engine for federated big data analytics *Replaces:* Snowflake, Starburst, Athena, BigQuery	Data platform teams	Consulting/implementation Managed hosting Setup + support retainer	• Federated query for data lakes • Lakehouse migrations for retailers • Cross-database reporting for enterprises *Angle:* Federated query engine service	$150-250/hr consulting *Effort:* High (Cluster engine, deep ops skills required) ⚠ Trino name and logo are foundation marks; Starburst is main vendor
Datafusion apache/datafusion ★ 9.6k · **Permissive** Apache-2.0 · Framework · Fit 2/5	Rust SQL query engine library for building analytics engines and data tools. *Replaces:* DuckDB, Trino, Snowflake SQL	Engineers embedding SQL engines in data products	Consulting/implementation Training/courses	• Embedded SQL for observability vendors • Query engines for logistics data startups • SQL analysis tools for fintech risk teams	$5-15k per embedded query engine project *Effort:* High (Engine library, deep Rust expertise needed) ⚠ Apache: keep notices; Apache DataFusion is an Apache project name
Apache Pinot apache/pinot ★ 6.2k · **Permissive** Apache-2.0 · Platform · Fit 2/5	Real-time OLAP database for low-latency user-facing analytics *Replaces:* Snowflake, Rockset, StarTree, Druid	Large product teams with user-facing analytics	Consulting/implementation Managed hosting Setup + support retainer	• In-app analytics for marketplaces • Real-time metrics for fintech apps • Streaming analytics for delivery apps *Angle:* User-facing analytics backend	$300-2k/mo managed cluster *Effort:* High (Multi-component cluster, ops-heavy) ⚠ Apache trademark; StarTree is main commercial vendor
Clickhouse-go ClickHouse/clickhouse-go ★ 3.4k · **Permissive** Apache-2.0 · Library · Fit 2/5	Go driver for connecting applications to ClickHouse analytics databases. *Replaces:* Go database drivers, ORM plugins	Go teams building analytics backends	Consulting/implementation Training/courses	• ClickHouse backends for Go ad-tech platforms • Analytics APIs for Go SaaS vendors • ClickHouse courses for Go backend teams	$3-8k per analytics backend integration *Effort:* Low (Driver library, Apache, easy to embed) ⚠ Apache: keep notices; ClickHouse is a trademark, avoid implied affiliation
Free-stockdb hello245m/free-stockdb ★ 3.1k · **Permissive** MIT · Tool · Fit 2/5	Local China A-share market data engine with incremental sync, caching, backtesting and indicators. *Replaces:* Wind, Tushare Pro, JoinQuant data	Chinese retail quant traders and small funds	Premium plugins/add-ons Training/courses	• Backtesting kits for Chinese quant students • ETF data tools for retail investors • Indicator packs for A-share trading courses	Free core; $20-60 one-time data pack *Effort:* Medium (Financial data licensing and compliance checks) ⚠ MIT: keep notices; A-share data source terms and investment advice rules apply

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Heavydb heavyai/heavydb ★ 3.1k · **Permissive** Apache-2.0 · Platform · Fit 2/5	GPU-accelerated SQL database for fast analytics on large datasets. *Replaces:* Kinetica, SingleStore, Snowflake	Teams analyzing huge datasets on GPUs	Consulting/implementation Managed hosting	• Geospatial analytics for telecom network planners • Trade analytics for hedge fund teams • Log analytics for security operations teams	$5-15k per GPU database deployment *Effort:* High (GPU hardware dependency, complex ops) ⚠ Apache: keep notices; HeavyDB name and OmniSci/MapD history are brands
Columnar hydradatabase/columnar ★ 3.0k · **Permissive** Apache-2.0 · Library · Fit 2/5	PostgreSQL extension adding columnar storage for faster analytical queries. *Replaces:* Citus columnar, Timescale, Redshift	Postgres teams running heavy analytics queries	Consulting/implementation Managed hosting	• Columnar reporting for SaaS usage analytics • Faster Postgres reports for small logistics firms • Analytics add-ons for fintech Postgres stacks	$3-10k per Postgres performance project *Effort:* Medium (Extension needs testing across Postgres versions) ⚠ Apache: keep notices; Postgres and Citus names are trademarks
Chdb chdb-io/chdb ★ 2.9k · **Permissive** Apache-2.0 · Library · Fit 2/5	In-process SQL analytics engine built on ClickHouse, usable from embedded applications. *Replaces:* DuckDB, pandas query tools	Developers embedding fast SQL in apps	Consulting/implementation Training/courses	• Embedded reporting engines for Python SaaS tools • Local analytics for desktop finance apps • Fast CSV analysis for data analysts	$3-8k per embedded analytics integration *Effort:* Low (Library, Apache, easy to embed) ⚠ Apache: keep notices; ClickHouse is a trademark, avoid implied affiliation
Datafusion-ballista apache/datafusion-ballista ★ 2.2k · **Permissive** Apache-2.0 · Framework · Fit 2/5	Distributed SQL query engine built on Apache DataFusion for scaling across clusters. *Replaces:* Spark SQL, Trino, Presto	Data platform teams scaling SQL across clusters	Consulting/implementation Managed hosting	• Distributed SQL for ad-tech log analysis • Cluster query services for research labs • Batch SQL platform for insurance analytics	$8-20k per cluster query platform project *Effort:* High (Distributed systems work, needs ops expertise) ⚠ Apache: keep notices; Apache and DataFusion names are project brands
Bigquery-utils GoogleCloudPlatform/bigquery-utils ★ 1.3k · **Permissive** Apache-2.0 · Starter · Fit 2/5	Scripts, UDFs and views that help migrate and run BigQuery data warehouses.	Data teams migrating warehouses to BigQuery	Consulting/implementation Setup + support retainer	• BigQuery migrations for regional retailers • Warehouse cost audits for fintech analytics • UDF kits for analytics consultancies	$3-10k per BigQuery migration project *Effort:* Low (Utility scripts, Apache, easy to package services) ⚠ Apache: keep notices; Google Cloud and BigQuery names are trademarks
Tstorage nakabonne/tstorage ★ 1.3k · **Permissive** Apache-2.0 · Library · Fit 2/5	Embedded time-series database library for storing and querying data inside Go apps. *Replaces:* InfluxDB embedded, Prometheus TSDB	Developers embedding time-series storage in apps	Consulting/implementation Training/courses	• Sensor logging for small factory software • Usage metrics for embedded IoT gateways • Local telemetry buffers for field devices	$3-8k per embedded storage integration *Effort:* Medium (Library needs hardening and production testing) ⚠ Apache: keep notices; time-series workloads need load testing before use

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Koodo-reader koodo-reader/koodo-reader ★ 28.8k · **AGPL** AGPL-3.0 · App · Fit 4/5	Ebook manager and reader with sync and backup across desktop, mobile and web. *Replaces:* Calibre, Apple Books, Kindle app	Readers and students managing ebook libraries	Mobile app on top Premium plugins/add-ons	• Ebook reader for Chinese-language students • Reading app for book clubs • Ebook library for law school reading lists	Free app; $4.99/mo for cloud sync *Effort:* Medium (Multi-platform, needs sync backend and branding) ⚠ AGPL-3.0; server-side modifications must be published
ImageToolbox T8RIN/ImageToolbox ★ 15.5k · **Permissive** Apache-2.0 · App · Fit 4/5	Android image editor with crop, filters, OCR and many processing tools. *Replaces:* Snapseed, Photoshop Express, Lightroom Mobile	Android users editing photos offline	Mobile app on top Premium plugins/add-ons	• Offline OCR scanner for field inspectors • Bulk resize tool for real estate agents • Passport photo editor for immigration firms	Free with ads; $3.99 one-time pro unlock *Effort:* Medium (Android app, needs rebrand and store listing) ⚠ Apache-2.0; Play Store policy; keep attribution notices
Gotenberg gotenberg/gotenberg ★ 13.5k · **Permissive** MIT · Tool · Fit 4/5	Docker API service converting HTML, Office and Markdown into PDF files. *Replaces:* DocRaptor, PDFShift, CloudConvert	SaaS teams generating PDFs from HTML templates	Managed hosting API/usage-based	• Invoice PDFs for bookkeeping SaaS • Contract rendering for legal tech startups • Report PDFs for fleet telematics dashboards	$29-199/mo by PDF volume tier *Effort:* Medium (Docker service, needs auth and tenant limits) ⚠ MIT; bundles Chromium and LibreOffice, their licenses apply
Markitdown microsoft/markitdown ★ 194.3k · **Permissive** MIT · Tool · Fit 3/5	Python tool converting Office files, PDFs and more into Markdown for LLM use. *Replaces:* Adobe Acrobat export, Mathpix, Docsumo	AI teams preparing documents for LLM ingestion	API/usage-based Consulting/implementation	• Markdown conversion for law firm contract archives • Clinical document ingestion for hospital RAG • Textbook-to-Markdown for edtech publishers	Usage-based per 1000 pages, or $2k setup *Effort:* Medium (Thin converter, business is the pipeline around it) ⚠ MIT; Microsoft trademark; scanned PDFs need OCR
PDFMathTranslate PDFMathTranslate/PDFMathTranslate ★ 38.3k · **AGPL** AGPL-3.0 · Tool · Fit 3/5	Translates scientific PDFs into other languages while keeping layout and formulas. *Replaces:* DeepL PDF translation, Adobe Acrobat translate, Google Translate	Researchers reading foreign-language papers	API/usage-based Setup + support retainer	• Paper translation for Japanese materials labs • Translated thesis reviews for graduate students • Chinese patent translation for IP firms	Free self-host; $20-80/mo hosted translation *Effort:* Medium (CLI, GUI and Docker, needs hosted service) ⚠ AGPL-3.0 publishes server changes; relies on third-party translation APIs
Pdf-inspector firecrawl/pdf-inspector ★ 19.9k · **Permissive** MIT · Library · Fit 3/5	Rust library that classifies PDFs as scanned or text and extracts their text. *Replaces:* Adobe Acrobat OCR, ABBYY FineReader, Amazon Textract	Document-processing pipelines and AI ingestion teams	API/usage-based Consulting/implementation	• PDF routing for insurance claim intake • OCR triage for law firm e-discovery • Invoice intake routing for AP teams	Usage-based per document, free local tier *Effort:* Medium (Rust library, needs a service wrapper) ⚠ MIT; Firecrawl is a known brand, avoid implying affiliation

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Sumatrapdf sumatrapdfreader/sumatrapdf ★ 18.0k · GPL GPL-3.0 · App · Fit 3/5	Lightweight Windows reader for PDF, ePub, comics and other document formats. *Replaces:* Adobe Acrobat Reader, Foxit Reader	Windows users wanting a light PDF viewer	Premium plugins/add-ons Setup + support retainer	• Portable PDF reader for government field offices • Lightweight viewer for legal document review • Offline reader for air-gapped Windows labs	Free app; $10/seat/yr enterprise support *Effort:* Medium (Windows-only C++, brand recognition tied to name) ⚠ GPL-3.0; distributed builds ship source; known brand name
Best-resume-ever salomonelli/best-resume-ever ★ 16.5k · Permissive MIT · App · Fit 3/5	Vue app to build and export multiple resume designs quickly. *Replaces:* Canva resumes, Zety, Resume.io	Job seekers, career coaches, bootcamp graduates	Vertical SaaS Premium plugins/add-ons	• Resume builder for nurses changing careers • CV templates for Spanish-speaking job seekers • Resume kit for veterans changing careers	$9/mo or $49/yr for premium templates *Effort:* Medium (Front-end only, needs accounts and billing) ⚠ MIT; template fonts may carry third-party licenses
Xournalpp xournalpp/xournalpp ★ 15.6k · GPL GPL-2.0 · App · Fit 3/5	Desktop handwriting note-taking app with PDF annotation and pen input. *Replaces:* Goodnotes, Notability, Noteshelf	Students and teachers annotating PDFs with a stylus	Premium plugins/add-ons Setup + support retainer	• Annotated handouts for university STEM teachers • Markup tool for field inspectors • Stylus notes for medical residents	Free app; $25/seat school bundles *Effort:* Medium (C++ and GTK3, separate builds per OS) ⚠ GPL-2.0; distributed builds must ship source
Kami tw93/Kami ★ 12.4k · Permissive MIT · Tool · Fit 3/5	Layout rules and templates that let AI agents export PDF, PNG and PowerPoint. *Replaces:* Canva, Beautiful.ai, Gamma	AI agent builders needing branded documents	API/usage-based Premium plugins/add-ons	• Branded report exports for AI bookkeeping tools • Slide export for AI sales-deck generators • Print-ready PDFs for AI legal memos	Free core; $19/mo brand template packs *Effort:* Medium (Templates and rules, not a full app) ⚠ MIT; templates may embed third-party fonts
Zotero-pdf-translate windingwind/zotero-pdf-translate ★ 12.2k · AGPL AGPL-3.0 · Tool · Fit 3/5	Zotero plugin that translates PDFs, EPUBs, web pages and annotations. *Replaces:* DeepL Pro, Smartcat, Trados	Academic researchers reading foreign-language papers	Premium plugins/add-ons API/usage-based	• Translation for Chinese medicine researchers • Paper translation for Japanese engineering labs • Translated literature reviews for graduate students	Free plugin; $5/mo managed translation keys *Effort:* Medium (Plugin tied to Zotero's API and release cycle) ⚠ AGPL-3.0 publishes server changes; Zotero is a trademark
Sioyek ahrm/sioyek ★ 10.0k · GPL GPL-3.0 · App · Fit 3/5	Desktop PDF viewer built for textbooks and research papers. *Replaces:* Adobe Acrobat, Foxit PDF Reader	Researchers and students reading technical PDFs	Premium plugins/add-ons Setup + support retainer	• Reader for chemistry textbook students • Paper reader for mathematics graduate programs • Annotation viewer for patent examiners	Free app; $10/seat lab support *Effort:* Medium (C++ desktop app, per-OS builds needed) ⚠ GPL-3.0; distributed builds must ship source
Pdfcpu pdfcpu/pdfcpu ★ 8.9k · Permissive Apache-2.0 · Tool · Fit 3/5	Go library and CLI for PDF validation, merging, splitting and watermarks. *Replaces:* PDFtk, Smallpdf, iLovePDF	Backend teams automating PDF processing	API/usage-based Managed hosting	• PDF watermarking for law firm disclosure packs • Validation for government form intake • Stamping engine for print shops	Usage-based per 1000 pages, or $199/mo *Effort:* Medium (Go CLI and library, needs hosted API layer) ⚠ Apache-2.0; permissive, keep notices
React-pdf diegomura/react-pdf ★ 16.9k · Permissive MIT · Library · Fit 2/5	React library that generates PDF documents from components, server or client side. *Replaces:* DocRaptor, PDFShift, Docmosis	React developers generating invoices and reports	Consulting/implementation Setup + support retainer	• Invoice generator for freelance bookkeepers • Policy PDFs for insurance agencies • Lab report generation for small clinics	Free library; $1.5-5k implementation projects *Effort:* Medium (Library, you build the product around it) ⚠ MIT; limited CSS support affects complex layouts

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
QuestPDF QuestPDF/QuestPDF ★ 14.2k · Check NOASSERTION · Library · Fit 2/5	C# fluent library that builds complex PDF documents from code. *Replaces:* iText, Telerik Reporting, Crystal Reports	.NET teams generating invoices and reports	Consulting/implementation Setup + support retainer	• Shipping label generator for .NET warehouses • Discharge letters for hospital IT • Event ticket PDFs for conference platforms	Free core; $3-8k per reporting integration *Effort:* Medium (Library, you build the product around it) ⚠ NOASSERTION; read license and commercial terms first
React-pdf wojtekmaj/react-pdf ★ 11.2k · Permissive MIT · Library · Fit 2/5	React components that display PDF files inside web apps. *Replaces:* PDF.js embed services, Nutrient SDK, PSPDFKit	React developers embedding PDF viewers	Consulting/implementation Setup + support retainer	• Contract viewer for legal e-signature startups • Lab results viewer for patient portals • Brochure viewer for real estate listings	Free library; $2-6k per integration project *Effort:* Medium (Library, you build the viewer UX) ⚠ MIT; wraps PDF.js, keep its notices intact
Pdfplumber jsvine/pdfplumber ★ 10.9k · Permissive MIT · Library · Fit 2/5	Python library to extract characters, tables and layout from PDFs. *Replaces:* Adobe Acrobat Pro, Tabula, Amazon Textract	Data teams extracting tables from PDF reports	Consulting/implementation API/usage-based	• Table extraction for hedge fund filings • Lab result parsing for trial data • Tender document parsing for construction bids	Free library; $3-10k extraction pipeline builds *Effort:* Medium (Python library, business is extraction service) ⚠ MIT; scanned PDFs need OCR, not handled
Pypdf py-pdf/pypdf ★ 10.3k · Check NOASSERTION · Library · Fit 2/5	Pure-Python library to split, merge, crop and transform PDF pages. *Replaces:* Adobe Acrobat Pro, PDFtk, Smallpdf	Python developers automating PDF page operations	Consulting/implementation Setup + support retainer	• Batch splitter for court filing clerks • Merge tool for mortgage packet assembly • Page cropper for scanned tax archives	Free library; $2-5k per automation build *Effort:* Medium (Library, business is the automation service) ⚠ Listed NOASSERTION; verify license, project is BSD

ETL & ELT · 27

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Kestra kestra-io/kestra ★ 30.2k · Permissive Apache-2.0 · Platform · Fit 4/5	Declarative YAML workflow orchestrator for data, API and infrastructure automation with a UI *Replaces:* Airflow, Zapier, Prefect, Fivetran	Data teams, ops automation groups	Managed hosting Consulting/implementation Setup + support retainer	• Managed pipelines for marketing agencies • Back-office automation for logistics firms • Data ingest service for SaaS vendors *Angle:* Declarative orchestration platform hosting	$99-999/mo per workspace *Effort:* Medium (UI included, enterprise features gated) ⚠ Enterprise features (SSO, multi-tenancy) are paid
Airbyte airbytehq/airbyte ★ 22.3k · Check NOASSERTION · Platform · Fit 4/5	Data integration platform with hundreds of connectors for ELT pipelines *Replaces:* Fivetran, Stitch, Matillion, Hevo	Data teams and analytics agencies	Managed hosting Consulting/implementation Vertical SaaS	• Connector hosting for ecommerce analytics • Managed pipelines for marketing agencies • Warehouse sync for SaaS startups *Angle:* Managed data connectors for SMBs	$300-1.5k/mo per client *Effort:* High (Kubernetes and many connectors, ops-heavy) ⚠ Elastic License 2.0 on core prevents offering as managed ELT service; Airbyte trademark
Apache Airflow apache/airflow ★ 47.4k · Permissive Apache-2.0 · Platform · Fit 3/5	Workflow orchestrator for authoring, scheduling and monitoring data pipelines in Python *Replaces:* Astronomer, AWS MWAA, Google Cloud Composer, Prefect	Data engineering teams	Managed hosting Consulting/implementation Setup + support retainer	• Managed Airflow for mid-size retailers • Pipeline builds for marketing analytics agencies • Airflow upgrade service for legacy DAGs *Angle:* Managed Airflow hosting	$400-2500/mo managed *Effort:* Medium (Mature, multi-team via RBAC only) ⚠ Apache trademark; Astronomer competes

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Prefect PrefectHQ/prefect ★ 24.1k · Permissive Apache-2.0 · Platform · Fit 3/5	Python workflow orchestration with observability, retries and scheduling for data pipelines *Replaces:* Airflow, Dagster, Astronomer, AWS Glue	Data scientists, analytics teams	Managed hosting Consulting/implementation Setup + support retainer	• Pipeline hosting for ML consultancies • ETL monitoring for ecommerce analytics • Automation for sports data teams *Angle:* Workflow orchestration hosting	$100-800/mo managed *Effort:* Medium (Server mode exists, no tenancy) ⚠ Prefect Cloud features differ; Prefect trademark
Vector vectordotdev/vector ★ 22.8k · Weak copyleft MPL-2.0 · Tool · Fit 3/5	High-performance observability data pipeline that collects, transforms and routes logs and metrics *Replaces:* Cribl, Datadog Agent, Splunk Forwarders, Logstash	SRE teams, platform engineers	Consulting/implementation Managed hosting Setup + support retainer	• Log cost-reduction for SaaS firms • Pipeline setup for security teams • Telemetry routing for MSPs *Angle:* Observability pipeline cost reduction service	$3-12k per pipeline project *Effort:* Medium (Config-driven binary, no UI) ⚠ Datadog-owned; MPL-2.0; trademark
Dagster dagster-io/dagster ★ 16.4k · Permissive Apache-2.0 · Platform · Fit 3/5	Asset-oriented orchestrator for data pipelines with lineage, testing and a web UI *Replaces:* Airflow, Prefect, dbt Cloud, Astronomer	Analytics engineers, data platform teams	Managed hosting Consulting/implementation Training/courses	• Dagster pipelines for DTC brands • Asset catalog for analytics agencies • Data quality workflow for insurers *Angle:* Data orchestration for data teams	$300-1500/mo managed *Effort:* Medium (Strong UI, single-tenant) ⚠ Dagster+ is the paid cloud offering
dbt Core dbt-labs/dbt ★ 14.1k · Permissive Apache-2.0 · Tool · Fit 3/5	SQL-based data transformation framework with testing and docs *Replaces:* Matillion, Informatica, Dataform	Analytics engineers	Consulting/implementation Training/courses Managed hosting	• dbt migration for retail analytics • Modeling packs for SaaS metrics • dbt training for analyst teams *Angle:* Analytics engineering consulting	$150-250/hr consulting *Effort:* High (CLI framework, no UI) ⚠ Core is Apache-2.0; dbt Cloud is separate; dbt is a trademark
Mage mage-ai/mage-ai ★ 8.8k · Permissive Apache-2.0 · Platform · Fit 3/5	Notebook-style data pipeline tool for building, running, and monitoring ETL *Replaces:* Fivetran, Airflow Cloud, Prefect, Astronomer	Small data teams	Managed hosting Consulting/implementation Setup + support retainer	• Pipelines for marketing agencies • ETL service for ecommerce data • Data prep for ML startups *Angle:* Notebook-style pipelines for analysts	$100-500/mo hosted per team *Effort:* Medium (Python app with UI, single-tenant) ⚠ Mage Pro is paid; Apache-2.0 core
Redpanda Connect redpanda-data/connect ★ 8.8k · Check NONE · Tool · Fit 3/5	Stream processor connecting many inputs, outputs, and transforms in declarative configs *Replaces:* Confluent Connect, Fivetran, Zapier, MuleSoft	Data and platform engineers	Consulting/implementation Managed hosting Setup + support retainer	• Event integration for logistics firms • Streaming ETL for fintechs • IoT ingest pipelines for utilities *Angle:* Stream processing integrations	$3-10k per integration *Effort:* High (Config-driven binary, no UI) ⚠ Former Benthos; license NONE in metadata, project uses Apache with enterprise parts; verify
Steampipe turbot/steampipe ★ 8.0k · AGPL AGPL-3.0 · Tool · Fit 3/5	Query cloud and SaaS APIs with SQL through Postgres-compatible plugins. *Replaces:* Wiz, Prowler Pro, CloudQuery Cloud	Cloud security and FinOps teams querying resources	Managed hosting Consulting/implementation	• SQL audit of AWS for regional banks • Azure cost queries for MSPs • GCP compliance checks for small clinics	$50-300/mo per team, or setup consulting *Effort:* Medium (Plugin ecosystem, needs enterprise features) ⚠ AGPL-3.0 publishes server changes; Turbot is a trademark
Cloudquery cloudquery/cloudquery ★ 6.6k · Weak copyleft MPL-2.0 · Tool · Fit 3/5	Extracts cloud and SaaS configuration into databases for security and FinOps. *Replaces:* Wiz, Orca Security, Vantage	Security and FinOps teams building cloud asset inventories	Managed hosting Consulting/implementation	• Asset inventory for MSPs managing AWS accounts • Cost audit for SaaS startups on GCP • Azure inventory for insurance compliance	Free core; $500-2k/mo managed pipeline *Effort:* Medium (Go CLI with plugin SDK, needs managed layer) ⚠ MPL-2.0 file-level copyleft; needs cloud API credentials
Apache NiFi apache/nifi ★ 6.3k · Permissive Apache-2.0 · Platform · Fit 3/5	Visual dataflow automation system for routing and transforming data *Replaces:* MuleSoft, Informatica, Talend, Boomi	Enterprise data engineers	Consulting/implementation Managed hosting Setup + support retainer	• Dataflow for hospital data exchange • IoT ingest for utilities • File routing for banks *Angle:* Data flow integration for government	$150-250/hr consulting *Effort:* High (Java platform, clustering ops required) ⚠ Apache trademark; heavy JVM footprint
dlt dlt-hub/dlt ★ 6.1k · Permissive Apache-2.0 · Library · Fit 3/5	Python library for declaratively loading data from APIs into warehouses *Replaces:* Fivetran, Airbyte, Stitch	Python data engineers	Consulting/implementation Training/courses Managed hosting	• Custom API connectors for agencies • Warehouse loading for SaaS startups • Ingest pipelines for analytics boutiques *Angle:* Python pipeline building service	$2-6k per pipeline set *Effort:* High (Library, no UI) ⚠ dlt is a trademark of dltHub; Apache-2.0

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Docetl ucbepic/docetl ★ 4.2k · Permissive MIT · Tool · Fit 3/5	Agentic LLM system for processing and transforming unstructured document collections. *Replaces:* Unstructured.io, Alteryx, Snowflake Cortex	Analysts processing large document collections	API/usage-based Consulting/implementation	• Complaint classification for consumer lenders • Grant report summaries for nonprofits • Research note extraction for biotech analysts	Usage-based on LLM tokens plus $2k setup *Effort:* Medium (Research-grade pipeline, needs a hosted UI) ⚠ MIT; depends on third-party LLM API terms and costs
Peerdb PeerDB-io/peerdb ★ 3.3k · AGPL AGPL-3.0 · Platform · Fit 3/5	Replicates Postgres data to warehouses, queues and storage with low latency. *Replaces:* Fivetran, Airbyte Cloud, hosted CDC services	Teams replicating Postgres into analytics warehouses	Managed hosting Consulting/implementation	• Postgres to Snowflake sync for ecommerce analytics • Real-time dispatch reporting for logistics • Postgres to S3 archive for healthcare	$300-1500/mo managed per pipeline, free self-host *Effort:* Medium (Multi-destination CDC, needs managed control plane) ⚠ AGPL-3.0; server modifications must be published
Devlake apache/devlake ★ 3.2k · Permissive Apache-2.0 · Platform · Fit 3/5	Collects data from DevOps tools to measure delivery speed and developer experience. *Replaces:* LinearB, Jellyfish, Swarmia	Engineering leaders measuring delivery metrics	Managed hosting Consulting/implementation	• DORA dashboards for mid-size SaaS engineering teams • Delivery metrics for outsourced dev shops • Jira-GitHub metrics for agency engineering managers	Free self-host; $300-1000/mo managed instances *Effort:* Medium (Many connectors, needs tenant and auth work) ⚠ Apache-2.0; Apache and DevLake names are trademarks
Meltano meltano/meltano ★ 2.7k · Permissive MIT · Platform · Fit 3/5	CLI-first data integration platform built on Singer taps and targets *Replaces:* Fivetran, Stitch, Airbyte, Hevo	Small data teams and agencies	Managed hosting Consulting/implementation Training/courses	• ELT for ecommerce brands • Singer connector builds for SaaS • Managed pipelines for analytics consultancies *Angle:* ELT pipelines as a service	$200-1k/mo managed per client *Effort:* High (CLI-first, no multi-tenant UI) ⚠ Owned by Arch; Singer connector quality varies
Proton timeplus-io/proton ★ 2.3k · Permissive Apache-2.0 · Platform · Fit 3/5	Single-binary streaming SQL engine for logs, metrics, events and change data. *Replaces:* Confluent ksqlDB, Materialize, Apache Flink SQL	Teams needing real-time SQL over event streams	Managed hosting Consulting/implementation	• Live anomaly alerts for IoT fleet operators • Real-time ad metrics for mobile game studios • Log analytics for small SaaS ops teams	Free core; $800-3000/mo managed cluster *Effort:* Medium (Engine is solid, needs managed ops and UI) ⚠ Apache-2.0; Timeplus is a company brand, avoid implying affiliation
Pathway pathwaycom/pathway ★ 62.0k · Check NOASSERTION · Framework · Fit 2/5	Python framework for streaming ETL, real-time analytics and RAG pipelines. *Replaces:* Apache Flink, Confluent, Databricks streaming	Data teams building real-time pipelines and RAG	Managed hosting Consulting/implementation	• Live fraud alerts for payment processors • Inventory sync for ecommerce retailers • Streaming document index for legal discovery	$1-4k/mo managed cluster, implementation extra *Effort:* Medium (Framework, needs deployment and monitoring layer) ⚠ NOASSERTION; read license, commercial terms may apply
Flink-cdc apache/flink-cdc ★ 6.5k · Permissive Apache-2.0 · Framework · Fit 2/5	Streaming data integration tool that captures database changes into Flink. *Replaces:* Fivetran, Debezium Cloud, Striim	Data engineers syncing databases to warehouses	Consulting/implementation Managed hosting	• CDC pipeline for retail inventory databases • Ledger sync for fintech reporting • MySQL to lakehouse sync for logistics firms	Free core; $4-12k per pipeline implementation *Effort:* High (Needs Flink cluster ops, Java stack) ⚠ Apache-2.0; Apache and Flink names are trademarks
Daft Eventual-Inc/Daft ★ 5.8k · Permissive Apache-2.0 · Library · Fit 2/5	Python dataframe engine for multimodal data: images, audio, video and tables. *Replaces:* Spark, Ray Data, Databricks	ML teams processing images, audio and video at scale	Managed hosting Consulting/implementation	• Image batch processing for ecommerce catalogs • Transcript pipelines for call centers • Frame indexing for security camera vendors	Free engine; $3-10k per pipeline setup *Effort:* Medium (Library, needs hosted runtime around it) ⚠ Apache-2.0; permissive, check native wheel support

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Sqlmesh SQLMesh/sqlmesh ★ 3.3k · Permissive Apache-2.0 · Framework · Fit 2/5	SQL transformation framework that runs dbt-compatible projects with incremental plans. *Replaces:* dbt Cloud, Coalesce, Paradime	Analytics engineers running SQL transforms on warehouses	Consulting/implementation Managed hosting	• dbt migration for PE-backed retail reporting • Warehouse transforms for clinic networks • Revenue models for subscription SaaS startups	Free core; $3-8k dbt migration project *Effort:* Medium (Needs hosted UI, scheduling and team controls) ⚠ Apache-2.0; Tobiko Data maintains it, fine to host
Ethereum-etl blockchain-etl/ethereum-etl ★ 3.1k · Permissive MIT · Tool · Fit 2/5	Python scripts exporting Ethereum blocks, transactions and token transfers to files or BigQuery. *Replaces:* Dune Analytics, Nansen, Alchemy data APIs	Crypto analytics firms and blockchain researchers	Consulting/implementation API/usage-based	• Token transfer data for crypto tax software • ERC721 sales history for NFT analytics • Wallet exports for compliance teams	Free scripts; $2-8k per data pipeline build *Effort:* Medium (Scripts need node access and hosting) ⚠ MIT; needs Ethereum node access and BigQuery costs
Mara-pipelines mara/mara-pipelines ★ 2.1k · Permissive MIT · Framework · Fit 2/5	Lightweight opinionated Python ETL framework, between plain scripts and Airflow. *Replaces:* Apache Airflow managed services, Prefect Cloud, Dagster Cloud	Small data teams running Python ETL jobs	Consulting/implementation Setup + support retainer	• Nightly ETL for regional retail chains • Import jobs for small logistics firms • Data pipelines for nonprofit fundraising teams	Free framework; $1.5-4k per pipeline setup *Effort:* Medium (Framework, must add scheduling and UI) ⚠ MIT; small community, check maintenance activity
Extractous yobix-ai/extractous ★ 1.8k · Permissive Apache-2.0 · Library · Fit 2/5	Rust library extracting text and metadata from many document formats, with bindings. *Replaces:* Apache Tika hosted, Unstructured.io, Azure Document Intelligence	Developers building document ingestion for search	Consulting/implementation API/usage-based	• Text extraction for municipal records archives • Metadata pull for e-discovery vendors • Indexing for internal wiki search tools	Free library; $2-6k per ingestion integration *Effort:* Medium (Library, needs a service around it) ⚠ Apache-2.0; bundled parsers may carry other licenses
Kiba thbar/kiba ★ 1.8k · Check NOASSERTION · Framework · Fit 2/5	Ruby framework for ETL pipelines built from sources, transforms and destinations. *Replaces:* Airbyte, Talend, Stitch	Ruby teams building data import pipelines	Consulting/implementation Setup + support retainer	• Feed imports for Ruby real estate portals • Catalog syncs for Rails ecommerce shops • Lead data imports for Rails CRM tools	Free framework; $1-3k per import project *Effort:* Medium (Framework, you add scheduling and UI) ⚠ NOASSERTION license; read it and check maintenance status
Apache Hop apache/hop ★ 1.5k · Permissive Apache-2.0 · Platform · Fit 2/5	Visual data orchestration and ETL design tool, Kettle successor *Replaces:* Talend, Informatica, SSIS, Pentaho	Data engineers moving from Kettle	Consulting/implementation Training/courses Setup + support retainer	• Kettle migrations for SMEs • ETL builds for ERP data • Training for BI consultants *Angle:* Visual ETL for consultancies	$120-200/hr consulting *Effort:* High (Desktop designer, enterprise ops) ⚠ Apache trademark; smaller ecosystem than Airflow or dbt

Email Marketing · 6

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Mautic mautic/mautic ★ 10.9k · Check NOASSERTION · App · Fit 4/5	Marketing automation platform with email, forms, lead scoring and campaigns *Replaces:* HubSpot, Marketo, ActiveCampaign, Mailchimp	Marketing agencies, SMBs	Managed hosting Setup + support retainer White-label reseller	• Marketing automation for real estate agents • Lead nurturing for SaaS startups • Campaigns for nonprofits *Angle:* Marketing automation agency	$49-299/mo per account *Effort:* Medium (Single-tenant PHP, theming possible) ⚠ GPL via NOASSERTION, fine for hosting; Mautic trademark
useSend usesend/useSend ★ 4.8k · AGPL AGPL-3.0 · App · Fit 4/5	Email sending platform on top of AWS SES with API and dashboard *Replaces:* Resend, SendGrid, Postmark, Mailgun	Developers, startups	Managed hosting API/usage-based White-label reseller	• Cheap transactional email for startups • Email API for agencies • SES wrapper for no-code makers *Angle:* SES-based email platform SaaS	$5-50/mo by volume *Effort:* Medium (SES-backed, teams supported) ⚠ AGPL, publish modifications; SES sending limits

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Dittofeed dittofeed/dittofeed ★ 3.0k · Permissive MIT · App · Fit 4/5	Customer engagement automation for email, SMS, push, WhatsApp and Slack journeys *Replaces:* Customer.io, Braze, OneSignal, Iterable	Product-led SaaS marketing teams	Managed hosting Vertical SaaS Setup + support retainer	• Lifecycle messaging for fintech apps • Onboarding emails for SaaS • Push campaigns for fitness apps *Angle:* Customer messaging automation	$99-499/mo by contacts *Effort:* Medium (Multi-workspace support, needs email provider setup) ⚠ MIT; deliverability and consent rules (CAN-SPAM, GDPR)
Laudspeaker laudspeaker/laudspeaker ★ 2.6k · Check NOASSERTION · App · Fit 3/5	Customer journey builder for messaging and product onboarding across email, SMS and push *Replaces:* Braze, Customer.io, OneSignal, Appcues	Growth teams in mobile and web apps	Managed hosting Vertical SaaS Agency service	• Journey builder for mobile games • Lifecycle messaging for ecommerce brands • Onboarding flows for B2B apps *Angle:* Customer journey orchestration SaaS	$49-299/mo by contacts *Effort:* Medium (Needs email and SMS provider integration) ⚠ NOASSERTION: read license; Laudspeaker trademark
React Email resend/react-email ★ 19.9k · Permissive MIT · Library · Fit 2/5	React components and tooling for building and previewing HTML emails *Replaces:* Mailchimp templates, Litmus, Stripo, Beefree	Developers sending transactional email	Premium plugins/add-ons Consulting/implementation Content/membership	• Email template packs for SaaS onboarding • Receipt designs for online shops • Newsletter templates for creators *Angle:* Email template builder service	$49-149 per template pack *Effort:* High (Library, no hosted editor) ⚠ Resend trademark; email client rendering quirks
MJML mjmlio/mjml ★ 18.3k · Permissive MIT · Framework · Fit 2/5	Markup language that compiles responsive email layouts into cross-client HTML *Replaces:* Mailchimp templates, Beefree, Stripo, Litmus	Email developers and agencies	Premium plugins/add-ons Agency service Content/membership	• Email templates for real estate agents • Responsive newsletters for restaurants • MJML template packs for Shopify stores *Angle:* Email template design agency	$300-1k per template set *Effort:* High (Compiler only, no UI) ⚠ MIT; Mailjet owns trademark; client rendering tests still needed

Fine-Tuning & Training · 18

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
LlamaFactory hiyouga/LlamaFactory ★ 75.9k · Permissive Apache-2.0 · Tool · Fit 3/5	Web UI and CLI for fine-tuning over 100 open LLMs and vision-language models. *Replaces:* OpenAI fine-tuning API, Together AI fine-tuning, Predibase	AI teams fine-tuning open models on private data	Managed hosting Consulting/implementation	• Support-bot tuning for insurance call centers • Legal drafting models for small law firms • Summarizers for private clinic notes	$1-3k per fine-tune project, GPU hosting extra *Effort:* Medium (Needs managed GPU, auth and branding) ⚠ Apache-2.0; base model licenses vary, check each model
Axolotl axolotl-ai-cloud/axolotl ★ 12.7k · Permissive Apache-2.0 · Tool · Fit 3/5	Config-driven tool for fine-tuning open LLMs with LoRA, QLoRA and full training. *Replaces:* Together AI fine-tuning, Predibase, OpenAI fine-tuning	ML teams fine-tuning open models on GPUs	Consulting/implementation Managed hosting	• Support-bot tuning for SaaS helpdesks • Product-spec models for hardware makers • Translation tuning for localization agencies	Free tool; $5-15k per fine-tuning engagement *Effort:* Medium (YAML-driven, needs UI and GPU operations) ⚠ Apache-2.0; base model licenses vary, check each one
Oumi oumi-ai/oumi ★ 9.4k · Permissive Apache-2.0 · Platform · Fit 3/5	Fine-tunes, evaluates and deploys open LLMs and vision-language models. *Replaces:* Scale AI, Weights and Biases fine-tuning, Predibase	Teams training and evaluating open LLMs	Managed hosting Consulting/implementation	• Eval harness for medical triage chatbots • Custom Qwen models for Spanish customer support • VLM tuning for retail shelf photos	$1-5k/mo managed training, plus GPU costs *Effort:* Medium (Needs managed GPU, dashboards and auth) ⚠ Apache-2.0; some base models like Gemma have usage terms
Kiln Kiln-AI/Kiln ★ 5.3k · Check NOASSERTION · Platform · Fit 3/5	Builds, evaluates and optimizes AI systems with evals, RAG, fine-tuning and datasets. *Replaces:* Humanloop, Braintrust, Scale AI data labeling	AI product teams building evals and datasets	Vertical SaaS Managed hosting	• Eval suite for legal document extraction • Synthetic data for support bots • Quality review for healthcare triage bots	$29-199/mo per team, free local *Effort:* Medium (Needs team features, auth and hosting) ⚠ NOASSERTION license; read first before shipping

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
H2o-llmstudio h2oai/h2o-llmstudio ★ 5.2k · **Permissive** Apache-2.0 · App · Fit 3/5	No-code GUI and framework for fine-tuning large language models. *Replaces:* Predibase, Together fine-tuning, Weights and Biases fine-tuning	Data teams fine-tuning LLMs without writing code	Setup + support retainer Consulting/implementation	• No-code tuning for regional bank support teams • Internal QA models for insurance adjusters • Summarizers for HR case notes	Free app; $2-5k setup and support per team *Effort:* Medium (GUI helps, needs multi-user hosting and branding) ⚠ Apache-2.0; H2O is a company brand, avoid implying affiliation
OpenDeepWiki AIDotNet/OpenDeepWiki ★ 3.7k · **Permissive** MIT · App · Fit 3/5	Open-source platform that generates code wikis and knowledge bases from repositories. *Replaces:* DeepWiki, GitBook, Notion AI	Engineering teams documenting legacy codebases	Managed hosting Vertical SaaS	• Code docs for outsourced software agencies • Legacy system wikis for banks • Onboarding wikis for dev bootcamps	Free self-host; $99-399/mo hosted team wiki *Effort:* Medium (C# and TypeScript, needs auth and tenancy) ⚠ MIT; sends code to LLM APIs, privacy review needed
OneTrainer Nerogar/OneTrainer ★ 3.3k · **AGPL** AGPL-3.0 · App · Fit 3/5	One-stop GUI for training diffusion models, including LoRA and full fine-tunes. *Replaces:* Civitai training, RunPod diffusion templates, Scenario	Image generation hobbyists and small studios	Premium plugins/add-ons Setup + support retainer	• LoRA training for indie comic artists • Brand style models for furniture retailers • Product photo style models for ecommerce sellers	Free app; $20-40/mo hosted GPU training *Effort:* Medium (Desktop GUI, needs cloud GPU backend) ⚠ AGPL-3.0 publishes server changes; base model licenses vary
Dstack dstackai/dstack ★ 2.3k · **Weak copyleft** MPL-2.0 · Platform · Fit 3/5	Orchestration layer running AI training and inference across GPU clouds and Kubernetes. *Replaces:* Run:ai, Anyscale, hosted SkyPilot	AI teams juggling GPU capacity across clouds	Managed hosting Consulting/implementation	• GPU scheduling for university research labs • Multi-cloud inference for AI startups • Bare-metal training pool for robotics teams	$500-2000/mo managed control plane, GPU hours extra *Effort:* Medium (Needs enterprise auth, quotas and billing) ⚠ MPL-2.0 file-level copyleft; GPU cloud costs fall on users
Peft huggingface/peft ★ 21.9k · **Permissive** Apache-2.0 · Library · Fit 2/5	Python library for parameter-efficient fine-tuning of large pretrained models. *Replaces:* OpenAI fine-tuning, Together fine-tuning, Predibase	ML engineers adapting large models cheaply	Consulting/implementation Setup + support retainer	• LoRA adapters for regional language chatbots • Domain adapters for medical coding teams • Brand voice models for marketing agencies	Free library; $3-10k per adapter project *Effort:* Medium (Library, business is the training service) ⚠ Apache-2.0; base model weights carry their own licenses
Ludwig ludwig-ai/ludwig ★ 11.8k · **Permissive** Apache-2.0 · Framework · Fit 2/5	Low-code framework for training custom LLMs, neural networks and other models. *Replaces:* Google AutoML, Azure ML Designer, DataRobot	Data teams wanting low-code custom models	Consulting/implementation Setup + support retainer	• Churn prediction for subscription boxes • Defect detection for small factories • Ticket routing for regional IT helpdesks	Free core; $4-12k per custom model build *Effort:* Medium (Framework, needs UI and deployment layer) ⚠ Apache-2.0; permissive; check base model weight licenses
Soup MakazhanAlpamys/Soup ★ 10.3k · **Permissive** Apache-2.0 · Tool · Fit 2/5	YAML-driven LLM fine-tuning tool with layer streaming for small consumer GPUs. *Replaces:* Together AI fine-tuning, OpenAI fine-tuning	Solo developers fine-tuning LLMs on consumer GPUs	Consulting/implementation Premium plugins/add-ons	• Writing assistant for indie novelists • FAQ model for local bakeries • Domain model for hobbyist game studios	Free tool; $200-800 per laptop fine-tune job *Effort:* Medium (Single-user CLI, needs onboarding work) ⚠ Apache-2.0; base model licenses vary; young project
face.evoLVe ZhaoJ9014/face.evoLVe ★ 3.6k · **Permissive** MIT · Library · Fit 2/5	Face recognition library for PaddlePaddle and PyTorch with pretrained models. *Replaces:* Amazon Rekognition, Face++, Azure Face API	Computer vision teams building face recognition	Consulting/implementation API/usage-based	• Check-in for gyms • Access control for small offices • Photo tagging for event photographers	Free library; $3-8k per on-prem integration *Effort:* Medium (Research library, needs accuracy and privacy work) ⚠ MIT; face recognition is regulated in the EU and some US states

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
UER-py dbiir/UER-py ★ 3.1k · **Permissive** Apache-2.0 · Framework · Fit 2/5	PyTorch framework for pretraining and fine-tuning NLP models, with a model zoo. *Replaces:* Hugging Face Enterprise, Google Cloud NLP	NLP researchers and Chinese-language AI teams	Consulting/implementation Setup + support retainer	• Chinese text classifier for customer service • Pretrained model for Chinese legal documents • Sentiment model for Chinese e-commerce reviews	Free framework; $5-15k per custom model build *Effort:* Medium (Research framework, needs productization) ⚠ Apache-2.0; pretrained model weights carry their own terms
Maestro roboflow/maestro ★ 2.7k · **Permissive** Apache-2.0 · Tool · Fit 2/5	Python toolkit to fine-tune multimodal vision models such as PaliGemma and Florence-2. *Replaces:* Roboflow Train, Labelbox training, Vertex AI Vision	Computer vision engineers fine-tuning VLMs	Consulting/implementation Setup + support retainer	• Shelf detection tuning for grocery chains • Defect spotting for PCB assembly lines • Plate reading for parking operators	Free toolkit; $4-12k per vision tuning project *Effort:* Medium (Python toolkit, needs labeling and UI) ⚠ Apache-2.0; Roboflow is a brand; model licenses apply
XTuring stochasticai/xTuring ★ 2.7k · **Permissive** Apache-2.0 · Library · Fit 2/5	Python library to personalize and fine-tune open-source LLMs on your own data. *Replaces:* Predibase, OpenAI fine-tuning, Together AI	Developers personalizing open LLMs on own data	Consulting/implementation Setup + support retainer	• Personal assistant models for solo lawyers • Support bots for boutique hotels • Recipe assistants for meal-kit companies	Free library; $3-8k per personalization project *Effort:* Medium (Python library, needs a product layer) ⚠ Apache-2.0; base model licenses vary, check each model
Ort pykeio/ort ★ 2.6k · **Permissive** Apache-2.0 · Library · Fit 2/5	Rust bindings for ONNX Runtime to run and train ML models. *Replaces:* Triton Inference Server, TensorRT, cloud inference APIs	Rust developers embedding ML inference in apps	Consulting/implementation Setup + support retainer	• On-device OCR for Rust point-of-sale apps • Edge vision for drone firmware • Local embedding service for search tools	Free library; $5-15k per embedded inference build *Effort:* Medium (Rust crate, needs a product built around it) ⚠ Apache-2.0; ONNX Runtime licenses apply to bundled binaries
Maxtext AI-Hypercomputer/maxtext ★ 2.5k · **Permissive** Apache-2.0 · Framework · Fit 2/5	Simple, scalable JAX codebase for training and serving LLMs on TPUs and GPUs. *Replaces:* Anyscale, Databricks model training, custom GPU clusters	Teams training large LLMs on Google TPUs	Consulting/implementation Managed hosting	• Custom LLM pretraining for national research labs • Domain LLMs for pharma research groups • Training pipelines for university AI clusters	Free code; $20-60k per training engagement *Effort:* High (Research codebase, needs cluster operations) ⚠ Apache-2.0; requires TPU or GPU cluster and cloud costs
DB-GPT-Hub eosphoros-ai/DB-GPT-Hub ★ 2.0k · **Permissive** MIT · Library · Fit 2/5	Models, datasets and fine-tuning recipes for text-to-SQL within the DB-GPT project. *Replaces:* AWS QuickSight Q, Vanna hosted, text-to-SQL vendors	Data teams building natural-language database queries	Consulting/implementation Setup + support retainer	• Text-to-SQL for hospital reporting teams • Natural-language queries for retail BI dashboards • SQL assistant for logistics analysts	Free recipes; $5-12k per text-to-SQL deployment *Effort:* Medium (Research recipes, needs product and evals) ⚠ MIT; training datasets may carry separate licenses

Terminalizer faressoft/terminalizer ★ 16.2k · **Permissive** MIT · App · Fit 3/5	Records terminal sessions and exports them as animated GIFs or web player links. *Replaces:* asciinema hosted, Loom for terminals, Screen Studio	Developers making terminal demos and docs	Premium plugins/add-ons Vertical SaaS	• Terminal demo GIFs for devtool startups • Install walkthroughs for open-source maintainers • Animated CLI tutorials for coding bootcamps	Free app; $9/mo hosted share links *Effort:* Medium (Node CLI, needs web player hosting and accounts) ⚠ MIT; hosted share links need your own infrastructure

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Fontsource fontsource/fontsource ★ 6.3k · Permissive MIT · Library · Fit 3/5	Self-host open-source fonts through neatly bundled npm packages. *Replaces:* Google Fonts CDN paid tiers, Adobe Fonts, Typekit	Web developers self-hosting fonts for privacy and speed	Managed hosting API/usage-based	• Self-hosted fonts for GDPR-focused EU sites • Font delivery for Shopify theme builders • Private font CDN for healthcare patient portals	$29-199/mo private font CDN, npm free *Effort:* Medium (npm packages, CDN hosting is the business) ⚠ MIT packages; underlying font licenses differ per family
FiraCode tonsky/FiraCode ★ 82.2k · Check OFL-1.1 · Library · Fit 2/5	Free monospaced programming font with ligatures for code editors and terminals. *Replaces:* Operator Mono, Dank Mono, Monotype code fonts	Developers and designers wanting code fonts	Premium plugins/add-ons Agency service	• Code font for fintech design teams • Terminal font for coding bootcamps • UI typeface for indie app studios	Free font; $99-299 brand font customization *Effort:* Low (OFL font, rename rules apply to changes) ⚠ OFL-1.1; modified versions must not use the reserved font name
Maple-font subframe7536/maple-font ★ 29.7k · Check OFL-1.1 · Library · Fit 2/5	Open-source monospace font with rounded corners, ligatures and Nerd Font icons. *Replaces:* Operator Mono, Dank Mono, Fira Code	Developers customizing terminal and IDE fonts	Premium plugins/add-ons Agency service	• Chinese-English terminal font for dev teams • Custom code font for Chinese fintech firms • Monospace brand font for coding bootcamps	Free font; $199 custom font variant builds *Effort:* Low (OFL font, rename rules limit rebranding) ⚠ OFL-1.1; modified versions must not reuse the font name
LxgwWenKai lxgw/LxgwWenKai ★ 26.9k · Check OFL-1.1 · Library · Fit 2/5	Open-source Chinese font derived from Klee One, for screen and print use. *Replaces:* Founder Type fonts, Adobe Chinese font packs	Chinese designers and publishers needing free fonts	Premium plugins/add-ons Agency service	• Chinese typeface for literary ebook publishers • Reading font for school textbook printers • Brand font for Chinese tea cafe chains	Free font; $500-2000 brand font setup *Effort:* Low (OFL font derived from Klee One, rename needed) ⚠ OFL-1.1; derived from FONTWORKS Klee One, keep notices and naming
Iosevka be5invis/Iosevka ★ 23.2k · Check OFL-1.1 · Library · Fit 2/5	Customizable programming typeface built from code, with many width and style variants. *Replaces:* Operator Mono, Dank Mono, Fira Code	Developers wanting customized code fonts	Premium plugins/add-ons Agency service	• Custom code font for SaaS design systems • Terminal presets for DevOps teams • Narrow code font for mobile dev teams	Free font; $300-1500 custom font builds *Effort:* Medium (Build-from-source config needs font skills) ⚠ OFL-1.1; modified fonts must be renamed
Inter rsms/inter ★ 20.0k · Check OFL-1.1 · Library · Fit 2/5	Open-source typeface family designed for user interfaces and on-screen text. *Replaces:* San Francisco, Circular, Graphik	Product designers building app interfaces	Premium plugins/add-ons Agency service	• UI font packs for fintech design systems • Dashboard typography for SaaS agencies • Interface font for government portal redesigns	Free font; $500-3000 design system typography setup *Effort:* Low (Ready-made font, bundling is easy) ⚠ OFL-1.1; modified versions must change the font name
Monaspace githubnext/monaspace ★ 19.8k · Check OFL-1.1 · Library · Fit 2/5	Superfamily of open-source monospace fonts for code, with variable axes. *Replaces:* Operator Mono, Dank Mono, IDE font packs	Developers and design teams picking code fonts	Premium plugins/add-ons Agency service	• Code font for design-led dev teams • Terminal font for AI tooling startups • Brand monospace for devtool landing pages	Free font; $250-900 brand typeface setup *Effort:* Low (OFL font, rename rules apply to changes) ⚠ OFL-1.1; GitHub name is a trademark, avoid implying endorsement
Source-han-sans adobe-fonts/source-han-sans ★ 17.4k · Check NOASSERTION · Library · Fit 2/5	Pan-CJK sans-serif typeface family covering Chinese, Japanese and Korean scripts. *Replaces:* Monotype CJK fonts, Adobe Fonts CJK packs	Publishers and apps needing CJK typefaces	Premium plugins/add-ons Agency service	• CJK typeface for Korean e-learning platforms • Japanese UI font for Tokyo app studios • Multilingual brand font for Hong Kong retailers	Free font; $800-3000 multilingual brand setup *Effort:* Low (Ready CJK font, packaging needs care) ⚠ NOASSERTION listed; check OFL terms and reserved names

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Smiley-sans atelier-anchor/smiley-sans ★ 15.0k · Check OFL-1.1 · Library · Fit 2/5	Chinese sans-serif typeface balancing humanist and geometric features. *Replaces:* Founder Type fonts, Alibaba Puhui	Chinese designers and brands needing a free heavy font	Premium plugins/add-ons Agency service	• Headline font for Chinese short-video creators • Poster font for restaurant chains • Brand headline font for fitness studios	Free font; $300-1000 brand font setup *Effort:* Low (OFL font, rename needed for modified versions) ⚠ OFL-1.1; modified versions must be renamed, check commercial terms
JetBrainsMono JetBrains/JetBrainsMono ★ 13.2k · Check OFL-1.1 · Library · Fit 2/5	Free and open-source monospace typeface for developers, made by JetBrains. *Replaces:* Operator Mono, Dank Mono, Fira Code	Developers choosing a free IDE font	Premium plugins/add-ons Agency service	• Code font for Kotlin bootcamps • IDE font presets for enterprise dev teams • Terminal font for data science courses	Free font; $200-600 IDE font presets for teams *Effort:* Low (Ready font, OFL rename rules apply) ⚠ OFL-1.1; JetBrains is a trademark, avoid implying endorsement
Sarasa-Gothic be5invis/Sarasa-Gothic ★ 13.0k · Check NOASSERTION · Library · Fit 2/5	Chinese and Japanese sans-serif font built from Iosevka and Source Han Sans. *Replaces:* Monotype CJK fonts, Adobe Source Han packs	Developers and designers needing CJK code fonts	Premium plugins/add-ons Agency service	• CJK terminal font for Chinese software teams • Japanese code font for Osaka dev shops • Mixed-script UI font for Korean fintech apps	Free font; $400-1500 CJK brand font build *Effort:* Medium (Build config for CJK mixing, needs font skills) ⚠ NOASSERTION listed; check OFL and Source Han terms
Mactype snowie2000/mactype ★ 12.0k · GPL GPL-3.0 · Tool · Fit 2/5	Windows utility that improves font rendering and sharpness for on-screen text. *Replaces:* ClearType tuning services, Windows font tools	Windows users wanting sharper font rendering	Premium plugins/add-ons Setup + support retainer	• Font tuning for design studios on Windows • Readable text setup for Windows-based clinics • Sharper UI fonts for dev workstations	Free tool; $30/workstation setup service *Effort:* Medium (Windows utility, needs installer and support) ⚠ GPL-3.0; distributed builds must ship source; Windows-only
Devicon devicons/devicon ★ 11.9k · Permissive MIT · Library · Fit 2/5	Icon set of programming language and developer tool logos in SVG and font form. *Replaces:* Font Awesome Pro brand icons, Iconify premium sets	Web developers and documentation sites	Premium plugins/add-ons Agency service	• Tech logo set for bootcamp course sites • Stack icons for devtool landing pages • Icon pack for DevOps training vendors	Free icons; $99-299 custom icon pack per client *Effort:* Low (MIT icon set, easy to bundle) ⚠ MIT; each logo carries its brand trademark, use with care
Plex IBM/plex ★ 11.8k · Check OFL-1.1 · Library · Fit 2/5	IBM Plex typeface family for interfaces, code and print. *Replaces:* Adobe Fonts licenses, Monotype font packs	Designers and product teams needing a corporate typeface	Premium plugins/add-ons Agency service	• Typography kit for government portal redesigns • Design system font for banks • Type system for open data nonprofits	Free font; $500-2500 design system typography setup *Effort:* Low (OFL font, bundle with rename rules) ⚠ OFL-1.1; IBM name is a trademark; reserved names apply
Monocraft IdreesInc/Monocraft ★ 11.5k · Check OFL-1.1 · Library · Fit 2/5	Monospaced programming font inspired by the look of the Minecraft typeface. *Replaces:* Pixel font packs, Minecraft-style asset stores	Minecraft fans and game developers	Premium plugins/add-ons Agency service	• Pixel font for indie Minecraft server sites • Retro terminal font for game dev tools • Blocky font for kids coding camps	Free font; $150-400 custom pixel font pack *Effort:* Low (Font with Minecraft look, easy to bundle) ⚠ OFL-1.1; Minecraft look raises Mojang trademark concerns
Source-han-serif adobe-fonts/source-han-serif ★ 9.8k · Check NOASSERTION · Library · Fit 2/5	Pan-CJK serif typeface family for Chinese, Japanese and Korean text. *Replaces:* Monotype Mincho, Adobe Fonts CJK packs	Publishers and book designers working in CJK	Premium plugins/add-ons Agency service	• Serif for Chinese literary publishers • Japanese magazine typography for Tokyo design firms • Korean serif for academic press books	Free font; $800-3000 publishing typography setup *Effort:* Low (Ready CJK font, OFL packaging rules) ⚠ NOASSERTION listed; check OFL and reserved names

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Icons twbs/icons ★ 8.2k · Permissive MIT · Library · Fit 2/5	Official open-source SVG icon library for Bootstrap projects. *Replaces:* Font Awesome Pro, Iconify premium sets	Bootstrap web developers needing UI icons	Premium plugins/add-ons Agency service	• Icon set for Bootstrap restaurant ordering sites • Dashboard icons for small-clinic admin tools • Icon kit for WordPress agency themes	Free icons; $200-800 themed icon pack per client *Effort:* Low (MIT icons, easy to restyle) ⚠ MIT; Bootstrap is a trademark of its maintainers, check branding
Fantasque-sans belluzj/fantasque-sans ★ 7.5k · Check OFL-1.1 · Library · Fit 2/5	Programming-friendly typeface family with a monospaced variant for coders. *Replaces:* Operator Mono, Dank Mono	Programmers wanting a readable coding font	Premium plugins/add-ons Agency service	• Code font for Python classroom IDEs • Readable font for accessibility-focused dev teams • Coding font for Clojure bootcamp students	Free font; $150-400 classroom font pack *Effort:* Low (OFL font, rename required for changes) ⚠ OFL-1.1; modified versions must not use reserved names
U8g2 olikraus/u8g2 ★ 6.7k · Check NOASSERTION · Library · Fit 2/5	C library for drawing text and graphics on monochrome LCD and OLED displays. *Replaces:* Segger emWin, TouchGFX	Embedded engineers building small display devices	Hardware kits/assembly Consulting/implementation	• OLED menus for portable medical meters • Status display for industrial sensors • Display firmware for smart kitchen timers	Free library; $3-8k per firmware display project *Effort:* Medium (C library, needs firmware and hardware integration) ⚠ NOASSERTION listed; check BSD terms before shipping firmware
Fontmin ecomfe/fontmin ★ 6.2k · Permissive MIT · Library · Fit 2/5	Node library that minifies and subsets font files to reduce web size. *Replaces:* Font subsetting SaaS, hosted glyphhanger services	Front-end teams shipping web fonts	Consulting/implementation Setup + support retainer	• Font subsetting for Chinese e-commerce sites • Web font builds for Korean news portals • Font optimization for Japanese government sites	Free library; $1-3k per font performance audit *Effort:* Medium (Node library, needs build pipeline integration) ⚠ MIT; subsetting may breach fonts with embedding limits
opentype.js opentypejs/opentype.js ★ 5.0k · Permissive MIT · Library · Fit 2/5	JavaScript library to read and write OpenType font files in browsers and Node. *Replaces:* Glyphs Mini, FontForge scripting services	Developers building font tools or text layout apps	Consulting/implementation Setup + support retainer	• Font preview tool for print shop storefronts • Glyph export for sign-making software • Text layout for web certificate generators	Free library; $2-6k per custom font tool build *Effort:* Medium (Library, you build the tool on top) ⚠ MIT; font embedding rules vary by each font's license

Forecasting & Time Series · 16

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Prophet meta/prophet ★ 20.5k · Permissive MIT · Library · Fit 2/5	Python and R library producing forecasts for time series with multiple seasonalities. *Replaces:* Amazon Forecast, Anaplan forecasting, Forecast Pro	Analysts forecasting sales and demand with seasonality	Consulting/implementation Setup + support retainer	• Demand forecasts for restaurant chains • Staffing forecasts for call centers • Ridership forecasts for regional transit	Free library; $3-10k per forecasting project *Effort:* Medium (Library, needs a forecasting product around it) ⚠ MIT; Meta is a trademark, no endorsement implied
DeepLearningExamples NVIDIA/DeepLearningExamples ★ 14.9k · Check NONE · Starter · Fit 2/5	Reference training scripts for many deep learning models, organized by model. *Replaces:* NVIDIA AI Enterprise training services, Scale AI recipes	Teams training models on NVIDIA GPUs	Consulting/implementation Training/courses	• GPU training recipes for speech AI startups • Training kits for radiology imaging vendors • Reference pipelines for recommender teams	Free scripts; $5-20k per GPU training setup *Effort:* Medium (Reference scripts, many separate model projects) ⚠ No license; NVIDIA trademark; each model folder has its own terms
Statsmodels statsmodels/statsmodels ★ 11.7k · Permissive BSD-3-Clause · Library · Fit 2/5	Python library for statistical modeling, econometrics and hypothesis testing. *Replaces:* SAS, Stata, SPSS	Economists and analysts running statistical models	Consulting/implementation Training/courses	• Regression analysis for clinical trial teams • Econometric models for regional planners • Statistics workshops for MBA programs	Free library; $150-300/seat statistics training *Effort:* Medium (Library, business is analysis or training) ⚠ BSD-3-Clause; permissive, no trademark issue

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Sktime sktime/sktime ★ 10.1k · **Permissive** BSD-3-Clause · Library · Fit 2/5	Unified Python framework for machine learning on time series tasks. *Replaces:* Dataiku forecasting, DataRobot time series	Data scientists building time series models	Consulting/implementation Setup + support retainer	• Demand forecasting for grocery distributors • Anomaly detection for manufacturing sensors • Energy load models for utility analysts	Free library; $4-12k per forecasting build *Effort:* Medium (Library, business built around modeling services) ⚠ BSD-3-Clause; permissive; check dependency licenses
Darts unit8co/darts ★ 9.6k · **Permissive** Apache-2.0 · Library · Fit 2/5	Python library for forecasting and anomaly detection on time series data. *Replaces:* Amazon Forecast, Azure Time Series Insights	Analysts and engineers forecasting business metrics	Consulting/implementation API/usage-based	• Sales forecasts for ecommerce merchants • Anomaly alerts for SaaS revenue dashboards • Traffic forecasts for regional airports	Free library; $3-9k per forecasting service build *Effort:* Medium (Library, service and tooling needed around it) ⚠ Apache-2.0; permissive; some models need GPU
Chronos-forecasting amazon-science/chronos-forecasting ★ 6.3k · **Permissive** Apache-2.0 · Model · Fit 2/5	Pretrained transformer models for zero-shot time series forecasting. *Replaces:* Amazon Forecast, Datadog forecasting, hosted TimeGPT	Data teams wanting zero-shot forecasts	API/usage-based Consulting/implementation	• Zero-shot demand forecasts for small grocers • Capacity forecasts for hosting providers • Sensor forecasts for water utilities	Free model; $2-6k per forecasting integration *Effort:* Medium (Model weights, needs serving and monitoring) ⚠ Apache-2.0; check training data terms and model card limits
Tsai timeseriesAI/tsai ★ 6.1k · **Permissive** Apache-2.0 · Library · Fit 2/5	PyTorch and fastai library for deep learning on time series and sequences. *Replaces:* Vertex AI time series, Azure ML forecasting	Data scientists doing time series classification	Consulting/implementation Training/courses	• ECG classification for wearable startups • Vibration fault detection for factory machinery • Activity recognition for fitness app teams	Free library; $3-8k per classification project *Effort:* Medium (Library, business is modeling services) ⚠ Apache-2.0; depends on fastai and PyTorch, keep notices
Gluonts awslabs/gluonts ★ 5.3k · **Permissive** Apache-2.0 · Library · Fit 2/5	Python toolkit for probabilistic time series modeling with deep learning. *Replaces:* Amazon Forecast, Databricks forecasting, Anaplan	Forecasting teams needing uncertainty ranges	Consulting/implementation Setup + support retainer	• Probabilistic inventory forecasts for auto parts sellers • Bed-demand ranges for hospital planners • Energy demand bands for solar installers	Free toolkit; $4-10k per forecasting deployment *Effort:* Medium (Toolkit, needs deployment and monitoring) ⚠ Apache-2.0; AWS-branded project, avoid implying endorsement
Pytorch-forecasting sktime/pytorch-forecasting ★ 5.0k · **Permissive** MIT · Library · Fit 2/5	PyTorch library for time series forecasting with deep models such as temporal fusion transformers. *Replaces:* Azure forecasting, DataRobot time series, Amazon Forecast	ML engineers building deep forecasting models	Consulting/implementation Setup + support retainer	• Retail sales forecasts for multi-store chains • Electricity price forecasts for trading desks • Ridership forecasts for ride-share fleets	Free library; $4-9k per forecasting build *Effort:* Medium (Library, needs data pipeline and serving) ⚠ MIT; depends on Lightning and PyTorch, pin versions
Statsforecast Nixtla/statsforecast ★ 5.0k · **Permissive** Apache-2.0 · Library · Fit 2/5	Fast statistical and econometric time series forecasting models in Python. *Replaces:* SAS Forecast Server, Amazon Forecast, Anaplan	Analysts forecasting many series quickly	Consulting/implementation Managed hosting	• Forecasts for thousands of SKUs at grocers • Daily demand models for restaurant suppliers • Usage forecasts for cloud cost teams	Free library; $2-5k/mo managed forecasting pipeline *Effort:* Medium (Library, needs managed pipeline layer) ⚠ Apache-2.0; Nixtla is a company brand, no endorsement implied
Neural_prophet ourownstory/neural_prophet ★ 4.3k · **Permissive** MIT · Library · Fit 2/5	Python package for neural network forecasting with a Prophet-style interface. *Replaces:* Prophet hosted services, Amazon Forecast, Anaplan	Analysts forecasting with seasonality and events	Consulting/implementation Setup + support retainer	• Energy demand forecasts for small utilities • Footfall forecasts for shopping malls • Traffic forecasts for media publishers	Free package; $2-6k per forecasting project *Effort:* Medium (Python package, needs product built around it) ⚠ MIT; interface mirrors Meta's Prophet, avoid implying endorsement

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Neuralforecast Nixtla/neuralforecast ★ 4.3k · Permissive Apache-2.0 · Library · Fit 2/5	Scalable and user-friendly neural forecasting algorithms for time series. *Replaces:* Amazon Forecast, Vertex AI forecasting, Databricks forecasting	Teams forecasting many series with deep models	Consulting/implementation API/usage-based	• Demand forecasts for auto dealership parts • Load forecasts for EV charging networks • Seat sale forecasts for regional airlines	Free library; $3-8k per forecasting engagement *Effort:* Medium (Library, deployment layer needed) ⚠ Apache-2.0; Nixtla is a company brand, avoid implying endorsement
Nixtla Nixtla/nixtla ★ 4.0k · Check NOASSERTION · Model · Fit 2/5	SDK for a hosted pretrained forecasting and anomaly detection API. *Replaces:* Amazon Forecast, Datadog forecasting, Anaplan	Teams wanting hosted forecasting through an API	API/usage-based Consulting/implementation	• Anomaly alerts for payment processors • Retail forecasts for regional grocers • Load forecasts for small utilities	Vendor-set API usage pricing; integration work extra *Effort:* High (Closed hosted model, reseller terms only) ⚠ NOASSERTION; hosted model terms restrict reselling, read carefully
Flow-forecast AIStream-Peelout/flow-forecast ★ 2.3k · GPL GPL-3.0 · Library · Fit 2/5	PyTorch library for forecasting, classification and anomaly detection, first built for floods. *Replaces:* Azure anomaly detector, Datadog anomaly detection, Amazon Forecast	Hydrology and environmental analytics teams	Consulting/implementation Setup + support retainer	• River flood warnings for county emergency offices • Water level forecasts for irrigation districts • Anomaly detection for weather sensor networks	Free library; $5-12k per monitoring deployment *Effort:* Medium (GPL research-era code, needs hardening) ⚠ GPL-3.0; flood warnings are safety-critical, needs validation
PyPOTS WenjieDu/PyPOTS ★ 2.1k · Permissive BSD-3-Clause · Library · Fit 2/5	Python toolkit with neural models for partially observed time series data. *Replaces:* SAS Viya time series, Databricks time series tooling	Scientists working with gappy sensor and clinical data	Consulting/implementation Training/courses	• Imputation for ICU vital-sign records • Gap filling for wind turbine sensors • Missing-data cleaning for weather station feeds	Free toolkit; $3-8k per data cleaning project *Effort:* Medium (Toolkit, needs domain validation) ⚠ BSD-3-Clause; clinical use may need regulatory validation
Orbit uber/orbit ★ 2.1k · Check NOASSERTION · Library · Fit 2/5	Python package for Bayesian time series forecasting with probabilistic models. *Replaces:* Amazon Forecast, SAS Forecast Server, hosted Prophet	Analysts needing Bayesian forecast intervals	Consulting/implementation Training/courses	• Revenue forecasts for SaaS finance teams • Demand planning for small manufacturers • Forecast training for analytics bootcamps	Free package; $2-6k per forecasting model build *Effort:* Medium (Package, needs productization) ⚠ NOASSERTION; Uber is a trademark; project may be unmaintained

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
AzuraCast AzuraCast/AzuraCast ★ 4.1k · AGPL AGPL-3.0 · Platform · Fit 5/5	Self-hosted web radio suite with AutoDJ, listener stats, and a web UI *Replaces:* Radio.co, Spacial, Live365, Shoutcast hosting	Hobby stations, churches, online broadcasters	Managed hosting Setup + support retainer White-label reseller	• Radio hosting for churches • Station builder for indie DJs • Podcast radio for universities *Angle:* Managed web radio station hosting	$9-39/mo per station *Effort:* Low (Docker install, theming and multi-station built in) ⚠ AGPL-3.0: publish server changes; music licensing (SoundExchange, PRS) applies
Mixxx mixxxdj/mixxx ★ 7.4k · Check NOASSERTION · App · Fit 3/5	Free DJ software for live mixing with controllers, effects, and library management *Replaces:* Serato, Traktor, Rekordbox, VirtualDJ	DJs and music hobbyists	Training/courses Hardware kits/assembly Content/membership	• DJ courses for beginners • Controller mapping packs for DJs • Wedding DJ starter kits *Angle:* Branded DJ software bundles with hardware	$49-99 per course *Effort:* High (Desktop C++ app, GPL, hard to rebrand) ⚠ GPL-2.0 or later; Mixxx name and logo are trademarks
ESP32-Bit-Pirate geo-tp/ESP32-Bit-Pirate ★ 6.3k · Permissive MIT · Hardware · Fit 3/5	Hardware hacking tool with a web CLI that speaks many embedded bus protocols. *Replaces:* Bus Pirate, Saleae logic tools, Total Phase Aardvark	Embedded engineers debugging buses	Hardware kits/assembly Consulting/implementation	• Debug kits for embedded bootcamps • Bus analyzer kits for IoT repair shops • Protocol testing for industrial controls integrators	Free firmware; $35-60 assembled kit *Effort:* Medium (Firmware plus hardware, kit assembly needed) ⚠ MIT; Bus Pirate is a brand; electronics safety certification needed
Ground-station sgoudelis/ground-station ★ 4.9k · GPL GPL-3.0 · App · Fit 3/5	Browser-based suite for satellite tracking, SDR reception and telemetry decoding. *Replaces:* N2YO Pro, Heavens-Above Pro, commercial satellite trackers	Amateur satellite operators and ground station clubs	Premium plugins/add-ons Hardware kits/assembly	• Satellite tracking for school STEM clubs • Ground station setup for amateur radio groups • Telemetry decoding for CubeSat student teams	Free app; $5-15/mo hosted tracking dashboard *Effort:* Medium (Browser app, needs hardware integration docs) ⚠ GPL-3.0; satellite frequency use needs licensed operators
Owntone-server owntone/owntone-server ★ 2.6k · GPL GPL-2.0 · App · Fit 3/5	Audio server playing to AirPlay, Chromecast and local speakers, with MPD and DAAP. *Replaces:* Sonos multiroom, Roon, Plex audio	Home audio users and multi-room installers	Setup + support retainer Hardware kits/assembly	• Multiroom audio for boutique hotels • Background music setup for small cafes • Home audio for music studios	Free server; $200-600 per install for setup *Effort:* Medium (Server app, needs packaging and support) ⚠ GPL-2.0; Spotify and AirPlay integration terms may restrict commercial use
Meshtastic-Android meshtastic/Meshtastic-Android ★ 1.9k · GPL GPL-3.0 · App · Fit 3/5	Android app for controlling Meshtastic off-grid mesh radio devices. *Replaces:* Garmin inReach messaging, Goal Zero comms, Zello	Hikers, emergency preparedness groups, off-grid users	Mobile app on top Hardware kits/assembly	• Off-grid comms for search and rescue volunteers • Mesh radio kits for festival organizers • Emergency comms for rural farm co-ops	Free app; $80-150 hardware kit margin *Effort:* Medium (Mobile app tied to radio hardware) ⚠ GPL-3.0; radio transmission rules apply; Meshtastic is a project brand
LibreTime libretime/libretime ★ 938 · AGPL AGPL-3.0 · Platform · Fit 3/5	Radio broadcast and automation platform with scheduling and playout *Replaces:* RadioDJ, Zetta, Radio.co, StationPlaylist	Community and campus radio stations	Managed hosting Setup + support retainer Consulting/implementation	• Automation for campus radio • Hosted scheduling for community stations • Playout for church radio *Angle:* Radio automation SaaS for community stations	$29-79/mo per station *Effort:* Medium (Multi-service stack, single-station per install) ⚠ AGPL-3.0; fork of Airtime; broadcast licensing obligations
Rivendell ElvishArtisan/rivendell ★ 248 · Check NONE · Platform · Fit 3/5	Full-featured radio automation system for professional broadcast environments *Replaces:* Zetta, WideOrbit, RadioDJ, StationPlaylist	Local radio stations and broadcasters	Consulting/implementation Setup + support retainer Managed hosting	• Automation for small FM stations • Studio installs for community radio • Remote playout for church broadcasters *Angle:* Broadcast automation installation and support	$2-8k per station install *Effort:* High (Linux desktop stack, single-station) ⚠ Metadata NONE; actually GPL-2.0; broadcast licensing duties

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Bootstrap-table wenzhixin/bootstrap-table ★ 11.8k · Permissive MIT · Library · Fit 2/5	Extended table plugin for Bootstrap, Semantic UI, Bulma and other CSS frameworks. *Replaces:* AG Grid, Handsontable, DataTables Pro	Web developers building data tables in admin apps	Consulting/implementation Premium plugins/add-ons	• Sortable order tables for invoicing SaaS • Bulk-edit tables for school admin portals • Stock tables for regional wholesale catalogs	Free plugin; $300-900 per table feature integration *Effort:* Low (jQuery-era plugin, easy to drop in) ⚠ MIT; jQuery dependency, check maintenance and security
Vxe-table x-extends/vxe-table ★ 8.6k · Permissive MIT · Library · Fit 2/5	Table component for Vue 2 and Vue 3 with large data sets and editing. *Replaces:* AG Grid Enterprise, Handsontable, Syncfusion Grid	Vue developers building data-heavy admin tables	Consulting/implementation Premium plugins/add-ons	• Data grid for logistics shipment tracking • Editable tables for accounting firms • Grid for hospital staffing schedules	Free library; $400-1500 per grid integration *Effort:* Medium (Vue table component, needs theming and support) ⚠ MIT; Vue 2 support aging; check version compatibility
Gnuradio gnuradio/gnuradio ★ 6.3k · GPL GPL-3.0 · Framework · Fit 2/5	Software-defined radio toolkit for signal processing and wireless experiments. *Replaces:* MATLAB Communications Toolbox, LabVIEW SDR, Ettus UHD tooling	RF engineers and university labs	Consulting/implementation Training/courses	• SDR training for university wireless labs • Signal flowgraphs for drone telemetry integrators • Spectrum tools for broadcast engineers	Free toolkit; $3-10k per RF prototype build *Effort:* Medium (Toolkit for experts, not an end-user app) ⚠ GPL-3.0; distributed flowgraph apps must ship source; GNU Radio mark
Mayhem-firmware portapack-mayhem/mayhem-firmware ★ 5.5k · GPL GPL-3.0 · Hardware · Fit 2/5	Firmware for the HackRF PortaPack handheld radio platform. *Replaces:* Commercial SDR handhelds, Flipper Zero-style tools	RF hobbyists and security students	Hardware kits/assembly Training/courses	• RF lab kits for security training courses • Signal learning kits for amateur radio clubs • Demo rigs for RF engineering schools	Free firmware; hardware kit margin $80-200 *Effort:* High (Firmware tied to specific hardware, regulatory exposure) ⚠ GPL-3.0; RF transmission needs regulatory compliance and licenses
CubicSDR cjcliffe/CubicSDR ★ 2.3k · GPL GPL-2.0 · App · Fit 2/5	Cross-platform desktop software-defined radio application. *Replaces:* SDR#, SDR Console, Gqrx	Hobbyist radio listeners and SDR enthusiasts	Premium plugins/add-ons Training/courses	• Radio monitoring for amateur radio clubs • SDR training for school STEM labs • Airband listening tools for aviation fans	Free app; small paid market, support upsell only *Effort:* Medium (Desktop app, low commercial ceiling) ⚠ GPL-2.0; distributed builds must ship source
Ubertooth greatscottgadgets/ubertooth ★ 2.2k · GPL GPL-2.0 · Hardware · Fit 2/5	Open hardware and firmware for Bluetooth Low Energy sniffing and research. *Replaces:* Ellisys sniffers, Frontline BLE analyzers	Security researchers and BLE developers	Hardware kits/assembly Consulting/implementation	• BLE testing kits for IoT product labs • Security audit tooling for medical device startups • Bluetooth training for embedded bootcamps	Hardware kit at $80-150; audit projects extra *Effort:* High (Security research tool, certification needed) ⚠ GPL-2.0; BLE sniffing has legal limits; hardware needs certification
Liquidsoap savonet/liquidsoap ★ 1.8k · GPL GPL-2.0 · Framework · Fit 2/5	Scripting language and engine for building audio and video streaming pipelines *Replaces:* Radio automation like RadioDJ, Zetta, StationPlaylist	Radio engineers and streaming developers	Consulting/implementation Setup + support retainer Managed hosting	• Radio automation for community stations • Stream relay for podcasters • Failover broadcast setup for webcasters *Angle:* Custom radio automation for broadcasters	$800-3k per station setup *Effort:* High (Script engine, no UI) ⚠ GPL-2.0; scripting skill required; music licensing duties
Look4Sat rt-bishop/Look4Sat ★ 1.5k · GPL GPL-3.0 · App · Fit 2/5	Android satellite tracker and pass predictor, inspired by Gpredict. *Replaces:* Gpredict, Heavens-Above, N2YO app	Amateur satellite enthusiasts on Android	Mobile app on top Premium plugins/add-ons	• Satellite pass alerts for amateur radio clubs • Sky tracking for stargazing tour guides • Pass planner for school space clubs	Free app; $2-4 one-time pro unlock *Effort:* Medium (Android app, needs store listing work) ⚠ GPL-3.0; distributed apps must ship source; TLE data terms

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Qspectrumanalyzer xmikos/qspectrumanalyzer ★ 1.5k · GPL GPL-3.0 · Tool · Fit 2/5	Spectrum analyzer GUI for several SDR backends and tools. *Replaces:* Signal Hound analyzer apps, spectrum analyzer hardware	RF engineers and SDR hobbyists	Consulting/implementation Training/courses	• Spectrum checks for radio shop technicians • EMI survey tool for small electronics makers • Teaching tool for RF courses	Free tool; $2-5k per RF survey service *Effort:* Medium (Python GUI, depends on SDR backends) ⚠ GPL-3.0; distributed builds ship source; RF regulations apply
Icecast xiph/Icecast-Server ★ 559 · GPL GPL-2.0 · Tool · Fit 2/5	Streaming media server that delivers audio streams to listeners *Replaces:* Shoutcast, Radio.co, Spacial, Live365	Internet radio operators	Managed hosting Setup + support retainer Consulting/implementation	• Stream hosting for hobby stations • Relay servers for podcasters • Radio hosting for churches *Angle:* Shoutcast-style stream hosting plans	$5-19/mo per stream *Effort:* Medium (Lightweight server, no admin UI or tenancy) ⚠ GPL-2.0; Icecast name is Xiph trademark; royalties for music streams

LLM Gateways & Observability · 21

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
New-api QuantumNous/new-api ★ 51.5k · AGPL AGPL-3.0 · Platform · Fit 4/5	Self-hosted AI gateway with OpenAI and Claude-compatible APIs, billing and usage tracking. *Replaces:* OpenRouter, Portkey, LiteLLM Enterprise	AI resellers and teams sharing LLM API access	Managed hosting Vertical SaaS	• API reseller panel for Chinese AI shops • Shared LLM access for university departments • Usage billing for AI bootcamps	Free self-host; $49-199/mo managed gateway per org *Effort:* Medium (Feature-rich gateway, needs branding and support) ⚠ AGPL-3.0 publishes server changes; reselling upstream API access breaks terms
Langfuse langfuse/langfuse ★ 37.1k · Check NOASSERTION · Platform · Fit 4/5	LLM observability platform with tracing, evaluation, prompt management, and datasets *Replaces:* LangSmith, Helicone, Datadog LLM, Arize	AI product teams	Managed hosting Setup + support retainer Consulting/implementation	• Hosted LLM tracing for startups • Eval service for legal AI • Self-hosted LLM logs for banks *Angle:* LLM observability SaaS for app teams	$30-300/mo per team *Effort:* Medium (Docker stack, orgs and projects built in) ⚠ MIT core with enterprise ee folder; Langfuse trademark; acquired by ClickHouse
Opik comet-ml/opik ★ 23.2k · Permissive Apache-2.0 · Platform · Fit 4/5	LLM application tracing, evaluation, and monitoring platform *Replaces:* LangSmith, Langfuse, Helicone, Arize	AI engineering teams	Managed hosting Setup + support retainer Consulting/implementation	• LLM monitoring for e-commerce chatbots • Evaluation service for legal AI • Self-hosted tracing for regulated firms *Angle:* Hosted LLM eval dashboards for agencies	$39-200/mo per team *Effort:* Medium (Docker or Kubernetes app, multi-workspace) ⚠ Comet trademark; hosted version competes with you
Portkey Gateway Portkey-AI/gateway ★ 13.3k · Permissive MIT · Platform · Fit 4/5	Lightweight AI gateway routing requests to many LLMs with fallbacks, caching and guardrails *Replaces:* OpenRouter, Helicone, LiteLLM, Cloudflare AI Gateway	AI startups, agencies running multiple LLM apps	Managed hosting API/usage-based White-label reseller	• Reliability gateway for AI customer-support startups • Compliance-filtering LLM gateway for law firms • Prepaid LLM gateway for freelancers *Angle:* Multi-provider AI gateway with failover	$49-299/mo plus usage *Effort:* Medium (Small codebase, add auth and billing) ⚠ Hosted dashboard features not in OSS gateway
Coai coaidev/coai ★ 9.3k · Permissive Apache-2.0 · Platform · Fit 4/5	Multi-tenant AI chat and gateway with admin, billing and access to many LLM providers. *Replaces:* OpenRouter, Poe, ChatGPT Team	AI resellers launching chat products	White-label reseller Managed hosting	• Branded AI chat for Chinese law firms • Team chat portal for regional agencies • Credit-based AI chat for language schools	Free self-host; $99-299/mo managed, credit margin *Effort:* Medium (Multi-tenant with billing, needs compliance work) ⚠ Apache-2.0; resold model access breaks upstream terms; check billing rules

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Helicone Helicone/helicone ★ 6.3k · Permissive Apache-2.0 · Platform · Fit 4/5	LLM observability proxy that logs, caches, and analyzes API requests *Replaces:* LangSmith, Langfuse, Portkey, OpenRouter	Developers running LLM apps	Managed hosting Setup + support retainer White-label reseller	• LLM cost tracking for agencies • Gateway logging for AI startups • Prompt analytics for chatbot vendors *Angle:* LLM cost monitoring for startups	$20-100/mo per workspace *Effort:* Medium (Multi-service stack, proxy and UI) ⚠ Helicone trademark; project moved to maintenance mode after acquisition
Promptfoo promptfoo/promptfoo ★ 26.9k · Permissive MIT · Tool · Fit 3/5	CLI and library for testing prompts, evaluating models, and red-teaming LLM apps *Replaces:* LangSmith, Humanloop, Lakera, Robust Intelligence	AI developers and security teams	Consulting/implementation Managed hosting Training/courses	• LLM red-team audits for fintechs • Prompt regression testing for SaaS • AI security assessments for health apps *Angle:* LLM red-teaming audits as a service	$3-15k per audit *Effort:* High (CLI tool, no multi-user UI) ⚠ Promptfoo trademark; security testing needs client authorization
Phoenix Arize-ai/phoenix ★ 12.2k · Check NOASSERTION · Platform · Fit 3/5	AI observability and evaluation tool for LLM apps, traces, and datasets *Replaces:* LangSmith, Langfuse, Datadog LLM, Weights and Biases	AI engineers	Managed hosting Consulting/implementation Setup + support retainer	• Trace service for RAG startups • Eval dashboards for support bots • Hallucination audits for health AI *Angle:* LLM evaluation and tracing service	$2-8k per setup *Effort:* Medium (Python app with UI, single-tenant) ⚠ Elastic License 2.0 prevents hosted-service resale; Arize trademark
OpenLIT openlit/openlit ★ 3.0k · Permissive Apache-2.0 · Platform · Fit 3/5	OpenTelemetry-native LLM observability and GPU monitoring toolkit *Replaces:* Datadog LLM Observability, Langfuse, LangSmith	AI platform engineers	Managed hosting Consulting/implementation Setup + support retainer	• OTel LLM tracing for SaaS • GPU monitoring for AI hosts • Cost reports for LLM agencies *Angle:* OpenTelemetry AI monitoring for enterprises	$20-80/mo per project *Effort:* Medium (Docker stack, OTel integration) ⚠ Smaller community; Apache-2.0
Octopus bestruirui/octopus ★ 2.7k · AGPL AGPL-3.0 · Platform · Fit 3/5	Personal LLM API aggregation gateway that unifies many model providers. *Replaces:* OpenRouter, One API commercial forks	Individuals managing several LLM API keys	Managed hosting Premium plugins/add-ons	• API key pooling for Chinese indie developers • Model router for small AI agencies • Unified keys for bootcamp students	Free self-host; $5-15/mo hosted with managed keys *Effort:* Medium (Personal-focused, needs multi-user features) ⚠ AGPL-3.0 publishes server changes; upstream API terms apply
Llmgateway theopenco/llmgateway ★ 1.7k · Check NOASSERTION · Platform · Fit 3/5	Routes, manages and analyzes LLM requests across providers through one API. *Replaces:* OpenRouter, Portkey, Helicone	Teams running LLM features across several providers	Managed hosting Vertical SaaS	• Provider routing for HR chatbot vendors • Cost tracking for legal AI startups • Multi-model gateway for ecommerce support teams	Free self-host; $99-499/mo managed analytics *Effort:* Medium (Gateway with analytics, needs multi-tenant work) ⚠ NOASSERTION license; read first; provider API terms apply
GoModel ENTERPILOT/GoModel ★ 1.3k · Permissive MIT · Platform · Fit 3/5	Go AI gateway with OpenAI and Anthropic-compatible APIs, guardrails and cost tracking. *Replaces:* LiteLLM hosted, Portkey, Kong AI Gateway	Platform teams routing requests to many LLM vendors	Managed hosting Consulting/implementation	• Guardrails gateway for fintech chatbots • Cost tracking for SaaS AI features • Provider failover for regional health portals	Free self-host; $150-600/mo managed gateway *Effort:* Medium (Go service, needs tenancy and admin UI) ⚠ MIT; sits in front of provider APIs, check each provider's terms
Otari mozilla-ai/otari ★ 865 · Permissive Apache-2.0 · Platform · Fit 3/5	Self-hosted AI gateway with one endpoint for 40-plus providers and budgets. *Replaces:* OpenRouter, Portkey, Cloudflare AI Gateway	Engineering teams wanting self-hosted LLM routing	Managed hosting Consulting/implementation	• Budget control for student AI tutoring apps • Virtual keys for agency client projects • Usage tracking for nonprofit AI pilots	Free self-host; $99-299/mo managed keys and budgets *Effort:* Medium (Young gateway, needs admin and hosting) ⚠ Apache-2.0; Mozilla is a trademark, avoid implying endorsement
Paritok-4b-v1 Paritok-official/paritok-4b-v1 ★ 1.4k · Permissive Apache-2.0 · Model · Fit 2/5	Compression gateway for coding agents that claims lower token bills with a 4B model. *Replaces:* Token optimizers, LLM cost gateways	Developers paying heavy token bills for coding agents	API/usage-based Consulting/implementation	• Token savings for agency dev teams • Cost control for solo coding-agent users • Long-session compression for code review bots	Usage-based; savings claims need independent verification *Effort:* Medium (Model plus gateway, vendor claims need checking) ⚠ Apache-2.0; savings figures are vendor-stated, verify before selling

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Vllora vllora/vllora ★ 810 · Check NOASSERTION · Tool · Fit 2/5	Debugging tool for AI agents with request tracing and observability. *Replaces:* LangSmith, Langfuse hosted, Arize Phoenix	Teams debugging LLM agent runs	Managed hosting Consulting/implementation	• Trace debugging for customer support agents • Agent QA for legal research tools • Debug dashboards for AI tutoring startups	Free self-host; $99-399/mo managed trace storage *Effort:* Medium (Developer tool, needs hosted traces and auth) ⚠ NOASSERTION license; read first; trace data may hold personal data
ThinkWatch-Lite ThinkWatchProject/ThinkWatch-Lite ★ 726 · Permissive MIT · App · Fit 2/5	Local gateway for Claude Code, Codex and other AI clients with tracing and tool-call blocking. *Replaces:* Helicone, Portkey local, LiteLLM proxy	Developers using multiple AI coding clients	Premium plugins/add-ons Setup + support retainer	• Request tracing for agency dev teams • Relay key manager for freelance developers • Tool-call guardrails for regulated fintech engineers	Free app; $10-25/seat team edition *Effort:* Medium (Lite local app, team features missing) ⚠ MIT; upstream vendor and relay terms apply to API keys
NadirClaw NadirRouter/NadirClaw ★ 662 · Check NOASSERTION · Tool · Fit 2/5	Source-available LLM router that sends simple prompts to cheaper models. *Replaces:* Martian router, Not Diamond, OpenRouter auto mode	Teams cutting LLM spend across coding tools	API/usage-based Consulting/implementation	• Cost routing for agency coding teams • Model routing for customer support SaaS • Spend control for solo AI developers	Usage-based savings share; free self-host core *Effort:* Medium (Router with source-available terms, needs hosting) ⚠ NOASSERTION source-available; read license before commercial use
Casbin-gateway apache/casbin-gateway ★ 647 · Permissive Apache-2.0 · Tool · Fit 2/5	Monitors AI coding agents on a machine and shows which API each one actually uses. *Replaces:* Helicone, Portkey, LiteLLM dashboards	Security teams governing developer AI tools	Setup + support retainer Managed hosting	• Coding agent audit for fintech engineering teams • API authenticity checks for procurement teams • Agent permission control for government IT	Free core; $50-150 per developer seat yearly *Effort:* Medium (Governance layer, needs enterprise features) ⚠ Apache-2.0; Apache and Casbin names are project trademarks
Lynkr Fast-Editor/Lynkr ★ 639 · Permissive Apache-2.0 · Tool · Fit 2/5	CLI tool acting as an HTTP proxy for Claude Code CLI requests. *Replaces:* Claude Code proxies, OpenRouter for Claude	Developers routing Claude Code through other endpoints	Premium plugins/add-ons Setup + support retainer	• Claude Code proxy for agency teams • Endpoint switching for offshore dev shops • Local routing for privacy-focused engineers	Free CLI; $10/seat team setup support *Effort:* Low (Small CLI proxy, narrow use) ⚠ Apache-2.0; Claude Code and Anthropic terms govern routed usage
Respan-gateway respanai/respan-gateway ★ 595 · Permissive Apache-2.0 · Platform · Fit 2/5	Open-source LLM gateway in Rust with one endpoint for many AI vendors. *Replaces:* Portkey, Helicone, OpenRouter	Teams wanting a fast self-hosted LLM gateway	Managed hosting Consulting/implementation	• Gateway for Rust-based fintech AI services • Routing layer for e-commerce chatbots • Model proxy for legal document tools	Free self-host; $150-500/mo managed gateway *Effort:* Medium (Rust gateway, needs dashboards and tenancy) ⚠ Apache-2.0; Respan is a company brand, avoid implying affiliation
HiRoute higress-group/HiRoute ★ 422 · Permissive Apache-2.0 · Tool · Fit 2/5	Local model router that sends routine agent work to cheaper models. *Replaces:* OpenRouter auto routing, Martian router	Developers stretching Codex and Claude Code subscriptions	Premium plugins/add-ons Consulting/implementation	• Cost routing for indie coding freelancers • Agent spend control for small dev agencies • Model routing for solo app builders	Free tool; $10-20/mo routing policy packs *Effort:* Medium (Local router, subscription tie-ins need care) ⚠ Apache-2.0; routing around subscriptions may breach vendor terms

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
LiteLLM BerriAI/litellm ★ 62.9k · Check NOASSERTION · Platform · Fit 4/5	Proxy that exposes 100+ LLM providers through one OpenAI-style API with spend tracking and guardrails *Replaces:* OpenRouter, Portkey, Helicone, Azure API Management	AI product teams, enterprise platform groups	Managed hosting Setup + support retainer API/usage-based	• LLM budget gateway for university departments • Multi-model proxy for AI agencies billing clients • Cost-capped LLM gateway for startups *Angle:* LLM gateway with billing and rate limits	Usage markup 5-10% or $99/mo flat *Effort:* Medium (Teams and keys built in, admin UI) ⚠ Enterprise dir is non-MIT; read license; SSO is paid
LocalAI mudler/LocalAI ★ 50.2k · Permissive MIT · Platform · Fit 4/5	OpenAI-compatible local AI server for LLMs, vision, voice, and images *Replaces:* OpenAI API, Together AI, ElevenLabs, Replicate	Self-hosters and private AI teams	Managed hosting Setup + support retainer API/usage-based	• Private AI API for clinics • Local AI box for law firms • Edge inference for retailers *Angle:* OpenAI-compatible private API for compliance clients	$30-200/mo per instance *Effort:* Medium (Docker image, OpenAI-compatible, no tenancy) ⚠ MIT; model licenses vary; no built-in billing
Ollama ollama/ollama ★ 186.2k · Permissive MIT · Tool · Fit 3/5	Runs and serves open LLMs locally with a simple CLI and REST API *Replaces:* LM Studio, OpenAI API, Together AI, Replicate	Developers and privacy-minded teams	Setup + support retainer Managed hosting Hardware kits/assembly	• Private LLM servers for law firms • Local AI boxes for clinics • GPU hosting for hobbyists *Angle:* Private on-prem LLM appliances for SMBs	$800-3k per private install *Effort:* Medium (Easy deploy, no multi-tenant or billing) ⚠ Ollama is a trademark; model licenses vary; no user management
vLLM vllm-project/vllm ★ 96.5k · Permissive Apache-2.0 · Platform · Fit 3/5	High-throughput LLM inference and serving engine with OpenAI-compatible API *Replaces:* Together AI, Fireworks, OpenAI API, Bedrock	ML platform teams and AI hosters	API/usage-based Managed hosting Consulting/implementation	• Private LLM API for banks • Fine-tuned model hosting for startups • GPU serving for regional clouds *Angle:* Managed open-model inference API	$0.20-2 per million tokens *Effort:* High (Server engine, needs GPU ops and billing) ⚠ Apache-2.0; GPU capex and model licenses are main risks
SGLang sgl-project/sglang ★ 38.6k · Permissive Apache-2.0 · Platform · Fit 3/5	High-performance serving framework for LLMs and multimodal models *Replaces:* vLLM, Together AI, Fireworks, Bedrock	AI hosters and platform teams	API/usage-based Managed hosting Consulting/implementation	• Fast inference API for startups • Private serving for enterprises • Agent backend hosting for AI SaaS *Angle:* High-throughput inference cloud reselling tokens	$0.15-1.50 per million tokens *Effort:* High (Server engine, GPU ops and billing needed) ⚠ Apache-2.0; GPU cost and model licenses
Litgpt Lightning-AI/litgpt ★ 13.7k · Permissive Apache-2.0 · Tool · Fit 3/5	Recipes and tools to pretrain, finetune and deploy 20-plus open LLMs. *Replaces:* Together AI fine-tuning, Anyscale, Modal recipes	ML teams running open LLMs on their GPUs	Consulting/implementation Managed hosting	• Private LLM deployment for legal firms • Fine-tuned support models for SaaS vendors • Domain LLM training for research hospitals	Free core; $3-10k per private model deployment *Effort:* Medium (Recipes and CLI, needs ops layer) ⚠ Apache-2.0; Lightning AI is a company brand; base model licenses vary
OpenLLM bentoml/OpenLLM ★ 12.6k · Permissive Apache-2.0 · Tool · Fit 3/5	Runs open LLMs such as DeepSeek and Llama as OpenAI-compatible API endpoints. *Replaces:* Together AI, Fireworks, Replicate	Teams self-hosting open LLM endpoints	Managed hosting API/usage-based	• Private inference endpoints for legal AI startups • Llama endpoint for Spanish-language bots • On-prem API for hospital back offices	Free self-host; $500-2000/mo managed GPU endpoint *Effort:* Medium (Serving tool, needs GPU ops and auth) ⚠ Apache-2.0; Llama-family model licenses restrict some commercial uses
Xinference xorbitsai/inference ★ 9.6k · Permissive Apache-2.0 · Platform · Fit 3/5	Unified server for running open LLMs, embedding, and multimodal models with OpenAI API *Replaces:* OpenAI API, Together AI, Replicate	AI teams and private-cloud hosters	Managed hosting Setup + support retainer API/usage-based	• Private model hub for enterprises • Embedding API for search apps • Chinese LLM hosting for SMEs *Angle:* Enterprise model serving with support contracts	$30-150/mo per instance *Effort:* Medium (Python server with web UI, light tenancy) ⚠ Apache-2.0; supports many models with differing licenses

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
BentoML bentoml/BentoML ★ 8.9k · **Permissive** Apache-2.0 · Framework · Fit 3/5	Python framework for packaging and serving AI models as APIs *Replaces:* SageMaker, Replicate, Modal, Baseten	ML engineers	Consulting/implementation Managed hosting Training/courses	• Model serving for fintech ML • Containerized inference for retailers • API wrappers for CV startups *Angle:* Model deployment platform for ML teams	$3-10k per deployment *Effort:* High (Framework, BentoCloud is vendor product) ⚠ BentoML trademark; BentoCloud competes with managed hosting
Lmdeploy InternLM/lmdeploy ★ 8.1k · **Permissive** Apache-2.0 · Tool · Fit 3/5	Toolkit for compressing, deploying and serving LLMs and vision-language models. *Replaces:* vLLM hosted, Together serving, Fireworks	Teams deploying LLMs on their own GPUs	Consulting/implementation Managed hosting	• Quantized serving for Chinese customer support bots • On-prem LLM for regional bank teams • Vision-language serving for retail shelf analytics	Free toolkit; $3-9k per deployment project *Effort:* Medium (Serving toolkit, needs ops and auth) ⚠ Apache-2.0; base model licenses such as Qwen and Llama apply
Plano katanemo/plano ★ 7.1k · **Permissive** Apache-2.0 · Platform · Fit 3/5	AI-native proxy and data plane for agent apps with routing, observability and guardrails. *Replaces:* Kong AI Gateway, Portkey, Azure API Management AI	Platform teams running agentic apps	Managed hosting Consulting/implementation	• Guardrails gateway for insurance agent bots • Routing for multi-model support desks • Traffic control for enterprise copilots	Free self-host; $300-1000/mo managed proxy *Effort:* Medium (Proxy with agent features, needs ops layer) ⚠ Apache-2.0; Katanemo is a company brand, check trademarks
Lemonade lemonade-sdk/lemonade ★ 6.1k · **Permissive** Apache-2.0 · App · Fit 3/5	Local AI server that runs optimized LLMs on GPUs and NPUs, with an app catalog. *Replaces:* LM Studio, Ollama Pro, Jan	Windows users running local AI apps	Mobile app on top Premium plugins/add-ons	• Local AI for Windows law offices • Offline assistant for field technicians • Private chat for home-office professionals	Free app; $5-15/mo managed model library *Effort:* Medium (Desktop server, needs installer and support) ⚠ Apache-2.0; hardware vendor ties may affect marketing claims
Gpustack gpustack/gpustack ★ 6.0k · **Permissive** Apache-2.0 · Platform · Fit 3/5	GPU cluster manager for serving models with vLLM and SGLang, plus SSH GPU instances. *Replaces:* Run:ai, Lambda GPU cloud, Anyscale	Teams managing their own GPU clusters	Managed hosting Consulting/implementation	• GPU pooling for university research clusters • Model serving for regional AI startups • On-prem inference for hospital IT	Free self-host; $1-3k/mo managed cluster control *Effort:* Medium (Cluster manager, needs enterprise auth and billing) ⚠ Apache-2.0; GPU hosting costs and vendor model licenses apply
Spiceai spiceai/spiceai ★ 3.1k · **Permissive** Apache-2.0 · Platform · Fit 3/5	Portable SQL query, search and LLM-inference engine in Rust for data-grounded AI apps. *Replaces:* Databricks SQL, Snowflake Cortex, Starburst	Data teams building AI apps over operational data	Managed hosting Consulting/implementation	• Real-time data layer for ecommerce chat assistants • Operational query engine for logistics teams • Search and SQL gateway for fintech analytics	Free self-host; $500-2000/mo managed cloud *Effort:* Medium (Engine with many connectors, needs managed layer) ⚠ Apache-2.0; Spice AI is a company brand, check trademarks
llama.cpp ggml-org/llama.cpp ★ 133.6k · **Permissive** MIT · Library · Fit 2/5	C/C++ engine for efficient LLM inference on CPUs and consumer GPUs *Replaces:* vLLM, OpenAI API, Ollama, LM Studio	Developers embedding LLMs	Consulting/implementation Hardware kits/assembly Setup + support retainer	• On-device LLM for POS vendors • Offline AI appliances for field teams • Embedded assistant for kiosks *Angle:* Edge inference consulting for device makers	$150-250/hr consulting *Effort:* High (Inference library, build everything else) ⚠ MIT; model licenses vary; GGML trademark
Ray ray-project/ray ★ 44.2k · **Permissive** Apache-2.0 · Framework · Fit 2/5	Distributed compute engine for scaling AI, training, serving, and Python workloads *Replaces:* Databricks, AWS SageMaker, Anyscale, Spark	ML platform engineers	Consulting/implementation Managed hosting Training/courses	• Distributed training for biotech startups • Batch inference for media firms • Ray cluster setup for AI teams *Angle:* Managed distributed compute clusters	$180-300/hr consulting *Effort:* High (Distributed runtime, Anyscale is primary vendor) ⚠ Apache trademark; Anyscale commercially competes; Kubernetes ops
TensorRT-LLM NVIDIA/TensorRT-LLM ★ 15.0k · **Check** NOASSERTION · Library · Fit 2/5	NVIDIA toolkit for optimizing and serving LLMs on NVIDIA GPUs *Replaces:* vLLM, Together AI, Bedrock	GPU cloud and AI infra teams	Consulting/implementation Managed hosting API/usage-based	• Optimized inference for GPU hosts • Latency tuning for voice AI • On-prem LLM serving for banks *Angle:* GPU inference optimization consulting	$200-300/hr consulting *Effort:* High (NVIDIA-only, complex build and tuning) ⚠ Apache-2.0 repo, but NVIDIA GPU lock-in; NVIDIA trademark

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Openvino openvinotoolkit/openvino ★ 11.1k · **Permissive** Apache-2.0 · Framework · Fit 2/5	Open-source toolkit for optimizing and deploying AI inference, mainly on Intel hardware. *Replaces:* TensorRT, ONNX Runtime hosted, Qualcomm AI tooling	Edge AI teams deploying on Intel hardware	Consulting/implementation Setup + support retainer	• Retail camera analytics on Intel boxes • Factory defect inspection on edge PCs • Clinic imaging inference on Intel workstations	Free toolkit; $6-18k per edge deployment project *Effort:* Medium (Toolkit for Intel hardware, deep integration) ⚠ Apache-2.0; Intel and OpenVINO are trademarks; keep notices
PowerInfer Tiiny-AI/PowerInfer ★ 9.9k · **Permissive** MIT · Tool · Fit 2/5	High-speed LLM serving engine for local deployment on consumer hardware. *Replaces:* llama.cpp hosted services, Ollama Pro, cloud inference APIs	Developers running LLMs on consumer PCs	Hardware kits/assembly Consulting/implementation	• On-device assistant for law offices • Local inference for privacy-focused clinics • Offline chatbot for field sales teams	Free engine; $2-5k per on-prem deployment *Effort:* Medium (Research engine, integration heavy) ⚠ MIT; model weight licenses vary; check benchmark claims
Dynamo ai-dynamo/dynamo ★ 8.5k · **Check** NOASSERTION · Framework · Fit 2/5	Datacenter-scale distributed inference serving framework for GPU fleets. *Replaces:* Anyscale, Baseten, Together dedicated endpoints	Platform teams running large GPU inference fleets	Consulting/implementation Setup + support retainer	• Inference fleet setup for regional telcos • Serving backend for enterprise search vendors • GPU routing for AI infrastructure startups	Free framework; $15-50k per cluster setup project *Effort:* High (Heavy distributed systems stack, GPU clusters) ⚠ NOASSERTION; read first; NVIDIA-linked project, check trademarks
Openevolve algorithmicsuperintelligence/openevolve ★ 7.7k · **Permissive** Apache-2.0 · Tool · Fit 2/5	Open-source implementation of an AlphaEvolve-style evolutionary code optimizer. *Replaces:* Commercial code optimizers, AlphaEvolve-style services	Researchers optimizing algorithms with LLMs	Consulting/implementation Training/courses	• Kernel tuning for GPU performance teams • Scheduling heuristics for logistics planners • Code optimization for quant research teams	Free tool; $5-15k per optimization engagement *Effort:* Medium (Research code, needs evals and guardrails) ⚠ Apache-2.0; AlphaEvolve is a Google name, avoid implying affiliation
Flashinfer flashinfer-ai/flashinfer ★ 6.9k · **Permissive** Apache-2.0 · Library · Fit 2/5	Kernel library for fast LLM serving on GPUs. *Replaces:* TensorRT-LLM, custom CUDA kernels	Inference engineers optimizing GPU serving	Consulting/implementation Training/courses	• Kernel tuning for GPU hosting firms • Attention kernels for long-context legal tools • Speed audits for LLM serving startups	Free library; $10-30k per performance tuning engagement *Effort:* High (Specialist GPU code, deep expertise needed) ⚠ Apache-2.0; GPU driver and CUDA version compatibility issues
Engine cactus-compute/engine ★ 6.2k · **Check** NOASSERTION · Library · Fit 2/5	Two-bit quantization, kernels and runtime for on-device AI on consumer devices. *Replaces:* Qualcomm AI Hub, Core ML tooling	Mobile and embedded developers shipping on-device AI	Consulting/implementation Mobile app on top	• On-device OCR for offline field inspections • Private voice assistant for clinics • Offline translator for travel apps	Free runtime; $5-20k per on-device integration *Effort:* High (Device-specific kernels, heavy porting work) ⚠ NOASSERTION license; read first; quantized model licenses apply
Shimmy Michael-A-Kuykendall/shimmy ★ 6.0k · **Permissive** Apache-2.0 · Tool · Fit 2/5	Pure-Rust WebGPU inference server with OpenAI-compatible API and GGUF support. *Replaces:* llama.cpp server, Ollama, LM Studio server	Rust developers running local GGUF models	Consulting/implementation Setup + support retainer	• Local inference for Rust desktop tools • Offline model server for dev workstations • GPU inference for embedded kiosks	Free binary; $3-8k per local inference integration *Effort:* Medium (Single binary, needs product and support) ⚠ Apache-2.0; GGUF model licenses vary; GPU driver issues
Superduper superduper-io/superduper ★ 5.3k · **Permissive** Apache-2.0 · Framework · Fit 2/5	End-to-end framework for building custom AI applications and agents. *Replaces:* LangChain Enterprise, LlamaIndex Cloud, Databricks AI	Data teams building custom AI apps	Consulting/implementation Setup + support retainer	• Custom search app for law firm archives • Agent backend for insurance claims teams • Model pipeline for manufacturing QA	Free framework; $8-25k per custom AI app build *Effort:* Medium (Framework, needs app and ops layer) ⚠ Apache-2.0; framework lock-in risk; check model licenses

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Eko FellouAI/eko ★ 5.0k · **Permissive** MIT · Framework · Fit 2/5	Framework for building production agentic workflows from natural language instructions. *Replaces:* UiPath agents, Zapier AI, Power Automate	Developers building browser and desktop agents	Consulting/implementation Setup + support retainer	• Browser automation for insurance claim portals • Data entry agents for small accounting firms • Form-filling bots for government service desks	Free framework; $3-10k per agent workflow build *Effort:* Medium (Framework, needs reliability and monitoring) ⚠ MIT; browser automation may violate target site terms
RuVector ruvnet/RuVector ★ 4.7k · **Permissive** MIT · Platform · Fit 2/5	Vector database in Rust with agent memory and graph-based learning features. *Replaces:* Pinecone, Weaviate Cloud, Qdrant Cloud	Engineers needing vector search and agent memory	Managed hosting Consulting/implementation	• Vector search for legal case law tools • Agent memory for customer support bots • Recommendation index for small ecommerce shops	Free self-host; $99-399/mo managed vector store *Effort:* Medium (Vector database, needs hosting and benchmarks) ⚠ MIT; performance claims are vendor-stated, verify independently
GenerativeAIExamples NVIDIA/GenerativeAIExamples ★ 4.2k · **Permissive** Apache-2.0 · Starter · Fit 2/5	NVIDIA reference workflows for generative AI on accelerated infrastructure. *Replaces:* Commercial RAG consulting kits	Teams building RAG apps on NVIDIA stacks	Consulting/implementation Training/courses	• RAG reference build for regional bank IT • Chatbot template for hospital systems • Workflow starter for NVIDIA cloud partners	Free examples; $10-30k per NVIDIA stack deployment *Effort:* Medium (Reference examples tied to NVIDIA stack) ⚠ Apache-2.0; NVIDIA trademarks; model and dataset terms differ
Rapid-MLX raullenchai/Rapid-MLX ★ 4.1k · **Check** NOASSERTION · Tool · Fit 2/5	OpenAI and Anthropic-compatible LLM inference server for Apple Silicon built on MLX. *Replaces:* Ollama, LM Studio server, mlx-lm	Mac developers running local coding agents	Premium plugins/add-ons Consulting/implementation	• Local inference for Mac-based dev agencies • Private coding agents for indie iOS studios • Offline model server for Mac clinics	Free server; $5-15 one-time support license *Effort:* Medium (Mac-only server, speed claims need checking) ⚠ License listed NOASSERTION though text says Apache 2.0; verify; speed claims vendor-stated
Distributed-llama b4rtaz/distributed-llama ★ 3.1k · **Permissive** MIT · Tool · Fit 2/5	Connects home devices into a cluster for distributed LLM inference. *Replaces:* Cloud GPU inference, commercial distributed inference services	Hobbyists pooling home computers for LLMs	Consulting/implementation Training/courses	• Home lab LLM cluster guides for makers • Pooled inference for university computing clubs • Low-cost local inference for small schools	Free software; $1-3k per cluster setup *Effort:* Medium (Hobbyist cluster tool, limited production use) ⚠ MIT; model weight licenses apply; cluster performance varies
Medusa FasterDecoding/Medusa ★ 2.8k · **Permissive** Apache-2.0 · Library · Fit 2/5	Framework that speeds up LLM generation with multiple decoding heads. *Replaces:* Speculative decoding services, vendor inference speedups	Inference engineers reducing LLM latency	Consulting/implementation Training/courses	• Latency tuning for chat products • Faster code completion for dev tools • Speedups for voice assistant backends	Free library; $5-15k per latency optimization project *Effort:* High (Heads must be trained per base model) ⚠ Apache-2.0; decoding heads retrain per base model; check weight licenses

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
SRS ossrs/srs ★ 29.4k · **Permissive** MIT · Platform · Fit 4/5	High-performance real-time media server for RTMP, WebRTC, HLS, SRT *Replaces:* Wowza, Agora, Twilio Video, Mux Live	Streaming startups and broadcasters	Managed hosting Setup + support retainer Consulting/implementation	• Live streaming for e-learning in Asia • Webinar infrastructure for training firms • Low-latency streams for auctions *Angle:* Live streaming infrastructure-as-a-service for apps	$50-500/mo per cluster *Effort:* Medium (C++ server, config-driven, multi-stream) ⚠ MIT; bandwidth costs dominate; SRS name from project

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Owncast owncast/owncast ★ 11.6k · Permissive MIT · App · Fit 4/5	Self-hosted live streaming server with built-in chat and RTMP ingest *Replaces:* Twitch, YouTube Live, Restream, Vimeo Livestream	Creators and communities streaming live events	Managed hosting Setup + support retainer White-label reseller	• Live streaming for church services • Stream hosting for indie esports • Webcasts for local venues *Angle:* Managed single-channel livestream hosting for creators	$15-49/mo per channel *Effort:* Low (Single Go binary, themeable page, one stream per instance) ⚠ MIT; bandwidth costs and music rights on streams
Restreamer datarhei/restreamer ★ 5.2k · Permissive Apache-2.0 · App · Fit 4/5	Self-hosted streaming server that restreams live video to YouTube, Twitch, and RTMP targets *Replaces:* Restream.io, StreamYard, Castr, OBS.live	Churches, event producers, small broadcasters	Managed hosting Setup + support retainer White-label reseller	• Restreaming for church livestreams • Multi-platform streaming for esports teams • Live event relay for wedding videographers *Angle:* Restream.io-style multistreaming service for churches	$19-79/mo per channel *Effort:* Medium (Docker image with UI, single-tenant per instance) ⚠ Needs bandwidth and transcoding capacity; datarhei is a trademark
Ant Media Server ant-media/Ant-Media-Server ★ 4.7k · Check NOASSERTION · Platform · Fit 4/5	Ultra-low latency live streaming server supporting WebRTC, SRT, RTMP, and HLS *Replaces:* Wowza, Agora, Twilio Video, Mux Live	Streaming, auctions, and telehealth providers	Managed hosting White-label reseller Setup + support retainer	• Live auction streaming • Low-latency tutoring video • Interactive streams for sports betting *Angle:* WebRTC streaming platform for telehealth and education	$99-499/mo per server *Effort:* Medium (Java server with dashboard, enterprise features paid) ⚠ Community edition limited; Enterprise edition paid; license NOASSERTION
OvenMediaEngine OvenMediaLabs/OvenMediaEngine ★ 3.3k · AGPL AGPL-3.0 · Platform · Fit 4/5	Sub-second latency live streaming server with WebRTC, LL-HLS, and SRT *Replaces:* Wowza, Agora, Mux Live, Millicast	Broadcasters and streaming startups	Managed hosting Setup + support retainer White-label reseller	• Sub-second sports streaming • Interactive events for creators • Live commerce streams for retailers *Angle:* Sub-second latency streaming CDN for auctions and betting	$80-600/mo per cluster *Effort:* Medium (C++ server, config and API, no tenant UI) ⚠ AGPL-3.0: publish server changes; bandwidth costs
MediaMTX bluenviron/mediamtx ★ 20.6k · Permissive MIT · Tool · Fit 3/5	Zero-dependency media server and proxy for RTSP, RTMP, WebRTC, SRT, HLS *Replaces:* Wowza, Agora, Twilio Video	IP camera and live video integrators	Setup + support retainer Managed hosting Consulting/implementation	• CCTV to web gateway for installers • Drone video relay for inspection firms • Low-latency camera streaming for farms *Angle:* Managed RTSP/camera relay for security integrators	$20-100/mo per site *Effort:* Medium (Single Go binary, config only, no UI) ⚠ MIT; formerly rtsp-simple-server; no auth UI or billing
Red5-server Red5/red5-server ★ 3.4k · Permissive Apache-2.0 · Platform · Fit 3/5	Core Java server for real-time video, RTMP and WebRTC streaming. *Replaces:* Wowza Streaming Engine, Ant Media, Agora	Developers building streaming and video chat	Managed hosting Consulting/implementation	• Video chat for telehealth consults • Live class streaming for language schools • Streaming for regional church services	Free core; $500-2000/mo managed streaming server *Effort:* Medium (Java server, scaling needs ops work) ⚠ Apache-2.0; Red5 is a brand; Pro edition features differ
MistServer DDVTECH/mistserver ★ 520 · Permissive Unlicense · Platform · Fit 3/5	Multi-protocol streaming server for live and on-demand video *Replaces:* Wowza, Ant Media, Mux, Nimble Streamer	Broadcasters and OTT operators	Managed hosting Setup + support retainer White-label reseller	• Pay-per-view streaming for local sports • Church streaming platform • IPTV backend for small ISPs *Angle:* OEM streaming engine licensing for broadcasters	$50-300/mo per node *Effort:* Medium (C++ server with UI, single-tenant) ⚠ Unlicense; MistServer trademark; commercial Pro edition exists
nginx-rtmp-module arut/nginx-rtmp-module ★ 14.0k · Permissive BSD-2-Clause · Tool · Fit 2/5	NGINX module adding RTMP live streaming and HLS packaging *Replaces:* Wowza, Mux Live, Restream	Small streaming operators	Setup + support retainer Managed hosting Consulting/implementation	• Self-hosted RTMP for churches • Stream restreaming for esports leagues • Event ingest for local TV *Angle:* Turnkey RTMP ingest servers for event producers	$500-2k per setup *Effort:* High (NGINX module, old, no UI) ⚠ Unmaintained for years; BSD-2-Clause; no WebRTC support
Yasea begeekmyfriend/yasea ★ 4.9k · Permissive MIT · App · Fit 2/5	RTMP live streaming client for Android devices. *Replaces:* Larix Broadcaster, Streamlabs Mobile, Prism Live	Android streamers and mobile journalists	Mobile app on top Premium plugins/add-ons	• Mobile live streams for church services • Field reporting for local news crews • Sports event streams for youth leagues	Free app; $3-6 one-time pro unlock *Effort:* Medium (Android client, needs store and UI work) ⚠ MIT; streaming platform rules and stream content liability

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
StreamCap ihmily/StreamCap ★ 4.4k · **Permissive** Apache-2.0 · App · Fit 2/5	Automatic multi-platform live stream recorder with monitoring, scheduling and transcoding. *Replaces:* Streamlink wrappers, paid DVR recording services	Streamers and archivists recording live channels	Premium plugins/add-ons Setup + support retainer	• Archiving for esports league broadcasts • Recording for Chinese educational live classes • Backup for podcast-style live shows	Free self-host; $5-10/mo hosted recording storage *Effort:* Medium (Many site scrapers, fragile to maintain) ⚠ Apache-2.0; platform terms and copyright limit recording and reuse
Srt Haivision/srt ★ 3.6k · **Weak copyleft** MPL-2.0 · Library · Fit 2/5	Secure Reliable Transport library for low-latency video over unreliable networks. *Replaces:* Zixi, Aviwest, Haivision Makito	Broadcasters and video contribution engineers	Hardware kits/assembly Consulting/implementation	• Contribution links for regional sports broadcasters • Remote feeds for news vans • Low-latency streams for surgical teaching	Free library; $4-12k per video link integration *Effort:* Medium (C library, needs encoder and gateway products) ⚠ MPL-2.0 file-level copyleft; Haivision is a company brand
Nginx-http-flv-module winshining/nginx-http-flv-module ★ 2.9k · **Permissive** BSD-2-Clause · Tool · Fit 2/5	nginx module for HTTP-FLV streaming with GOP cache, virtual hosts and stats. *Replaces:* Wowza, commercial nginx-rtmp builds	Sysadmins running live streaming servers	Consulting/implementation Setup + support retainer	• Streaming server for regional TV channels • Live feeds for stadium scoreboards • Internal streaming for corporate town halls	Free module; $2-5k per streaming server setup *Effort:* Medium (nginx module, needs ops and monitoring) ⚠ BSD-2-Clause; nginx is an F5 trademark, keep notices
Docker-nginx-rtmp alfg/docker-nginx-rtmp ★ 1.1k · **Permissive** MIT · Starter · Fit 2/5	Docker image of nginx-rtmp and FFmpeg for basic HLS live streaming. *Replaces:* Wowza hosted, AWS Elemental MediaLive	Developers spinning up small streaming servers	Consulting/implementation Setup + support retainer	• Test streaming stack for video startups • Simple HLS server for church livestreams • Stream relay for school event broadcasts	Free image; $800-2500 streaming server setup *Effort:* Low (Small Dockerfile, easy to adapt) ⚠ MIT; FFmpeg is LGPL or GPL, codec patents may apply
Cyber-xiaoya-live cyber-xiaoya/cyber-xiaoya-live ★ 786 · **AGPL** AGPL-3.0 · App · Fit 2/5	Chinese live-streaming component for AI digital human hosts using a video model. *Replaces:* Commercial AI avatar hosts, Synthesia, HeyGen	Chinese streamers wanting AI avatar hosts	Premium plugins/add-ons Setup + support retainer	• AI avatar hosts for Chinese shopping streams • Virtual presenter for Chinese course channels • Digital host for local event streams	Free component; avatar service $30-100/mo *Effort:* Medium (Component tied to a video model API) ⚠ AGPL-3.0; author brand and avatar likeness rights need care
Streamline streamlinevideo/streamline ★ 784 · **Permissive** MIT · Framework · Fit 2/5	Reference architecture for end-to-end live video: capture, encode, package, CDN and player. *Replaces:* Mux live, Wowza, AWS Elemental MediaLive	Video platforms building live streaming pipelines	Consulting/implementation Setup + support retainer	• Live streaming for regional sports leagues • Church livestream pipelines for multi-campus churches • Live classes for online schools	Free reference; $10-30k per live pipeline build *Effort:* High (Reference system, many components to build) ⚠ MIT; cloud, CDN and codec patent licensing costs
Brave bbc/brave ★ 693 · **Permissive** Apache-2.0 · Tool · Fit 2/5	Cloud tool to preview, mix and route live audio and video streams. *Replaces:* vMix, cloud production suites, Grass Valley cloud	Broadcasters running remote live productions	Managed hosting Consulting/implementation	• Remote mixing for regional TV stations • Cloud production for church broadcasts • Live switching for university sports streams	$500-2000/mo hosted mixing, setup extra *Effort:* Medium (Broadcast tool, needs cloud operations) ⚠ Apache-2.0; BBC name and marks must not imply endorsement
Livepeer go-livepeer livepeer/go-livepeer ★ 587 · **Permissive** MIT · Platform · Fit 2/5	Go node for the Livepeer decentralized video transcoding network *Replaces:* Mux, AWS Elemental, Cloudflare Stream, Wowza	Video infrastructure operators	API/usage-based Consulting/implementation Managed hosting	• Transcoding for live shopping streams • Video API for creator apps • Orchestrator hosting for GPU owners *Angle:* Decentralized transcoding reseller for video platforms	$0.005 per minute transcoded *Effort:* High (Crypto-economics network, no product layer) ⚠ Livepeer Inc runs the commercial network; crypto token mechanics involved

AetherEngine superuser404notfound/AetherEngine ★ 391 · Check NOASSERTION · Library · Fit 2/5	Media playback engine for Apple platforms with FFmpeg demux, HDR and audio passthrough. *Replaces:* Infuse, VLC for iOS, Plex player SDK	Apple platform developers building video players	Mobile app on top Consulting/implementation	• Home theater player for Apple TV owners • Video SDK for enterprise training apps • Player for visionOS media studios	Free engine; $5-15k per player app build *Effort:* Medium (Engine, needs app and interface work) ⚠ NOASSERTION license; FFmpeg and codec patent licenses apply
StreamPack ThibaultBee/StreamPack ★ 375 · Permissive Apache-2.0 · Library · Fit 2/5	Android libraries for multiprotocol live broadcasting over SRT, RTMP and others. *Replaces:* Larix SDK, Wowza GoCoder SDK, Haivision SDK	Android developers building broadcast apps	Consulting/implementation Mobile app on top	• Live reporting app for local journalists • Church streaming app for volunteers • Field camera app for sports coaches	Free library; $6-15k per broadcast app build *Effort:* Medium (SDK, needs app and store work) ⚠ Apache-2.0; SRT and RTMP patents and codec licenses may apply
Meshlive-android MeshLive/meshlive-android ★ 342 · GPL GPL-3.0 · App · Fit 2/5	Android app for encrypted voice, video and streams over Bluetooth mesh without internet. *Replaces:* Zello, Signal calls, Goal Zero mesh radios	Festival crews, disaster responders, off-grid groups	Mobile app on top Premium plugins/add-ons	• Offline calls for festival safety crews • Emergency comms for rural volunteer fire teams • Crew messaging for concert producers	Free app; $3-6 one-time premium encryption pack *Effort:* Medium (Android app, mesh tech needs field testing) ⚠ GPL-3.0; encryption export rules and Bluetooth range limits
Live-streaming-server-net josephnhtam/live-streaming-server-net ★ 334 · Permissive MIT · Tool · Fit 2/5	Live streaming server in .NET with RTMP, HTTP-FLV, WebSocket-FLV and HLS output. *Replaces:* Wowza, Ant Media Server, hosted RTMP services	.NET teams building streaming backends	Consulting/implementation Setup + support retainer	• Live server for .NET school platforms • Streaming backend for church media teams • HLS server for corporate training portals	Free server; $4-10k per streaming integration *Effort:* Medium (Server with Kubernetes setup, needs hardening) ⚠ MIT; stream content rules and codec licensing apply

Local AI & Model Runners · 13

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Local-deep-research LearningCircuit/local-deep-research ★ 9.5k · Permissive MIT · App · Fit 3/5	Local deep research assistant that searches arXiv, PubMed and private documents with LLMs. *Replaces:* Perplexity Pro, Elicit, Consensus	Researchers wanting private, local literature search	Premium plugins/add-ons Setup + support retainer	• Literature search for hospital research teams • Private document research for law firms • Grant research for university labs	Free self-host; $30-99/mo managed private instance *Effort:* Medium (Runs locally, needs install and support) ⚠ MIT; PubMed and arXiv terms apply; verify citations before use
Openmed maziyarpanahi/openmed ★ 5.8k · Permissive Apache-2.0 · Library · Fit 3/5	Local healthcare AI for clinical entity extraction and HIPAA-style PII de-identification. *Replaces:* AWS Comprehend Medical, Philter, John Snow Labs Healthcare NLP	Hospitals, clinical research and health data teams	Vertical SaaS Consulting/implementation	• De-identification for clinical trial sites • PII scrubbing for radiology reports • Clinical entity extraction for health insurers	Free SDK; $1-3k/mo per hospital de-identification license *Effort:* Medium (Health SDK, needs validation and compliance work) ⚠ Apache-2.0 SDK; HIPAA and clinical validation needed; check model licenses
Dossier AienTech/dossier ★ 4.8k · AGPL AGPL-3.0 · App · Fit 3/5	Self-hosted job search and resume builder that writes tailored resumes and cover letters. *Replaces:* Teal, Jobscan, Resume.io	Job seekers and career coaches	Vertical SaaS Managed hosting	• Resume tailoring for nurses changing roles • Cover letters for bootcamp graduates • Job search tracker for career coaches	Free self-host; $12-25/mo hosted profiles *Effort:* Medium (Full app, needs billing and auth) ⚠ AGPL-3.0 publishes server changes; AI resumes need honesty safeguards

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Open-multi-agent open-multi-agent/open-multi-agent ★ 7.0k · **Permissive** MIT · Framework · Fit 2/5	TypeScript agent runtime with approval gates and verifiable run records for self-hosted agents. *Replaces:* LangGraph Cloud, CrewAI Enterprise, Temporal for agents	Engineering teams running auditable AI agents	Consulting/implementation Setup + support retainer	• Approval workflows for finance ops agents • Audit trails for healthcare admin bots • Agent runs for legal intake teams	Free runtime; $8-25k per agent build *Effort:* Medium (Runtime library, needs product layer) ⚠ MIT; regulated use needs your own audit and compliance review
Langroid langroid/langroid ★ 4.1k · **Permissive** MIT · Framework · Fit 2/5	Python framework for multi-agent LLM programming with tools and retrieval. *Replaces:* LangChain Enterprise, CrewAI Enterprise	Python developers building multi-agent apps	Consulting/implementation Training/courses	• Agent workflows for insurance claims teams • Multi-agent research tools for consultancies • Agent tutoring for computer science courses	Free framework; $6-20k per agent app build *Effort:* Medium (Framework, product built around it) ⚠ MIT; LLM API terms and costs apply
Claude-code-local nicedreamzapp/claude-code-local ★ 3.5k · **Permissive** MIT · Tool · Fit 2/5	Runs Claude Code against local models on Mac, Linux and Windows without an API key. *Replaces:* Claude Code paid plans, Cursor subscriptions	Developers wanting offline coding assistants	Premium plugins/add-ons Consulting/implementation	• Offline coding agent for air-gapped software teams • Local coding setup for privacy-focused startups • Setup service for indie coders on Macs	Free tool; $200-600 setup for local AI workstations *Effort:* Medium (Setup tool, model quality and hardware limits) ⚠ MIT; Anthropic Claude Code terms may limit routing; model licenses apply
Atomic-agent AtomicBot-ai/atomic-agent ★ 3.4k · **Permissive** MIT · App · Fit 2/5	Local-first AI agent that runs open-weight models on your own machine via llama.cpp. *Replaces:* Cursor, ChatGPT desktop, Claude desktop	Privacy-focused professionals running local agents	Premium plugins/add-ons Mobile app on top	• Local assistant for family law practices • Offline research agent for journalists • Private note-taking agent for physicians	Free app; $10-20/mo premium skill packs *Effort:* Medium (Desktop agent, needs installers and support) ⚠ MIT; open-weight model licenses vary; agent actions need safeguards
Algernon xyproto/algernon ★ 3.0k · **Permissive** BSD-3-Clause · Tool · Fit 2/5	Small self-contained Go web server with Lua, Markdown, HTTP/2 and built-in database support. *Replaces:* Nginx, Caddy, Node dev servers	Go and Lua developers serving small web apps	Consulting/implementation Setup + support retainer	• Small web server for local government forms • Markdown site host for documentation teams • Lightweight app server for kiosk displays	Free server; $1-3k per deployment setup *Effort:* Medium (Niche server, small ecosystem) ⚠ BSD-3-Clause; niche project, check maintenance and security
Little-coder itayinbarr/little-coder ★ 2.7k · **Permissive** Apache-2.0 · Tool · Fit 2/5	Coding agent harness tuned for smaller local LLMs. *Replaces:* Claude Code, Cursor agents	Developers running small models locally	Premium plugins/add-ons Consulting/implementation	• Coding helper for low-power laptop students • Local coding agent for schools without internet • Tuned agent for small-model research labs	Free harness; little paid market, use as component *Effort:* Low (Small harness, narrow user base) ⚠ Apache-2.0; small model code quality limits, check outputs
Papersgpt-for-zotero papersgpt/papersgpt-for-zotero ★ 2.7k · **AGPL** AGPL-3.0 · Tool · Fit 2/5	Zotero plugin for chatting with PDFs, library search and literature discovery using LLMs. *Replaces:* Elicit, Scite, Zotero AI assistants	Researchers and graduate students using Zotero	Premium plugins/add-ons API/usage-based	• Literature review assistant for graduate students • Chat with PDFs for thesis committees • Literature radar for biomedical labs	Free plugin; $8-15/mo premium AI features *Effort:* Medium (Zotero plugin, ecosystem-dependent) ⚠ AGPL-3.0 publishes server changes; Zotero is a trademark; paper copyrights
Synthadoc axoviq-ai/synthadoc ★ 1.9k · **AGPL** AGPL-3.0 · Tool · Fit 2/5	LLM engine that compiles raw documents into structured, local-first wikis. *Replaces:* Notion AI, Glean, traditional RAG pipelines	Teams turning document piles into internal wikis	Consulting/implementation Setup + support retainer	• Wiki builds for legal precedent libraries • Internal knowledge wikis for clinics • Policy wikis for municipal staff	Free self-host; $1-3k per wiki compilation project *Effort:* Medium (Engine, needs UI and access controls) ⚠ AGPL-3.0 publishes server changes; document source copyrights apply

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Row-bot siddsachar/row-bot ★ 1.7k · Permissive Apache-2.0 · App · Fit 2/5	Local-first personal AI assistant with tools, knowledge graph, voice and automation. *Replaces:* Siri, Apple Intelligence, personal AI assistants	Privacy-minded individuals running local assistants	Premium plugins/add-ons Setup + support retainer	• Private assistant for solo therapists • Scheduled admin bot for small accountants • Health log assistant for family caregivers	Free app; $5-15/mo for cloud sync option *Effort:* Medium (Broad feature set, needs polish and packaging) ⚠ Apache-2.0; shell and browser automation risks; health data privacy rules
Observer Roy3838/Observer ★ 1.7k · AGPL AGPL-3.0 · App · Fit 2/5	Local agent that monitors screens or web sources and reacts to changes. *Replaces:* Visualping, Distill.io, Zapier monitors	Individuals wanting local monitoring of sites and screens	Premium plugins/add-ons Mobile app on top	• Price watch for small resellers • Permit monitoring for contractors • Stock alert watch for local retailers	Free app; $5-10/mo alert relay service *Effort:* Medium (Desktop agent, needs packaging and support) ⚠ AGPL-3.0 publishes server changes; monitoring may breach site terms

Low-Code App Builders · 25

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Appwrite appwrite/appwrite ★ 57.9k · Permissive BSD-3-Clause · Platform · Fit 4/5	Self-hosted backend with auth, databases, storage, functions, messaging and hosting *Replaces:* Firebase, Supabase, AWS Amplify, Auth0	Mobile and web developers, agencies	Managed hosting White-label reseller Agency service	• Appwrite hosting for African developers • Backend for Flutter agency clients • Compliance-region BaaS for German startups *Angle:* Backend-as-a-service hosting	$15-100/mo per project *Effort:* Medium (Docker stack, console themable, org features) ⚠ Appwrite trademark; many containers to operate
ToolJet ToolJet/ToolJet ★ 41.2k · AGPL AGPL-3.0 · Platform · Fit 4/5	Low-code platform for internal tools, dashboards and AI apps *Replaces:* Retool, Airtable, Power Apps, Appsmith	Dev teams, ops teams	Managed hosting Setup + support retainer Agency service	• Internal tools for logistics firms • Admin panels for e-commerce • Dashboards for clinics *Angle:* Internal tools platform hosting	$15-50/user/mo *Effort:* Medium (Workspaces built in, EE features gated) ⚠ AGPL core with enterprise folder, read license
Appsmith appsmithorg/appsmith ★ 41.2k · Permissive Apache-2.0 · Platform · Fit 4/5	Platform to build admin panels, internal tools and dashboards *Replaces:* Retool, Power Apps, Airtable, ToolJet	Dev teams, ops teams	Managed hosting Agency service Setup + support retainer	• Internal tools for ops teams • Admin panels for startups • Dashboards for clinics *Angle:* Custom admin panels agency	$15-40/user/mo *Effort:* Medium (Mature, EE features gated) ⚠ Apache core with commercial ee folder; Appsmith trademark
Directus directus/directus ★ 38.7k · Check NOASSERTION · Platform · Fit 4/5	Wraps any SQL database with REST and GraphQL APIs, admin app, headless CMS and flows *Replaces:* Contentful, Strapi Cloud, Airtable, Retool	Agencies, content teams, product teams	Managed hosting Agency service Premium plugins/add-ons	• Directus CMS for museum collections • Headless data backend for boutique hotels • Client portals for web agencies *Angle:* Headless CMS and data apps hosting	$29-199/mo per project *Effort:* Medium (Extensible app, BSL license limits) ⚠ BSL license restricts large commercial hosting; read terms
Budibase Budibase/budibase ★ 28.4k · Check NOASSERTION · Platform · Fit 4/5	Low-code platform for internal tools, automations and AI agents *Replaces:* Retool, Airtable, Power Apps, Appsmith	Ops teams, IT teams	Managed hosting Setup + support retainer Agency service	• Internal portals for property managers • Approval apps for HR • Client portals for agencies *Angle:* Internal apps for SMBs with white-label	$15-50/user/mo *Effort:* Medium (Workspaces built in, some features gated) ⚠ GPL v3 core with enterprise parts (NOASSERTION), read license
Webstudio webstudio-is/webstudio ★ 9.2k · AGPL AGPL-3.0 · Platform · Fit 4/5	Open-source visual website builder with full CSS control and headless CMS support *Replaces:* Webflow, Framer, Wix, Squarespace	Designers, agencies, marketing teams	Managed hosting White-label reseller Agency service	• Client sites for freelance designers • Landing pages for SaaS startups • Agency site factory for studios *Angle:* Webflow alternative for agencies	$15-49/mo per site *Effort:* Medium (Self-hostable builder, needs multi-tenant hosting) ⚠ AGPL-3.0: publish modified server code; Webstudio is a trademark

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
GrapesJS GrapesJS/grapesjs ★ 26.4k · Check NOASSERTION · Framework · Fit 3/5	Embeddable web builder framework for drag-and-drop template editors *Replaces:* Mailchimp builder, Wix, Unlayer, Webflow	SaaS builders adding page editors	Premium plugins/add-ons Consulting/implementation Vertical SaaS	• Email template editor for CRMs • Landing page builder for realtors • Newsletter designer for agencies *Angle:* Embedded web builder for SaaS platforms	$99-499/mo embedded licensing *Effort:* Medium (Embeddable and themeable, you build the product) ⚠ BSD-3-Clause per repo; metadata shows NOASSERTION, confirm
Illa Builder illacloud/illa-builder ★ 12.3k · Permissive Apache-2.0 · Platform · Fit 3/5	Low-code platform for building internal tools and dashboards *Replaces:* Retool, Appsmith, Budibase, Airtable	Small ops teams and developers	Managed hosting Consulting/implementation Vertical SaaS	• Back-office tools for logistics SMBs • Admin consoles for clinics • Order management for distributors *Angle:* AI-powered internal apps service	$20-80/mo per builder *Effort:* Medium (Self-hostable builder, theming limited) ⚠ ILLA Cloud trademark; development pace slowed
Blocks blocks/blocks ★ 5.1k · Permissive MIT · App · Fit 3/5	JSX-based visual page builder for creating websites without writing code. *Replaces:* Webflow, Framer, Wix	Designers and marketers building landing pages	Vertical SaaS Premium plugins/add-ons	• Landing page builder for dental marketers • Event pages for conference organizers • Product pages for small Shopify sellers	Free self-host; $19-49/mo hosted builder *Effort:* Medium (Builder, needs hosting and templates) ⚠ MIT; Webflow and Framer are trademarks; check block licenses
Form-create-designer xaboy/form-create-designer ★ 2.4k · Permissive MIT · App · Fit 3/5	Visual Vue form designer that builds forms by drag and drop for desktop and mobile. *Replaces:* Jotform, Typeform, Microsoft Forms	Vue developers and low-code teams building forms	Vertical SaaS Premium plugins/add-ons	• Intake forms for government service halls • Approval forms for OA systems • Order forms for regional e-commerce shops	Free designer; $29-99/mo hosted form builder *Effort:* Medium (Designer UI, needs tenancy and hosting) ⚠ MIT; check companion form-create license before commercial use
Pageplug cloudtogo/pageplug ★ 2.2k · Permissive Apache-2.0 · Platform · Fit 3/5	Chinese localized Appsmith fork with performance work and Formily and ECharts components. *Replaces:* Retool, Appsmith Cloud, Mendix	Chinese enterprises building internal tools	Consulting/implementation Setup + support retainer	• Internal tools for Chinese manufacturers • Admin panels for regional logistics firms • Reporting apps for school districts	Free self-host; $3-8k per internal tool rollout *Effort:* Medium (Appsmith fork, needs support and branding) ⚠ Apache-2.0; Appsmith fork, trademark and upstream sync issues
Saltcorn saltcorn/saltcorn ★ 2.1k · Permissive MIT · Platform · Fit 3/5	No-code application builder *Replaces:* Airtable, Retool, Bubble, Glide	Citizen developers, agencies	Managed hosting Agency service Setup + support retainer	• Client portals for agencies • Internal apps for clinics • Database apps for nonprofits *Angle:* No-code database apps for nonprofits	$10-39/mo *Effort:* Medium (Multi-tenant mode supported) ⚠ MIT; small community
Marsview JackySoft/marsview ★ 1.6k · Permissive Apache-2.0 · Platform · Fit 3/5	Chinese low-code visual platform for back-office apps with pages, components and logic. *Replaces:* Retool, Mendix, Appsmith	Chinese enterprises building back-office systems	Vertical SaaS Consulting/implementation	• Back-office builder for Chinese SMEs • Service-desk apps for telecom support teams • Admin systems for municipal services	Free self-host; $2-6k per internal system rollout *Effort:* Medium (Platform with microservice integration, needs packaging) ⚠ Apache-2.0; check bundled component licenses; China data rules apply
Lowcoder lowcoder-org/lowcoder ★ 1.6k · AGPL AGPL-3.0 · Platform · Fit 3/5	Open-source low-code platform for internal tools *Replaces:* Retool, ToolJet, Appsmith	Dev teams	Managed hosting Agency service Setup + support retainer	• Internal tools for agencies • Admin panels for startups • Dashboards for ops *Angle:* Branded app builder for consultancies	$10-30/user/mo *Effort:* Medium (Workspaces, smaller community) ⚠ AGPL, publish modifications; Lowcoder trademark

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Juggle somta/Juggle ★ 1.2k · GPL GPL-3.0 · Platform · Fit 3/5	Chinese no-code and low-code API orchestration and system integration platform. *Replaces:* MuleSoft, Dify hosted, Apache APISIX	Chinese enterprises integrating legacy systems	Consulting/implementation Setup + support retainer	• Legacy integration for Chinese bank branches • Data sync for regional manufacturers • API hub for municipal service providers	Free core; $5-15k per integration project *Effort:* Medium (Many protocols, needs cleanup and support) ⚠ GPL-3.0; distributed builds ship source; scripting sandbox risks
Refine refinedev/refine ★ 36.0k · Permissive MIT · Framework · Fit 2/5	React framework for building internal tools, admin panels and B2B apps *Replaces:* Retool, React-admin, Power Apps	React developers	Agency service Consulting/implementation Premium plugins/add-ons	• Admin panels for startups • Back office for e-commerce • Internal tools for clinics *Angle:* CRUD app development agency	$3k-20k per project *Effort:* Medium (Framework, code required) ⚠ MIT; Refine trademark
Form-create xaboy/form-create ★ 7.1k · Permissive MIT · Library · Fit 2/5	JSON-driven Vue form component with mobile support and visual form design. *Replaces:* Formily, Jotform embed, Typeform	Chinese developers building government and ERP forms	Consulting/implementation Premium plugins/add-ons	• Online forms for Chinese government portals • Approval forms for ERP vendors • Mobile forms for e-commerce back offices	Free library; $1-3k per form system integration *Effort:* Medium (Library with designer, needs integration work) ⚠ MIT; check designer companion license before commercial use
Tiny-engine opentiny/tiny-engine ★ 2.8k · Permissive MIT · Framework · Fit 2/5	Low-code engine for building or developing low-code platforms in different domains. *Replaces:* Mendix, OutSystems, Retool	Teams building internal low-code platforms	Consulting/implementation Setup + support retainer	• Low-code builder for Chinese government forms • Internal app builder for hospital IT • Visual builder for logistics operations teams	Free engine; $15-40k per low-code platform build *Effort:* Medium (Engine, needs platform and components) ⚠ MIT; OpenTiny brand; component licenses vary
Drip-table jd-opensource/drip-table ★ 1.6k · Permissive MIT · Library · Fit 2/5	Lightweight enterprise Vue table builder for low-code table pages. *Replaces:* AG Grid, Ant Design Pro tables, Handsontable	Chinese front-end teams building enterprise tables	Consulting/implementation Premium plugins/add-ons	• Visual table builder for Chinese logistics dashboards • Report tables for public health portals • Configurable admin tables for school systems	Free library; $1-3k per table component integration *Effort:* Low (Table library, easy to embed) ⚠ MIT; JD name used in project, avoid implying endorsement
Sequential-workflow-designer nocode-js/sequential-workflow-designer ★ 1.5k · Permissive MIT · Library · Fit 2/5	No-code JavaScript component for building flow-based and workflow automation editors. *Replaces:* Camunda Modeler, Bizagi, flow diagram tools	Front-end teams building workflow editors	Consulting/implementation Premium plugins/add-ons	• Approval flow editor for HR software • Automation builder for marketing tools • Process designer for small clinics	Free component; $3-8k per workflow editor integration *Effort:* Low (Small component, easy to embed) ⚠ MIT; zero dependencies; check trademark use in design tools
Power-pwn mbrg/power-pwn ★ 1.3k · Permissive MIT · Tool · Fit 2/5	Security toolset for discovering, reconning and assessing AI agents, offense and defense. *Replaces:* Pentest consulting, Lakera Red, Protect AI scanners	Security teams assessing AI agent deployments	Consulting/implementation Training/courses	• AI agent pentests for fintech vendors • Red-team training for AppSec teams • Assessment kit for healthcare AI deployments	Free tool; $5-20k per AI agent security assessment *Effort:* Medium (Security toolkit, needs expert operators) ⚠ MIT; offensive tooling, authorized testing only; misuse risk
Flowlong aizuda/flowlong ★ 834 · Check NOASSERTION · Library · Fit 2/5	Chinese workflow engine with JSON process models and an approval flow designer. *Replaces:* Camunda, Activiti hosted, Feishu approval flows	Chinese Java teams building approval flows	Consulting/implementation Setup + support retainer	• Expense approvals for Chinese SMEs • Leave requests for school administrations • Purchase approvals for construction firms	Free engine; $3-8k per approval system integration *Effort:* Medium (Java engine, needs designer and operations work) ⚠ NOASSERTION license; read first; Feishu and DingTalk are trademarks

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Mfish-nocode mfish-qf/mfish-nocode ★ 749 · **Permissive** Apache-2.0 · Platform · Fit 2/5	Chinese low-code platform on Spring Boot and Vue 3 with microservice architecture. *Replaces:* Mendix, OutSystems, Chinese low-code vendors	Chinese Java teams building business systems	Consulting/implementation Setup + support retainer	• Business systems for Chinese SME logistics • Internal portals for hospital admin teams • Ticketing apps for property managers	Free core; $4-12k per business system rollout *Effort:* Medium (Large Java stack, needs white-label cleanup) ⚠ Apache-2.0; Spring and Vue dependency licenses; check China data rules
Nop-entropy entropy-cloud/nop-entropy ★ 701 · **Permissive** Apache-2.0 · Framework · Fit 2/5	Low-code framework based on reversible computation, with GraphQL and other engines. *Replaces:* OutSystems, Mendix, Retool	Java architects building enterprise low-code systems	Consulting/implementation Training/courses	• Enterprise backends for Chinese insurers • GraphQL services for logistics platforms • Config-driven ERP modules for manufacturers	Free framework; $10-30k per enterprise platform build *Effort:* High (Novel paradigm, steep learning curve) ⚠ Apache-2.0; niche paradigm, few developers, vendor lock-in risk
R3 r3-team/r3 ★ 586 · **Check** NOASSERTION · Platform · Fit 2/5	Free and open low-code platform for building business apps. *Replaces:* Retool, Airtable Interfaces, Budibase	Small teams building internal apps	Managed hosting Vertical SaaS	• Internal apps for small nonprofits • Inventory apps for home-based sellers • Booking tools for independent clinics	Free self-host; $19-49/mo managed workspace *Effort:* Medium (Platform, needs hosting and branding) ⚠ NOASSERTION license; read first; check trademarks in branding

MLOps · 30

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
ClearML clearml/clearml ★ 6.9k · **Permissive** Apache-2.0 · Platform · Fit 4/5	ML experiment tracking, orchestration, data management, and pipelines platform *Replaces:* Weights and Biases, Neptune, SageMaker, Domino	ML teams	Managed hosting Consulting/implementation Setup + support retainer	• Managed ML tracking for startups • GPU orchestration for AI labs • MLOps for computer vision firms *Angle:* Hosted ML ops for research labs	$100-600/mo per team *Effort:* Medium (Server with UI and tenancy, enterprise parts paid) ⚠ ClearML trademark; enterprise SSO and RBAC are paid
MLflow mlflow/mlflow ★ 28.7k · **Permissive** Apache-2.0 · Platform · Fit 3/5	ML lifecycle platform for experiment tracking, models, and LLM evaluation *Replaces:* Weights and Biases, Databricks, Neptune, SageMaker	ML teams	Managed hosting Consulting/implementation Setup + support retainer	• Hosted experiment tracking for startups • MLOps setup for retail ML teams • LLM eval dashboards for AI agencies *Angle:* Managed experiment tracking for data teams	$100-500/mo managed per team *Effort:* Medium (Python server with UI, light multi-user) ⚠ MLflow is a Databricks/Linux Foundation trademark; auth is basic
Metaflow Netflix/metaflow ★ 10.3k · **Permissive** Apache-2.0 · Framework · Fit 3/5	Python framework for building and deploying data science and ML workflows *Replaces:* Airflow, SageMaker Pipelines, Dataiku, Prefect	Data scientists and ML platform teams	Consulting/implementation Managed hosting Training/courses	• Metaflow setup on AWS for biotech • ML pipelines for fintechs • Managed Metaflow for startups *Angle:* Managed data science workflows	$3-10k per setup *Effort:* High (Framework with AWS or Kubernetes backends) ⚠ Netflix trademark; Outerbounds is main commercial vendor
Evidently evidentlyai/evidently ★ 8.0k · **Permissive** Apache-2.0 · Library · Fit 3/5	ML and LLM observability framework with drift reports, tests, and dashboards *Replaces:* Arize, Fiddler, WhyLabs, Monte Carlo	ML engineers	Managed hosting Consulting/implementation Setup + support retainer	• Drift monitoring for credit scoring • ML health reports for retailers • LLM test suites for chatbots *Angle:* Model monitoring SaaS	$50-200/mo per project *Effort:* Medium (Library with UI service, light tenancy) ⚠ Evidently Cloud is the paid product; Apache-2.0
Flyte flyteorg/flyte ★ 7.8k · **Permissive** Apache-2.0 · Platform · Fit 3/5	Orchestration platform for ML pipelines, agents and real-time inference on Kubernetes. *Replaces:* Databricks Workflows, Prefect Cloud, managed Airflow	ML platform teams running pipelines on Kubernetes	Managed hosting Consulting/implementation	• Pipelines for biotech genomics labs • Training orchestration for AI startups • Scheduled model jobs for insurance risk teams	Free self-host; $1-4k/mo managed control plane *Effort:* Medium (Kubernetes platform, needs ops and support) ⚠ Apache-2.0; Kubernetes operations expertise needed

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
ZenML zenml-io/zenml ★ 5.6k · **Permissive** Apache-2.0 · Framework · Fit 3/5	MLOps and AI pipeline framework with stacks and orchestrator integrations *Replaces:* SageMaker Pipelines, Vertex AI, Domino	ML engineers	Managed hosting Consulting/implementation Training/courses	• ML pipeline setup for retail • Agent pipeline templates for AI startups • Stack migration for data teams *Angle:* MLOps pipeline consulting	$3-10k per platform setup *Effort:* High (Framework and server, tenancy in paid tier) ⚠ ZenML Pro adds RBAC and workspaces; trademark
Cube-studio tencentmusic/cube-studio ★ 5.1k · **Check** NOASSERTION · Platform · Fit 3/5	Chinese cloud-native ML platform covering notebooks, pipelines, distributed training and LLM fine-tuning. *Replaces:* Databricks ML, SageMaker, Alibaba PAI	Chinese enterprises running ML platforms	Consulting/implementation Managed hosting	• ML platform for Chinese bank risk teams • LLM fine-tuning for Chinese retail chains • Private model hub for Chinese hospitals	Free self-host; $15-50k platform setup project *Effort:* Medium (Large platform, needs support and simplification) ⚠ NOASSERTION listed; check terms; Chinese AI regulations apply to models
Polyaxon polyaxon/polyaxon ★ 3.7k · **Permissive** Apache-2.0 · Platform · Fit 3/5	AI infrastructure and orchestration control plane for running experiments on Kubernetes. *Replaces:* Run:ai, Determined AI hosted, Weights and Biases Launch	ML teams sharing GPU clusters	Managed hosting Consulting/implementation	• GPU scheduling for university AI labs • Experiment platform for medical imaging groups • Shared cluster control for regional AI startups	Free self-host; $2-6k/mo managed control plane *Effort:* Medium (Platform needs enterprise auth and billing) ⚠ Apache-2.0; Kubernetes operations expertise; Polyaxon is a company brand
Determined determined-ai/determined ★ 3.2k · **Permissive** Apache-2.0 · Platform · Fit 3/5	ML platform for distributed training, hyperparameter tuning, experiment tracking and resource management. *Replaces:* Run:ai, SageMaker training, Weights and Biases hosted	ML teams training models on shared GPUs	Managed hosting Consulting/implementation	• GPU sharing for university AI labs • Hyperparameter tuning for ad-tech teams • Training pools for medical imaging startups	Free self-host; $1-3k/mo managed cluster support *Effort:* Medium (Platform with resource management, needs auth) ⚠ Apache-2.0; check current maintenance and ownership before adoption
Serve jina-ai/serve ★ 21.8k · **Permissive** Apache-2.0 · Framework · Fit 2/5	Framework for building and deploying multimodal AI services on cloud-native stacks. *Replaces:* BentoML cloud, Modal, Seldon Core	Teams deploying multimodal AI microservices	Consulting/implementation Managed hosting	• Search services for photo archive vendors • Multimodal APIs for media libraries • Embedding services for e-commerce catalogs	Free framework; $3-10k per service deployment *Effort:* Medium (Framework, needs ops and platform layer) ⚠ Apache-2.0; Jina AI is a company brand, check trademarks
Agent-lightning microsoft/agent-lightning ★ 18.9k · **Permissive** MIT · Framework · Fit 2/5	Trainer that uses reinforcement learning to improve AI agents. *Replaces:* OpenAI fine-tuning, Predibase, RL training services	Teams improving agent performance with training	Consulting/implementation Setup + support retainer	• Agent tuning for SaaS support bots • RL training for coding assistant vendors • Agent optimization for logistics dispatch teams	Free framework; $10-30k per agent training project *Effort:* Medium (Research framework, GPU and data work needed) ⚠ MIT; Microsoft is a trademark; check base model licenses
DVC treeverse/dvc ★ 16.0k · **Permissive** Apache-2.0 · Tool · Fit 2/5	Git-style data and model versioning for machine learning projects *Replaces:* Weights and Biases, Pachyderm, LakeFS, Neptune	Data scientists	Training/courses Consulting/implementation Setup + support retainer	• ML data versioning setup for biotech • DVC training for data teams • Storage cost tooling for AI startups *Angle:* Data versioning services for ML teams	$150-250/hr consulting *Effort:* High (CLI tool, no hosted UI) ⚠ DVC owned by lakeFS now; Apache-2.0; command-line only
Kubeflow kubeflow/kubeflow ★ 16.0k · **Permissive** Apache-2.0 · Platform · Fit 2/5	Kubernetes-native platform for machine learning workflows and serving *Replaces:* AWS SageMaker, Vertex AI, Databricks, Azure ML	ML platform teams on Kubernetes	Consulting/implementation Managed hosting Setup + support retainer	• Kubeflow rollout for pharma ML • ML platform for fintechs • Multi-tenant notebooks for universities *Angle:* ML platform deployments for enterprises	$150-250/hr consulting *Effort:* High (Huge Kubernetes stack, upgrade pain) ⚠ Complex to operate; Kubeflow is a CNCF trademark

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Wandb wandb/wandb ★ 11.3k · Permissive MIT · Library · Fit 2/5	Python SDK for the Weights and Biases AI developer platform, for tracking training runs. *Replaces:* MLflow hosted, Neptune, Comet	ML teams tracking experiments	API/usage-based Consulting/implementation	• Experiment tracking for medical imaging labs • Model tracking for ad-tech teams • Training logs for university AI courses	Vendor-set SaaS plans; SDK itself free *Effort:* Medium (SDK for a commercial hosted platform) ⚠ MIT SDK; Weights & Biases is a trademark; hosted server is proprietary
Kedro kedro-org/kedro ★ 11.0k · Check NOASSERTION · Framework · Fit 2/5	Python framework for structured, reproducible data science pipelines *Replaces:* Dataiku, Domino, SageMaker Pipelines	Data science teams	Consulting/implementation Training/courses Agency service	• Pipeline refactoring for analytics teams • Kedro training for data scientists • ML project templates for startups *Angle:* Data pipeline project templates for consultancies	$150-250/hr consulting *Effort:* High (Framework, no hosted service) ⚠ Apache-2.0 per repo; metadata NOASSERTION; Linux Foundation trademark
Pycaret pycaret/pycaret ★ 9.9k · Check NOASSERTION · Library · Fit 2/5	Open-source low-code AutoML library for Python to compare and deploy models. *Replaces:* DataRobot, H2O Driverless AI, Azure AutoML	Analysts building ML models without deep coding	Consulting/implementation Setup + support retainer	• Churn models for subscription businesses • Credit scoring for small lenders • Demand prediction for local grocers	Free library; $3-8k per AutoML model build *Effort:* Medium (Library, needs UI and deployment) ⚠ NOASSERTION listed; verify license before commercial use
Feast feast-dev/feast ★ 7.4k · Permissive Apache-2.0 · Platform · Fit 2/5	Open-source feature store for serving ML features online and offline *Replaces:* Tecton, SageMaker Feature Store, Databricks Feature Store	ML platform engineers	Consulting/implementation Managed hosting Setup + support retainer	• Feature stores for fraud teams • Real-time features for recommendation systems • MLOps setup for retail data teams *Angle:* Feature store hosting for fintech	$150-250/hr consulting *Effort:* High (Infra component, needs ML platform around it) ⚠ Apache-2.0; heavy infra, niche need
Lance lance-format/lance ★ 7.3k · Permissive Apache-2.0 · Library · Fit 2/5	Columnar lakehouse format for multimodal AI with fast random access and vector indexes. *Replaces:* Parquet with custom indexes, Delta Lake, managed vector stores	Data teams storing multimodal AI datasets	Consulting/implementation Managed hosting	• Image dataset store for ecommerce visual search • Video frame index for media archives • Embedding store for legal document search	Free format; $4-12k per data platform build *Effort:* Medium (Format and library, needs platform layer) ⚠ Apache-2.0; format is new, check interop and version stability
Aim aimhubio/aim ★ 6.3k · Permissive Apache-2.0 · Tool · Fit 2/5	Experiment tracker and UI for comparing ML training runs *Replaces:* Weights and Biases, Neptune, Comet	ML researchers	Managed hosting Consulting/implementation Setup + support retainer	• Self-hosted tracking for research labs • Experiment dashboards for startups • Tracker hosting for universities *Angle:* Experiment tracking hosting	$30-100/mo per team *Effort:* Medium (Python app with UI, activity slowed) ⚠ Activity declined versus W&B; Apache-2.0
KServe kserve/kserve ★ 6.2k · Permissive Apache-2.0 · Platform · Fit 2/5	Kubernetes platform for serving ML and generative AI models at scale *Replaces:* SageMaker Endpoints, Vertex AI, Seldon, BentoCloud	Platform teams on Kubernetes	Consulting/implementation Managed hosting Setup + support retainer	• Model serving for banks • GPU inference platform for telcos • Multi-model hosting for AI SaaS *Angle:* Kubernetes model serving setup service	$150-250/hr consulting *Effort:* High (Kubernetes CRDs, deep ops expertise) ⚠ CNCF project; needs Knative or Gateway API stack
Giskard-oss Giskard-AI/giskard-oss ★ 5.9k · Permissive Apache-2.0 · Library · Fit 2/5	Open-source evaluation and testing library for LLM agents. *Replaces:* Arize, Patronus AI, Galileo	AI teams testing LLM agents before release	Consulting/implementation Setup + support retainer	• Agent testing for insurance chatbot vendors • Eval suites for legal AI tools • Quality gates for healthcare triage bots	Free library; $5-15k per AI testing engagement *Effort:* Medium (Library, needs test workflows and dashboards) ⚠ Apache-2.0; Giskard is a company brand; LLM API costs for evals

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Lightning-hydra-template ashleve/lightning-hydra-template ★ 5.4k · Check NONE · Starter · Fit 2/5	Template for PyTorch Lightning and Hydra ML experiments. *Replaces:* Paid ML project templates, cookiecutter services	ML engineers starting experiment projects	Consulting/implementation Training/courses	• Starter project for university ML labs • Experiment template for medical imaging startups • Setup kit for ML bootcamp teams	Free template; $2-5k per ML project setup *Effort:* Low (Template, easy to fork and rebrand) ⚠ No license stated; get explicit permission before reuse or redistribution
Seldon Core SeldonIO/seldon-core ★ 4.8k · Check NOASSERTION · Platform · Fit 2/5	Kubernetes framework for deploying and managing production ML models *Replaces:* SageMaker, Vertex AI, KServe, BentoCloud	ML platform teams	Consulting/implementation Managed hosting Setup + support retainer	• Model deployment for insurers • Inference platform for telcos • A/B model rollout for retailers *Angle:* Model deployment for regulated industries	$150-250/hr consulting *Effort:* High (Kubernetes expertise needed) ⚠ License changed to BSL for newer versions; read license before commercial use
Pipelines kubeflow/pipelines ★ 4.3k · Permissive Apache-2.0 · Platform · Fit 2/5	Machine learning pipelines for Kubeflow, for orchestrating ML workflows on Kubernetes. *Replaces:* Vertex AI Pipelines, SageMaker Pipelines, Domino Data Lab	Platform teams running ML pipelines on Kubernetes	Consulting/implementation Managed hosting	• Pipelines for regional bank model risk • Training flows for university HPC clusters • Retraining jobs for ecommerce recommendation teams	Free self-host; $10-30k per Kubernetes ML platform setup *Effort:* High (Kubernetes-heavy, needs operations expertise) ⚠ Apache-2.0; Kubeflow is a CNCF-hosted project, trademark use rules
FedML FedML-AI/FedML ★ 4.1k · Permissive Apache-2.0 · Library · Fit 2/5	Library for distributed training, model serving and federated learning across clouds. *Replaces:* Anyscale, Flower hosted, NVIDIA FLARE services	Teams training models on distributed or private data	Consulting/implementation Managed hosting	• Federated training across regional hospitals • Edge model training for retail chains • Cross-cloud GPU jobs for AI startups	Free library; $5-20k per federated learning deployment *Effort:* Medium (Broad library, needs a focused product) ⚠ Apache-2.0; FedML brand; GPU cloud costs and data privacy rules
Deepchecks deepchecks/deepchecks ★ 4.1k · Check NOASSERTION · Library · Fit 2/5	Testing library for validating ML models and data from research to production. *Replaces:* Arize, Fiddler, WhyLabs	ML teams validating models and data	Vertical SaaS Consulting/implementation	• Data validation for fraud model teams • Model checks for insurance pricing teams • Drift tests for retail demand models	Free library; $500-2000/mo hosted validation dashboard *Effort:* Medium (Library with dashboards, needs hosted layer) ⚠ NOASSERTION listed; verify license; check Deepchecks trademark
Sie superlinked/sie ★ 3.5k · Permissive Apache-2.0 · Tool · Fit 2/5	Open-source inference server and production cluster for models that agents need. *Replaces:* Hugging Face Inference Endpoints, Modal, Fireworks	Teams serving embedding and ranking models	Managed hosting API/usage-based	• Embedding server for legal search tools • Ranking models for ecommerce search • Inference cluster for agent memory platforms	Free self-host; $500-2000/mo managed cluster *Effort:* Medium (Inference server, needs managed cluster ops) ⚠ Apache-2.0; model licenses vary; GPU costs fall on operator
Vllm-ascend vllm-project/vllm-ascend ★ 3.1k · Permissive Apache-2.0 · Library · Fit 2/5	Community-maintained hardware plugin that runs vLLM on Huawei Ascend chips. *Replaces:* NVIDIA-based vLLM hosting, Huawei Cloud inference	Chinese AI teams running LLMs on Ascend hardware	Consulting/implementation Setup + support retainer	• LLM serving for Chinese state-owned enterprises • Inference setup for Ascend cloud resellers • vLLM deployment for Chinese universities	Free plugin; $5-15k per Ascend deployment project *Effort:* Medium (Plugin, depends on Ascend hardware stack) ⚠ Apache-2.0; vLLM trademark; Ascend hardware export and support limits
Plexe plexe-ai/plexe ★ 2.6k · Permissive Apache-2.0 · Tool · Fit 2/5	Builds a machine learning model from a plain-language prompt. *Replaces:* DataRobot, Vertex AutoML, Akkio	Analysts wanting models without ML coding	Consulting/implementation Setup + support retainer	• Churn model builds for small subscription boxes • Lead scoring for regional real estate teams • Quality prediction for small food producers	Free tool; $1-3k per prompt-built model *Effort:* Medium (Agent-built models, needs review and hosting) ⚠ Apache-2.0; generated models need validation before business use

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Hamilton apache/hamilton ★ 2.6k · Permissive Apache-2.0 · Library · Fit 2/5	Python library for testable, modular dataflows with lineage and metadata tracking. *Replaces:* Dagster Cloud, Prefect Cloud, lineage tools	Data scientists building maintainable pipelines	Consulting/implementation Training/courses	• Feature pipelines for credit union analytics • Lineage-tracked reporting for hospital finance teams • Testable ETL for logistics analysts	Free library; $3-8k per pipeline refactor project *Effort:* Medium (Library, needs orchestration and UI) ⚠ Apache-2.0; Apache and Hamilton names are trademarks; keep notices

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Weblate WeblateOrg/weblate ★ 6.2k · GPL GPL-3.0 · Platform · Fit 5/5	Web localization platform with translation memory, QA checks, and Git integration *Replaces:* Crowdin, Lokalise, Transifex, Phrase	Software teams and open-source projects	Managed hosting Vertical SaaS Consulting/implementation	• Hosted localization for indie game studios • Translation workflow for mobile app agencies • Open-source project localization hub *Angle:* Hosted localization platform for software	$19-199/mo per project *Effort:* Medium (Mature Django app, projects and teams built in) ⚠ GPL-3.0: hosting is fine; Weblate trademark and hosted offering compete
LibreTranslate LibreTranslate/LibreTranslate ★ 17.3k · AGPL AGPL-3.0 · App · Fit 4/5	Self-hosted offline machine translation API and web UI based on Argos Translate *Replaces:* Google Translate API, DeepL API, Microsoft Translator, Amazon Translate	Privacy-focused developers and businesses	Managed hosting API/usage-based Setup + support retainer	• Private translation API for law firms • Offline translation for NGOs • Translation widget for CMS sites *Angle:* Translation API with paid keys	$10-80/mo by character volume *Effort:* Low (Docker app with API keys built in) ⚠ AGPL-3.0: publish server changes; quality below DeepL for some languages
Tolgee tolgee/tolgee-platform ★ 4.2k · Check NOASSERTION · Platform · Fit 4/5	Developer-friendly localization platform with in-context translation and SDKs *Replaces:* Crowdin, Lokalise, Phrase, Transifex	Product and engineering teams	Managed hosting Vertical SaaS Consulting/implementation	• Localization for SaaS startups • In-app translation for mobile app agencies • Localization portal for game studios *Angle:* Localization SaaS for web apps	$20-150/mo per project *Effort:* Medium (Java and React app, orgs and projects built in) ⚠ Open-core: ee folder is paid; Tolgee trademark; read license
Argos Translate argosopentech/argos-translate ★ 6.6k · Permissive MIT · Library · Fit 3/5	Offline Python translation library using OpenNMT with downloadable language packs *Replaces:* Google Translate, DeepL, Microsoft Translator	Developers and privacy-focused apps	API/usage-based Consulting/implementation Premium plugins/add-ons	• Offline translator for field workers • Embedded translation for e-readers • Privacy translation for journalists *Angle:* Offline translation for field teams	$0.50-2 per 1k words *Effort:* Medium (Library, build UI and serving) ⚠ Quality modest on rarer language pairs; models licensed separately
Manga-translator-ui hgmzhn/manga-translator-ui ★ 3.2k · GPL GPL-3.0 · App · Fit 3/5	Desktop manga translator that detects text, erases it, translates and typesets the result. *Replaces:* Manga translation services, Google Lens translate, DeepL manga tools	Manga fans and small scanlation groups	Premium plugins/add-ons Mobile app on top	• Translation of Korean webtoons for fan groups • Localization for indie comic publishers • Translated illustrated manuals for furniture makers	Free app; $10-30 one-time pro or API credits *Effort:* Medium (Desktop app, needs packaging and engine licenses) ⚠ GPL-3.0; scanlation copyright risk; distributed builds ship source
Comic-translate ogkalu2/comic-translate ★ 3.0k · Permissive Apache-2.0 · App · Fit 3/5	AI translator for comics, manga and PDF or EPUB pages, as an app or browser extension. *Replaces:* Manga translation services, webtoon translation tools	Comic publishers and readers of foreign comics	Premium plugins/add-ons Vertical SaaS	• Localization for French comic publishers • Webtoon translation for Korean romance comics • Translated illustrated guides for appliance makers	Free app; $8-20/mo cloud translation credits *Effort:* Medium (App and extension, needs hosting and branding) ⚠ Apache-2.0; comic copyrights apply; cloud engine API costs
Traduora ever-co/ever-traduora ★ 2.1k · AGPL AGPL-3.0 · App · Fit 3/5	Translation management platform for teams with projects, terms, and exports *Replaces:* Crowdin, Lokalise, Transifex, Phrase	Small software teams	Managed hosting Setup + support retainer White-label reseller	• Translation hub for app agencies • Localization for indie games • Website translation workflow for NGOs *Angle:* Translation management for agencies	$10-40/mo per team *Effort:* Medium (NestJS and Angular app, multi-project) ⚠ AGPL-3.0; Ever and Traduora are trademarks; project less active

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Pontoon mozilla/pontoon ★ 1.7k · **Permissive** BSD-3-Clause · Platform · Fit 3/5	Mozilla's community localization platform with translation workflows and reviews *Replaces:* Crowdin, Transifex, Weblate	Open-source communities and nonprofits	Managed hosting Consulting/implementation Setup + support retainer	• Community localization for open-source projects • Volunteer translation hub for NGOs • Translation memory for public bodies *Angle:* Community translation portals	$200-800/mo managed instance *Effort:* High (Mozilla-specific workflows, complex setup) ⚠ Mozilla trademark; tailored to Mozilla workflows
Linguist translate-tools/linguist ★ 1.1k · **Permissive** BSD-3-Clause · App · Fit 3/5	Browser extension that translates pages, highlights and subtitles, with a personal vocabulary. *Replaces:* Google Translate extension, DeepL extension, Language Reactor	Language learners reading foreign websites	Premium plugins/add-ons Mobile app on top	• Vocabulary tool for Spanish-speaking nurses learning English • Subtitle learning for film students • Web translation for expat retirees	Free extension; $3-5/mo for premium voices *Effort:* Medium (Extension, needs store listing and engines) ⚠ BSD-3-Clause; subtitle use may breach streaming platform terms
OpenNMT-py OpenNMT/OpenNMT-py ★ 7.0k · **Permissive** MIT · Framework · Fit 2/5	PyTorch toolkit for training neural machine translation and language models *Replaces:* DeepL, Google Translate, Lilt	ML researchers	Consulting/implementation API/usage-based Training/courses	• Custom domain translation for legal firms • Translation models for low-resource languages • Medical translation MT for clinics *Angle:* Custom domain translation models	$5-20k per custom model *Effort:* High (Training framework, no service layer) ⚠ Maintenance slowed; training data licensing issues
CTranslate2 OpenNMT/CTranslate2 ★ 4.7k · **Permissive** MIT · Library · Fit 2/5	Fast C++ and Python inference engine for Transformer models like Whisper and NLLB *Replaces:* NVIDIA Riva, Google Translate API, OpenAI Whisper API	ML engineers	API/usage-based Consulting/implementation Managed hosting	• Fast Whisper transcription API • Self-hosted translation service for SMEs • Speech-to-text for call centers *Angle:* Fast inference for translation services	$0.003-0.01 per audio minute *Effort:* High (Inference library, build service around it) ⚠ MIT; model weights have own licenses
RL4LMs allenai/RL4LMs ★ 2.4k · **Permissive** Apache-2.0 · Library · Fit 2/5	Modular reinforcement learning library for fine-tuning language models on human preferences. *Replaces:* OpenAI RLHF services, Scale AI preference tuning	NLP researchers doing RL fine-tuning	Consulting/implementation Training/courses	• Preference tuning for support bot vendors • RL fine-tuning for summarization tools • Preference models for legal drafting startups	Free library; $6-15k per preference tuning project *Effort:* High (Research library, needs data and compute) ⚠ Apache-2.0; base model licenses apply; GPU compute costs
Index-Translate bilibili/Index-Translate ★ 2.0k · **Permissive** Apache-2.0 · Model · Fit 2/5	Multilingual, multimodal translation model family released by Bilibili. *Replaces:* Google Translate API, DeepL API	Teams wanting an open translation model	API/usage-based Consulting/implementation	• Subtitle translation for Chinese video creators • Product description translation for cross-border sellers • Caption translation for online course platforms	Free model; $1-4k per translation integration *Effort:* High (Model weights, needs serving and evaluation) ⚠ Apache-2.0 code; model weight terms and Bilibili name need checking
TurboTransformers Tencent/TurboTransformers ★ 1.6k · **Check** NOASSERTION · Library · Fit 2/5	Fast runtime for transformer inference such as BERT and GPT-2 on CPU and GPU. *Replaces:* ONNX Runtime, TensorRT, Hugging Face Infinity	Engineers optimizing transformer serving speed	Consulting/implementation Setup + support retainer	• CPU search ranking for small e-commerce sites • BERT serving for news classification • Speedups for text moderation backends	Free runtime; $4-10k per inference speed project *Effort:* High (Runtime, deep performance tuning needed) ⚠ NOASSERTION license; read first; Tencent is a trademark
OpenNMT-tf OpenNMT/OpenNMT-tf ★ 1.5k · **Permissive** MIT · Framework · Fit 2/5	Neural machine translation and sequence learning toolkit built on TensorFlow. *Replaces:* Google Cloud Translation, DeepL API, Systran	Researchers training translation models	Consulting/implementation Training/courses	• Domain MT for regional medical translators • Translation models for small language pairs • Training course for NLP students	Free toolkit; $5-12k per custom MT project *Effort:* High (TensorFlow stack, older and less active) ⚠ MIT; older TensorFlow stack, check maintenance

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Sockeye awslabs/sockeye ★ 1.2k · **Permissive** Apache-2.0 · Framework · Fit 2/5	Sequence-to-sequence framework focused on neural machine translation in PyTorch. *Replaces:* Google Translate API, DeepL API, Systran	Researchers building custom translation models	Consulting/implementation Training/courses	• Custom MT for regional courts • Translation models for Nordic medical device makers • Training course for computational linguistics students	Free toolkit; $6-15k per custom MT model *Effort:* High (Research toolkit, model training expertise needed) ⚠ Apache-2.0; AWS-branded project; training data licensing matters
Opus-MT Helsinki-NLP/Opus-MT ★ 873 · **Permissive** MIT · Model · Fit 2/5	Open neural machine translation models and web services from Helsinki NLP. *Replaces:* DeepL API, Google Translate API, Azure Translator	Developers needing self-hosted translation	API/usage-based Consulting/implementation	• Self-hosted translation for Nordic government forms • Translation for small Finnish publishers • Multilingual support chat for regional clinics	Free models; $1-4k per translation integration *Effort:* Medium (Model set, needs serving and QA) ⚠ MIT; OPUS training data has mixed licenses; verify per language
Bergamot Translator browsermt/bergamot-translator ★ 561 · **Weak copyleft** MPL-2.0 · Library · Fit 2/5	C++ library for fast offline machine translation in browsers and on devices *Replaces:* Google Translate, DeepL, Microsoft Translator	Browser and app developers	Consulting/implementation API/usage-based Mobile app on top	• Offline translator app for travelers • In-browser translation for privacy sites • Embedded translation for kiosks *Angle:* Private in-browser translation SDK	$2-8k per integration *Effort:* High (Library, WebAssembly integration needed) ⚠ MPL-2.0 file-level copyleft; models from Mozilla have own terms

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Payload payloadcms/payload ★ 45.7k · Permissive MIT · Framework · Fit 4/5	Fullstack Next.js framework with headless CMS and admin panel *Replaces:* Contentful, Sanity, Strapi, WordPress	Developers, agencies	Agency service Managed hosting Premium plugins/add-ons	• Client sites for agencies • Headless CMS for e-commerce • Membership sites for coaches *Angle:* CMS-powered client sites	$2k-15k per client site *Effort:* Medium (Code-first, white-label admin supported) ⚠ MIT; Payload trademark
Outline outline/outline ★ 41.2k · Check NOASSERTION · App · Fit 4/5	Team knowledge base with realtime collaboration, markdown and integrations *Replaces:* Notion, Confluence, Slite, GitBook	Growing teams documenting processes	Managed hosting Setup + support retainer Vertical SaaS	• Wiki for remote agencies • Handbook for coworking operators • Docs for SaaS support teams *Angle:* Team wiki SaaS	$6-10/user/mo *Effort:* Medium (Needs Slack or OIDC login, S3, multi-workspace limits) ⚠ NOASSERTION: BSL license limits competing hosted use; Outline trademark
Wiki.js requarks/wiki ★ 29.2k · AGPL AGPL-3.0 · App · Fit 4/5	Wiki engine with markdown editors, many auth providers and git storage sync *Replaces:* Confluence, Notion, GitBook, Slite	Teams and communities needing a clean wiki	Managed hosting Setup + support retainer White-label reseller	• Wiki for homelab communities • Docs site for open source projects • Internal handbook for small agencies *Angle:* Managed knowledge base hosting	$5-19/mo per wiki *Effort:* Low (Node app, theming, many auth modules) ⚠ AGPL: publish server-side changes; Wiki.js trademark
BookStack BookStackApp/BookStack ★ 19.1k · Permissive MIT · App · Fit 4/5	Wiki platform organized as books, chapters and pages with WYSIWYG editor *Replaces:* Confluence, Notion, GitBook, Document360	Small companies and IT teams documenting systems	Managed hosting Setup + support retainer White-label reseller	• Documentation hosting for MSP clients • Handbook wiki for franchise networks • Procedure library for care homes *Angle:* Documentation portal hosting	$15-49/mo per instance *Effort:* Low (Laravel app, themable, one instance per client) ⚠ MIT; BookStack name is trademarked by author
Calibre-Web janeczku/calibre-web ★ 18.5k · GPL GPL-3.0 · App · Fit 4/5	Web app for browsing, reading, and downloading ebooks from a Calibre library *Replaces:* Kindle Unlimited, Libby, Kobo, Scribd	Ebook collectors, small libraries	Managed hosting Setup + support retainer White-label reseller	• Ebook lending for small libraries • Book club library portal • Self-hosted library for schools *Angle:* Ebook library hosting	$5-12/mo per library *Effort:* Medium (Flask app, single Calibre library per install) ⚠ GPL-3.0; ebook DRM and copyright duties
Kavita Kareadita/Kavita ★ 12.1k · GPL GPL-3.0 · App · Fit 4/5	Fast self-hosted reading server for manga, comics, and books *Replaces:* Comixology, Kindle, Marvel Unlimited, Libby	Comic and manga readers	Managed hosting Setup + support retainer Mobile app on top	• Comic library for local comic shops • Manga hosting for scanlation-free publishers • Ebook server for book clubs *Angle:* Comics and manga reader hosting	$5-10/mo per reader *Effort:* Medium (Dotnet app, multi-user, themeable) ⚠ GPL-3.0; content copyright duties; Kavita trademark
Komga gotson/komga ★ 6.8k · Permissive MIT · App · Fit 4/5	Media server for comics, manga, magazines, and ebooks with OPDS and Kobo sync *Replaces:* Comixology, Kindle, Kobo, Libby	Comic readers and small publishers	Managed hosting Setup + support retainer White-label reseller	• Digital library for indie comic publishers • Manga server for schools • Comic collection hosting for shops *Angle:* Comic library subscriptions	$5-12/mo per library *Effort:* Medium (Kotlin app, multi-user, Kobo sync built in) ⚠ MIT; copyright content responsibilities; Komga trademark
WriteFreely writefreely/writefreely ★ 5.3k · AGPL AGPL-3.0 · App · Fit 4/5	Minimal Markdown publishing platform with federation and multi-user writer communities *Replaces:* Medium, Substack, Ghost, Write.as	Writing communities and independent publishers	Managed hosting Content/membership White-label reseller	• Blogging platform for poetry collectives • Writing hub for university departments • Publishing space for local newsletters *Angle:* Minimal blogging service	$4-9/mo per writer *Effort:* Low (Single Go binary, multi-user and federation built in) ⚠ AGPL: publish server-side changes; WriteFreely trademark
Pandoc jgm/pandoc ★ 46.8k · GPL GPL-2.0 · Tool · Fit 3/5	Command-line tool converting documents between many markup and word-processing formats. *Replaces:* Aspose.Words, CloudConvert	Publishers and academics converting manuscripts between formats	Consulting/implementation Managed hosting	• Manuscript conversion for academic journals • Pandoc-based docs pipeline for legal teams • Ebook formatting for self-publishing authors	Conversion service $50-300 per document, batch plans *Effort:* Medium (CLI tool, needs a web wrapper) ⚠ GPL-2.0: fine for hosting, distributed apps must ship source

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Tailwind-nextjs-starter-blog timlrx/tailwind-nextjs-starter-blog ★ 10.6k · **Permissive** MIT · Starter · Fit 3/5	Next.js and Tailwind blog template with MDX, search and dark mode. *Replaces:* Ghost hosting, Medium, Squarespace blogs	Developers and writers launching technical blogs	Premium plugins/add-ons Agency service	• Blog starter for indie SaaS founders • Docs-style blog for dev tool startups • Portfolio blogs for freelance engineers	$49-99 one-time template, premium theme add-ons *Effort:* Low (config-driven template, themeable) ⚠ MIT; keep copyright notice; relies on Next.js and Vercel tooling
Gradle-play-publisher Triple-T/gradle-play-publisher ★ 4.3k · **Permissive** MIT · Tool · Fit 3/5	Gradle plugin automating Android app builds, uploads and Play Store publishing. *Replaces:* Fastlane, Bitrise, AppFollow release tools	Android teams automating Google Play release pipelines	Consulting/implementation Setup + support retainer	• Play release automation for game studios • Multi-app release pipelines for agencies • Store listing sync for localization teams	Setup $1-3k per app, retainer $200/mo *Effort:* Medium (plugin, not a product; wrap in CI service) ⚠ MIT; depends on Google Play API terms and quota limits
Wink themsaid/wink ★ 2.9k · **Permissive** MIT · App · Fit 3/5	Laravel-based publishing platform for blogs and online magazines. *Replaces:* Medium, Substack, WordPress.com	Independent writers and small online magazines	Managed hosting Vertical SaaS	• Publishing platform for local news sites • Newsletter-blog hybrid for indie journalists • Academic blog network for universities	$15-40/mo per publication, free self-host *Effort:* Medium (Laravel app, needs theming and multi-tenant work) ⚠ MIT; verify current maintenance and Laravel version support
Casper TryGhost/Casper ★ 2.6k · **Permissive** MIT · Starter · Fit 3/5	Classic default theme for the Ghost publishing platform. *Replaces:* Ghost theme marketplaces, Squarespace templates	Bloggers and publishers using Ghost CMS	Premium plugins/add-ons Agency service	• Ghost theme for local newsletters • Membership site theme for coaches • Ghost design service for SaaS blogs	$39-79 one-time theme, premium variants *Effort:* Low (Handlebars theme, standard Ghost customization) ⚠ MIT; Ghost name and logo are trademarks; don't imply official endorsement
Epubcheck w3c/epubcheck ★ 2.0k · **Permissive** BSD-3-Clause · Tool · Fit 3/5	Conformance checker validating EPUB ebook files against the W3C standard. *Replaces:* Commercial EPUB validation and ebook QA tools	Ebook publishers needing file validation	Vertical SaaS API/usage-based	• Ebook QA API for self-publishing platforms • EPUB validation for university presses • Pre-submission checks for textbook publishers	$0.10-0.50 per file via API, $99/mo batch *Effort:* Medium (Java CLI, needs wrapping into a service) ⚠ BSD-3-Clause; W3C name and EPUB trademark use needs care
Notebooker man-group/notebooker ★ 939 · **AGPL** AGPL-3.0 · Tool · Fit 3/5	Schedules and productionises Jupyter notebooks as parameterised reports. *Replaces:* Deepnote scheduled runs, Papermill hosted, Databricks jobs	Quant and analytics teams turning notebooks into reports	Managed hosting Consulting/implementation	• Scheduled notebook reports for trading desks • Parameterised analytics reports for clinical trials • Notebook-to-dashboard service for consultancies	$300-1000/mo managed instance, setup $5k *Effort:* Medium (Python web app, needs auth and branding) ⚠ AGPL-3.0: modified server must publish source to network users
Lerna lerna/lerna ★ 36.0k · **Permissive** MIT · Tool · Fit 2/5	Build and publishing tool for managing multiple JavaScript packages in one repository. *Replaces:* Changesets hosted services, Nx Cloud	JavaScript teams maintaining multi-package monorepos	Setup + support retainer Consulting/implementation	• Monorepo release setup for design systems • Publishing pipeline for SDK vendors • Package releases for open-source UI libraries	Setup $2-5k, retainer $500/mo per repo *Effort:* Low (CLI tool, nothing user-facing to rebrand) ⚠ MIT; Lerna is now maintained alongside Nx, check upstream status
Substance substance/substance ★ 2.7k · **Permissive** MIT · Library · Fit 2/5	JavaScript library for building web-based content editors. *Replaces:* Tiptap Pro, Contentful editing UI	Product teams adding rich editing to web apps	Consulting/implementation Premium plugins/add-ons	• Embedded editor for legal document drafting • Research note editor for academic tools • Structured content editing for CMS vendors	Integration $10-25k per product, license $500/yr *Effort:* High (library, you must build editor UI and features) ⚠ MIT; verify maintenance status before depending on it

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Auto intuit/auto ★ 2.5k · Permissive MIT · Tool · Fit 2/5	Automated release notes and versioning driven by pull request labels. *Replaces:* GitHub release automation services, Changesets	Engineering teams automating GitHub release workflows	Setup + support retainer Consulting/implementation	• Release automation for fintech mobile teams • Changelog setup for open-source maintainers • Versioning audits for enterprise plugin vendors	Setup $1-2k, support $200/mo per org *Effort:* Low (CLI and GitHub Action, little UI) ⚠ MIT; relies on GitHub Actions; Intuit-owned, avoid implying affiliation
Plume Plume-org/Plume ★ 2.2k · AGPL AGPL-3.0 · App · Fit 2/5	Federated blogging app using ActivityPub, now developed elsewhere with this repo as a mirror *Replaces:* Medium, WordPress, Ghost	Self-hosting writers in the fediverse	Managed hosting Setup + support retainer Content/membership	• Federated blog hosting for activists • Publishing server for hobby collectives • Writers space for open source groups *Angle:* Federated blog hosting	$3-6/mo per blog *Effort:* Medium (Rust app, mirror repo, low maintenance) ⚠ AGPL: publish server-side changes; maintenance status uncertain
Joss openjournals/joss ★ 1.9k · Permissive MIT · Platform · Fit 2/5	Website and editorial workflow code for the Journal of Open Source Software. *Replaces:* ScholarOne, Editorial Manager	Academic societies running peer-reviewed journals	Managed hosting Consulting/implementation	• Review platform for university press journals • Code-review journal for research software • Editorial workflow for nonprofit societies	Setup $10-25k, hosting $500-1500/mo per journal *Effort:* High (tied to JOSS workflow, heavy customization) ⚠ MIT; JOSS name and brand are theirs; do not imply endorsement
Gradle-maven-publish-plugin vanniktech/gradle-maven-publish-plugin ★ 1.8k · Permissive Apache-2.0 · Tool · Fit 2/5	Gradle plugin publishing Android and Kotlin libraries to Maven Central or Nexus. *Replaces:* Sonatype hosted services, JFrog Artifactory publishing	Android and Kotlin library authors publishing to Maven	Consulting/implementation Setup + support retainer	• Maven publishing setup for Android SDK vendors • Release pipelines for Kotlin multiplatform teams • Artifact publishing for internal enterprise libraries	Setup $1-3k per library, support $300/mo *Effort:* Low (configuration-driven plugin, minimal UI) ⚠ Apache-2.0; Maven Central publishing needs Sonatype account and policies
Gmpublisher WilliamVenner/gmpublisher ★ 1.3k · GPL GPL-3.0 · Tool · Fit 2/5	Desktop tool for uploading and managing Garry's Mod Steam Workshop addons. *Replaces:* Steam Workshop web uploader, manual Steam tools	Garry's Mod addon creators publishing Workshop content	Premium plugins/add-ons Agency service	• Workshop publishing for Garry's Mod server owners • Addon release manager for modding studios • Map upload tool for GMod community servers	$5-10 one-time desktop license, optional premium features *Effort:* Medium (niche desktop app, Steam-dependent workflow) ⚠ GPL-3.0: distributed apps ship source; Garry's Mod and Steam are Valve trademarks
Texture substance/texture ★ 1.0k · Permissive MIT · App · Fit 2/5	Visual editor for writing and publishing research articles in the browser. *Replaces:* Overleaf, Microsoft Word for academic writing	Researchers and labs writing academic papers	Vertical SaaS Premium plugins/add-ons	• Lab manuscript editor for biology groups • Thesis writing tool for graduate students • Collaborative paper editor for policy think tanks	$8-15/mo per user, lab plans $99/mo *Effort:* Medium (JS editor, needs backend and auth) ⚠ MIT; check whether upstream is still maintained before building

Notebooks & Data Science · 31

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
JupyterHub jupyterhub/jupyterhub ★ 8.4k · Permissive BSD-3-Clause · Platform · Fit 4/5	Multi-user server spawning Jupyter notebooks for teams, classes, and companies *Replaces:* Databricks Notebooks, Colab, SageMaker Studio, Deepnote	Universities, bootcamps, data teams	Managed hosting Consulting/implementation Setup + support retainer	• JupyterHub for coding bootcamps • Compute hub for university labs • Notebook platform for genomics teams *Angle:* Hosted notebooks for universities	$5-30/mo per learner *Effort:* Medium (Mature, authenticators and spawners pluggable) ⚠ Jupyter trademark; Kubernetes deployment skills for scale

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Mercury mljar/mercury ★ 4.4k · **Permissive** Apache-2.0 · Tool · Fit 4/5	Turns Jupyter notebooks into shareable web apps with interactive parameter widgets. *Replaces:* Streamlit Community Cloud, Dash Enterprise	Analysts wanting to share notebook results with non-coders	Managed hosting Vertical SaaS	• Shared pricing calculators for insurance brokers • Internal report apps for logistics managers • Client portals for accounting firms	$29-99/mo per app server, free self-host *Effort:* Medium (Python server, needs auth and branding work) ⚠ Apache-2.0; mljar sells its own hosted version, check trademark use
Gradio gradio-app/gradio ★ 44.0k · **Permissive** Apache-2.0 · Framework · Fit 3/5	Python library for building and sharing machine learning demo web apps *Replaces:* Streamlit, Retool, Hugging Face Spaces	ML developers and AI startups	Consulting/implementation Managed hosting Agency service	• Demo UIs for AI startups • Internal model tools for ML teams • Prototype apps for AI agencies *Angle:* ML demo hosting for researchers	$2-8k per app *Effort:* Medium (Python framework, light theming, Hugging Face owned) ⚠ Hugging Face trademark; limited auth and multi-user
marimo marimo-team/marimo ★ 23.5k · **Permissive** Apache-2.0 · App · Fit 3/5	Reactive Python notebook that runs as scripts and deployable apps *Replaces:* Jupyter, Hex, Deepnote, Observable	Python data scientists	Managed hosting Consulting/implementation Training/courses	• Hosted notebooks for data courses • Notebook apps for analytics agencies • Reactive reports for finance teams *Angle:* Reactive notebook app hosting	$15-40/mo per seat *Effort:* Medium (Python app, no multi-tenant, single-user) ⚠ marimo is a trademark; hosting multi-user requires custom infra
JupyterLab jupyterlab/jupyterlab ★ 15.4k · **Permissive** BSD-3-Clause · App · Fit 3/5	Browser-based interactive notebook and code development environment *Replaces:* Deepnote, Hex, Colab, Databricks Notebooks	Data scientists and educators	Managed hosting Training/courses Consulting/implementation	• Hosted notebooks for coding bootcamps • Compute rental for data teams • Research notebook hosting for universities *Angle:* Data science workspace hosting	$10-50/mo per seat *Effort:* Medium (Single-user app, JupyterHub for multi-user) ⚠ Jupyter is a trademark; compute costs dominate
Fg-data-profiling Data-Centric-AI-Community/fg-data-profiling ★ 13.8k · **Permissive** MIT · Tool · Fit 3/5	Python tool generating automated data quality profiling reports for pandas and Spark. *Replaces:* Monte Carlo data quality, Great Expectations Cloud	Data teams auditing dataset quality before modeling	Consulting/implementation Setup + support retainer	• Data quality audits for insurance claims teams • Profiling reports for clinical research data • Dataset QA for ecommerce analytics teams	Audit project $3-10k, monitoring SaaS $200/mo *Effort:* Medium (needs report branding and pipeline integration) ⚠ MIT; project forks and renames exist; confirm current upstream maintainer
Notebook jupyter/notebook ★ 13.5k · **Permissive** BSD-3-Clause · App · Fit 3/5	Classic browser-based notebook interface for running code, text and charts. *Replaces:* Google Colab, Databricks notebooks, Deepnote	Universities and data teams hosting notebook environments	Managed hosting Setup + support retainer	• Hosted notebooks for university data courses • Analyst sandboxes for insurance firms • Research notebook portal for biotech labs	$20-60 per seat/mo, campus license $5k/yr *Effort:* Medium (needs multi-user auth and branding work) ⚠ BSD-3-Clause; Jupyter name is a trademark; classic UI is legacy
Datasette simonw/datasette ★ 11.5k · **Permissive** Apache-2.0 · Tool · Fit 3/5	Tool for exploring and publishing SQLite data as websites and JSON APIs *Replaces:* Airtable, Socrata, Retool, Metabase	Data journalists and open-data publishers	Managed hosting Consulting/implementation Premium plugins/add-ons	• Public data portals for newsrooms • Dataset publishing for NGOs • Read-only data APIs for city councils *Angle:* Publish open data for newsrooms	$20-60/mo per portal *Effort:* Medium (Plugin-based Python app, single dataset focus) ⚠ Apache-2.0; read-mostly by design, limited write workflows
Docker-stacks jupyter/docker-stacks ★ 8.5k · **Permissive** BSD-3-Clause · Starter · Fit 3/5	Ready-to-run Docker images bundling Jupyter servers with data science stacks. *Replaces:* Anaconda Enterprise, Saturn Cloud	Teams needing reproducible Jupyter environments on containers	Managed hosting Setup + support retainer	• Containerized notebooks for university classes • Reproducible research environments for biotech labs • Jupyter images for data bootcamps	Managed env $200-800/mo per team, setup $2k *Effort:* Medium (images need auth, hosting, orchestration layer) ⚠ BSD-3-Clause; Jupyter trademark; bundled package licenses vary

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Papermill nteract/papermill ★ 6.5k · Permissive BSD-3-Clause · Tool · Fit 3/5	Parameterizes, executes and analyzes Jupyter notebooks as batch jobs for reports. *Replaces:* Databricks jobs, Deepnote scheduled runs	Data teams running recurring notebook reports in production	Setup + support retainer Consulting/implementation	• Parameterized monthly reports for logistics analysts • Notebook pipelines for pharma QA labs • Batch model scoring for insurance underwriters	Setup $3-8k, support $500/mo per team *Effort:* Medium (CLI library, needs UI and scheduler) ⚠ BSD-3-Clause; nteract project brand; runs arbitrary code, sandboxing needed
Quarto quarto-dev/quarto-cli ★ 6.2k · Check NOASSERTION · Tool · Fit 3/5	Scientific and technical publishing system for documents, books, and websites from notebooks *Replaces:* Overleaf, Notion, GitBook, Medium	Researchers, educators, data scientists	Training/courses Consulting/implementation Managed hosting	• Reproducible reports for consultancies • Textbook publishing for professors • Branded client reports for analytics shops *Angle:* Branded report publishing service	$1-4k per report template pack *Effort:* High (CLI tool, no hosted editor) ⚠ Metadata NOASSERTION; actual MIT; Posit trademark
Jupyterlite jupyterlite/jupyterlite ★ 4.9k · Permissive BSD-3-Clause · Platform · Fit 3/5	Runs Jupyter notebooks entirely in the browser using WebAssembly, with no server.	Educators and documentation teams needing serverless notebooks	Setup + support retainer Training/courses	• Browser notebooks for online Python courses • Interactive docs for API vendors • Serverless lab exercises for bootcamps	Setup $3-8k, hosting near-zero, support $300/mo *Effort:* Medium (needs kernel config, branding and content work) ⚠ BSD-3-Clause; Jupyter trademark; browser limits on packages and compute
Jupyter-ai jupyterlab/jupyter-ai ★ 4.4k · Permissive BSD-3-Clause · Tool · Fit 3/5	JupyterLab extension connecting language models and AI chat to notebooks. *Replaces:* GitHub Copilot for notebooks, Hex Magic	Data teams using JupyterLab who want AI assistance	Setup + support retainer Consulting/implementation	• AI assistant setup for hospital analytics teams • Notebook copilot rollouts for banks • Private LLM notebook assistant for universities	Rollout $5-15k, support $500-1000/mo *Effort:* Medium (extension, needs model provider and auth setup) ⚠ BSD-3-Clause; model API keys and data leaving network need governance
Jupyterlab-desktop jupyterlab/jupyterlab-desktop ★ 4.3k · Permissive BSD-3-Clause · App · Fit 3/5	Desktop application packaging JupyterLab for Windows, macOS and Linux via Electron. *Replaces:* Anaconda Navigator, Anaconda Notebooks	Students and analysts wanting a desktop notebook app	Premium plugins/add-ons Setup + support retainer	• Branded notebook app for bootcamp students • Desktop analytics workbench for accounting teams • Offline notebook tool for field researchers	Licensed desktop app $25-49 per seat, enterprise custom *Effort:* Medium (Electron app, code signing and updates needed) ⚠ BSD-3-Clause; JupyterLab trademark; Apple and Windows code signing costs
Jupyter-book jupyter-book/jupyter-book ★ 4.3k · Permissive BSD-3-Clause · Tool · Fit 3/5	Builds publication-quality websites and PDF books from notebooks and Markdown. *Replaces:* GitBook, Read the Docs hosting	Academic authors and courses publishing computational textbooks	Training/courses Setup + support retainer	• Online textbook builds for statistics professors • Interactive course books for bootcamps • Technical handbooks for research labs	Book build service $1-4k per title, hosting $100/mo *Effort:* Low (static site build, template-driven) ⚠ BSD-3-Clause; textbooks you publish must respect their own copyright
Observable Framework observablehq/framework ★ 3.7k · Permissive ISC · Framework · Fit 3/5	Static site generator for building data apps, dashboards, and reports with JavaScript *Replaces:* Tableau, Datawrapper, Flourish, Power BI	Data journalists and analysts	Agency service Consulting/implementation Training/courses	• Interactive reports for newsrooms • Public dashboards for NGOs • Data portals for city offices *Angle:* Data app development agency	$3-10k per dashboard site *Effort:* High (Developer framework, hosting by Observable optional) ⚠ Observable trademark; ISC license permissive
Tqdm tqdm/tqdm ★ 31.4k · Check NOASSERTION · Library · Fit 2/5	Progress bar library for Python loops and command-line tasks.	Python developers wanting progress feedback in scripts	Consulting/implementation Premium plugins/add-ons	• Progress reporting for data migration scripts • CLI feedback for ETL vendors • Batch job monitors for analytics teams	Support contract $500-2k/yr, library itself free *Effort:* High (library, no product surface to build on) ⚠ NOASSERTION license: read it first; tqdm is widely embedded

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
D2l-en d2l-ai/d2l-en ★ 30.0k · Check NOASSERTION · Content · Fit 2/5	Interactive open deep learning textbook with code in multiple frameworks and math.	University students and instructors teaching deep learning	Training/courses Content/membership	• Deep learning course kit for bootcamps • Textbook companion for university TAs • Corporate deep learning primer for engineers	Course license $1-3k per cohort, printed edition $60 *Effort:* Low (book content, multi-framework code reusable) ⚠ NOASSERTION license, read first; text likely CC-BY-SA share-alike; check before reuse
Machine-learning-for-trading stefan-jansen/machine-learning-for-trading ★ 21.7k · Permissive MIT · Content · Fit 2/5	Companion code for a machine learning for trading book, from data to execution. *Replaces:* QuantConnect courses, Quantopia-style training	Quant students and traders learning ML strategies	Training/courses Content/membership	• Algo trading course for finance grad students • Strategy lab for retail traders • ML trading bootcamp for fintech analysts	Course $199-499 per seat, cohort workshops $3k *Effort:* Low (book companion code, teaching material) ⚠ MIT code; book text copyrighted; trading strategies carry financial risk disclaimers
Bokeh bokeh/bokeh ★ 20.5k · Permissive BSD-3-Clause · Library · Fit 2/5	Python library for building interactive browser visualizations and dashboards. *Replaces:* Tableau, Power BI embedded charts	Data teams building interactive browser dashboards in Python	Consulting/implementation Agency service	• Interactive dashboards for hospital operations • Plotting service for energy traders • Embedded charts for climate research portals	Dashboard build $8-30k, maintenance $1k/mo *Effort:* High (library, you build the entire app) ⚠ BSD-3-Clause; check bundled JavaScript dependency licenses
Ipython ipython/ipython ★ 16.8k · Permissive BSD-3-Clause · Tool · Fit 2/5	Interactive Python shell and kernel powering Jupyter notebooks.	Python developers and data scientists using interactive shells	Consulting/implementation Training/courses	• Python shell training for finance analysts • Interactive kernels for classroom coding labs • Notebook environment setup for research institutes	Training $500-1500 per cohort, setup $2-5k *Effort:* High (core runtime, not a user product) ⚠ BSD-3-Clause; IPython and Jupyter names are project trademarks
Python-training jpmorganchase/python-training ★ 14.3k · Permissive Apache-2.0 · Content · Fit 2/5	Python training course materials aimed at business analysts and traders. *Replaces:* DataCamp, Coursera business Python courses	Finance teams learning Python for analysis	Training/courses Consulting/implementation	• Python course for trading desk analysts • Excel-to-Python upskilling for insurers • Python onboarding for finance graduates	Cohort course $1-3k per team, $49 self-paced *Effort:* Low (training content, easy to adapt and rebrand) ⚠ Apache-2.0; JPMorgan name appears; do not imply bank endorsement
Apache Zeppelin apache/zeppelin ★ 6.7k · Permissive Apache-2.0 · App · Fit 2/5	Web notebook for interactive data analytics with Spark and SQL *Replaces:* Databricks Notebooks, Hex, Deepnote	Hadoop and Spark data teams	Consulting/implementation Managed hosting Setup + support retainer	• Notebook hosting for Spark teams • Analytics workspace for enterprises • Spark training environments *Angle:* Big data notebooks for enterprises	$150-250/hr consulting *Effort:* High (Aging, JVM-heavy, low momentum) ⚠ Declining mindshare against Jupyter; Apache trademark
Deepo ufoym/deepo ★ 6.3k · Permissive MIT · Framework · Fit 2/5	Generates customized Docker images with popular deep learning frameworks preinstalled. *Replaces:* Anaconda Enterprise, Saturn Cloud	ML teams needing reproducible GPU development environments	Setup + support retainer Consulting/implementation	• GPU dev images for university ML labs • Reproducible training environments for robotics startups • Deep learning sandboxes for bootcamps	Setup $2-6k per team, support $300/mo *Effort:* Medium (images need access control and orchestration) ⚠ MIT; CUDA driver compatibility is on the buyer
Voila voila-dashboards/voila ★ 6.0k · Check NOASSERTION · Tool · Fit 2/5	Turns Jupyter notebooks into standalone interactive web dashboards *Replaces:* Tableau, Power BI, Streamlit	Data scientists sharing results	Consulting/implementation Managed hosting Agency service	• Notebook dashboards for lab teams • Client reports for data consultancies • Interactive tools for analysts *Angle:* Notebook-to-dashboard publishing	$2-5k per dashboard *Effort:* Medium (Jupyter extension, no auth or tenancy) ⚠ Metadata NOASSERTION; BSD-3-Clause; limited user management

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
AidLearning-FrameWork aidlearning/AidLearning-FrameWork ★ 5.8k · Check NOASSERTION · Platform · Fit 2/5	Linux environment on Android for AI development with GUI and inference acceleration.	Developers and hobbyists doing AI work on Android devices	Premium plugins/add-ons Consulting/implementation	• Offline AI assistant for field technicians • On-device vision prototyping for IoT teams • Android ML lab kits for schools	Paid app $10-30 one-time, enterprise device licensing *Effort:* High (Android-specific, hardware and NPU variance) ⚠ NOASSERTION license, read first; Android and HarmonyOS platform policies apply
Lux lux-org/lux ★ 5.4k · Permissive Apache-2.0 · Library · Fit 2/5	Automatically generates visualizations and recommendations from pandas dataframes in notebooks. *Replaces:* Tableau quick charts, Power BI quick charts	Analysts exploring pandas data inside Jupyter notebooks	Consulting/implementation Training/courses	• Quick EDA tooling for trading analysts • Auto-charts for market research firms • Notebook explorer training for graduate students	Training $300-800 per cohort, setup $2k *Effort:* High (library, notebook-bound, no product surface) ⚠ Apache-2.0; verify maintenance status and pandas version compatibility
Nbdev AnswerDotAI/nbdev ★ 5.3k · Permissive Apache-2.0 · Framework · Fit 2/5	Toolkit for writing and publishing Python packages entirely from Jupyter notebooks.	Python library authors who prefer notebook-driven development	Training/courses Consulting/implementation	• Notebook-first library workshops for data scientists • Documentation build service for Python startups • Package scaffolding for research labs	Workshop $1-2k per team, docs setup $1.5k *Effort:* High (developer library, no end-user product) ⚠ Apache-2.0; tied to fast.ai ecosystem conventions; notebook workflow lock-in
DeepAnalyze ruc-datalab/DeepAnalyze ★ 4.8k · Permissive MIT · Model · Fit 2/5	Agentic LLM that autonomously analyzes data and writes analysis reports. *Replaces:* Julius AI, ChatGPT data analysis	Business analysts wanting automated data reports	API/usage-based Vertical SaaS	• Automated sales reports for retail chains • Survey analysis for market research agencies • Monthly KPI narratives for finance teams	$49-199/mo per seat, usage-based model costs *Effort:* High (model hosting, data security, evaluation needed) ⚠ MIT; LLM outputs need validation; data privacy rules for uploaded datasets
Alphalens quantopian/alphalens ★ 4.5k · Permissive Apache-2.0 · Library · Fit 2/5	Python library analyzing predictive stock factor performance and returns. *Replaces:* Quantopian platform, Bloomberg factor tools	Quant researchers testing alpha signals on equities	Consulting/implementation Training/courses	• Factor research toolkit for boutique asset managers • Alpha testing course for finance students • Signal validation for crypto quants	Model validation project $5-15k, training $1k *Effort:* High (library, needs data feeds and UI) ⚠ Apache-2.0; Quantopian is defunct, check dependency and data sources
Cling root-project/cling ★ 4.2k · Check NOASSERTION · Library · Fit 2/5	C++ interpreter enabling interactive sessions and Jupyter C++ kernels.	C++ developers and researchers wanting interactive sessions	Consulting/implementation Training/courses	• C++ training for quant developers • Interactive C++ labs for university courses • Prototyping tool for embedded engineers	Training $800-2k per cohort, support $1k/yr *Effort:* High (interpreter core, not a product surface) ⚠ NOASSERTION license, read first; LLVM/Clang dependency is heavy

OCR & Document AI · 36

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Stirling-PDF Stirling-Tools/Stirling-PDF ★ 95.9k · Check NOASSERTION · App · Fit 5/5	Self-hosted PDF editing, merging, OCR and conversion web app *Replaces:* Adobe Acrobat, Smallpdf, iLovePDF, PDFescape	Offices, privacy-minded firms, individuals	Managed hosting White-label reseller Setup + support retainer	• PDF toolkit for law firms • Private PDF tools for clinics • PDF API for accountants *Angle:* Branded PDF toolkit for enterprises	$5-15/user/mo *Effort:* Medium (Docker web app, enterprise features gated) ⚠ MIT core with proprietary parts, check; Stirling name

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Paperless-ngx paperless-ngx/paperless-ngx ★ 47.8k · GPL GPL-3.0 · App · Fit 5/5	Document management system that scans, indexes and archives documents *Replaces:* Evernote, Dropbox, M-Files, DocuWare	Households, small offices, accountants	Managed hosting Setup + support retainer Mobile app on top	• Paperless office for accounting firms • Document archive for clinics • Receipt archive for freelancers *Angle:* Managed document management for small offices	$8-25/mo per user *Effort:* Medium (Single-tenant Django, add auth wrapper) ⚠ GPL, fine for hosting; no multi-tenant support
OCRmyPDF ocrmypdf/OCRmyPDF ★ 35.3k · Weak copyleft MPL-2.0 · Tool · Fit 4/5	Adds searchable OCR text layers to scanned PDFs from the command line *Replaces:* ABBYY FineReader, Adobe Acrobat OCR, Kofax	Accountants, offices, archivists	API/usage-based Managed hosting Local service business	• Scan-to-searchable-PDF for law offices • Archive digitization for councils • Invoice OCR for bookkeepers *Angle:* Searchable PDF conversion for archives	$0.01-0.03 per page *Effort:* Medium (CLI tool, wrap in web upload service) ⚠ MPL-2.0 file-level copyleft; depends on Tesseract quality
Unstract Zipstack/unstract ★ 7.4k · AGPL AGPL-3.0 · Platform · Fit 4/5	LLM-powered platform extracting structured data from unstructured documents for APIs and ETL. *Replaces:* Rossum, Docsumo, Nanonets	Operations teams automating document data entry	Managed hosting Vertical SaaS	• Invoice data extraction for AP teams • Claims intake automation for insurers • Contract data extraction for procurement departments	$300-1500/mo per workspace, self-host free *Effort:* Medium (multi-tenant platform, needs branding and auth) ⚠ AGPL-3.0: modified hosted version must publish source; rebranding needs care
PaddleOCR PaddlePaddle/PaddleOCR ★ 92.4k · Permissive Apache-2.0 · Library · Fit 3/5	Lightweight OCR toolkit and document parsing for 80+ languages *Replaces:* Google Vision OCR, ABBYY, AWS Textract, Azure Document Intelligence	Developers processing scanned documents	API/usage-based Consulting/implementation Vertical SaaS	• Invoice OCR for Asian-language accountants • ID card reading for fintech onboarding • Receipt scanning for expense apps *Angle:* Invoice and receipt extraction service	$0.002-0.01 per page *Effort:* Medium (Python toolkit, build API and UI) ⚠ Apache-2.0; Baidu ecosystem; some models need verification
MinerU opendatalab/MinerU ★ 83.3k · Check NOASSERTION · Tool · Fit 3/5	Converts PDFs and Office documents into clean Markdown and JSON for LLM workflows *Replaces:* LlamaParse, Unstructured API, Adobe Extract, Mathpix	AI teams building RAG pipelines	API/usage-based Managed hosting Consulting/implementation	• PDF-to-markdown API for RAG startups • Academic paper parser for libraries • Contract ingestion for law firms *Angle:* Scientific paper extraction service	$0.01-0.05 per page *Effort:* Medium (Python service, GPU recommended, no tenancy) ⚠ License changed to AGPL-based custom license; read terms before commercial use
Docling docling-project/docling ★ 70.2k · Permissive MIT · Library · Fit 3/5	Converts PDFs and documents into structured data for generative AI *Replaces:* Adobe Extract, AWS Textract, Unstructured, Azure Document Intelligence	AI developers, data teams	API/usage-based Managed hosting Consulting/implementation	• Document parsing API for law firms • Invoice extraction for accountants • PDF-to-markdown for AI startups *Angle:* Document-to-LLM ingestion API	$0.01-0.05 per page *Effort:* Medium (Python library, wrap with API) ⚠ MIT; IBM-led project
Marker datalab-to/marker ★ 40.8k · Permissive Apache-2.0 · Tool · Fit 3/5	Converts PDFs to Markdown and JSON quickly with layout awareness *Replaces:* LlamaParse, Mathpix, Adobe Extract, Unstructured	AI developers and publishers	API/usage-based Managed hosting Consulting/implementation	• PDF conversion for law firms • Paper parsing for research tools • Textbook conversion for publishers *Angle:* PDF to Markdown conversion service	$0.01-0.04 per page *Effort:* Medium (Python tool, GPU, weights license limits) ⚠ Code GPL-3.0, model weights modified OpenRAIL-M with revenue limits for commercial use
EasyOCR JaidedAI/EasyOCR ★ 30.1k · Permissive Apache-2.0 · Library · Fit 3/5	Ready-to-use Python OCR supporting 80+ languages and scripts *Replaces:* Google Vision OCR, ABBYY, AWS Textract	Developers adding OCR	API/usage-based Consulting/implementation Managed hosting	• Multilingual OCR API for archives • Menu scanning for travel apps • License plate text for parking lots *Angle:* Multilingual OCR for logistics	$0.003-0.01 per image *Effort:* Medium (Library with models, build service around it) ⚠ Apache-2.0; project less active; accuracy varies by script
Surya datalab-to/surya ★ 21.6k · Permissive Apache-2.0 · Library · Fit 3/5	OCR, layout analysis, reading order, and table recognition in 90+ languages *Replaces:* AWS Textract, ABBYY, Azure Document Intelligence	AI teams processing documents	API/usage-based Managed hosting Consulting/implementation	• Table extraction for finance • Multilingual document parsing for legal archives • Layout API for e-learning *Angle:* Layout-aware OCR for publishers	$0.01-0.03 per page *Effort:* Medium (Python library, GPU, commercial weights terms) ⚠ Code GPL-3.0; weights have revenue-based commercial limit; read model license

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Unstructured Unstructured-IO/unstructured ★ 15.7k · **Permissive** Apache-2.0 · Library · Fit 3/5	ETL toolkit that parses and chunks documents for LLM and RAG pipelines *Replaces:* LlamaParse, Azure Document Intelligence, Reducto	AI engineers	API/usage-based Managed hosting Consulting/implementation	• Document ingestion for RAG startups • Contract parsing for law firms • Email archive chunking for compliance *Angle:* ETL for unstructured documents	$0.005-0.03 per page *Effort:* Medium (Library, hosted API is vendor product) ⚠ Unstructured trademark; best features in paid API
Easydict tisfeng/Easydict ★ 15.2k · **GPL** GPL-3.0 · App · Fit 3/5	macOS dictionary and translation app with offline OCR and many translation engines. *Replaces:* DeepL desktop app, Youdao Dictionary app	Mac users translating text and screenshots daily	Premium plugins/add-ons Marketplace	• Translation tool for Chinese-English legal translators • Dictionary app for Mandarin learners • Screenshot translator for Mac-using researchers	$10-20 one-time premium plugins, free core *Effort:* Medium (macOS app, many engine API keys to manage) ⚠ GPL-3.0: distributed apps ship source; translation API terms apply per engine
LunaTranslator HIllya51/LunaTranslator ★ 14.0k · **GPL** GPL-3.0 · App · Fit 3/5	Windows app translating visual novel text in real time using OCR and translation engines. *Replaces:* DeepL desktop app, Google Translate app	Visual novel players wanting translated game text	Premium plugins/add-ons Marketplace	• Translation overlay for Japanese visual novel fans • Localization tool for small indie game studios • Subtitle translator for anime streaming groups	$5-15 one-time premium engines, free core *Effort:* Medium (Windows app, engine keys and updates) ⚠ GPL-3.0: distributed apps ship source; game publisher copyrights apply to text
Liteparse run-llama/liteparse ★ 13.0k · **Permissive** Apache-2.0 · Tool · Fit 3/5	Fast open-source document parser turning files into structured text for AI. *Replaces:* LlamaParse, Unstructured.io hosted, Reducto	AI teams ingesting PDFs into retrieval pipelines	API/usage-based Managed hosting	• PDF ingestion API for legal RAG startups • Invoice text extraction for accounting firms • Research paper parsing for pharma knowledge teams	Hosted API $0.003-0.02 per page, free self-host *Effort:* Medium (parser library, needs API layer and auth) ⚠ Apache-2.0; PDF extraction accuracy varies; verify on your document types
Chandra datalab-to/chandra ★ 12.7k · **Permissive** Apache-2.0 · Model · Fit 3/5	OCR model that extracts complex tables, forms and handwriting with layout. *Replaces:* ABBYY FineReader, Amazon Textract	Back-office teams digitizing forms and handwritten records	API/usage-based Vertical SaaS	• Handwritten intake form digitizing for clinics • Table extraction for insurance claims • Historical archive transcription for libraries	$0.01-0.05 per page API, $299/mo enterprise tier *Effort:* High (model serving, GPU hosting, accuracy evaluation needed) ⚠ Apache-2.0; check model weight license and any gated commercial terms
Zerox getomni-ai/zerox ★ 12.3k · **Permissive** MIT · Tool · Fit 3/5	Converts documents to markdown by sending page images to vision language models. *Replaces:* LlamaParse, Mistral OCR API	Developers extracting document content with vision models	API/usage-based Consulting/implementation	• Markdown conversion for contract archives • Page extraction for insurance claim packets • Scanned textbook conversion for edtech firms	Usage-based pass-through plus $99/mo API tier *Effort:* Medium (wrapper around vision models, needs hardening) ⚠ MIT; vision model API costs and data privacy depend on provider chosen
Video-subtitle-extractor YaoFANGUK/video-subtitle-extractor ★ 9.7k · **Permissive** Apache-2.0 · App · Fit 3/5	GUI tool extracting hard-coded subtitles from videos into SRT files using local OCR. *Replaces:* Subtitle Edit OCR, Rev.com captioning	Video editors and localizers needing subtitle text	Consulting/implementation Setup + support retainer	• Subtitle extraction for anime fansub groups • Caption recovery for corporate training videos • Translation prep for documentary distributors	Desktop license $30-60 one-time, batch service $0.10/min *Effort:* Medium (GUI app, deep learning packaging on Windows) ⚠ Apache-2.0; copyright of extracted subtitles and source videos stays with owners

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
STranslate STranslate/STranslate ★ 8.5k · **Permissive** MIT · App · Fit 3/5	Windows translation and OCR tool with screenshot capture and many translation engines. *Replaces:* DeepL desktop app, Google Translate app	Windows users translating and OCRing text on screen	Premium plugins/add-ons Marketplace	• Screen translation for Chinese-English office workers • Dictionary tool for language school students • OCR copy tool for accounting clerks	Free core, paid pro plugins $10-20 one-time *Effort:* Medium (WPF app, engine keys and installer work) ⚠ MIT; translation engine API terms apply; Chinese-language docs need localizing
GLM-OCR zai-org/GLM-OCR ★ 7.6k · **Permissive** Apache-2.0 · Model · Fit 3/5	Multilingual OCR model focused on accurate, fast, comprehensive document text recognition. *Replaces:* Google Document AI, Amazon Textract	Teams processing high-volume scanned documents	API/usage-based Vertical SaaS	• Scanned invoice extraction for accounting firms • Document digitizing for Chinese-language law offices • Bulk archive OCR for municipal records	$0.005-0.03 per page, $199/mo dedicated tier *Effort:* High (model serving and GPU infrastructure needed) ⚠ Apache-2.0; GLM is Zhipu's brand, avoid implying affiliation
Pdf-craft oomol-lab/pdf-craft ★ 6.5k · **Permissive** MIT · App · Fit 3/5	Converts scanned book PDFs into other formats using OCR and layout processing. *Replaces:* ABBYY FineReader, Adobe Acrobat Pro	Publishers and archives digitizing scanned books	Vertical SaaS API/usage-based	• Scanned textbook conversion for schools • Digital archive for local historical societies • Ebook conversion for indie scanned-book publishers	$0.20-0.50 per page, bulk plans from $99/mo *Effort:* Medium (pipeline app, needs packaging and cloud work) ⚠ MIT; OCR depends on model providers, check their terms for commercial use
docTR mindee/doctr ★ 6.4k · **Permissive** Apache-2.0 · Library · Fit 3/5	Deep-learning OCR toolkit for document text detection and recognition *Replaces:* Google Vision OCR, AWS Textract, ABBYY	Developers adding OCR	API/usage-based Consulting/implementation Managed hosting	• Receipt OCR for expense apps • ID document reading for KYC startups • Form capture for field teams *Angle:* ID document parsing for KYC	$0.003-0.01 per page *Effort:* Medium (Python library, build API) ⚠ Apache-2.0; Mindee runs competing hosted service
PaddleX PaddlePaddle/PaddleX ★ 6.3k · **Permissive** Apache-2.0 · Platform · Fit 3/5	Low-code all-in-one toolkit for training and deploying PaddlePaddle AI models. *Replaces:* Roboflow, Google Vertex AI custom training	Teams building vision and OCR models on PaddlePaddle	Consulting/implementation Setup + support retainer	• Factory defect detection setup for manufacturers • OCR deployment for logistics firms • Low-code vision training for retail analytics	Deployment project $8-25k, support $1-3k/mo *Effort:* Medium (toolkit, needs UI and PaddlePaddle expertise) ⚠ Apache-2.0; PaddlePaddle is Baidu's framework; model weight licenses vary
Translumo ramjke/Translumo ★ 5.9k · **Permissive** Apache-2.0 · App · Fit 3/5	Windows real-time screen translator for games, video subtitles and static text. *Replaces:* Google Lens translate, DeepL desktop screen tools	Gamers and video watchers needing live translation	Premium plugins/add-ons Marketplace	• Live game translation for Japanese RPG fans • Subtitle translation for foreign film students • Screen translator for overseas e-sports viewers	Free core, paid engine packs $5-15 one-time *Effort:* Medium (Windows app, OCR and translation engine setup) ⚠ Apache-2.0; game publishers' copyright and anti-cheat policies may apply
Tesseract tesseract-ocr/tesseract ★ 77.4k · **Permissive** Apache-2.0 · Library · Fit 2/5	Long-standing open OCR engine supporting 100+ languages *Replaces:* ABBYY FineReader, Google Vision, AWS Textract	Developers and document processors	API/usage-based Consulting/implementation Local service business	• Archive digitization for local museums • OCR for accounting firms • Invoice capture API for bookkeepers *Angle:* OCR API for document digitization	$0.005 per page *Effort:* Medium (Engine only, wrap in API and UI) ⚠ Accuracy lower than modern deep-learning OCR; Apache-2.0
tesseract.js naptha/tesseract.js ★ 38.8k · **Permissive** Apache-2.0 · Library · Fit 2/5	Pure JavaScript OCR engine recognizing text in over 100 languages in browsers. *Replaces:* Google Cloud Vision OCR, Azure Document Intelligence	Web developers adding offline text recognition to apps	Consulting/implementation Premium plugins/add-ons	• In-browser receipt scanning for expense apps • Offline ID text capture for field clinics • Multilingual scan reader for translation tools	Integration $4-12k per app, support $300/mo *Effort:* Medium (library, needs UI and accuracy tuning) ⚠ Apache-2.0; browser OCR less accurate on poor scans, test first

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Ddddocr sml2h3/ddddocr ★ 14.9k · Permissive MIT · Library · Fit 2/5	Python library recognizing text in captcha images using a pretrained model.	Developers needing captcha text recognition for test automation	API/usage-based Consulting/implementation	• Captcha handling for QA test suites • Image text extraction for bookkeeping teams • Verification code reading for internal tools	Usage API $0.001-0.01 per image, integration $2-5k *Effort:* Low (Python library, minimal product surface) ⚠ MIT; captcha bypass may breach site terms and laws, avoid anti-bot use
Chineseocr_lite DayBreak-u/chineseocr_lite ★ 12.4k · GPL GPL-2.0 · Library · Fit 2/5	Ultra-light Chinese OCR with vertical text support for mobile and edge inference. *Replaces:* Baidu OCR API, Tencent OCR	Chinese apps needing offline text recognition on devices	Consulting/implementation Setup + support retainer	• Offline Chinese receipt scanning for mobile apps • Vertical text reader for classical book digitizers • Edge OCR for Chinese retail kiosks	Integration $5-12k per app, support $400/mo *Effort:* Medium (model pipeline, needs mobile SDK work) ⚠ GPL-2.0: fine for hosting, distributed apps must ship source
PyMuPDF pymupdf/PyMuPDF ★ 11.1k · AGPL AGPL-3.0 · Library · Fit 2/5	High-performance Python library for reading, converting and editing PDF and other documents. *Replaces:* Adobe Acrobat SDK, Apryse PDF SDK, Foxit PDF SDK	Software vendors embedding PDF extraction and conversion	Consulting/implementation Setup + support retainer	• PDF text extraction API for legal vendors • Invoice parsing for accounting SaaS • Form-field filling for insurance agencies	Commercial license quote-based; implementation $5-15k *Effort:* Medium (library, needs API and product layer) ⚠ AGPL-3.0 unless commercial license; SaaS use triggers source release
Bob ripperhe/Bob ★ 9.8k · Check NONE · App · Fit 2/5	macOS translation and OCR app with plugin-based translation engines. *Replaces:* DeepL desktop app, Apple Translate app	Mac users translating and OCRing text daily	Premium plugins/add-ons Marketplace	• Translation utility for Chinese-speaking Mac users • OCR copy tool for paralegals • Screenshot translator for travel bloggers	Free core, paid plugin packs $5-15 one-time *Effort:* Medium (macOS app, engine keys and updates) ⚠ NONE license, read first; engine APIs and Chinese-language UI need localization
Dolphin bytedance/Dolphin ★ 9.1k · Check NOASSERTION · Model · Fit 2/5	Research model parsing document images into layout elements and text. *Replaces:* Adobe Acrobat AI, Azure Document Intelligence	Research labs and document AI teams testing parsers	Consulting/implementation API/usage-based	• Layout parsing for scanned academic papers • Document parsing for historical newspaper archives • Form layout detection for government digitizers	Model integration $10-25k, hosting $0.02 per page *Effort:* High (research model, needs serving and evaluation) ⚠ NOASSERTION license, read first; research-only code likely
Jev-chat-jarvis jev-chat/jev-chat-jarvis ★ 8.3k · Permissive MIT · App · Fit 2/5	Chat assistant that reads conversations, judges intent and drafts replies for you to send. *Replaces:* Grammarly, Gmail smart reply	Sales and support staff replying to customer chats	Vertical SaaS Mobile app on top	• Reply drafting for dental clinic front desks • Chat triage for real estate agents • Customer chat assist for auto dealers	$8-20/mo per user, free personal tier *Effort:* Medium (multi-platform app, needs per-platform work) ⚠ MIT; messaging platforms' terms may forbid automated reply drafting
Omniparse adithya-s-k/omniparse ★ 7.9k · GPL GPL-3.0 · Platform · Fit 2/5	Ingests and parses documents, media and web data into formats suited for GenAI frameworks. *Replaces:* LlamaParse, Unstructured.io	GenAI developers preprocessing mixed document and media data	API/usage-based Managed hosting	• Multimodal ingestion for knowledge base startups • Media transcription pipelines for podcast networks • Document prep for enterprise RAG teams	Hosted API $50-300/mo, enterprise self-host $5k/yr *Effort:* High (many parsers, heavy dependencies, needs hardening) ⚠ GPL-3.0: distributed apps ship source; hosted use fine; dependency licenses vary
Tessdata tesseract-ocr/tessdata ★ 7.7k · Permissive Apache-2.0 · Model · Fit 2/5	Trained Tesseract OCR language model files for over 100 languages.	OCR developers needing language packs for Tesseract	Consulting/implementation Setup + support retainer	• Language packs for regional newspaper digitizers • Tesseract tuning for Arabic invoice scanning • Custom OCR models for minority-language archives	Tuning project $3-10k per language *Effort:* Low (model files, drop-in, little product work) ⚠ Apache-2.0; training data provenance varies per language model; verify rights

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Donut clovaai/donut ★ 6.9k · **Permissive** MIT · Model · Fit 2/5	OCR-free transformer model for document understanding and extracting fields from images. *Replaces:* Azure Document Intelligence, AWS Textract	Document AI researchers and teams building extractors	Consulting/implementation Training/courses	• Receipt field extraction for expense apps • Form understanding for government forms • Synthetic training data for document AI vendors	Custom model build $15-40k, training $2k per workshop *Effort:* High (research code, needs training and serving) ⚠ MIT; Clova AI brand not endorsement; pretrained weights may have data restrictions
Parsr axa-group/Parsr ★ 6.2k · **Permissive** Apache-2.0 · Tool · Fit 2/5	Transforms PDFs, documents and images into structured JSON and Markdown output. *Replaces:* Adobe PDF Services, ABBYY Cloud OCR	Data teams needing structured output from PDFs	Consulting/implementation Managed hosting	• Structured PDF extraction for consulting research teams • Report parsing for ESG analysts • Table extraction for public-sector data teams	Setup $5-12k, hosted service $400-900/mo *Effort:* Medium (Docker service, needs auth and UI) ⚠ Apache-2.0; verify maintenance; OCR engine dependencies carry their own licenses
Layout-parser Layout-Parser/layout-parser ★ 5.8k · **Permissive** Apache-2.0 · Library · Fit 2/5	Python toolkit for deep learning based layout analysis of document images. *Replaces:* Azure Layout, Amazon Textract layout	Document AI teams building layout detection pipelines	Consulting/implementation Training/courses	• Layout detection for historical newspaper digitizers • Form structure detection for tax agencies • Layout training course for document AI engineers	Pipeline build $10-30k, training $1.5k per cohort *Effort:* High (library, needs models and product layer) ⚠ Apache-2.0; pretrained model weights from varied sources, check each license

Prompt Tools & Libraries · 7

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Prompts terkelg/prompts ★ 9.3k · **Permissive** MIT · Library · Fit 2/5	Lightweight Node.js library for interactive command-line prompts.	Node.js CLI developers building interactive setup tools	Consulting/implementation Setup + support retainer	• Interactive setup wizards for SaaS onboarding CLIs • Project scaffolding tools for agencies • Install prompts for hardware vendors	Integration $1-3k per CLI, support $200/mo *Effort:* High (library, you build the entire CLI) ⚠ MIT; library only, no commercial barriers beyond attribution
ChatGPT-Shortcut rockbenben/ChatGPT-Shortcut ★ 8.9k · **Permissive** MIT · Content · Fit 2/5	Searchable library of ready-made prompts for ChatGPT, Claude, Gemini and Cursor. *Replaces:* PromptBase, FlowGPT	Non-technical users and teams wanting ready prompts	Content/membership Premium plugins/add-ons	• Prompt library for real estate agents • Translated prompt packs for Russian-speaking marketers • Korean-language prompt library for HR teams	Team plan $10-20/mo per seat, free public library *Effort:* Low (content library, data-driven and translatable) ⚠ MIT; prompt authors' contributions may have their own rights
Clack bombshell-dev/clack ★ 8.1k · **Check** NOASSERTION · Library · Fit 2/5	Library for building polished interactive command-line apps with prompts and spinners.	Node developers building CLI tools and scaffolders	Consulting/implementation Training/courses	• Branded CLI installers for SaaS companies • Scaffolding tools for agencies • Onboarding CLIs for developer tool startups	CLI build $3-8k per tool, training $800 per workshop *Effort:* High (library, no product surface) ⚠ NOASSERTION license, read first; verify license before bundling
Enquirer enquirer/enquirer ★ 8.0k · **Permissive** MIT · Library · Fit 2/5	Node.js library for stylish, user-friendly interactive command-line prompts.	JavaScript CLI authors needing interactive input prompts	Consulting/implementation Setup + support retainer	• Setup prompts for Node deployment tools • Config wizards for fintech CLIs • Interactive forms for internal dev tooling	Integration $1-3k per CLI, support $150/mo *Effort:* High (library, not a user-facing product) ⚠ MIT; do not imply endorsement by listed big-name users
OpenPromptStudio Moonvy/OpenPromptStudio ★ 6.7k · **Check** NONE · App · Fit 2/5	Visual web editor for building and organizing AI image generation prompts. *Replaces:* PromptPerfect, Midjourney prompt tools	AI image artists and studios organizing prompts	Vertical SaaS Premium plugins/add-ons	• Prompt management for game art studios • Prompt libraries for ad agencies • Visual prompt builder for Chinese e-commerce photographers	$8-15/mo per user, team plan $49/mo *Effort:* Medium (web editor, needs accounts and storage) ⚠ NONE license, read first; image generator terms restrict some commercial use
OpenPrompt thunlp/OpenPrompt ★ 4.9k · **Permissive** Apache-2.0 · Framework · Fit 2/5	Research framework for prompt-learning methods in pretrained language models.	NLP researchers experimenting with prompt-tuning methods	Training/courses Consulting/implementation	• Prompt-tuning workshops for NLP PhD students • Few-shot classifier builds for legal taxonomy projects • Prompt research consulting for academic labs	Workshop $1-2k per cohort, research build $8-20k *Effort:* High (research framework, needs productization) ⚠ Apache-2.0; prompt-learning field is research-stage, outputs need validation
Promptify promptslab/Promptify ★ 4.6k · **Permissive** Apache-2.0 · Library · Fit 2/5	Python library extracting structured outputs from language models using prompts.	Developers extracting structured data from LLM text	API/usage-based Consulting/implementation	• Structured extraction for medical discharge notes • Resume parsing for recruiting firms • Contract field extraction for procurement teams	Integration $5-12k, usage pass-through plus $200/mo *Effort:* Medium (library, needs schema, UI and evaluation) ⚠ Apache-2.0; LLM provider terms apply; structured outputs need validation for accuracy

Push Notifications · 19

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Uptime Kuma louislam/uptime-kuma ★ 93.3k · Permissive MIT · App · Fit 5/5	Self-hosted monitoring tool with uptime checks, alerts and status pages *Replaces:* UptimeRobot, Pingdom, StatusCake, Better Stack, Statuspage	Small businesses, agencies, devs	Managed hosting White-label reseller Setup + support retainer	• Uptime monitoring for web agencies • Status pages for SaaS startups • Monitoring for local IT firms *Angle:* Status monitoring with alerting plans	$5-29/mo per account *Effort:* Medium (Single-tenant, multi-user missing) ⚠ MIT; Uptime Kuma name used; needs multi-tenant wrapper
Novu novuhq/novu ★ 40.3k · Check NOASSERTION · Platform · Fit 4/5	Notification infrastructure for in-app, email, SMS and push with workflows and templates *Replaces:* Courier, Knock, OneSignal, SendGrid	Product teams, SaaS developers	Managed hosting API/usage-based White-label reseller	• Notification hub for ecommerce apps • Multi-channel alerts for healthcare portals • Notification service for SaaS agencies *Angle:* Notification infrastructure for SaaS	$30-250/mo plus usage *Effort:* Medium (Multi-tenant, inbox component) ⚠ Enterprise folder under commercial license; Novu trademark
ntfy binwiederhier/ntfy ★ 35.4k · Permissive Apache-2.0 · App · Fit 4/5	Simple HTTP pub-sub service that sends push notifications to phones and desktops *Replaces:* Pushover, OneSignal, Pushbullet, PagerDuty	Developers, sysadmins, small teams	Managed hosting Mobile app on top Setup + support retainer	• Hosted push alerts for sysadmins • Branded alert app for security cameras • Notification relay for homelab users *Angle:* Push notification API with paid tiers	$3-10/mo per user *Effort:* Low (Self-contained, Android and iOS apps exist) ⚠ Dual Apache and GPL; iOS push needs ntfy.sh relay
Gotify gotify/server ★ 16.2k · Check NOASSERTION · App · Fit 3/5	Self-hosted push notification server with web UI and Android client *Replaces:* Pushover, Pushbullet, ntfy	Sysadmins, homelab users	Managed hosting Setup + support retainer Mobile app on top	• Alert push for small hosting providers • Branded notification app for monitoring vendors • Hosted Gotify for home labs *Angle:* Self-hosted alerts for IT teams	$2-6/mo per user *Effort:* Low (Simple Go server) ⚠ License NOASSERTION (MIT); no iOS client
Gorush appleboy/gorush ★ 8.8k · Permissive MIT · Tool · Fit 3/5	Go push notification server for APNs, FCM, and HMS *Replaces:* OneSignal, Firebase Cloud Messaging, Airship, Pushwoosh	App developers wanting self-hosted push	Managed hosting API/usage-based Setup + support retainer	• Push gateway for indie app studios • Notification relay for delivery apps • Push service for local news apps *Angle:* Mobile push gateway hosting	$10-50/mo per app *Effort:* Medium (Go service with API, no dashboard or tenancy) ⚠ MIT; APNs and FCM credentials per customer; no analytics UI
Pushdeer easychen/pushdeer ★ 5.0k · Check NOASSERTION · App · Fit 3/5	Open-source push notification service delivering alerts to iOS, Android and Mac clients. *Replaces:* Pushover, Bark, ntfy hosted	Developers and makers wanting simple push alerts	Managed hosting Setup + support retainer	• Alert relay for home automation installers • Deploy-failure alerts for small dev agencies • Push monitoring for hobby server operators	Managed hosting $5-15/mo per team, self-host free *Effort:* Medium (server plus client apps need branding) ⚠ NOASSERTION license, read first; iOS push relies on Apple APNs terms
Crowdsec-web-ui TheDuffman85/crowdsec-web-ui ★ 988 · AGPL AGPL-3.0 · App · Fit 3/5	Self-hosted web dashboard for CrowdSec security alerts, decisions and runtime metrics. *Replaces:* CrowdSec Console, Grafana security dashboards	Sysadmins and MSPs running CrowdSec intrusion defense	Managed hosting Setup + support retainer	• CrowdSec dashboards for managed service providers • Server security monitoring for small hosting firms • Alert triage UI for school IT teams	MSP plan $50-150/mo per site, self-host free *Effort:* Medium (needs multi-tenant, auth and branding) ⚠ AGPL-3.0: modified hosted versions must publish source; CrowdSec trademark
Apprise caronc/apprise ★ 17.7k · Permissive BSD-2-Clause · Library · Fit 2/5	Python library and CLI that sends notifications through 100+ services with one syntax *Replaces:* Novu, Courier, Zapier notifications	Developers, scripters	Consulting/implementation Setup + support retainer API/usage-based	• Alert routing API for small apps • Notification relay for IoT hubs • Hosted Apprise endpoint for scripts *Angle:* Multi-channel notification service	$5-19/mo per endpoint *Effort:* Medium (Library plus API container) ⚠ BSD; service credentials stay with user
Web Push web-push-libs/web-push ★ 3.6k · Check NOASSERTION · Library · Fit 2/5	Node.js library for sending Web Push notifications with VAPID *Replaces:* OneSignal, Pushwoosh, PushEngage, Airship	Node developers adding browser push	Consulting/implementation API/usage-based Premium plugins/add-ons	• Browser push for ecommerce shops • Notification plugin for blogs • Push service for news sites *Angle:* Web push campaigns for publishers	$9-29/mo per site *Effort:* High (Library, needs subscriber UI and tenancy) ⚠ MIT per repo; metadata NOASSERTION; browser push opt-in rules

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
TIMSDK TencentCloud/TIMSDK ★ 2.8k · **Check** NONE · Library · Fit 2/5	Client SDK repository for Tencent's instant messaging and chat service across platforms. *Replaces:* Stream Chat, Sendbird, Twilio Conversations	App developers adding in-app chat to mobile products	Consulting/implementation API/usage-based	• In-app chat for telehealth consults • Buyer-seller messaging for marketplace apps • Chat widgets for fitness coaching apps	Integration $8-20k per app, usage on Tencent cloud *Effort:* High (SDK tied to Tencent Cloud backend) ⚠ NONE license; tied to Tencent Cloud terms and data residency
Notifiers liiight/notifiers ★ 2.7k · **Permissive** MIT · Library · Fit 2/5	Python library sending notifications to many services through one interface.	Python developers sending alerts across messaging services	Consulting/implementation Setup + support retainer	• Alert integration for DevOps consultancies • Notification routing for small logistics firms • Multi-channel alerts for school admin systems	Integration $2-5k per project, support $200/mo *Effort:* High (library, needs product and UI around it) ⚠ MIT; each target service has its own API terms and rate limits
Mqttwarn mqtt-tools/mqttwarn ★ 983 · **Weak copyleft** EPL-2.0 · Tool · Fit 2/5	Configurable MQTT router sending messages to notification targets via Python plugins. *Replaces:* Node-RED, AWS IoT Core rules	IoT teams routing MQTT sensor messages to alerts	Setup + support retainer Consulting/implementation	• Sensor alerts for cold-chain logistics • Home automation alerts for property managers • Machine alerts for small factories	Setup $1.5-4k per site, support $150/mo *Effort:* Medium (config-driven, needs dashboards and auth) ⚠ EPL-2.0: modified library files must stay open; target services have own terms
Heimdallr LeslieLeung/heimdallr ★ 814 · **GPL** GPL-3.0 · App · Fit 2/5	Lightweight serverless notification gateway aggregating many push channels. *Replaces:* Pushover, Zapier notifications	Developers wanting one endpoint for alerts	Managed hosting Setup + support retainer	• Alert gateway for indie app developers • Deploy alerts for Chinese SMB dev teams • Serverless alert relay for side-project founders	Hosted gateway $9-19/mo, self-host near-zero cost *Effort:* Medium (serverless deploy, needs channel config work) ⚠ GPL-3.0: distributed apps ship source; Chinese push channel APIs have own terms
Notify guanguans/notify ★ 691 · **Permissive** MIT · Library · Fit 2/5	Push notification SDK sending messages to many chat and push services.	Backend developers sending alerts to chat apps	Consulting/implementation Setup + support retainer	• Deploy alerts for Laravel agencies • Ops notifications for Chinese SaaS teams • Chat alerts for ecommerce order systems	Integration $1.5-4k per project, support $150/mo *Effort:* High (SDK, you build product and channel config) ⚠ MIT; wrapped third-party services each enforce separate terms
Php-flasher php-flasher/php-flasher ★ 377 · **Permissive** MIT · Library · Fit 2/5	PHP library adding customizable flash notification messages to Laravel, Symfony and PHP apps.	PHP developers adding in-app notification messages	Consulting/implementation Premium plugins/add-ons	• Notification UI for Laravel SaaS dashboards • Flash messages for Symfony admin panels • Alert components for PHP agency builds	Integration $1-3k per app, plugin packs $29 *Effort:* Medium (library, needs theme and UI polish) ⚠ MIT; supports Laravel and Symfony, those names are trademarks
Pushbits pushbits/server ★ 371 · **Permissive** ISC · App · Fit 2/5	Push notification server that delivers messages through Matrix as a Pushover alternative *Replaces:* Pushover, Pushbullet, Gotify, ntfy	Homelab users and sysadmins	Managed hosting Setup + support retainer Consulting/implementation	• Alert relay for small IT shops • Matrix notifications for sysadmins • Monitoring push for homelab clubs *Angle:* Matrix-based push relay	$2-5/mo per user *Effort:* Medium (Small Go server, needs Matrix account) ⚠ ISC license; tiny project, Matrix dependency
Wxpusher-sdk-python wxpusher/wxpusher-sdk-python ★ 289 · **Permissive** Apache-2.0 · Library · Fit 2/5	Python SDK for sending real-time messages to personal WeChat through WxPusher's API. *Replaces:* Server酱, PushPlus	Chinese developers pushing alerts to WeChat users	API/usage-based Consulting/implementation	• WeChat alerts for Chinese e-commerce sellers • Monitoring alerts for Shenzhen IoT firms • Order notifications for WeChat shop owners	Usage tiers via WxPusher, integration $1-3k *Effort:* Medium (SDK, depends on WxPusher service) ⚠ Apache-2.0; depends on third-party WxPusher service terms and WeChat policies

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Claude-pulse nikitadoudikov/claude-pulse ★ 247 · Permissive MIT · App · Fit 2/5	Local zero-dependency dashboard showing Claude Code token usage, context and session recovery. *Replaces:* ccusage, Claude Code usage dashboards	Developers and teams tracking Claude Code token spend	Setup + support retainer Premium plugins/add-ons	• Token budget dashboards for engineering managers • Claude Code cost reporting for agencies • Usage audits for startup dev teams	Team setup $300-800, support $50/mo per team *Effort:* Medium (local app, needs team features and auth) ⚠ MIT; uses Claude name; Anthropic trademark, avoid implying affiliation
Ble-scale-sync KristianP26/ble-scale-sync ★ 216 · GPL GPL-3.0 · Tool · Fit 2/5	Bridges Bluetooth smart scales to Garmin, Strava, MQTT and other health services. *Replaces:* Renpho app, Withings Health Mate	Fitness users with Bluetooth scales wanting data sync	Setup + support retainer Consulting/implementation	• Scale sync setup for corporate wellness programs • Body-composition tracking for gym members • Home Assistant scale integration for smart-home installers	Setup $100-300 per home, support $30/mo *Effort:* Medium (device-specific BLE drivers need maintenance) ⚠ GPL-3.0; device protocols may be reverse-engineered; health data privacy rules apply

RAG & Knowledge Bots · 32

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Dify langgenius/dify ★ 160.6k · Check NOASSERTION · Platform · Fit 5/5	LLM app platform for agentic workflows, RAG pipelines and model orchestration *Replaces:* OpenAI GPTs, Voiceflow, Flowise, Zapier AI	Startups, enterprises, AI agencies	Managed hosting Setup + support retainer Agency service	• Support chatbots for e-commerce stores • AI knowledge bots for law firms • Internal AI assistants for clinics *Angle:* LLM app builder SaaS for SMB chatbots	$29-199/mo per workspace *Effort:* High (Dify license bars multi-tenant and logo removal) ⚠ Modified Apache: no multi-tenant SaaS, must keep logo; read license
AnythingLLM Mintplex-Labs/anything-llm ★ 68.0k · Permissive MIT · App · Fit 5/5	All-in-one local-first AI app with RAG, agents and document chat *Replaces:* ChatGPT Team, Copilot, Notion AI, Glean	Teams, privacy-minded firms, consultants	Managed hosting Setup + support retainer White-label reseller	• Private document AI for law firms • Knowledge assistant for clinics • Support AI for agencies *Angle:* Private document chat for law firms	$10-30/user/mo *Effort:* Medium (MIT, multi-user mode built in) ⚠ MIT; AnythingLLM trademark, keep attributions
RAGFlow infiniflow/ragflow ★ 93.7k · Permissive Apache-2.0 · Platform · Fit 4/5	RAG engine with deep document parsing, agents, and a web UI for knowledge bases *Replaces:* Glean, Notion AI, Guru, Dust, Mendable	Teams chatting with private documents	Managed hosting Setup + support retainer Vertical SaaS	• Contract Q&A for law firms • Policy chatbot for HR teams • Technical manual search for manufacturers *Angle:* Enterprise document Q&A deployments	$50-300/mo per workspace *Effort:* Medium (Docker stack, team and tenant features exist) ⚠ RAGFlow trademark; heavy resource needs; Apache-2.0
Serviette pathwaycom/serviette ★ 58.7k · Permissive MIT · Platform · Fit 4/5	No-code RAG server keeping answers synced with documents across eight vector databases. *Replaces:* Glean, Vectara, Mendable	Small businesses wanting document Q&A bots	Managed hosting Setup + support retainer	• Policy Q&A bot for HR departments • Product manual assistant for equipment dealers • Contract answer bot for small law firms	Hosted $99-499/mo per knowledge base, free self-host *Effort:* Medium (server exists, needs auth and white-label UI) ⚠ MIT; Pathway framework dependency; verify sync and vector DB licenses
Khoj khoj-ai/khoj ★ 38.0k · AGPL AGPL-3.0 · App · Fit 4/5	Self-hostable AI second brain that searches your docs and the web with agents and automations *Replaces:* Notion AI, Mem, Perplexity, ChatGPT	Knowledge workers and researchers	Managed hosting Mobile app on top Setup + support retainer	• Research assistant for academics • Private notes AI for consultants • Document Q&A for solo lawyers *Angle:* Personal AI assistant subscriptions	$10-20/mo per user *Effort:* Medium (Django app, multi-user, apps for Obsidian and Emacs) ⚠ AGPL-3.0: publish server-side changes; Khoj trademark
Onyx onyx-dot-app/onyx ★ 33.3k · Check NOASSERTION · Platform · Fit 4/5	Open-source AI chat and enterprise search that connects workplace tools and works with any LLM *Replaces:* Glean, ChatGPT Enterprise, Guru, Notion AI	Mid-size companies wanting private AI search	Managed hosting Setup + support retainer Consulting/implementation	• Internal AI search for agencies • Slack and Drive Q&A for startups • Private company search for law firms *Angle:* Enterprise workplace search with connectors	$12-25/mo per seat *Effort:* Medium (Docker stack, EE features separate, tenancy via EE) ⚠ Onyx (ex Danswer) MIT core with EE folder paid; trademark

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
FastGPT labring/FastGPT ★ 30.0k · Check NOASSERTION · Platform · Fit 4/5	Knowledge-base and workflow platform for building LLM Q&A bots with visual flows *Replaces:* Dify, Chatbase, Voiceflow, Botpress	Chinese SMEs and automation agencies	Managed hosting White-label reseller Setup + support retainer	• Customer support bots for Chinese SMEs • Training Q&A bots for schools • Product FAQ bots for ecommerce *Angle:* Customer service knowledge bots for ecommerce	$30-150/mo per workspace *Effort:* Medium (Node app with multi-tenant, Chinese-first) ⚠ Custom license forbids multi-tenant SaaS resale and logo removal; read terms
MaxKB 1Panel-dev/MaxKB ★ 23.1k · GPL GPL-3.0 · Platform · Fit 4/5	Open-source enterprise platform for building knowledge-base and workflow AI agents. *Replaces:* Dify Cloud, Coze	Chinese and enterprise teams deploying internal AI assistants	Managed hosting Vertical SaaS	• Internal knowledge assistant for manufacturers • Customer support bot for e-commerce brands • Policy QA bot for government service halls	Managed deployment $500-2000/mo, enterprise license quote *Effort:* Medium (multi-tenant platform, needs branding and billing) ⚠ GPL-3.0: distributed builds ship source; 1Panel name and branding are theirs
LangBot langbot-app/LangBot ★ 18.8k · Permissive Apache-2.0 · Platform · Fit 4/5	Production platform for building agentic chatbots on WeChat, Slack, Discord and Telegram. *Replaces:* Botpress, Chatfuel, ManyChat	Businesses deploying AI support bots on chat apps	Managed hosting Vertical SaaS	• WeChat Work support bot for manufacturers • Telegram sales bot for Southeast Asian retailers • Discord community bot for esports teams	$49-199/mo per bot, self-host free *Effort:* Medium (multi-channel platform, needs white-label admin) ⚠ Apache-2.0; each chat platform's bot API terms and rate limits apply
SurfSense MODSetter/SurfSense ★ 16.8k · Permissive Apache-2.0 · App · Fit 4/5	Self-hosted NotebookLM-style research assistant that reads, transforms and edits your documents. *Replaces:* NotebookLM, Perplexity Spaces	Researchers and teams wanting private document AI	Managed hosting Vertical SaaS	• Private research assistant for biotech labs • Document Q&A for consulting firms • Knowledge base for legal research teams	$15-40/mo per seat, self-host free *Effort:* Medium (full app, needs branding and tenancy) ⚠ Apache-2.0; NotebookLM is Google's name, avoid in marketing; verify air-gap claims
Graphify Graphify-Labs/graphify ★ 143.8k · Permissive Apache-2.0 · Tool · Fit 3/5	Turns codebases, docs, schemas and PDFs into a queryable knowledge graph for coding agents. *Replaces:* Sourcegraph, Swimm	Engineering teams onboarding onto large legacy codebases	Setup + support retainer Consulting/implementation	• Legacy code mapping for banks • Onboarding graphs for outsourcing vendors • Codebase Q&A for government IT teams	Setup $3-10k per codebase, support $500/mo *Effort:* Medium (skill and CLI, needs enterprise hosting work) ⚠ Apache-2.0; indexes proprietary code, check where it sends data
Claude-mem thedotmack/claude-mem ★ 114.3k · Permissive Apache-2.0 · Tool · Fit 3/5	Captures agent session activity, compresses it with AI and reinjects context into later sessions. *Replaces:* Mem0 hosted, Zep memory	Developers running long coding-agent sessions daily	Managed hosting Vertical SaaS	• Shared memory for dev agencies' coding agents • Session memory for legal drafting teams • Context carryover for support agents	Team hosting $30-80/mo per seat, self-host free *Effort:* Medium (needs multi-tenant storage and access controls) ⚠ Apache-2.0; captures everything agents do, privacy and client data risk
Headroom headroomlabs-ai/headroom ★ 79.1k · Permissive Apache-2.0 · Tool · Fit 3/5	Compresses tool outputs, logs and RAG chunks before they reach an LLM. *Replaces:* LLMLingua hosted, token-optimization proxies	Teams running coding agents and RAG at high token cost	API/usage-based Managed hosting	• Token savings proxy for coding agencies • JSON log compression for SRE teams • RAG chunk trimming for legal research tools	Usage share of savings, or $199-799/mo proxy *Effort:* Medium (library and proxy, needs billing and tenancy) ⚠ Apache-2.0; compression may drop details, validate answers on your data
Mem0 mem0ai/mem0 ★ 68.6k · Permissive Apache-2.0 · Platform · Fit 3/5	Memory infrastructure that gives AI agents and apps persistent context across sessions. *Replaces:* Zep, Letta hosted, Pinecone memory	Product teams building personalized AI assistants	Managed hosting API/usage-based	• Memory layer for telehealth intake bots • Customer preference memory for ecommerce assistants • Persistent tutoring memory for edtech apps	Hosted tier $19-199/mo, enterprise custom *Effort:* Medium (API service, needs tenant and UI layers) ⚠ Apache-2.0; personal memory data raises GDPR and retention obligations

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
PrivateGPT zylon-ai/private-gpt ★ 57.6k · **Permissive** Apache-2.0 · App · Fit 3/5	Private API layer for running RAG and AI apps entirely on local models *Replaces:* Glean, ChatGPT Enterprise, Mendable	Privacy-restricted firms	Setup + support retainer Managed hosting Consulting/implementation	• On-prem document chat for law firms • Private AI for healthcare admin • Local Q&A for accounting practices *Angle:* On-prem private document AI for government	$2-8k per private deployment *Effort:* Medium (Python API, no multi-tenant, UI basic) ⚠ Zylon is the commercial upsell; PrivateGPT trademark; Apache-2.0
LightRAG HKUDS/LightRAG ★ 40.6k · **Permissive** MIT · Framework · Fit 3/5	Fast graph-based retrieval-augmented generation framework for document question answering. *Replaces:* Glean, Vectara	Teams building document question answering with graphs	Consulting/implementation API/usage-based	• Graph Q&A for pharma regulatory documents • Contract relationship mapping for law firms • Research literature graphs for university libraries	Build $8-25k, hosted pipeline $300-1000/mo *Effort:* Medium (framework, needs ingestion and UI) ⚠ MIT; graph indexing costs LLM calls heavily; validate answer accuracy
Graphrag microsoft/graphrag ★ 36.6k · **Permissive** MIT · Framework · Fit 3/5	Modular graph-based retrieval system from Microsoft for querying large text corpora. *Replaces:* Glean, Vectara	Enterprises querying large private document collections	Consulting/implementation Setup + support retainer	• Investigation document search for compliance teams • Research corpus querying for think tanks • Incident report analysis for safety teams	Implementation $15-40k, support $2-5k/mo *Effort:* Medium (heavy indexing pipeline, needs ops and UI) ⚠ MIT; Microsoft brand, indexing costs high; verify LLM provider terms
Graphiti getzep/graphiti ★ 32.6k · **Permissive** Apache-2.0 · Framework · Fit 3/5	Framework building real-time knowledge graphs that give AI agents evolving memory. *Replaces:* Zep hosted, Neo4j-based agent memory	Teams building agents that need evolving memory	Managed hosting Consulting/implementation	• Account memory graphs for SaaS support bots • Client history graphs for wealth advisors • Patient context graphs for care coordinators	Managed graph service $200-800/mo, build $10-25k *Effort:* High (needs graph database ops and tenancy) ⚠ Apache-2.0; graph database operations and LLM costs need planning
Kotaemon Cinnamon/kotaemon ★ 25.9k · **Permissive** Apache-2.0 · App · Fit 3/5	Clean open-source RAG UI for chatting with documents with citations *Replaces:* ChatGPT Enterprise, NotebookLM, Mendable, Guru	End users and small teams	Setup + support retainer Managed hosting Consulting/implementation	• Document chat for accountants • Private research assistant for students • Policy Q&A for HR teams *Angle:* Branded document QA for research firms	$15-40/mo per team *Effort:* Medium (Gradio app, light multi-user) ⚠ Apache-2.0; Gradio UI limits branding and tenancy
DB-GPT eosphoros-ai/DB-GPT ★ 20.3k · **Permissive** MIT · Platform · Fit 3/5	Open-source agentic platform for querying databases and building data assistants. *Replaces:* Vanna AI, Databricks Genie	Enterprises wanting natural-language database querying	Consulting/implementation Vertical SaaS	• Natural-language reporting for hospital admins • Sales data assistant for retail chains • Finance query bot for mid-size banks	Deployment $15-50k, support $2-5k/mo *Effort:* High (data security, SQL safety, heavy integration) ⚠ MIT; text-to-SQL can run unsafe queries; database access controls mandatory
Eliza elizaOS/eliza ★ 19.8k · **Permissive** MIT · Platform · Fit 3/5	Open-source framework for building and deploying autonomous AI agents across platforms. *Replaces:* Character.ai, Botpress hosted	Developers building social and community AI agents	Managed hosting Consulting/implementation	• Community moderation agents for Discord servers • Social media assistant for creators • Customer chat agents for game studios	Hosted agents $20-100/mo per agent, setup $2k *Effort:* Medium (framework, needs agent UI and hosting) ⚠ MIT; plugins vary in license; social platform API terms apply
Memori MemoriLabs/Memori ★ 17.5k · **Check** NOASSERTION · Platform · Fit 3/5	LLM-agnostic memory layer turning agent conversations into persistent structured state. *Replaces:* Mem0 hosted, Zep	Enterprises needing persistent agent memory across systems	Managed hosting Consulting/implementation	• Persistent memory for claims-handling agents • Customer account state for telecom agents • Case memory for legal intake bots	Enterprise hosting $1-4k/mo, integration $15k *Effort:* Medium (infra layer, needs tenancy and admin UI) ⚠ NOASSERTION license, read first; enterprise memory raises data retention issues

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Easy-dataset ConardLi/easy-dataset ★ 15.1k · Check NOASSERTION · Tool · Fit 3/5	Tool creating fine-tuning, RAG and evaluation datasets from your own documents. *Replaces:* Scale AI data engine, Argilla hosted	AI teams fine-tuning models on private documents	Consulting/implementation Vertical SaaS	• Training datasets from manuals for equipment makers • Clinical guideline Q&A sets for health AI • Eval sets from contracts for legal startups	Consulting $5-15k per dataset, SaaS $199/mo *Effort:* Medium (app with pipelines, needs auth and export work) ⚠ NOASSERTION license, read first; generated data may inherit source document rights
Prompt-Engineering-Guide dair-ai/Prompt-Engineering-Guide ★ 79.9k · Permissive MIT · Content · Fit 2/5	Open guides, papers and notebooks covering prompt engineering, RAG and AI agents. *Replaces:* Udemy prompt courses, DeepLearning.AI short courses	Developers and students learning prompting and agents	Training/courses Content/membership	• Prompt engineering course for marketing managers • RAG primer for legal tech trainees • Agent curriculum for corporate IT teams	Course $99-299 per seat, team workshops $2k *Effort:* Medium (content-heavy, needs course platform) ⚠ MIT; community guides include third-party papers, check each source's license
Ai-agent-book bojieli/ai-agent-book ★ 57.4k · Permissive Apache-2.0 · Content · Fit 2/5	Chinese book on AI agent design principles and engineering, with companion code.	Chinese engineers learning agent system design	Training/courses Content/membership	• Agent engineering course for Chinese backend developers • Companion code kit for university AI labs • Corporate agent handbook for IT managers	Print edition $20-40, course bundle $99 *Effort:* Low (book and code, translate and repackage) ⚠ Apache-2.0 repo; book text may be separately licensed, verify first
LlamaIndex run-llama/llama_index ★ 52.8k · Permissive MIT · Framework · Fit 2/5	Data framework for connecting LLMs with documents, indexes, and agents *Replaces:* Glean, Dust, Mendable	AI developers	Consulting/implementation Training/courses API/usage-based	• RAG builds for law firms • Document agents for insurers • Knowledge search for consultancies *Angle:* RAG consulting and data connectors	$150-250/hr consulting *Effort:* High (Framework, you build product and UI) ⚠ LlamaIndex trademark; LlamaCloud is separate paid product
PageIndex VectifyAI/PageIndex ★ 40.2k · Permissive MIT · Framework · Fit 2/5	Vectorless RAG that builds a reasoning-navigable document index for retrieval. *Replaces:* Pinecone-based RAG services, Vectara	Teams querying long professional documents accurately	Consulting/implementation Setup + support retainer	• Long filing Q&A for equity research analysts • Regulatory manual navigation for utilities • Textbook reasoning search for publishers	Build $10-20k per corpus, support $800/mo *Effort:* Medium (framework, needs ingestion and UI) ⚠ MIT; reasoning-based retrieval costs more LLM tokens per query
Quivr The-Vibe-Company/quivr ★ 39.6k · Permissive MIT · Framework · Fit 2/5	Engine for turning continuous content streams into search and monitoring with durable ingestion *Replaces:* Glean, Mem, Notion AI	Developers building knowledge tools	Consulting/implementation Managed hosting Agency service	• Monitoring feeds for market research • Company knowledge search for small firms • News watch bots for PR agencies *Angle:* Second-brain AI for consultants	$2-6k per project *Effort:* High (Recently refocused, earlier product removed) ⚠ Project pivoted away from chat-with-docs app; unclear maturity
Haystack deepset-ai/haystack ★ 26.9k · Permissive Apache-2.0 · Framework · Fit 2/5	Python AI orchestration framework for building RAG and agent pipelines *Replaces:* LlamaIndex Cloud, Dust, Azure AI Search	AI engineers	Consulting/implementation Training/courses Agency service	• Enterprise search for insurers • RAG for legal firms • Document Q&A pipelines for banks *Angle:* Custom search and RAG builds for enterprises	$150-250/hr consulting *Effort:* High (Framework, no UI product) ⚠ deepset Cloud is the paid product; Haystack is a trademark
Ai-guide liyupi/ai-guide ★ 21.9k · Check NOASSERTION · Content · Fit 2/5	Large Chinese AI resource guide covering tutorials, prompts, models and news.	Chinese developers and beginners exploring AI tools	Content/membership Training/courses	• Vibe coding course for Chinese beginners • Chinese AI tool directory for SMB owners • Prompt pack for Chinese content creators	Membership $5-15/mo, course $49-99 one-time *Effort:* Low (content directory, easy to rebrand) ⚠ NOASSERTION license, read first; aggregates third-party links and copyrighted tutorials

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Turbovec RyanCodrai/turbovec ★ 17.5k · **Permissive** MIT · Library · Fit 2/5	Rust vector index with Python bindings for fast similarity search. *Replaces:* Pinecone, Milvus managed	Developers building search over large embedding sets	Consulting/implementation Setup + support retainer	• Image search for stock photo marketplaces • Semantic search for patent databases • Product matching for ecommerce catalogs	Integration $5-15k per index, support $400/mo *Effort:* High (library, needs serving and persistence layer) ⚠ MIT; young project, verify index accuracy and maintenance before production
Garden-skills ConardLi/garden-skills ★ 14.6k · **Permissive** MIT · Starter · Fit 2/5	Collection of agent skills covering web design, knowledge retrieval and image generation.	Developers equipping coding agents with reusable skills	Premium plugins/add-ons Marketplace	• Web design skill pack for agencies • Retrieval skills for internal knowledge teams • Image generation skills for ecommerce studios	Skill packs $19-49 one-time, team bundle $199 *Effort:* Low (skill files, easily repackaged) ⚠ MIT; skills may wrap third-party APIs with their own terms

RPA & Browser Automation · 14

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
EasySpider NaiboWang/EasySpider ★ 44.8k · **AGPL** AGPL-3.0 · App · Fit 4/5	Visual no-code web crawler and browser automation tool with graphical task design. *Replaces:* Octoparse, ParseHub, Browse AI	Market researchers and sales teams scraping websites	Premium plugins/add-ons Managed hosting	• Competitor price scraping for ecommerce teams • Lead list building for B2B sales teams • Real estate listing collection for brokers	Desktop license $30-60 one-time, cloud runs $99/mo *Effort:* Medium (Windows app, needs cloud runner and billing) ⚠ AGPL-3.0: hosted modifications must publish source; scraping sites may breach terms
Skyvern Skyvern-AI/skyvern ★ 23.4k · **AGPL** AGPL-3.0 · Platform · Fit 4/5	AI agent automating browser-based workflows such as form filling and data entry. *Replaces:* UiPath, Automation Anywhere	Operations teams automating repetitive web portal tasks	Managed hosting Vertical SaaS	• Insurance portal data entry for brokers • Government form submission for accounting firms • Supplier portal updates for procurement teams	$199-799/mo per team, self-host free *Effort:* Medium (needs hosted runner, auth and branding) ⚠ AGPL-3.0: hosted modifications must publish source; portal ToS may forbid bots
Robotframework robotframework/robotframework ★ 12.0k · **Permissive** Apache-2.0 · Framework · Fit 3/5	Generic keyword-driven framework for acceptance testing and robotic process automation. *Replaces:* Tricentis Tosca, UiPath test suite	QA teams automating acceptance tests and RPA	Training/courses Consulting/implementation	• Robot Framework training for insurance QA teams • Acceptance test automation for bank release teams • RPA test suites for government IT departments	Training $1-2k per seat, test automation build $10-30k *Effort:* Medium (framework, needs libraries and reporting) ⚠ Apache-2.0; Robot Framework name used by foundation, check trademark policy
Workflow-use browser-use/workflow-use ★ 4.2k · **AGPL** AGPL-3.0 · Tool · Fit 3/5	Creates and runs browser workflows from recorded actions, with AI for variable steps. *Replaces:* UiPath, Power Automate Desktop	Ops teams repeating web-based tasks each week	Managed hosting Setup + support retainer	• Recurring portal reports for property managers • Weekly price checks for distributors • Compliance portal submissions for small accountants	Hosted runs $99-299/mo per team, setup $1.5k *Effort:* Medium (workflow runner, needs hosting and UI) ⚠ AGPL-3.0: hosted modifications must publish source; target site terms apply
Openrpa open-rpa/openrpa ★ 3.1k · **Weak copyleft** MPL-2.0 · App · Fit 3/5	Open-source enterprise RPA desktop designer and runner for workflow automation. *Replaces:* UiPath, Automation Anywhere, Blue Prism	Enterprises replacing paid RPA licenses	Setup + support retainer Consulting/implementation	• RPA migration for mid-size insurers • Back-office bots for shared service centers • Document processing bots for public agencies	Support contract $8-20k per year, implementation $15-40k *Effort:* Medium (desktop app, needs packaging and support) ⚠ MPL-2.0: modified MPL files stay open; RPA bots interact with protected systems

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Agentql tinyfish-io/agentql ★ 1.5k · **Permissive** MIT · Tool · Fit 3/5	Query language and API that extracts structured data from web pages using Playwright. *Replaces:* Diffbot, Apify, Bright Data	Developers extracting structured web data at scale	API/usage-based Consulting/implementation	• Price monitoring extraction for retail analysts • Listing data pipelines for property portals • Public filing extraction for investment researchers	Usage-based API, integration $3-8k *Effort:* Medium (API and SDK, needs hosting and dashboard) ⚠ MIT; scraping may breach target sites' terms; protect API keys
Robotgo go-vgo/robotgo ★ 10.9k · **Permissive** Apache-2.0 · Library · Fit 2/5	Go library for cross-platform GUI automation, keyboard, mouse and screen control. *Replaces:* AutoHotkey, Sikuli	Go developers automating desktop GUI tasks	Consulting/implementation Setup + support retainer	• Desktop test automation for Windows ERP vendors • Kiosk control scripts for retail chains • Legacy app automation for insurance back offices	Integration $4-10k per tool, support $300/mo *Effort:* High (library, needs product and safety controls) ⚠ Apache-2.0; automation of others' desktops needs consent and security review
Xiaobei TeamWiseFlow/xiaobei ★ 8.7k · **Check** NOASSERTION · App · Fit 2/5	Chinese AI agent for self-media lead generation aimed at small and micro businesses. *Replaces:* Huoke content marketing tools, WeChat marketing SaaS	Chinese small businesses wanting social media leads	Vertical SaaS Setup + support retainer	• Lead generation for Chinese dental clinics • Social content agent for furniture shops • Customer acquisition bot for tutoring centers	$30-100/mo per account, setup $300 *Effort:* Medium (agent tied to platform scraping, needs branding) ⚠ NOASSERTION license, read first; Chinese platform automation may breach terms
Wxauto cluic/wxauto ★ 7.4k · **Permissive** Apache-2.0 · Tool · Fit 2/5	Automates the Windows WeChat desktop client to send and receive messages. *Replaces:* WeChat Work bot platforms, chatbot services	Chinese businesses automating WeChat customer messages	Setup + support retainer Consulting/implementation	• Order notifications for WeChat shop owners • Auto-replies for Chinese property agencies • Message logging for small trading firms	Setup $300-800 per PC, support $50/mo *Effort:* High (desktop UI automation, fragile across versions) ⚠ Apache-2.0; WeChat terms may prohibit automation; account bans are a real risk
RPA-Python tebelorg/RPA-Python ★ 5.5k · **Permissive** Apache-2.0 · Library · Fit 2/5	Python package for building robotic process automation scripts. *Replaces:* UiPath, Automation Anywhere	Python developers scripting office process automation	Consulting/implementation Training/courses	• Invoice entry automation for accounting firms • Report download bots for logistics teams • Data entry scripts for small clinics	Automation build $5-15k per workflow, training $1k *Effort:* High (package only, needs orchestration and UI) ⚠ Apache-2.0; RPA scripts break when target software changes
Integuru Integuru-AI/Integuru ★ 4.8k · **AGPL** AGPL-3.0 · App · Fit 2/5	AI agent that reverse-engineers platform internal APIs to build integrations automatically. *Replaces:* Merge.dev, Unified.to, Zapier	Companies needing integrations with platforms lacking APIs	Consulting/implementation Managed hosting	• Integrations for legacy vendor portals in insurance • Private API connectors for logistics software • Data sync for niche SaaS apps	Integration build $5-15k each, hosting $300/mo *Effort:* High (fragile reverse engineering, heavy maintenance) ⚠ AGPL-3.0; reverse-engineering internal APIs may breach platform terms
Browser-agent magnitudedev/browser-agent ★ 4.1k · **Permissive** Apache-2.0 · Framework · Fit 2/5	Open-source vision-first AI agent that operates web browsers from screenshots. *Replaces:* Browserbase, OpenAI Operator	Developers building agents that operate websites	API/usage-based Consulting/implementation	• QA agents for ecommerce checkout flows • Web research agents for market analysts • Form-filling agents for accounting firms	Usage pass-through plus $149/mo platform fee *Effort:* High (agent core, needs runtime and safety layer) ⚠ Apache-2.0; autonomous browsing can violate site terms and cause errors

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
AutoMate yuruotong1/autoMate ★ 4.0k · **Permissive** MIT · App · Fit 2/5	Local AI desktop assistant that turns natural language into computer automation tasks. *Replaces:* Manus, Microsoft Power Automate	Small businesses automating repetitive desktop chores	Setup + support retainer Premium plugins/add-ons	• Desktop chore automation for Chinese SMEs • Spreadsheet data entry bot for shop bookkeepers • Report generation for small trading firms	Desktop license $30-80 one-time, setup $200-500 *Effort:* High (desktop agent, OS-level permissions and safety) ⚠ MIT; desktop control agents carry security risk; ensure user approval controls
OSWorld xlang-ai/OSWorld ★ 3.3k · **Permissive** Apache-2.0 · Tool · Fit 2/5	Benchmark environment testing multimodal AI agents on open-ended real computer tasks.	AI labs and vendors evaluating computer-use agents	Consulting/implementation Training/courses	• Agent evaluation services for computer-use startups • Desktop task benchmark for enterprise software vendors • Agent QA training for AI teams	Evaluation service $10-40k per agent release *Effort:* High (research benchmark, heavy VM infrastructure) ⚠ Apache-2.0; benchmark task data may carry separate licenses; VM setup heavy

Recommendation Engines · 10

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Gorse gorse-io/gorse ★ 9.9k · **Permissive** Apache-2.0 · Platform · Fit 3/5	Open-source recommender system engine with classical and LLM-based rankers. *Replaces:* AWS Personalize, Algolia Recommend, Recombee	E-commerce and media sites needing personalized recommendations	Managed hosting Setup + support retainer	• Product recommendations for Shopify stores • Article suggestions for regional news sites • Course matching for online education platforms	Managed cluster $300-1000/mo, setup $5-10k *Effort:* Medium (server exists, needs tenancy and dashboards) ⚠ Apache-2.0; recommendation data is personal data, GDPR and consent apply
Alink alibaba/Alink ★ 3.6k · **Permissive** Apache-2.0 · Platform · Fit 3/5	Machine learning algorithm platform built on Apache Flink for batch and streaming data. *Replaces:* Spark MLlib commercial distributions, Databricks ML	Data platform teams running ML on Flink streams	Consulting/implementation Setup + support retainer	• Streaming fraud scoring for payment processors • Real-time recommendations for ad platforms • Sensor anomaly detection for factories	Deployment $20-60k, support $3-8k/mo *Effort:* High (big-data stack, JVM and Flink ops heavy) ⚠ Apache-2.0; needs Flink cluster operations expertise; Alibaba brand, avoid implying endorsement
Lightfm lyst/lightfm ★ 5.1k · **Permissive** Apache-2.0 · Library · Fit 2/5	Python implementation of LightFM, a hybrid recommendation algorithm.	Data scientists building hybrid recommender models	Consulting/implementation Training/courses	• Hybrid recommenders for online bookshops • Course recommenders for corporate learning teams • Product matching for B2B marketplaces	Build $6-15k per recommender, training $1k *Effort:* High (library, needs data pipeline and serving) ⚠ Apache-2.0; verify maintenance status; prefer actively maintained alternatives
Implicit benfred/implicit ★ 3.8k · **Permissive** MIT · Library · Fit 2/5	Fast Python collaborative filtering library for implicit feedback datasets.	Data scientists building implicit-feedback recommenders	Consulting/implementation Training/courses	• Music playlist recommenders for indie streaming apps • Basket recommendations for grocery retailers • Article suggestions for news apps	Build $5-12k per system, workshop $800 *Effort:* High (library, needs data pipeline and serving) ⚠ MIT; implicit feedback models need careful evaluation to avoid misleading metrics

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
SparrowRecSys wzhe06/SparrowRecSys ★ 2.8k · **Permissive** Apache-2.0 · Framework · Fit 2/5	Deep learning recommender demo project with ranking models and a web front end.	Engineers learning production recommender architecture	Training/courses Consulting/implementation	• Recsys training for data engineers • Demo architecture for retail analytics pitches • Recommender starter for media startups	Workshop $1.5-3k per team, build $10-25k *Effort:* High (demo project, not production-ready) ⚠ Apache-2.0; demo data and models are sample-only, not production-tested
Torchrec meta-pytorch/torchrec ★ 2.6k · **Permissive** BSD-3-Clause · Library · Fit 2/5	PyTorch library for building and training large-scale recommendation models.	Ad tech and retail ML teams training large recommenders	Consulting/implementation Training/courses	• Large recommender training for ad networks • Embedding model training for marketplaces • GPU training workshops for ML platform teams	Build $20-60k, GPU training workshop $3k *Effort:* High (library, needs GPU infrastructure and serving) ⚠ BSD-3-Clause; Meta and PyTorch names need care; needs GPU clusters
Recommenders tensorflow/recommenders ★ 2.0k · **Permissive** Apache-2.0 · Library · Fit 2/5	TensorFlow library for building and evaluating recommender system models.	TensorFlow teams building retrieval and ranking models	Consulting/implementation Training/courses	• Retrieval models for fashion ecommerce • Two-tower ranking for news apps • Recsys workshops for TensorFlow shops	Build $8-20k per model, workshop $1.5k *Effort:* High (library, needs data pipeline and serving) ⚠ Apache-2.0; TensorFlow brand belongs to Google; check trademark usage
QRec Coder-Yu/QRec ★ 1.6k · **Check** NONE · Framework · Fit 2/5	Python framework for quickly implementing and comparing recommender system algorithms.	Researchers benchmarking recommender algorithms quickly	Training/courses Consulting/implementation	• Algorithm benchmarking for recsys researchers • Recsys teaching labs for universities • Baseline comparisons for vendor evaluations	Benchmark study $3-8k, workshop $1k *Effort:* High (research framework, TensorFlow-based, needs modernizing) ⚠ NONE license, read first; research code with unclear reuse rights
Transformers4Rec NVIDIA-Merlin/Transformers4Rec ★ 1.3k · **Permissive** Apache-2.0 · Library · Fit 2/5	PyTorch library for sequential and session-based recommendation with transformer models.	Ecommerce teams modeling user session behavior	Consulting/implementation Training/courses	• Session recommenders for online fashion retailers • Next-article models for news publishers • Sequential recsys workshops for data teams	Build $10-25k, GPU tuning service $5k *Effort:* High (library, GPU-heavy, needs serving) ⚠ Apache-2.0; NVIDIA Merlin ecosystem dependencies, GPU-heavy stack
Torch-rechub datawhalechina/torch-rechub ★ 1.2k · **Permissive** MIT · Framework · Fit 2/5	Lightning-based PyTorch framework for building and extending recommendation models.	PyTorch developers building recommender models quickly	Consulting/implementation Training/courses	• Recsys prototypes for ad tech startups • Model benchmarking for media analytics teams • Recommender workshops for Python developers	Build $8-18k per model, workshop $1k *Effort:* High (framework, needs data and serving layers) ⚠ MIT; recsys models need validation on your own data before production

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Evolution API evolution-foundation/evolution-api ★ 10.1k · **Check** NOASSERTION · Platform · Fit 4/5	Open-source WhatsApp integration API with multi-instance, webhooks, and chatbot integrations *Replaces:* Twilio WhatsApp, Wati, Z-API, Respond.io	Latin American SMBs and agencies	Managed hosting White-label reseller Setup + support retainer	• WhatsApp CRM for Brazilian clinics • Order bots for pizzerias • Booking reminders for barbershops *Angle:* WhatsApp API reselling for agencies	$15-50/mo per instance *Effort:* Medium (Docker API, multi-instance built in) ⚠ Uses unofficial WhatsApp protocol; ban risk; Apache with additional conditions, read license

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
WAHA devlikeapro/waha ★ 7.8k · Permissive Apache-2.0 · App · Fit 4/5	WhatsApp HTTP API with dashboard and multiple engines, configurable in one click *Replaces:* Twilio WhatsApp, Wati, Z-API, MessageBird	Developers, small agencies, SMBs	Managed hosting White-label reseller Setup + support retainer	• WhatsApp alerts for e-commerce stores • Support inbox for small clinics • Reminder service for tutors *Angle:* WhatsApp HTTP API hosting	$19-49/mo per session *Effort:* Low (Docker image with dashboard and REST API) ⚠ Unofficial protocol: ToS risk; paid Plus edition adds features
httpSMS NdoleStudio/httpsms ★ 6.3k · AGPL AGPL-3.0 · App · Fit 4/5	Turns an Android phone into an SMS gateway with an HTTP API and web dashboard *Replaces:* Twilio, Vonage, Textlocal, MessageBird	Small businesses with local SMS needs	Managed hosting Setup + support retainer Vertical SaaS	• SMS reminders for dental clinics • Delivery notifications for local couriers • Appointment texts for salons *Angle:* Android phone as SMS API	$5-20/mo per phone *Effort:* Medium (Go and Vue app plus Android app, multi-user) ⚠ AGPL-3.0: publish server changes; carrier plan limits and SMS compliance
SMS Gateway for Android capcom6/android-sms-gateway ★ 6.0k · Permissive Apache-2.0 · App · Fit 4/5	Android app and API to send and receive SMS through your own phone *Replaces:* Twilio, Vonage, Textlocal, ClickSend	Small businesses wanting cheap SMS	Managed hosting Setup + support retainer Vertical SaaS	• SMS gateway for rural clinics • Order alerts for market vendors • Delivery notices for local couriers *Angle:* Low-cost SMS API for emerging markets	$4-15/mo per device *Effort:* Medium (Android app and server, device-based) ⚠ Apache-2.0; carrier limits and consent rules; Android is a trademark
Jasmin SMS Gateway jookies/jasmin ★ 1.2k · Check NOASSERTION · Platform · Fit 4/5	Open-source SMS gateway with SMPP routing, billing hooks, and HTTP API *Replaces:* Twilio, Infobip, Sinch, Kannel services	SMS aggregators and telecom resellers	Managed hosting White-label reseller Consulting/implementation	• SMS aggregation for regional telcos • Bulk SMS for banks • OTP delivery for fintech apps *Angle:* SMS aggregator business	$0.005-0.03 per SMS markup *Effort:* High (Python and Twisted, SMPP connections required) ⚠ Telecom regulation, sender ID rules, and carrier contracts; license NOASSERTION, read
PlaySMS playsms/playsms ★ 894 · GPL GPL-3.0 · App · Fit 4/5	Web interface for SMS gateways with bulk messaging, contacts, and user accounts *Replaces:* Twilio, Textlocal, ClickSend, Sendinblue SMS	Small marketers and SMS resellers	White-label reseller Managed hosting Setup + support retainer	• Bulk SMS for church groups • Appointment reminders for clinics • SMS marketing for local stores *Angle:* Bulk SMS portal for resellers	$10-40/mo per sender account *Effort:* Medium (PHP app, multi-user and credits built in) ⚠ GPL-3.0; carrier gateway contracts and SMS consent laws
OpenWA rmyndharis/OpenWA ★ 16.6k · Permissive MIT · Platform · Fit 3/5	Self-hosted WhatsApp API gateway for sending messages and automating chats. *Replaces:* Twilio WhatsApp API, WATI, Respond.io	Businesses wanting self-hosted WhatsApp messaging	Setup + support retainer Managed hosting	• Appointment reminders for dental clinics • Order updates for small ecommerce shops • Alerts for property management teams	Setup $500-1500, hosting $30-80/mo per number *Effort:* Medium (API gateway, needs admin UI and compliance) ⚠ MIT; unofficial-style APIs risk number bans; WhatsApp trademark, Meta policy
Matterbridge 42wim/matterbridge ★ 7.6k · Permissive Apache-2.0 · Tool · Fit 3/5	Bridges messages between many chat platforms like Slack, Discord, Telegram and IRC. *Replaces:* Zapier chat connectors, Slack Connect	Communities and teams running multiple chat platforms	Setup + support retainer Managed hosting	• Cross-platform bridges for open-source communities • Slack-Discord sync for remote agencies • Chat relays for gaming clans	Setup $300-800 per bridge, hosting $40/mo *Effort:* Medium (Go service, needs admin UI and onboarding) ⚠ Apache-2.0; each bridged platform's terms apply; bridging private chats may breach policy
Go-whatsapp-web-multidevice aldinokemal/go-whatsapp-web-multidevice ★ 5.0k · Permissive MIT · Platform · Fit 3/5	Self-hosted WhatsApp REST API with web UI, multiple accounts, webhooks and Chatwoot. *Replaces:* Twilio WhatsApp API, Chat-API	Small teams automating WhatsApp messages via API	Managed hosting Setup + support retainer	• WhatsApp notifications for dental clinic chains • Multi-account support desks for agencies • Chatwoot integration for helpdesk vendors	Hosting $25-60/mo per instance, setup $400 *Effort:* Medium (API server, needs tenancy and billing) ⚠ MIT; WhatsApp unofficial-style automation risks bans; Meta trademark rules apply

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Textbelt typpo/textbelt ★ 3.4k · **Permissive** MIT · App · Fit 3/5	Free-to-run SMS sending API that routes through carriers and gateways *Replaces:* Twilio, Vonage, ClickSend	Developers needing simple SMS	API/usage-based Managed hosting Setup + support retainer	• SMS API for hobby apps • Alerting for small SaaS • Verification codes for niche apps *Angle:* Simple SMS API service	$0.03-0.08 per SMS *Effort:* Medium (Node app, needs carrier access, simple) ⚠ MIT; free self-host path unreliable; SMS regulation (TCPA, A2P)
Whaticket-community canove/whaticket-community ★ 2.1k · **Permissive** MIT · App · Fit 3/5	Open-source helpdesk turning WhatsApp messages into tickets shared by multiple agents. *Replaces:* Zendesk, Intercom, Respond.io	Small support teams handling customers on WhatsApp	Managed hosting Vertical SaaS	• WhatsApp support desk for car dealerships • Ticketing for local clinic reception • Shared inbox for real estate agencies	$29-79/mo per workspace, self-host free *Effort:* Medium (multi-user app, needs branding and billing) ⚠ MIT; likely uses unofficial WhatsApp connections; ban risk and Meta terms apply
whatsapp-web.js wwebjs/whatsapp-web.js ★ 22.9k · **Permissive** Apache-2.0 · Library · Fit 2/5	Node.js library that automates WhatsApp Web through a browser *Replaces:* Twilio WhatsApp, Wati, MessageBird, Respond.io	Developers building WhatsApp bots	API/usage-based Consulting/implementation Managed hosting	• Appointment reminders for clinics • Order notifications for small shops • Group broadcast tools for community managers *Angle:* WhatsApp bots for small businesses	$10-40/mo per number *Effort:* Medium (Library, needs API wrapper and session mgmt) ⚠ Violates WhatsApp ToS; account bans likely; use official Business API for commercial
Baileys WhiskeySockets/Baileys ★ 11.6k · **Permissive** MIT · Library · Fit 2/5	TypeScript WebSocket API for WhatsApp Web without a browser *Replaces:* Twilio WhatsApp, Wati, MessageBird	Developers building WhatsApp tools	API/usage-based Consulting/implementation Managed hosting	• Chatbots for local restaurants • Bulk notifier for schools • CRM integration for real estate agents *Angle:* WhatsApp automation SaaS	$10-40/mo per number *Effort:* Medium (Library, build everything above it) ⚠ Unofficial reverse engineering; WhatsApp ban risk and ToS violation
Whatsmeow tulir/whatsmeow ★ 7.8k · **Weak copyleft** MPL-2.0 · Library · Fit 2/5	Go library implementing the WhatsApp multi-device web protocol for custom clients.	Go developers building WhatsApp integrations	Consulting/implementation Setup + support retainer	• WhatsApp alerts for Go-based logistics platforms • Chat integration for ecommerce backends • Support bridges for helpdesk vendors	Integration $5-15k per product, support $500/mo *Effort:* High (protocol library, needs product and ops) ⚠ MPL-2.0 file-level copyleft; unofficial protocol use risks WhatsApp account bans
Venom vynect/venom ★ 6.6k · **Permissive** Apache-2.0 · Framework · Fit 2/5	JavaScript framework for building WhatsApp Web bots handling media and conversations.	Node developers building WhatsApp chat bots	Consulting/implementation Setup + support retainer	• Customer service bots for regional retailers • Media broadcast bots for news publishers • Appointment bots for clinics	Bot build $3-8k, support $200/mo *Effort:* High (bot framework, needs product and compliance) ⚠ Apache-2.0; WhatsApp Web automation may violate WhatsApp terms; ban risk
Notify nikoksr/notify ★ 3.9k · **Permissive** MIT · Library · Fit 2/5	Go library for sending notifications through many messaging services via one API.	Go developers adding alerts to backend services	Consulting/implementation Setup + support retainer	• Ops alerts for Go-based SaaS backends • Deploy notices for fintech release teams • Job alerts for data pipeline vendors	Integration $2-5k per service, support $150/mo *Effort:* High (library, needs product and config layer) ⚠ MIT; upstream messaging APIs have separate terms and rate limits
Whatsapp-chatgpt askrella/whatsapp-chatgpt ★ 3.8k · **Check** NONE · App · Fit 2/5	WhatsApp bot that answers chats with ChatGPT and generates images with DALL-E. *Replaces:* ManyChat, Respond.io AI	Small businesses wanting AI replies on WhatsApp	API/usage-based Setup + support retainer	• AI replies for hair salon bookings • FAQ bot for local restaurants • Image-generation bot for social media shops	Setup $300-900, usage pass-through plus $30/mo *Effort:* Medium (bot code, needs safe hosting and keys) ⚠ NONE license, read first; WhatsApp bot policies, OpenAI terms and bans apply

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
zuck.js ramonszo/zuck.js ★ 3.7k · Permissive MIT · Library · Fit 2/5	JavaScript library that adds Instagram-style story carousels to any website. *Replaces:* Storyly, Pinterest-style carousel SaaS	Publishers and ecommerce sites adding story carousels	Premium plugins/add-ons Consulting/implementation	• Story carousels for regional news sites • Product story widgets for fashion ecommerce • Recipe story widgets for food blogs	Plugin pack $29-79 one-time, integration $1-3k *Effort:* Medium (widget library, needs styling and analytics) ⚠ MIT; avoid Instagram-like branding that may confuse users or trigger complaints
Wppconnect wppconnect-team/wppconnect ★ 3.5k · Check NOASSERTION · Library · Fit 2/5	Node.js library automating WhatsApp Web sessions for sending messages and building bots. *Replaces:* Twilio WhatsApp API, WATI	Node developers building WhatsApp automation	Consulting/implementation Setup + support retainer	• Appointment reminders for beauty salons • Order confirmation bots for small ecommerce • Support replies for car repair shops	Integration $3-8k, support $200/mo *Effort:* High (library, needs product and compliance layer) ⚠ NOASSERTION license, read first; WhatsApp Web automation may breach Meta terms
Easy-sms overtrue/easy-sms ★ 3.3k · Permissive MIT · Library · Fit 2/5	Multi-channel SMS sending library supporting many SMS providers through one interface. *Replaces:* Twilio, Aliyun SMS	Developers sending SMS across several providers	Consulting/implementation Setup + support retainer	• SMS failover for fintech OTP flows • Notification SMS for Chinese clinic chains • Provider switching for ecommerce order texts	Integration $1.5-4k, support $150/mo *Effort:* High (library, needs provider accounts and UI) ⚠ MIT; SMS providers' terms, sender registration and carrier rules apply
Mautrix WhatsApp mautrix/whatsapp ★ 1.9k · AGPL AGPL-3.0 · Tool · Fit 2/5	Matrix-WhatsApp bridge that puppets WhatsApp chats inside Matrix *Replaces:* Beeper, Texts, Zendesk messaging	Matrix users and community managers	Managed hosting Setup + support retainer Consulting/implementation	• WhatsApp bridge for Matrix communities • Unified inbox for small support teams • Chat consolidation for freelancers *Angle:* Unified messaging bridges for teams	$5-12/mo per user *Effort:* High (Bridge needs Matrix homeserver stack) ⚠ AGPL-3.0: publish server changes; WhatsApp ToS risk
Gammu gammu/gammu ★ 596 · GPL GPL-2.0 · Library · Fit 2/5	Toolkit and daemon for controlling mobile phones and GSM modems from computers *Replaces:* Twilio, ClickSend, Textlocal	Developers building SMS gateways	Setup + support retainer Hardware kits/assembly Consulting/implementation	• GSM modem SMS boxes for factories • Alerting gateways for utilities • SMS kiosks for rural clinics *Angle:* GSM modem SMS solutions	$150-400 per modem gateway kit *Effort:* High (Low-level C library, hardware dependent) ⚠ GPL-2.0; modem hardware needed; carrier SMS limits

Screen Recording · 17

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
OBS Studio obsproject/obs-studio ★ 79.1k · GPL GPL-2.0 · App · Fit 3/5	Free software for live streaming and screen recording with scenes and plugins *Replaces:* Streamlabs, XSplit, vMix, Wirecast	Streamers, educators, event producers	Training/courses Premium plugins/add-ons Setup + support retainer	• OBS templates for streamers • Overlay packs for esports teams • Livestream setup for churches *Angle:* Branded streaming setups and plugins	$19-79 per overlay or course *Effort:* High (Desktop C++ app, GPL, hard to rebrand) ⚠ GPL-2.0; OBS name and logo are trademarks of the project
Recordly webadderallorg/Recordly ★ 36.3k · Check NOASSERTION · App · Fit 3/5	Cross-platform app creating polished product demo videos without video editing skills. *Replaces:* Screen Studio, Loom, Camtasia	SaaS marketers and founders making product demos	Vertical SaaS Premium plugins/add-ons	• Demo video maker for B2B SaaS launches • Tutorial recorder for software training teams • Feature walkthroughs for indie app developers	$12-29/mo per user or one-time $79 *Effort:* Medium (desktop app, needs signing and branding) ⚠ NOASSERTION license, read first; codecs and bundled fonts may need separate licenses
Screenity alyssaxuu/screenity ★ 19.0k · GPL GPL-3.0 · Tool · Fit 3/5	Privacy-friendly Chrome extension screen recorder with annotations and no limits *Replaces:* Loom, Vidyard, CloudApp, Screencastify	Educators, support teams, remote workers	Vertical SaaS Managed hosting Premium plugins/add-ons	• Lesson recording for tutors • Bug-report recorder for QA teams • Training video capture for HR *Angle:* Loom-style Chrome recorder SaaS	$6-12/mo per seat *Effort:* Medium (Chrome extension, needs backend for sharing) ⚠ GPL-3.0; Chrome Web Store publisher required; Screenity trademark

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Asciinema asciinema/asciinema ★ 17.9k · GPL GPL-3.0 · Tool · Fit 3/5	Records and shares terminal sessions as lightweight text-based replays *Replaces:* Loom for terminals, Carbon, Replit Replays	Developers and DevRel teams	Managed hosting Training/courses Premium plugins/add-ons	• Terminal replays for coding bootcamps • Hosted demos for CLI tool makers • Docs embeds for DevOps teams *Angle:* Terminal recording hosting	$5-15/mo per team *Effort:* Medium (Recorder and player, server separate) ⚠ GPL-3.0; server is separate repo; asciinema.org is vendor-hosted
Openscreen getopenscreen/openscreen ★ 6.5k · Permissive MIT · App · Fit 3/5	Free screen recorder for demo videos on Windows, macOS and Linux, without watermarks. *Replaces:* Screen Studio, Loom, Camtasia	Product teams making demo videos without subscriptions	Premium plugins/add-ons Vertical SaaS	• Demo video recorder for indie hackers • Feature demos for open-source launch teams • Walkthrough recorder for sales engineers	Pro templates $19-49 one-time, team support $99/mo *Effort:* Medium (desktop app, needs signing and branding) ⚠ MIT; codec and GPU driver dependencies; verify Mac and Windows signing costs
ShareX ShareX/ShareX ★ 40.8k · GPL GPL-3.0 · App · Fit 2/5	Windows screen capture and file sharing tool with automation workflows *Replaces:* Snagit, Loom, CloudApp, Greenshot	Windows power users	Training/courses Premium plugins/add-ons Setup + support retainer	• Capture workflow setup for support teams • Documentation screenshots for tech writers • Custom uploader configs for agencies *Angle:* Screenshot upload hosting plans	$29-79 per workflow pack *Effort:* High (Windows-only desktop app) ⚠ GPL-3.0; ShareX name is a trademark; Windows only
Flameshot flameshot-org/flameshot ★ 31.4k · GPL GPL-3.0 · App · Fit 2/5	Cross-platform screenshot tool with annotation and quick editing *Replaces:* Snagit, Greenshot, Lightshot, CleanShot	Developers and support teams	Training/courses Setup + support retainer Premium plugins/add-ons	• Annotated screenshot kits for support teams • Docs screenshot service for tech writers • Training for QA reporting *Angle:* Enterprise screenshot tooling	$15-40 per template pack *Effort:* High (Desktop Qt app, difficult to commercialize) ⚠ GPL-3.0; competing with free built-in OS screenshot tools
ScreenToGif NickeManarin/ScreenToGif ★ 27.9k · Check MS-PL · App · Fit 2/5	Windows tool that records a screen area and edits it into GIF or video *Replaces:* Snagit, LICEcap, CloudApp, Loom	Windows users, documentation writers	Training/courses Premium plugins/add-ons Setup + support retainer	• GIF tutorials for software docs • Demo clip service for SaaS support • Short clips for tech bloggers *Angle:* Tutorial GIF production service	$9-29 one-time pack *Effort:* High (Windows-only .NET app) ⚠ Microsoft Public License; Windows only
rrweb rrweb-io/rrweb ★ 20.4k · Permissive MIT · Library · Fit 2/5	JavaScript library to record and replay web page sessions via DOM snapshots *Replaces:* FullStory, Hotjar, LogRocket, Smartlook	Developers building replay features	API/usage-based Consulting/implementation Vertical SaaS	• Session replay for support-ticket tools • Replay for ecommerce funnels • UX replay for usability labs *Angle:* Session recording SaaS	$29-149/mo by sessions *Effort:* High (Recorder only, no backend) ⚠ MIT; privacy and consent obligations for recordings
Kap wulkano/Kap ★ 19.4k · Permissive MIT · App · Fit 2/5	Open-source macOS screen recorder built with web technology *Replaces:* CleanShot, Loom, ScreenFlow, Snagit	Mac users and developers	Premium plugins/add-ons Training/courses Setup + support retainer	• Plugin packs for Mac screen recording • Clip tools for dev advocates • Demo capture for startup founders *Angle:* Branded screen recorder for teams	$19-39 one-time *Effort:* High (macOS Electron app, Apple notarization needed) ⚠ MIT; Mac-only; Kap development slowed
Skill-recorder microsoft/skill-recorder ★ 5.7k · Permissive MIT · App · Fit 2/5	Desktop app recording work sessions and turning them into reusable AI agent skills. *Replaces:* UiPath Task Mining, Celonis	Ops teams capturing repetitive desktop workflows	Setup + support retainer Consulting/implementation	• Workflow capture for claims processors • Task mining for shared service centers • Skill building for internal IT helpdesks	Pilot $5-12k, per-seat license $20-40/mo *Effort:* High (tied to Copilot SDK and Microsoft ecosystem) ⚠ MIT; Copilot SDK and Microsoft ecosystem terms apply; screen data sensitive
Kooha SeaDve/Kooha ★ 3.6k · GPL GPL-3.0 · App · Fit 2/5	Simple screen recorder for Linux desktops, built for the GNOME environment. *Replaces:* Loom, Camtasia	Linux users recording quick screen clips	Setup + support retainer Premium plugins/add-ons	• Screen capture setup for Linux support desks • Training clips for GNOME-based offices • Bug-report recorder for Linux QA teams	Setup $150-400 per workstation, support $25/mo *Effort:* Low (single app, small configuration changes) ⚠ GPL-3.0: distributed builds ship source; GNOME name use needs care

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
BetterCapture jsattler/BetterCapture ★ 1.7k · **Permissive** MIT · App · Fit 2/5	Free, open-source macOS screen recorder with a native look and feel. *Replaces:* Loom, ScreenFlow, Camtasia for Mac	Mac users recording quick screen videos	Premium plugins/add-ons Setup + support retainer	• Quick recording tool for Mac support teams • Free recorder for Mac-based design studios • Bundled recorder for Mac education labs	Paid pro features $9-19 one-time, free core *Effort:* Medium (macOS app, needs signing and notarization) ⚠ MIT; Apple notarization and code-signing costs for distributed builds
Aperture wulkano/Aperture ★ 1.3k · **Permissive** MIT · App · Fit 2/5	macOS screen recording library and tool built on Apple's capture APIs. *Replaces:* ScreenFlow, Loom	Mac developers building screen recording features	Consulting/implementation Setup + support retainer	• Recording module for Mac training software • Screen capture SDK for QA tool vendors • Recording feature for Mac support apps	Integration $4-10k, support $300/mo *Effort:* High (library, needs UI and product layer) ⚠ MIT; relies on Apple screen capture permissions and API changes
MFCMouseEffect sqmw/MFCMouseEffect ★ 878 · **Permissive** MIT · App · Fit 2/5	Cross-platform mouse effects and keystroke visualizer with gesture-to-shortcut mapping.	Presenters and streamers showing keys and clicks	Premium plugins/add-ons Marketplace	• Keystroke overlays for coding tutorial streamers • Click effects for training video producers • Input visualizers for remote-teaching instructors	Plugin packs $5-15 one-time, free core *Effort:* Medium (desktop app, WASM plugin system needs docs) ⚠ MIT; Windows and macOS input hooks may trigger antivirus or permission prompts
Azayaka Mnpn/Azayaka ★ 765 · **Check** NONE · App · Fit 2/5	Small macOS menu bar app recording screen and system audio via ScreenCaptureKit. *Replaces:* QuickTime Player, Loom	Mac users recording quick screen and audio clips	Premium plugins/add-ons Setup + support retainer	• Menu bar recorder for Mac training teams • Audio-plus-screen capture for podcast hosts • Clip recorder for Mac-based support staff	Paid pro build $9-15 one-time, free core *Effort:* Low (small menu bar app, few features) ⚠ NONE license, read first; Apple ScreenCaptureKit permissions and notarization apply
Screenarc tamnguyenvan/screenarc ★ 730 · **GPL** GPL-3.0 · App · Fit 2/5	Cross-platform screen recorder and editor with automatic cinematic zooms and mouse tracking. *Replaces:* Screen Studio, Loom	Product marketers and creators making polished demos	Vertical SaaS Premium plugins/add-ons	• Auto-zoom demo videos for SaaS founders • Mouse-tracked tutorials for coding educators • Cinematic app walkthroughs for mobile studios	$15-29/mo per user, one-time $89 license *Effort:* Medium (desktop app, needs packaging and licensing) ⚠ GPL-3.0: distributed binaries must ship source; sales must respect that

Mathesar mathesar-foundation/mathesar ★ 5.2k · GPL GPL-3.0 · App · Fit 4/5	Spreadsheet-like interface for viewing and editing Postgres databases *Replaces:* Airtable, Retool, NocoDB, Baserow	Non-technical staff using Postgres	Managed hosting Setup + support retainer Vertical SaaS	• Airtable replacement for nonprofits • Postgres front end for clinics • Inventory sheets for small manufacturers *Angle:* Postgres spreadsheet UI for nonprofits	$8-20/mo per user *Effort:* Medium (Django and Svelte app, Postgres-only) ⚠ GPL-3.0: hosting is fine; Mathesar trademark
Univer dream-num/univer ★ 22.9k · Permissive Apache-2.0 · Framework · Fit 3/5	Office SDK offering embeddable spreadsheets, docs and slides with calculation and collaboration *Replaces:* Google Sheets, Microsoft Excel Online, Handsontable, SpreadJS	Developers embedding spreadsheets in their products	Consulting/implementation API/usage-based Premium plugins/add-ons	• Embedded spreadsheet for fintech dashboards • Excel-like editor for ERP vendors • Online sheets for survey tools *Angle:* Embedded office suite SDK licensing	$99-999/mo per product, enterprise tier *Effort:* High (SDK needs integration, advanced features paid) ⚠ Apache-2.0 core; Pro features commercial, Univer trademark
Rowy buildship-ai/rowy ★ 6.8k · Check NOASSERTION · App · Fit 3/5	Low-code backend platform with spreadsheet-like UI over Firestore and cloud functions *Replaces:* Airtable, Retool, Google Sheets, Notion Databases	Firebase developers and ops teams	Managed hosting Consulting/implementation Vertical SaaS	• Back-office for Firebase startups • Content admin for mobile apps • Order tracking for small shops *Angle:* Firestore spreadsheet UI for startups	$15-50/mo per workspace *Effort:* Medium (Firebase-tied app, theming limited) ⚠ Rowy shifted focus to BuildShip; Firebase dependency; read license
Radzen-blazor radzenhq/radzen-blazor ★ 4.4k · Permissive MIT · Library · Fit 3/5	Free Blazor component library with data grids, schedulers and charts. *Replaces:* Telerik UI for Blazor, DevExpress Blazor	.NET teams building internal business apps	Consulting/implementation Premium plugins/add-ons	• Scheduling screens for clinic staff apps • Reporting dashboards for manufacturers • Admin grids for .NET insurance back offices	Premium themes $49-99 one-time, build $10-30k *Effort:* Medium (component library, needs theming and app build) ⚠ MIT; verify which components and themes you rely on are free
Revogrid revolist/revogrid ★ 3.5k · Permissive MIT · Library · Fit 3/5	High-performance virtual data grid component with spreadsheet-like editing. *Replaces:* AG Grid, Handsontable, Excel Online embed	Product teams building spreadsheet-like data entry	Consulting/implementation Premium plugins/add-ons	• Inventory entry grids for warehouse software • Budget editors for finance SaaS • Bulk price editors for ecommerce admin	Integration $6-15k per grid, support $400/mo *Effort:* High (web component, needs app features built) ⚠ MIT; verify performance and feature parity against commercial grids
Ethercalc audreyt/ethercalc ★ 3.1k · Check NOASSERTION · App · Fit 3/5	Real-time collaborative web spreadsheet with no sign-up needed *Replaces:* Google Sheets, Airtable, Excel Online	Event organizers and small teams	Managed hosting White-label reseller Setup + support retainer	• Shared spreadsheets for volunteer rosters • Live scoreboards for tournaments • Sign-up sheets for community groups *Angle:* Collaborative spreadsheets for classrooms	$5-12/mo per team *Effort:* Medium (Node and Redis app, simple, dated) ⚠ Metadata NOASSERTION; CPAL attribution license, read terms
Tablecn sadmann7/tablecn ★ 6.4k · Permissive MIT · Library · Fit 2/5	shadcn/ui data table components with sorting, filtering, pagination and infinite scroll. *Replaces:* AG Grid Enterprise, Handsontable	React teams building admin dashboards with data tables	Premium plugins/add-ons Consulting/implementation	• Admin tables for logistics dashboards • Order grids for ecommerce back offices • Patient list tables for clinic portals	Premium table pack $49-99 one-time, build $3-6k *Effort:* Low (copy-in components, easy to restyle) ⚠ MIT; depends on shadcn/ui and Radix, check their licenses and versions
Reui keenthemes/reui ★ 4.0k · Permissive MIT · Starter · Fit 2/5	Design-forward shadcn UI kit with over a thousand free interface patterns. *Replaces:* Tailwind UI, Untitled UI	Startups and agencies building React interfaces fast	Premium plugins/add-ons Agency service	• Landing page kits for fintech startups • Dashboard templates for dental practice software • Pattern library for agency design systems	Premium pattern pack $79-149 one-time *Effort:* Low (copy-paste components, easy to restyle) ⚠ MIT; some free patterns may borrow designs; check attribution and trademark use

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
React-pivot davidguttman/react-pivot ★ 1.1k · **Check** NONE · Library · Fit 2/5	React data grid component with pivot-table-style summaries and filtering. *Replaces:* AG Grid pivot, Handsontable	React developers building pivot-style reports	Consulting/implementation Setup + support retainer	• Pivot reports for regional sales teams • Expense summaries for accounting SaaS • Survey result pivots for research firms	Integration $3-8k per report, support $200/mo *Effort:* High (old component, needs maintenance) ⚠ NONE license; read first; possibly dated, check React version support
Extensions ng-matero/extensions ★ 500 · **Permissive** MIT · Library · Fit 2/5	Angular Material extension components for richer admin and data UIs. *Replaces:* PrimeNG Pro	Angular teams building material-styled admin apps	Consulting/implementation Premium plugins/add-ons	• Admin panels for logistics firms • Data tables for HR tools • Form widgets for Angular insurance portals	Integration $2-6k per app, support $200/mo *Effort:* Medium (Angular library, needs theming and assets) ⚠ MIT; Angular Material version compatibility must be checked per release
Coherence oracle/coherence ★ 474 · **Check** UPL-1.0 · Platform · Fit 2/5	Java in-memory data grid for caching and distributed computing, community edition. *Replaces:* Redis Enterprise, Hazelcast Enterprise	Java enterprises needing distributed caching	Consulting/implementation Setup + support retainer	• Session caching for bank core systems • Distributed cache for telecom billing • Grid caching for airline pricing engines	Implementation $30-80k, support $5-15k/yr *Effort:* High (heavy Java stack, enterprise integration needed) ⚠ UPL-1.0 license; Oracle trademark; community edition lacks enterprise features
Ej2-javascript-ui-controls syncfusion/ej2-javascript-ui-controls ★ 449 · **Check** NOASSERTION · Library · Fit 2/5	JavaScript UI controls library with grids, charts and schedulers for web apps. *Replaces:* Telerik Kendo UI, DevExtreme	Enterprise web teams building data-heavy front ends	Consulting/implementation Setup + support retainer	• Scheduling UIs for clinic booking systems • Grid screens for warehouse portals • Chart dashboards for utility operators	Integration $8-20k per app, license via vendor *Effort:* High (large control suite, vendor-licensed) ⚠ NOASSERTION; Syncfusion commercial license terms apply, check revenue limits
Vaadin-grid vaadin/vaadin-grid ★ 407 · **Permissive** Apache-2.0 · Library · Fit 2/5	Free web component data grid for sorting, filtering and large data sets. *Replaces:* Telerik Grid, AG Grid	Java and web teams building admin data grids	Consulting/implementation Premium plugins/add-ons	• Admin grids for Java ERP vendors • Claims list screens for insurers • Log viewers for DevOps tools	Integration $4-10k per screen, support $300/mo *Effort:* Medium (web component, needs theming and integration) ⚠ Apache-2.0; Vaadin brand; Pro features and enterprise components are paid separately
Ej2-react-ui-components syncfusion/ej2-react-ui-components ★ 398 · **Check** NOASSERTION · Library · Fit 2/5	React UI controls library with grids, charts, schedulers and form inputs. *Replaces:* Kendo UI for React, DevExtreme React	React teams building enterprise dashboards and forms	Consulting/implementation Setup + support retainer	• Scheduler UIs for clinic booking apps • Grid screens for logistics portals • Chart panels for energy monitoring tools	Integration $6-15k per app, vendor license extra *Effort:* High (vendor-licensed control suite, heavy) ⚠ NOASSERTION; vendor license needed beyond community terms, verify eligibility
Ej2-vue-ui-components syncfusion/ej2-vue-ui-components ★ 316 · **Check** NOASSERTION · Library · Fit 2/5	Vue UI controls library with grids, charts, schedulers and inputs. *Replaces:* Kendo UI for Vue, DevExtreme Vue	Vue teams building enterprise admin screens	Consulting/implementation Setup + support retainer	• Admin grids for Vue-based fintech tools • Booking calendars for salon chains • Metric charts for hospital ops teams	Integration $5-12k per app, vendor license extra *Effort:* High (vendor-licensed control suite, Vue wrappers) ⚠ NOASSERTION; Syncfusion terms govern use, eligibility for free tier must be verified

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
JQWidgets jqwidgets/jQWidgets ★ 307 · Check NONE · Library · Fit 2/5	Multi-framework UI widget library including grids, charts and schedulers. *Replaces:* Kendo UI, Telerik	Enterprise teams maintaining legacy jQuery apps	Setup + support retainer Consulting/implementation	• Legacy jQuery grid upgrades for government portals • Scheduler widgets for clinic systems • Chart widgets for manufacturing dashboards	Migration $10-30k per app, support $2k/yr *Effort:* High (commercial widget suite, licensing and migration) ⚠ NONE license; commercial license needed; verify terms before embedding
Ej2-angular-ui-components syncfusion/ej2-angular-ui-components ★ 294 · Check NOASSERTION · Library · Fit 2/5	Angular UI controls library with grids, charts, schedulers and form elements. *Replaces:* Kendo UI for Angular, PrimeNG	Angular teams building data-heavy enterprise screens	Consulting/implementation Setup + support retainer	• Scheduler screens for field service apps • Grid-based approval workflows for banks • Chart panels for hospital analytics	Integration $6-14k per app, vendor license extra *Effort:* High (vendor-licensed Angular controls, heavy) ⚠ NOASSERTION; vendor terms govern licensing, confirm free-tier eligibility first
Grid svar-widgets/grid ★ 229 · Permissive MIT · Library · Fit 2/5	Lightweight, fast Svelte datagrid component with rich features. *Replaces:* AG Grid, Svelte-Tabulator	Svelte developers needing fast tabular UIs	Consulting/implementation Premium plugins/add-ons	• Order tables for Svelte ecommerce admin • Inventory grids for small warehouses • Live data views for trading tools	Integration $3-8k per screen, support $200/mo *Effort:* Medium (component library, needs theming and features) ⚠ MIT; young Svelte component, verify API stability and maintenance
UiGrid orneryd/uiGrid ★ 142 · Permissive MIT · Library · Fit 2/5	Multi-platform data grid remastered from AngularJS ui-grid for Rust, Angular, React and web components. *Replaces:* AG Grid, Syncfusion grid	Teams porting legacy AngularJS grids to modern stacks	Consulting/implementation Setup + support retainer	• Legacy grid migrations for insurers • Rust desktop grid tools for trading firms • Grid upgrades for ERP vendors	Migration $5-15k per app, support $300/mo *Effort:* High (port work, multiple targets, young project) ⚠ MIT; remaster of older AngularJS ui-grid; verify each platform's maturity

OpenVoice myshell-ai/OpenVoice ★ 38.2k · **Permissive** MIT · Model · Fit 3/5	Instant voice cloning model with cross-language style control *Replaces:* ElevenLabs, Play.ht, Resemble AI, HeyGen voice	Audio and video localization builders	API/usage-based Managed hosting Consulting/implementation	• Multilingual dubbing for course creators • Brand voice cloning for ad agencies • Voice assistants for apps *Angle:* Multilingual voice cloning for dubbing	$0.03-0.12 per minute *Effort:* Medium (Model repo, wrap in API) ⚠ MIT; consent and impersonation regulations; MyShell trademark
CosyVoice QwenAudio/CosyVoice ★ 24.3k · **Permissive** Apache-2.0 · Model · Fit 3/5	Multilingual voice generation model with inference, training and deployment tooling. *Replaces:* ElevenLabs, Google Cloud TTS	Teams building multilingual voice products	API/usage-based Consulting/implementation	• Multilingual IVR voices for telecom providers • Voiceovers for regional e-learning platforms • Voice agents for hospitality bookings	Usage $0.01-0.04 per minute, deployment $10k *Effort:* High (full stack, GPU serving, voice policies) ⚠ Apache-2.0; voice cloning consent rules apply; check base model terms
F5-TTS SWivid/F5-TTS ★ 15.5k · **Permissive** MIT · Model · Fit 3/5	Zero-shot voice cloning TTS model using flow matching *Replaces:* ElevenLabs, Play.ht, Murf	Developers and audio studios	API/usage-based Managed hosting Consulting/implementation	• Voice-over for explainer videos • Narration for language learning apps • Dubbing for regional creators *Angle:* Zero-shot voice cloning SaaS	$0.02-0.08 per minute *Effort:* Medium (Model repo with demo UI, add API) ⚠ Code MIT but pretrained model CC-BY-NC, commercial use not allowed
EmotiVoice netease-youdao/EmotiVoice ★ 8.5k · **Permissive** Apache-2.0 · Model · Fit 3/5	Multi-voice text-to-speech engine with prompt-controlled emotion and style. *Replaces:* ElevenLabs, Azure expressive TTS	Game and app teams needing expressive character voices	API/usage-based Consulting/implementation	• Expressive NPC voices for indie games • Emotional narration for audiobook studios • Meditation app narration with mood control	Usage $0.005-0.02 per second, integration $5k *Effort:* High (engine needs serving and voice pipelines) ⚠ Apache-2.0; Youdao brand; voice cloning consent and model weight terms apply
MeloTTS myshell-ai/MeloTTS ★ 7.7k · **Permissive** MIT · Model · Fit 3/5	Multilingual text-to-speech library supporting six major languages including Chinese. *Replaces:* Google Cloud TTS, Amazon Polly	Developers building multilingual voice features	Consulting/implementation API/usage-based	• Voice prompts for Asian-market apps • Multilingual IVR for regional clinics • Narration for language-learning apps	Integration $4-10k, usage hosting $0.01/min *Effort:* Medium (library, needs voice quality and hosting) ⚠ MIT; MyShell brand; voice cloning and model terms on hosted services apply
Abogen denizsafak/abogen ★ 6.2k · **Permissive** MIT · App · Fit 3/5	Generates audiobooks from EPUB, PDF and text files with synced captions. *Replaces:* Speechify, ElevenLabs Reader, Audible AI narration	Self-publishing authors making audiobooks cheaply	Vertical SaaS Premium plugins/add-ons	• Audiobooks for indie fiction authors • Narrated textbook chapters for online schools • Caption-synced guides for corporate training	Hosted $15-39/mo per author, one-time narration $99 *Effort:* Medium (desktop app, needs packaging and voice choices) ⚠ MIT; copyrighted books cannot be narrated for resale without rights
Piper OHF-Voice/piper1-gpl ★ 6.2k · **GPL** GPL-3.0 · Tool · Fit 3/5	Fast local neural text-to-speech engine for many languages and devices *Replaces:* Amazon Polly, Google TTS, ElevenLabs, Microsoft Azure TTS	Smart-home and embedded builders	Hardware kits/assembly API/usage-based Setup + support retainer	• Offline voices for smart speakers • Accessibility reader for libraries • Announcement voices for transit signs *Angle:* Offline TTS for kiosks and IVR	$0.003 per 1k characters *Effort:* Medium (CLI and library, small and fast) ⚠ GPL-3.0: distributed apps must ship source; voice model licenses vary

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Kokoro-FastAPI remsky/Kokoro-FastAPI ★ 5.7k · **Permissive** Apache-2.0 · Tool · Fit 3/5	Dockerized OpenAI-compatible speech API serving Kokoro text-to-speech models. *Replaces:* OpenAI TTS API, ElevenLabs API	Developers needing cheap self-hosted TTS endpoints	Managed hosting API/usage-based	• Self-hosted TTS for hospital phone trees • Voice endpoints for Shopify audio product pages • Narration API for news publishers	Managed endpoint $99-399/mo, setup $1.5k *Effort:* Medium (Docker server, needs auth and scaling) ⚠ Apache-2.0; Kokoro model license and voice-pack terms must be checked
MOSS-TTS-Nano OpenMOSS/MOSS-TTS-Nano ★ 4.6k · **Permissive** Apache-2.0 · Model · Fit 3/5	Small multilingual speech model for real-time CPU speech with voice cloning. *Replaces:* ElevenLabs, Azure Neural TTS	Edge device makers needing offline voice output	Hardware kits/assembly Consulting/implementation	• Offline voice for kiosks and smart speakers • Voice output for industrial handhelds • Low-cost voice for classroom robots	Integration $5-12k per device line, royalty model quote *Effort:* High (model on device, quality and licensing work) ⚠ Apache-2.0; voice cloning consent rules; check model card for usage limits
MOSS-TTS OpenMOSS/MOSS-TTS ★ 4.3k · **Permissive** Apache-2.0 · Model · Fit 3/5	Open speech model family for long-form narration, dialogue, voice design and streaming. *Replaces:* ElevenLabs, OpenAI TTS API	Studios producing long-form narration at scale	API/usage-based Consulting/implementation	• Long-form narration for podcast networks • Dialogue for explainer video studios • Sound-effect-rich audio for game studios	Usage $0.02-0.06 per minute, setup $5k *Effort:* High (large model family, GPU serving needed) ⚠ Apache-2.0; voice cloning consent rules and sound effect source licenses apply
Applio IAHispano/Applio ★ 4.0k · **Permissive** MIT · App · Fit 3/5	Voice conversion app focused on ease of use and high-quality results. *Replaces:* Voicemod, Voice.ai	Creators and game modders changing voices	Premium plugins/add-ons Vertical SaaS	• Voice swaps for YouTube character channels • Voice conversion for indie game dialogue • Voice dubbing previews for film studios	Desktop license $20-40 one-time, voice model packs $10 *Effort:* Medium (desktop app, needs model packs and UI) ⚠ MIT; voice conversion of real people needs consent; deepfake laws apply
TTS-WebUI rsxdalv/TTS-WebUI ★ 3.3k · **Permissive** MIT · App · Fit 3/5	Single web interface bundling many text-to-speech and audio generation models. *Replaces:* ElevenLabs web app, Murf AI	Small studios testing many open audio models	Setup + support retainer Consulting/implementation	• Model testbed for audio agencies • Voice prototyping for podcast producers • Local audio lab for university media labs	Setup $500-1.5k per studio, support $150/mo *Effort:* Medium (many extensions, needs curation and auth) ⚠ MIT; bundled models each have separate licenses; many extensions raise security risk
VoxCPM OpenBMB/VoxCPM ★ 41.2k · **Permissive** Apache-2.0 · Model · Fit 2/5	Tokenizer-free multilingual speech model for voice design and voice cloning. *Replaces:* ElevenLabs, Play.ht	Studios and apps needing custom voices	API/usage-based Consulting/implementation	• Custom narrator voices for audiobook studios • Brand voice design for call-center vendors • Character voices for indie game studios	Usage $0.02-0.08 per minute, voice design $2-5k *Effort:* High (model serving and GPU work needed) ⚠ Apache-2.0; voice cloning needs speaker consent and deepfake-law review
ChatTTS 2noise/ChatTTS ★ 40.0k · **AGPL** AGPL-3.0 · Model · Fit 2/5	Generative speech model producing natural conversational dialogue audio. *Replaces:* Google WaveNet, Amazon Polly Neural	Developers building conversational voice products	API/usage-based Consulting/implementation	• Voices for podcast-style explainer tools • Dialogue voices for language apps • Voice demos for call-center vendors	Usage-based hosted TTS, integration $5-10k *Effort:* High (model serving needed, AGPL constraints) ⚠ AGPL-3.0: hosted modifications publish source; synthetic speech disclosure rules apply

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Bark suno-ai/bark ★ 39.3k · Permissive MIT · Model · Fit 2/5	Text-prompted generative audio model producing speech, music, and sound effects *Replaces:* ElevenLabs, Play.ht, Murf	Developers and audio hobbyists	API/usage-based Consulting/implementation Managed hosting	• Voice-over clips for indie games • Expressive narration for podcasts • Sound effects for video editors *Angle:* Expressive audio generation API	$0.02-0.08 per minute *Effort:* High (Research model, unreliable, slow) ⚠ MIT; unstable output quality; project dormant; Suno trademark
RVC WebUI RVC-Project/Retrieval-based-Voice-Conversion-WebUI ★ 39.1k · Permissive MIT · App · Fit 2/5	Web UI to train and run voice conversion models from short voice samples *Replaces:* ElevenLabs Voice Changer, Voicemod, Kits.AI	Musicians and VTubers	Managed hosting Premium plugins/add-ons Setup + support retainer	• Voice changer for VTubers • Vocal cover tool for singers • Voice swap for dubbing *Angle:* Voice conversion for music producers	$8-20/mo credits *Effort:* High (Single-user Gradio app, ethics burdens) ⚠ Voice impersonation and consent law; copyright on covers
MockingBird babysor/MockingBird ★ 36.9k · Check NOASSERTION · App · Fit 2/5	Real-time voice cloning toolkit generating speech from a few seconds of sample audio. *Replaces:* ElevenLabs voice cloning, Resemble AI	Creators wanting quick voice cloning for content	API/usage-based Consulting/implementation	• Voiceover samples for indie game studios • Voice prototypes for audiobook producers • Dubbing previews for regional film distributors	Usage-based $0.01-0.05 per second, setup $3k *Effort:* High (research-grade cloning, consent and model work) ⚠ NOASSERTION license; voice cloning without consent is restricted in many places
Index-tts index-tts/index-tts ★ 25.0k · Check NOASSERTION · Model · Fit 2/5	Controllable zero-shot text-to-speech system for cloning voices from short samples. *Replaces:* ElevenLabs, Microsoft Azure Custom Neural Voice	Enterprises building branded voice assistants	Consulting/implementation Setup + support retainer	• Branded IVR voices for banks • Voice prompts for hospital phone systems • Narration for corporate e-learning libraries	Deployment $10-25k, GPU hosting $800/mo *Effort:* High (needs GPU serving and consent workflows) ⚠ NOASSERTION license, read first; voice cloning consent and misuse policies apply
Dia nari-labs/dia ★ 19.4k · Permissive Apache-2.0 · Model · Fit 2/5	Text-to-speech model generating realistic multi-speaker dialogue in a single pass. *Replaces:* NotebookLM audio overviews, PlayHT	Podcast and video producers making dialogue audio	API/usage-based Consulting/implementation	• Scripted podcast dialogues for explainers • Dialogue audio for educational role-plays • Ad script voice tests for agencies	Usage $0.02-0.06 per minute, integration $4k *Effort:* High (model serving and voice consent work) ⚠ Apache-2.0; synthetic speakers can mislead listeners; disclose AI-generated audio
Tortoise TTS neonbjb/tortoise-tts ★ 14.9k · Permissive Apache-2.0 · Model · Fit 2/5	High-quality multi-voice text-to-speech system with slow generation *Replaces:* ElevenLabs, Play.ht, Murf	Researchers and audiobook hobbyists	API/usage-based Consulting/implementation Managed hosting	• Audiobook voice samples for authors • Voice-overs for indie films • Podcast intros for creators *Angle:* Audiobook narration service	$0.05-0.15 per minute *Effort:* High (Slow inference, superseded by newer models) ⚠ Apache-2.0; cloning ethics; superseded and slow
Edge-tts rany2/edge-tts ★ 12.5k · Check NOASSERTION · Library · Fit 2/5	Python library using Microsoft Edge's online text-to-speech service without Edge. *Replaces:* Azure Text to Speech, Google Cloud TTS	Python developers needing free-tier TTS voices	Consulting/implementation Setup + support retainer	• Voice narration for school reading apps • Voiced alerts for hobby home labs • Audio blog versions for news sites	Integration $1-3k, support $150/mo *Effort:* High (unofficial service wrapper, fragile) ⚠ NOASSERTION license; relies on unofficial Microsoft endpoint, may break or violate terms
TTS mozilla/TTS ★ 10.2k · Weak copyleft MPL-2.0 · Library · Fit 2/5	Deep learning text-to-speech toolkit for training and running speech synthesis models. *Replaces:* Amazon Polly, Google Cloud TTS	Researchers and TTS engineers training custom voices	Consulting/implementation Training/courses	• Custom voice training for regional language projects • TTS research workshops for university labs • Voice builds for accessibility startups	Voice build $10-25k, training $1.5k per cohort *Effort:* High (research toolkit, needs productization) ⚠ MPL-2.0: modified files stay open; Mozilla-origin, verify maintenance status

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Espnet espnet/espnet ★ 10.0k · **Permissive** Apache-2.0 · Library · Fit 2/5	End-to-end speech processing toolkit covering recognition, synthesis and translation. *Replaces:* Nuance, Google Speech suites	Speech researchers and enterprise voice teams	Consulting/implementation Training/courses	• Speech model builds for regional call centers • Academic speech labs' training kits • Custom ASR for field-service dictation	Model build $15-40k, workshop $2k per cohort *Effort:* High (research toolkit, heavy training setup) ⚠ Apache-2.0; training data and pretrained recipes have separate dataset licenses
Vits jaywalnut310/vits ★ 7.9k · **Permissive** MIT · Model · Fit 2/5	Research implementation of VITS, an end-to-end text-to-speech model.	Speech researchers and TTS engineers	Training/courses Consulting/implementation	• TTS course labs for universities • Custom-voice pilots for small language communities • Research baselines for speech startups	Workshop $1-2k per cohort, pilot $5-10k *Effort:* High (research model code, needs productization) ⚠ MIT; research code; voice data licensing for training voices needs review
StyleTTS2 yl4579/StyleTTS2 ★ 6.4k · **Permissive** MIT · Model · Fit 2/5	Research TTS model reaching near human-level naturalness with style diffusion *Replaces:* ElevenLabs, Murf, Play.ht	TTS researchers	Consulting/implementation API/usage-based Training/courses	• Custom TTS voices for brands • Narration for e-learning • Voice models for game studios *Angle:* Premium voice packs for games	$5-15k per custom voice *Effort:* High (Research code, requires training) ⚠ MIT; pretrained speakers' consent and license; research-grade
DiffSinger MoonInTheRiver/DiffSinger ★ 4.9k · **Permissive** MIT · Model · Fit 2/5	Singing voice synthesis and text-to-speech model using shallow diffusion. *Replaces:* Synthesizer V, Vocaloid	Music producers and vocal synthesis hobbyists	Premium plugins/add-ons Consulting/implementation	• Vocal synth plugins for music producers • Singing voice demos for game studios • Custom voice banks for virtual idol teams	Voice bank $200-800 each, plugin $30-60 one-time *Effort:* High (research model, singer data rights) ⚠ MIT; singer voice banks need consent and rights; Vocaloid brand trademarks
Metavoice-src metavoiceio/metavoice-src ★ 4.2k · **Permissive** Apache-2.0 · Model · Fit 2/5	Foundational expressive text-to-speech model for human-like voice generation. *Replaces:* ElevenLabs, Play.ht	Voice product teams building expressive speech	API/usage-based Consulting/implementation	• Expressive audiobook voices for indie publishers • Voice agents for wellness coaching apps • Ad voiceovers for performance marketing agencies	Usage $0.02-0.05 per minute, integration $6k *Effort:* High (model serving, GPU, voice safety work) ⚠ Apache-2.0; voice cloning misuse risk; disclose synthetic audio in ads
RealtimeTTS KoljaB/RealtimeTTS ★ 4.1k · **Permissive** MIT · Library · Fit 2/5	Python library streaming text-to-speech output in real time from text generators. *Replaces:* ElevenLabs streaming, Azure streaming TTS	Developers building real-time voice assistants	Consulting/implementation Setup + support retainer	• Voice responses for kiosk assistants • Live voice agent for appointment booking • Streaming narration for live-stream tools	Integration $3-8k per assistant, support $250/mo *Effort:* High (library, needs voice engines and product layer) ⚠ MIT; engine choices carry separate API and voice model licenses
TensorFlowTTS TensorSpeech/TensorFlowTTS ★ 4.0k · **Permissive** Apache-2.0 · Library · Fit 2/5	Real-time speech synthesis toolkit built on TensorFlow 2 for multiple languages. *Replaces:* Google Cloud TTS	TensorFlow teams building custom voice models	Consulting/implementation Training/courses	• Custom voices for regional language apps • TTS workshops for TensorFlow training firms • Voice builds for accessibility startups	Voice build $10-20k, workshop $1.5k *Effort:* High (older TF2 toolkit, needs modernization) ⚠ Apache-2.0; TensorFlow is Google's brand; TF2 stack may need upgrades
Qwen-audio-agent QwenAudio/qwen-audio-agent ★ 3.2k · **Permissive** Apache-2.0 · Framework · Fit 2/5	Real-time voice runtime that lets AI agents hold spoken conversations. *Replaces:* Vapi, Retell AI	Developers building voice agents for businesses	API/usage-based Consulting/implementation	• Voice receptionists for dental clinics • Voice ordering for pizza chains • Voice intake for home-service firms	Per-minute pass-through plus $299/mo platform *Effort:* High (runtime, needs telephony and latency work) ⚠ Apache-2.0; call recording and voice-agent disclosure rules apply by region

URL Shorteners & Link Tools · 22

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Karakeep karakeep-app/karakeep ★ 30.4k · AGPL AGPL-3.0 · App · Fit 4/5	Bookmark-everything app for links, notes and images with AI tagging and full text search *Replaces:* Pocket, Raindrop.io, Pinboard, Notion Web Clipper	Researchers and heavy readers saving web content	Managed hosting Mobile app on top Setup + support retainer	• Research bookmarking for journalists • Image and link vault for designers • Reading library for students *Angle:* AI bookmark manager subscriptions	$3-8/mo per user *Effort:* Medium (Single-user focus, multi-user light, AI costs) ⚠ AGPL: publish server-side changes; Karakeep (formerly Hoarder) trademark
Dub dubinc/dub.link ★ 25.1k · Check NOASSERTION · App · Fit 4/5	Link shortening and click attribution platform with analytics, custom domains and partner programs *Replaces:* Bitly, Rebrandly, Short.io, PartnerStack, Linktree	Marketing teams and SaaS growth teams	Managed hosting Vertical SaaS White-label reseller	• Branded links for real estate agents • Affiliate tracking for indie SaaS • Link analytics for podcast networks *Angle:* Branded link management SaaS	$19-99/mo per workspace *Effort:* Medium (Modern Next.js stack, multi-tenant, but large) ⚠ License NOASSERTION: read it, some ee features are commercial; Dub trademark
Linkwarden linkwarden/linkwarden ★ 20.3k · AGPL AGPL-3.0 · App · Fit 4/5	Collaborative bookmark manager that saves, annotates and preserves web pages *Replaces:* Pocket, Raindrop.io, Pinboard, Diigo	Research teams and students sharing sources	Managed hosting Vertical SaaS Setup + support retainer	• Source library for academic labs • Shared link collections for law students • Reference archive for newsrooms *Angle:* Collaborative bookmark archive SaaS	$4-8/user/mo *Effort:* Low (Teams and collections built in, Next.js) ⚠ AGPL: publish server-side changes; Linkwarden trademark; cloud tier upstream
YOURLS YOURLS/YOURLS ★ 12.3k · Permissive MIT · App · Fit 4/5	PHP URL shortener with stats, plugins and API, runs on any shared host *Replaces:* Bitly, TinyURL, Rebrandly	Small businesses wanting branded short links	Managed hosting Premium plugins/add-ons White-label reseller	• Branded shortener for local restaurants • Short links for church newsletters • Campaign links for event organizers *Angle:* Custom domain short links	$5-15/mo per domain *Effort:* Low (Plugin system, simple PHP install) ⚠ MIT; YOURLS name trademarked; no native multi-tenant
Linkding sissbruecker/linkding ★ 11.4k · Permissive MIT · App · Fit 4/5	Minimal, fast self-hosted bookmark manager with tags, search and browser extension *Replaces:* Pocket, Raindrop.io, Pinboard, Delicious	Individuals and small teams wanting quick link storage	Managed hosting Setup + support retainer Premium plugins/add-ons	• Bookmark hosting for developers • Link vault for small agencies • Shared bookmarks for study groups *Angle:* Bookmark manager hosting	$2-5/mo per user *Effort:* Low (Docker one-liner, simple multi-user) ⚠ MIT; linkding name; limited collaboration
Kutt thedevs-network/kutt ★ 11.2k · Permissive MIT · App · Fit 4/5	Modern URL shortener with custom domains, analytics, API and teams *Replaces:* Bitly, Rebrandly, Short.io	Startups and agencies needing branded short links	Managed hosting Vertical SaaS White-label reseller	• Link shortener for newsletter creators • Short links for SMS marketing agencies • Branded links for Discord communities *Angle:* Link shortener with analytics plans	$9-39/mo, free tier *Effort:* Low (Node app, custom domains already supported) ⚠ MIT license; Kutt name is trademarked
Shlink shlinkio/shlink ★ 5.4k · Permissive MIT · App · Fit 4/5	Self-hosted URL shortener with REST API, tags, visit tracking and multiple domains *Replaces:* Bitly, Rebrandly, Short.io	Agencies and developers needing API-driven short links	Managed hosting API/usage-based White-label reseller	• Short link API for SMS providers • Multi-domain links for marketing agencies • Link tracking for event ticketing *Angle:* White-label URL shortener for agencies	$10-49/mo, usage tiers *Effort:* Low (API-first, web client separate, multi-domain built in) ⚠ MIT; Shlink name is trademarked
LinkStack LinkStackOrg/LinkStack ★ 3.9k · AGPL AGPL-3.0 · App · Fit 4/5	Self-hosted link-in-bio page builder with themes, multi-user and analytics *Replaces:* Linktree, Beacons, Carrd, Bio.link	Creators, musicians and small businesses	Managed hosting White-label reseller Premium plugins/add-ons	• Link-in-bio for tattoo artists • Bio pages for real estate agents • Link pages for indie musicians *Angle:* Linktree alternative hosting	$3-9/mo per page, free tier *Effort:* Low (Multi-user and themes built in, Laravel) ⚠ AGPL: publish server-side changes; LinkStack name is trademarked

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
UTM utmapp/UTM ★ 36.7k · **Permissive** Apache-2.0 · App · Fit 3/5	Virtual machine app for running macOS and iOS guests on Apple hardware. *Replaces:* Parallels Desktop, VMware Fusion	Mac developers and testers running VMs	Premium plugins/add-ons Setup + support retainer	• macOS test VMs for iOS QA teams • Sandboxed Mac environments for security labs • Disposable dev VMs for agencies	Pro support $99/yr, enterprise setup $3-8k *Effort:* Medium (VM app, needs macOS licensing review) ⚠ Apache-2.0; macOS guest use must follow Apple's EULA; trademark caution
Shiori go-shiori/shiori ★ 11.7k · **Permissive** MIT · App · Fit 3/5	Simple bookmark manager in Go with archiving and web interface *Replaces:* Pocket, Raindrop.io, Pinboard	Individuals wanting simple link archive	Managed hosting Setup + support retainer Premium plugins/add-ons	• Link archive for minimalist users • Bookmark hosting for students • Archive tool for small research groups *Angle:* Read-later archiving service	$2-4/mo per user *Effort:* Low (Single Go binary, easy deploy, basic multi-user) ⚠ MIT; limited features, slow updates
Orbstack orbstack/orbstack ★ 9.5k · **Permissive** MIT · App · Fit 3/5	Lightweight app running Docker containers and Linux machines on macOS. *Replaces:* Docker Desktop, Parallels, Colima	Mac developers running containers and Linux VMs	Premium plugins/add-ons Vertical SaaS	• Container setup for Mac-based dev bootcamps • Linux dev VMs for iOS agencies • Local stacks for Mac data science teams	Pro plan $8-15/mo per user, team plan $30/mo *Effort:* Medium (Mac app, needs licensing and team controls) ⚠ MIT; Docker is a trademark; check current commercial use terms
Url-link buildlabs-io/url-link ★ 116 · **Permissive** MIT · App · Fit 3/5	Self-hosted URL shortener with built-in click analytics using FastAPI and Next.js. *Replaces:* Bitly, Rebrandly, Short.io	Marketers and agencies needing branded short links	Vertical SaaS Managed hosting	• Branded short links for event marketers • Campaign link tracking for real estate agencies • Short links for local restaurant promos	$9-29/mo per workspace, self-host free *Effort:* Medium (app with analytics, needs tenancy and billing) ⚠ MIT; shorteners get abused for phishing, so add abuse controls
LittleLink sethcottle/littlelink ★ 3.1k · **Permissive** MIT · Starter · Fit 2/5	Lightweight do-it-yourself HTML link-in-bio page like Linktree *Replaces:* Linktree, Beacons, Carrd	Individuals wanting a free static link page	Setup + support retainer Content/membership Agency service	• Bio page for tattoo artists • Link page for indie musicians • Setup service for small influencers *Angle:* Bio link pages for creators	$15-40 per setup *Effort:* Low (Static HTML, trivial to rebrand, no backend) ⚠ MIT; static page, no accounts or analytics
Geodesy chrisveness/geodesy ★ 1.2k · **Permissive** MIT · Library · Fit 2/5	JavaScript library of geodesy functions for distance, bearing and coordinate calculations. *Replaces:* Google Maps distance APIs, Turf.js	Mapping developers needing geo calculations	Consulting/implementation Setup + support retainer	• Route distance tools for delivery startups • Coordinate converters for surveying firms • Geofence calculators for property managers	Integration $2-5k per app, support $150/mo *Effort:* High (library, needs product and map data) ⚠ MIT; geodesy formulas are public; differentiation depends on your product
Chrome-utm-stripper jparise/chrome-utm-stripper ★ 747 · **Permissive** MIT · App · Fit 2/5	Browser extension removing UTM and other click-tracking parameters from URLs. *Replaces:* ClearURLs hosted, Brave privacy filters	Privacy-minded browser users and privacy teams	Premium plugins/add-ons Vertical SaaS	• Privacy extension for law-firm browsers • Link cleaning for newsroom research desks • Tracker removal for privacy-focused schools	Enterprise policy pack $5-10/seat/yr, free core *Effort:* Low (small extension, config and rules) ⚠ MIT; extension store policies; removing parameters may break some links
Bluesky TUDelft-CNS-ATM/bluesky ★ 578 · **Permissive** MIT · App · Fit 2/5	Open-source air traffic simulator for research, training and conflict-detection studies.	Aviation researchers and air traffic training schools	Training/courses Consulting/implementation	• ATC training scenarios for flight schools • Airspace research sims for university labs • Conflict-detection studies for drone-traffic startups	Training scenarios $2-5k per course, consulting $10k *Effort:* High (research simulator, needs domain validation) ⚠ MIT; aviation use needs regulatory and safety validation before any operational claim

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
CoordinateSharp Tronald/CoordinateSharp ★ 386 · Check NOASSERTION · Library · Fit 2/5	C# library converting coordinate formats and calculating sun and moon information.	.NET developers building location features	Consulting/implementation Setup + support retainer	• Solar timing tools for installers • Moon-phase features for travel apps • Coordinate converters for field surveyors	Integration $2-5k per app, support $150/mo *Effort:* High (library, needs product and data) ⚠ NOASSERTION license, read first; check astronomy data source licensing
Ghost_sa white-shiro-bai/ghost_sa ★ 370 · Check NONE · App · Fit 2/5	Self-hosted server receiving SensorsData analytics events for ad and link tracking. *Replaces:* Sensors Analytics cloud, Adjust tracking	Chinese app teams needing self-hosted event tracking	Setup + support retainer Managed hosting	• Ad attribution for Chinese app marketing teams • Short-link tracking for mobile game publishers • Event data sink for mid-size Chinese apps	Setup $2-6k, hosting $200-500/mo *Effort:* Medium (analytics server, needs compliance and UI) ⚠ NONE license; personal data collection needs PIPL compliance; SensorsData is a brand
OmacVM gillesgoetsch/OmacVM ★ 220 · Permissive MIT · App · Fit 2/5	Linux desktop VM for Apple Silicon Macs, tuned to feel native on macOS. *Replaces:* Parallels Desktop, VMware Fusion	Mac users wanting a Linux desktop in a VM	Setup + support retainer Premium plugins/add-ons	• Linux dev VMs for Mac-based engineers • Developer environment kits for remote teams • Training labs for Linux bootcamps	Setup $200-500 per Mac, support $30/mo *Effort:* Medium (VM image, needs upkeep and licensing review) ⚠ MIT; Omarchy and Arch-based distro licenses apply; hypervisor terms vary
UTMFW sonertari/UTMFW ★ 190 · GPL GPL-3.0 · App · Fit 2/5	UTM firewall distribution built on OpenBSD. *Replaces:* Sophos XG, Fortinet FortiGate	Small businesses needing a firewall appliance	Hardware kits/assembly Setup + support retainer	• Firewall appliances for small clinics • Network edge kits for coworking spaces • Firewall setup for home-office teams	Appliance kit $400-900, setup $300, support $30/mo *Effort:* Medium (OpenBSD base, needs UI and updates) ⚠ GPL-3.0: distributed appliances ship source; OpenBSD and UTM names need care
Ingecad ingelibre/ingecad ★ 148 · GPL GPL-3.0 · App · Fit 2/5	Free 2D CAD program for Linux that reads and writes DWG and DXF drawings. *Replaces:* AutoCAD, DraftSight	Linux users drafting 2D plans and drawings	Premium plugins/add-ons Setup + support retainer	• CAD drafting for Linux-based architecture firms • DWG viewing for small contractors • Plan drafting training for vocational schools	Pro support $99-199/yr, training $500 per cohort *Effort:* High (CAD core, DWG compatibility work heavy) ⚠ GPL-3.0: distributed builds ship source; DWG format and AutoCAD trademarks
Dropmind oldany/dropmind ★ 141 · AGPL AGPL-3.0 · App · Fit 2/5	Self-hosted tool capturing and saving links, notes and files from anywhere. *Replaces:* Pocket, Raindrop.io, Evernote web clipper	Researchers and teams saving content into one archive	Managed hosting Vertical SaaS	• Research capture for law firms • Clip archive for newsroom reporters • Reading archive for consulting analysts	Hosted $6-12/mo per user, self-host free *Effort:* Medium (self-hosted app, needs auth and clients) ⚠ AGPL-3.0: hosted modifications must publish source; saved third-party content copyright

Firecrawl firecrawl/firecrawl ★ 199.4k · **AGPL** AGPL-3.0 · App · Fit 4/5	Web scraping and crawling API that returns clean markdown for LLMs *Replaces:* Apify, Bright Data, ScrapingBee, Diffbot	Developers, data teams, growth and e-commerce teams	API/usage-based Managed hosting Agency service	• Price monitoring for Shopify stores • Lead data for real-estate agents • Scraping feeds for hedge funds *Angle:* Website-to-LLM data API	Usage-based, $29-299/mo tiers *Effort:* High (self-host needs extra services) ⚠ AGPL: must publish server-side modifications; Firecrawl trademark
Crawl4AI unclecode/crawl4ai ★ 87.0k · **Permissive** Apache-2.0 · App · Fit 4/5	LLM-friendly web crawler and extraction tool with a hosted cloud API *Replaces:* Firecrawl, Apify, Diffbot, ScrapingBee	Developers, data teams, growth and e-commerce teams	API/usage-based Managed hosting Agency service	• Price monitoring for Shopify stores • Lead data for real-estate agents • Scraping feeds for hedge funds *Angle:* AI-ready crawling API	Usage-based, $29-299/mo tiers *Effort:* Medium (self-hostable Docker API)
Changedetection.io dgtlmoon/changedetection.io ★ 35.6k · **Permissive** Apache-2.0 · App · Fit 4/5	Website change monitoring with alerts for price drops, restocks and content changes *Replaces:* Visualping, Distill.io, Fluxguard, Hexowatch	Developers, data teams, growth and e-commerce teams	API/usage-based Managed hosting Agency service	• Price monitoring for Shopify stores • Lead data for real-estate agents • Scraping feeds for hedge funds *Angle:* Website change alerts SaaS	Usage-based, $29-299/mo tiers *Effort:* Medium (single-tenant, add accounts and billing)
Maxun getmaxun/maxun ★ 18.2k · **AGPL** AGPL-3.0 · App · Fit 4/5	No-code robot builder that turns websites into structured APIs and monitors them *Replaces:* Browse AI, Octoparse, Apify, Import.io	Developers, data teams, growth and e-commerce teams	API/usage-based Managed hosting Agency service	• Price monitoring for Shopify stores • Lead data for real-estate agents • Scraping feeds for hedge funds *Angle:* No-code scraping robots SaaS	Usage-based, $29-299/mo tiers *Effort:* Medium (web app, needs multi-tenancy) ⚠ AGPL: must publish server-side modifications
ScrapeGraphAI ScrapeGraphAI/Scrapegraph-ai ★ 32.6k · **Permissive** MIT · Library · Fit 3/5	Python scraper that uses LLMs to extract data from described pages *Replaces:* Diffbot, Apify, Browse AI	Developers, data teams, growth and e-commerce teams	API/usage-based Managed hosting Agency service	• Price monitoring for Shopify stores • Lead data for real-estate agents • Scraping feeds for hedge funds *Angle:* LLM-powered scraping API	Usage-based, $29-299/mo tiers *Effort:* Medium (library plus hosted API possible)
Browserless browserless/browserless ★ 13.9k · **Check** NOASSERTION · Platform · Fit 3/5	Headless Chrome service run in Docker with API for screenshots, PDFs and scraping *Replaces:* Browserless Cloud, ScreenshotOne, Urlbox, ScrapingBee	Developers, data teams, growth and e-commerce teams	API/usage-based Managed hosting Agency service	• Price monitoring for Shopify stores • Lead data for real-estate agents • Scraping feeds for hedge funds *Angle:* Hosted headless Chrome	Usage-based, $29-299/mo tiers *Effort:* Medium (Docker image, add auth and billing) ⚠ Non-commercial free only; commercial use needs paid license

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Google-maps-scraper gosom/google-maps-scraper ★ 7.4k · **Permissive** MIT · Tool · Fit 3/5	Scrapes Google Maps listings for names, phones, websites, ratings and reviews. *Replaces:* Outscraper, PhantomBuster, Apify Google Maps scraper	Lead generation agencies and local SEO consultants	Agency service Setup + support retainer	• Lead lists for roofing contractors • Dentist directories for marketing agencies • Restaurant contact lists for food distributors	$99-299/mo per seat, or per 1000 places *Effort:* Medium (Go binary, needs proxies and anti-bot handling) ⚠ Google Maps terms restrict scraping; personal data and email laws apply
Anakin Anakin-Inc/anakin ★ 3.9k · **AGPL** AGPL-3.0 · Platform · Fit 3/5	Self-hosted web scraping API returning clean markdown or structured JSON. *Replaces:* Firecrawl, ScrapingBee, Jina Reader	AI teams converting websites into LLM-ready data	Managed hosting API/usage-based	• Markdown feeds for legal research chatbots • Product data API for ecommerce analytics • Clean website text for RAG search vendors	$49-299/mo hosted, usage-based overage *Effort:* Medium (proxy and anti-detect infrastructure, AGPL server) ⚠ AGPL: publish server modifications; proxy and scraping legal limits apply
VirtualBrowser Virtual-Browser/VirtualBrowser ★ 3.3k · **Permissive** BSD-3-Clause · App · Fit 3/5	Anti-fingerprint browser for managing many isolated browser profiles. *Replaces:* Multilogin, GoLogin, Dolphin Anty	Affiliate marketers and agencies running many ad accounts	Vertical SaaS Premium plugins/add-ons	• Ad-account separation for social media agencies • Profile isolation for ecommerce resellers • Account testing for QA teams	$30-80/mo per seat, profile limits *Effort:* High (Chinese-language UI, fingerprint maintenance, abuse-prone) ⚠ BSD-3 notice needed; account-farming abuse and platform bans risk
Playwright microsoft/playwright ★ 99.5k · **Permissive** Apache-2.0 · Framework · Fit 2/5	Browser automation and end-to-end testing framework for Chromium, Firefox and WebKit *Replaces:* BrowserStack, Sauce Labs, Cypress Cloud, LambdaTest	Developers, data teams, growth and e-commerce teams	API/usage-based Managed hosting Agency service	• Price monitoring for Shopify stores • Lead data for real-estate agents • Scraping feeds for hedge funds *Angle:* Browser automation and testing service	Usage-based, $29-299/mo tiers *Effort:* Low (needs proxies, anti-bot handling, billing) ⚠ Playwright is a Microsoft trademark
Scrapling D4Vinci/Scrapling ★ 99.1k · **Permissive** BSD-3-Clause · Framework · Fit 2/5	Python scraping framework that handles single requests through full crawls. *Replaces:* Apify, ScrapingBee, Bright Data	Data teams and agencies running scraping pipelines	Consulting/implementation Agency service	• Price monitoring for regional grocery chains • Lead lists for commercial real estate brokers • Job aggregation for staffing agencies	$3-10k per scraper project, monthly maintenance *Effort:* Low (framework, you build services on top) ⚠ BSD-3: keep notice; scraping legality depends on site terms
Puppeteer puppeteer/puppeteer ★ 95.8k · **Permissive** Apache-2.0 · Library · Fit 2/5	Node library to control Chrome and Firefox for scraping, screenshots and PDFs *Replaces:* Browserless, ScreenshotOne, Urlbox, PDFShift	Developers, data teams, growth and e-commerce teams	API/usage-based Managed hosting Agency service	• Price monitoring for Shopify stores • Lead data for real-estate agents • Scraping feeds for hedge funds *Angle:* Headless rendering API	Usage-based, $29-299/mo tiers *Effort:* Low (needs proxies, anti-bot handling, billing)
Scrapy scrapy/scrapy ★ 65.3k · **Permissive** BSD-3-Clause · Framework · Fit 2/5	Python crawling framework for building spiders that extract structured data *Replaces:* Import.io, Zyte, Octoparse, Apify	Developers, data teams, growth and e-commerce teams	API/usage-based Managed hosting Agency service	• Price monitoring for Shopify stores • Lead data for real-estate agents • Scraping feeds for hedge funds *Angle:* Custom data extraction agency	Usage-based, $29-299/mo tiers *Effort:* Low (needs proxies, anti-bot handling, billing)
Crawlee apify/crawlee ★ 26.4k · **Permissive** Apache-2.0 · Library · Fit 2/5	Node.js crawling and browser automation library for reliable scrapers *Replaces:* Apify, Bright Data, Zyte	Developers, data teams, growth and e-commerce teams	API/usage-based Managed hosting Agency service	• Price monitoring for Shopify stores • Lead data for real-estate agents • Scraping feeds for hedge funds *Angle:* Scraping-as-a-service for ecommerce data	Usage-based, $29-299/mo tiers *Effort:* Low (needs proxies, anti-bot handling, billing) ⚠ Apify trademark; Apache license ok
Colly gocolly/colly ★ 25.6k · **Permissive** Apache-2.0 · Library · Fit 2/5	Go scraping and crawling framework with fast concurrent fetching *Replaces:* Import.io, Octoparse, Zyte	Developers, data teams, growth and e-commerce teams	API/usage-based Managed hosting Agency service	• Price monitoring for Shopify stores • Lead data for real-estate agents • Scraping feeds for hedge funds *Angle:* High-speed crawler builds	Usage-based, $29-299/mo tiers *Effort:* Low (needs proxies, anti-bot handling, billing)

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Katana projectdiscovery/katana ★ 17.8k · **Permissive** MIT · Tool · Fit 2/5	Fast web crawler used for security reconnaissance and endpoint discovery *Replaces:* Detectify, Burp Suite, Intruder	Developers, data teams, growth and e-commerce teams	API/usage-based Managed hosting Agency service	• Price monitoring for Shopify stores • Lead data for real-estate agents • Scraping feeds for hedge funds *Angle:* Attack surface crawling service	Usage-based, $29-299/mo tiers *Effort:* Low (CLI tool) ⚠ ProjectDiscovery trademark
Camofox-browser jo-inc/camofox-browser ★ 12.2k · **Permissive** MIT · Tool · Fit 2/5	Stealth headless browser for AI agents that evades bot detection. *Replaces:* Browserless, Bright Data Browser API, ScrapingBee browser	AI agent builders needing browsers that pass bot checks	API/usage-based Managed hosting	• Stealth browsing for competitive price monitors • Browser agents for procurement portals • Bot-safe fare tracking for travel sites	$50-300/mo hosted, per browser-hour usage *Effort:* Medium (browser infrastructure, anti-detection legal and ToS risk) ⚠ MIT allows rebrand; evasion may violate site terms and local laws
Jsoup jhy/jsoup ★ 11.4k · **Permissive** MIT · Library · Fit 2/5	Java HTML parser for scraping, cleaning and sanitizing untrusted HTML. *Replaces:* OWASP Java HTML Sanitizer, Jericho HTML Parser	Java developers handling user HTML or scraping pages	Consulting/implementation Setup + support retainer	• HTML sanitizer for CMS plugins • Scraper for regional classifieds sites • HTML cleaner for newsletter platforms	$2-6k per integration, support retainer *Effort:* Low (Java library embedded in your own code) ⚠ MIT: keep notice; XSS safety claims need expert review
Nopecha-extension NopeCHALLC/nopecha-extension ★ 11.1k · **Permissive** MIT · Tool · Fit 2/5	Browser extension that automatically solves CAPTCHAs for test automation frameworks. *Replaces:* 2Captcha, Anti-Captcha, CapSolver	Automation developers needing CAPTCHA handling in browsers	API/usage-based Premium plugins/add-ons	• CAPTCHA handling for QA test suites • Solver add-on for SEO rank trackers • Automation for accessibility audit bots	$1-3 per 1000 solves, usage credits *Effort:* Medium (extension plus solver backend, ToS and legal risk) ⚠ MIT extension, but solving CAPTCHAs may breach site terms
Crawlee-python apify/crawlee-python ★ 9.7k · **Permissive** Apache-2.0 · Library · Fit 2/5	Python crawling and browser automation library for reliable data extraction. *Replaces:* Apify platform, Zyte, ScrapingBee	Python teams building crawlers for data pipelines	Consulting/implementation Setup + support retainer	• Crawler for AI training data vendors • Job board aggregator for regional recruiters • PDF harvesting for legal document archives	$3-10k per crawler build, $500/mo maintenance *Effort:* Low (library, services built on top) ⚠ Apache-2.0: keep notices; Apify is a brand; scraping legality varies
Helium mherrmann/helium ★ 8.3k · **Permissive** MIT · Library · Fit 2/5	Python library for lighter web browser automation with simple commands. *Replaces:* Selenium scripts, Robot Framework browser keywords	Python testers and scripters automating web forms	Consulting/implementation Training/courses	• Form automation for dental insurance portals • Test scripts for small accounting firms • Scripted checks for municipal permit sites	$1-4k per automation script, support plan *Effort:* Low (small Python library, you build the product) ⚠ MIT: keep notice; portal automation may breach site terms
Autoscraper alirezamika/autoscraper ★ 8.1k · **Permissive** MIT · Library · Fit 2/5	Python library that learns scraping rules automatically from example data. *Replaces:* Octoparse, ParseHub	Python developers needing quick scrapers from examples	Consulting/implementation Setup + support retainer	• Example-based scrapers for wine shop price lists • Listing scrapers for boutique real estate sites • Menu scrapers for food comparison apps	$500-2k per scraper project, maintenance plans *Effort:* Low (small library, you build product around it) ⚠ MIT: keep notice; scraped sites may bar automated access
Firecrawl-mcp-server firecrawl/firecrawl-mcp-server ★ 7.8k · **Permissive** MIT · Tool · Fit 2/5	MCP server exposing web search, scraping and crawling to AI agents. *Replaces:* Bright Data MCP, Exa, Apify actors	AI agent developers needing web data inside their tools	API/usage-based Consulting/implementation	• MCP web research for legal research teams • Competitor monitoring agent for ecommerce brands • Lead research agent for B2B sales teams	Pass-through API credits plus $29-99/mo wrapper *Effort:* Low (thin MCP client, value sits in upstream API) ⚠ MIT wrapper, but Firecrawl API is paid and a separate service
Curl_cffi lexiforest/curl_cffi ★ 6.8k · **Permissive** MIT · Library · Fit 2/5	Python HTTP client that impersonates browser TLS and HTTP2 fingerprints. *Replaces:* Requests, ZenRows, Scrapfly	Python scraper developers facing TLS fingerprint blocks	Consulting/implementation Setup + support retainer	• Fingerprint-safe clients for airline fare monitors • Price feeds for marketplace sellers • API clients for legacy banking portals	$2-5k per integration, free library *Effort:* Low (small Python library, you build the service) ⚠ MIT: keep notice; browser impersonation may breach site terms

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Skills browser-act/skills ★ 6.3k · **Permissive** MIT · Tool · Fit 2/5	Browser automation CLI and skills for AI agents with multi-account sessions. *Replaces:* Browserbase, Anchor Browser, MultiOn	AI agent builders running multi-account browser tasks	API/usage-based Managed hosting	• Multi-account social posting for agencies • Browser agents for supplier portal orders • Parallel research runs for market analysts	$49-199/mo per agent seat, usage credits *Effort:* Medium (CLI plus skills, depends on hosted browser backend) ⚠ MIT, but anti-bot bypass may breach platform terms and laws
Ferret MontFerret/ferret ★ 6.0k · **Permissive** Apache-2.0 · Framework · Fit 2/5	Declarative query language and Go runtime for structured web data extraction. *Replaces:* Apify actor code, Diffbot	Go and data engineers building extraction workflows	Consulting/implementation Training/courses	• Extraction queries for real estate listing feeds • Structured pulls from government tender portals • Data flows for university course catalogs	$3-8k per workflow build, $1k training *Effort:* Low (language runtime, you build product on it) ⚠ Apache-2.0: keep notices; data scraping legal limits apply
Patchright Kaliiiiiiiiii-Vinyzu/patchright ★ 5.1k · **Permissive** Apache-2.0 · Library · Fit 2/5	Patched Playwright build designed to avoid automation detection. *Replaces:* Undetected-chromedriver, Bright Data Scraping Browser	Scraper developers hitting Playwright bot detection	Managed hosting Consulting/implementation	• Ad verification crawlers for agencies • Classifieds aggregators for local news • Stock photo scrapers for design studios	$1-3k integration, $200/mo managed browser pool *Effort:* Medium (patch tracks Playwright upstream, maintenance-heavy) ⚠ Apache-2.0 notice; detection evasion may violate site terms
Noria AhmadHassan-BTed/Noria ★ 4.6k · **Permissive** MIT · App · Fit 2/5	Chat-driven agent that scrapes URLs and scores them against custom criteria. *Replaces:* Manual job screening services, Zapier scraper flows	Recruiters and advisors screening many listings	Setup + support retainer Vertical SaaS	• Scholarship screening for high school counselors • Job match scores for staffing firms • Grant screening for nonprofit consultants	$29-79/mo per team, $500 setup *Effort:* Medium (chat integrations and scoring logic per vertical) ⚠ MIT: free to rebrand; chat platform API terms apply; scraping rules vary
Scrape-it IonicaBizau/scrape-it ★ 4.1k · **Permissive** MIT · Library · Fit 2/5	Node.js library for scraping web pages into structured objects. *Replaces:* Cheerio-based scrapers, Apify	Node developers writing simple scrapers	Consulting/implementation Setup + support retainer	• Price scraper for wine shops • Event scraper for local arts venues • Menu scraper for food delivery analysts	$1-3k per scraper project, $200/mo maintenance *Effort:* Low (small MIT library, wrap in your own service) ⚠ MIT: keep notice; site terms limit scraping; small maintainer risk
Stealth-browser-mcp vibheksoni/stealth-browser-mcp ★ 3.3k · **Permissive** MIT · Tool · Fit 2/5	MCP server for stealth browser automation, network hooks and DOM extraction. *Replaces:* Browserbase MCP, Bright Data MCP	AI agent builders needing stealth browsing via MCP	API/usage-based Consulting/implementation	• Pixel-accurate UI clone tool for design agencies • Stealth price checks for competitor monitoring • Network hook debugging for QA contractors	$30-150/mo hosted MCP, consulting setup *Effort:* Medium (MCP server, stealth methods need constant maintenance) ⚠ MIT: free to rebrand; UI cloning raises copyright and ToS risks
Php-curl-class php-curl-class/php-curl-class ★ 3.3k · **Permissive** Unlicense · Library · Fit 2/5	PHP library for sending HTTP requests and integrating web APIs. *Replaces:* Guzzle, Unirest	PHP developers integrating third-party web APIs	Consulting/implementation Setup + support retainer	• API client for shipping rate lookups • Webhook client for dental practice software • Sync scripts for bakery point-of-sale	$1-4k per API integration, support plans *Effort:* Low (tiny library, embed in your own code) ⚠ Unlicense: public domain, no notice needed; upstream API terms apply
Twscrape vladkens/twscrape ★ 2.9k · **Permissive** MIT · Library · Fit 2/5	Python library and CLI for scraping X posts with account rotation and rate-limit handling. *Replaces:* Apify X scraper, paid X API tiers	Researchers and marketers needing X post data	Consulting/implementation API/usage-based	• Brand mention tracking for snack brands • Post archives for university media labs • Trend alerts for restaurant chains	$1-3k setup, $200/mo managed data pulls *Effort:* Medium (account rotation needs upkeep as platform changes) ⚠ MIT, but X terms bar scraping; account rotation risks bans

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
docker-mailserver docker-mailserver/docker-mailserver ★ 19.7k · Permissive MIT · App · Fit 4/5	Container-based mail server with SMTP, IMAP, antispam and antivirus managed by config files *Replaces:* Google Workspace, Microsoft 365, Zoho Mail, Fastmail	Small businesses, privacy-minded teams	Managed hosting Setup + support retainer White-label reseller	• Private email hosting for law firms • Branded mail for creative agencies • Email for non-profits on own domains *Angle:* Managed mail stacks	$3-6/mailbox/mo *Effort:* Medium (No web admin, config files only) ⚠ Deliverability and IP reputation are the real work
Mailspring Foundry376/Mailspring ★ 18.0k · GPL GPL-3.0 · App · Fit 4/5	Fast, open-source desktop email client for Mac, Windows and Linux. *Replaces:* Outlook desktop, Apple Mail, Thunderbird	Professionals wanting a fast desktop email client	Premium plugins/add-ons Setup + support retainer	• Email client for boutique law firms • Shared inbox client for small nonprofits • Desktop mail for real estate brokerages	$5-8/mo Pro sync features, free core *Effort:* High (Electron app, sync service, signing and branding work) ⚠ GPL-3.0: distributed builds ship source; Mailspring is a brand
Postal postalserver/postal ★ 16.9k · Permissive MIT · Platform · Fit 4/5	Mail delivery platform for sending and receiving email with web UI *Replaces:* SendGrid, Mailgun, Postmark, Amazon SES	Developers, SaaS, agencies	Managed hosting API/usage-based White-label reseller	• Transactional email for Shopify apps • Dedicated IP email for agencies • Email API for LATAM startups *Angle:* Transactional email delivery service	$10-100/mo by volume *Effort:* Medium (Org-based, deliverability and IP warmup needed) ⚠ MIT; sending reputation and spam compliance
Stalwart stalwartlabs/stalwart ★ 15.8k · Check NONE · Platform · Fit 4/5	All-in-one mail and collaboration server with IMAP, JMAP, SMTP and CalDAV *Replaces:* Google Workspace, Microsoft 365, Fastmail, Proton	Hosting providers, privacy-focused orgs	Managed hosting White-label reseller Setup + support retainer	• Sovereign mail hosting for EU public bodies • Branded email for ISPs • Secure mail for journalists *Angle:* Modern mail server hosting	$2-5/mailbox/mo *Effort:* Medium (Single Rust binary, web admin included) ⚠ AGPL core and enterprise features; metadata says NONE, verify
Mailcow mailcow/mailcow-dockerized ★ 13.8k · GPL GPL-3.0 · Platform · Fit 4/5	Dockerized mail server suite with SOGo webmail, admin UI, antispam and multi-domain support *Replaces:* Google Workspace, Microsoft 365, Zoho Mail, cPanel email	Small hosters, agencies, SMBs	Managed hosting White-label reseller Setup + support retainer	• Email hosting for small web agencies • Branded mail for school districts • Mail service for Spanish-speaking SMBs *Angle:* Managed email hosting for SMBs	$2-5/mailbox/mo *Effort:* Medium (Admin UI with domains, branding customizable) ⚠ GPL-3 fine for hosting; mailcow trademark
Mailu Mailu/Mailu ★ 7.6k · Check NOASSERTION · App · Fit 4/5	Docker-based mail server with web admin, webmail and multi-domain support *Replaces:* Google Workspace, Zoho Mail, Microsoft 365	Small hosters, community orgs	Managed hosting Setup + support retainer White-label reseller	• Mail hosting for local chambers of commerce • Email for cooperatives • Private mail for small schools *Angle:* Email hosting for agencies	$2-4/mailbox/mo *Effort:* Medium (Admin UI with domains and quotas) ⚠ License metadata NOASSERTION (MIT in practice), verify
Imapsync imapsync/imapsync ★ 4.2k · Check NOASSERTION · Tool · Fit 4/5	Tool to migrate or back up IMAP mailboxes between email servers. *Replaces:* Google Workspace Migration, BitTitan MigrationWiz, Mailsteward	IT admins migrating mailboxes between providers	Consulting/implementation Setup + support retainer	• Mailbox migrations for accounting firms • Backup jobs for small law offices • Migrations for nonprofits leaving legacy hosts	$150-400 per mailbox migration, support plans *Effort:* Low (command-line tool runs as-is, migration service needed) ⚠ NOASSERTION license: read first; migrating mail may breach privacy rules

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Core dovecot/core ★ 1.3k · Check NOASSERTION · App · Fit 4/5	Secure IMAP and POP3 mail server for large mail deployments. *Replaces:* Microsoft Exchange, Google Workspace, Zimbra	ISPs and organizations running self-hosted mail	Managed hosting Setup + support retainer Consulting/implementation	• Mail hosting for regional ISPs • Self-hosted mail for private schools • Mail servers for medical practice groups	$3-8/mailbox/mo managed, $2k setup *Effort:* Medium (mature server, mail operations and deliverability expertise) ⚠ NOASSERTION license: read first; Dovecot is a trademark; mail law compliance
Mail-in-a-Box mail-in-a-box/mailinabox ★ 15.5k · Permissive CC0-1.0 · App · Fit 3/5	One-click personal mail server on Ubuntu with webmail, DNS and auto TLS *Replaces:* Google Workspace, Fastmail, Proton Mail	Individuals, tiny organizations	Setup + support retainer Managed hosting Training/courses	• Managed Mail-in-a-Box for freelancers • Setup service for solo consultants • Family email hosting *Angle:* Turnkey email servers service	$99 setup, $8/mo maintenance *Effort:* Low (Opinionated, one domain per box) ⚠ One box per instance; not multi-tenant; CC0 so permissive
Roundcube roundcube/roundcubemail ★ 7.3k · GPL GPL-3.0 · App · Fit 3/5	Browser-based IMAP webmail client with plugins and address books *Replaces:* Gmail, Outlook web, Zoho Mail, cPanel webmail	Hosting providers, mail operators	Premium plugins/add-ons Managed hosting White-label reseller	• Branded webmail for regional ISPs • CalDAV-enabled mail for small firms • Webmail skin store for hosts *Angle:* Branded webmail for ISPs	$500-2000 per branded install *Effort:* Low (Skinnable PHP app, plugin ecosystem) ⚠ GPL-3 fine for hosting; shipped skins must carry source
Maddy foxcpp/maddy ★ 6.1k · GPL GPL-3.0 · Tool · Fit 3/5	Composable all-in-one SMTP and IMAP mail server in Go *Replaces:* Postfix plus Dovecot, Google Workspace, Mailgun	Small organizations, self-hosters	Setup + support retainer Managed hosting Consulting/implementation	• Lightweight mail for micro-businesses • Transactional SMTP for small apps • Email for Matrix hosting users *Angle:* Simple mail hosting plans	$3-6/mailbox/mo *Effort:* Medium (Config-file server, no UI) ⚠ Low maintenance activity; GPL-3
WebClients ProtonMail/WebClients ★ 5.7k · GPL GPL-3.0 · App · Fit 3/5	Monorepo of Proton's web clients for mail, calendar, drive and VPN. *Replaces:* Gmail web, Outlook web, Tuta	Privacy vendors building encrypted mail services	Consulting/implementation Setup + support retainer	• Encrypted mail for legal boutiques • Private mail for therapy practices • Secure webmail for journalism nonprofits	Not practical without Proton's backend; custom quote only *Effort:* High (frontend tied to proprietary Proton backend APIs) ⚠ GPL-3.0 code, but Proton trademarks and backend APIs are closed
Neomutt neomutt/neomutt ★ 3.9k · GPL GPL-2.0 · App · Fit 3/5	Terminal email client with deep customization and vim-style keys. *Replaces:* Mutt, Alpine, Thunderbird	Power users and sysadmins who live in terminals	Training/courses Consulting/implementation	• Terminal mail training for Linux sysadmin teams • Mutt setup for developer teams • Email workflows for open-source maintainers	$300-500 per training session, custom config *Effort:* Low (terminal app, config-driven, niche users) ⚠ GPL-2.0: distributed builds ship source; NeoMutt is a project brand
Cypht cypht-org/cypht ★ 1.8k · Weak copyleft LGPL-2.1 · App · Fit 3/5	Lightweight webmail that aggregates multiple IMAP, SMTP, JMAP and EWS accounts *Replaces:* Gmail, Outlook.com, Spike, Mailbird	Small businesses, privacy-minded users, hosting providers	Managed hosting White-label reseller Setup + support retainer	• Private email for law firms • Webmail for school districts • Branded mail for web agencies *Angle:* Unified inbox webmail service	$2-6/mailbox/mo *Effort:* Medium (PHP app, themeable)
SnappyMail the-djmaze/snappymail ★ 1.7k · AGPL AGPL-3.0 · App · Fit 3/5	Fast web-based email client forked from RainLoop with PGP support *Replaces:* Roundcube, Gmail web, Outlook web	Mail hosts, privacy services	White-label reseller Premium plugins/add-ons Managed hosting	• Branded webmail for ISPs • PGP webmail for activists • Lightweight webmail for schools *Angle:* Lightweight webmail hosting	$300-1500 per branded install *Effort:* Low (Themeable single app) ⚠ AGPL requires publishing modified code
Wino-Mail bkaankose/Wino-Mail ★ 1.7k · GPL GPL-3.0 · App · Fit 3/5	Windows mail and calendar app that clones the built-in Mail app. *Replaces:* Outlook for Windows, Mailbird, Windows Mail	Windows users wanting a lighter mail app	Premium plugins/add-ons Consulting/implementation	• Lightweight mail app for school IT labs • Mail client for retail kiosk tablets • Calendar-plus-mail app for small clinics	$5-10 one-time Windows Store app *Effort:* Medium (Windows-only app, store signing, mail protocol testing) ⚠ GPL-3.0: distributed builds ship source; avoid Microsoft branding

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Deltachat-desktop deltachat/deltachat-desktop ★ 1.6k · GPL GPL-3.0 · App · Fit 3/5	Desktop messenger built on email protocols with chat and mini-app tools. *Replaces:* Signal Desktop, Telegram Desktop, Slack desktop	Privacy-minded users wanting email-based messaging	Setup + support retainer Consulting/implementation	• Email-based chat for privacy-focused nonprofits • Secure team chat for small clinics • Chat app for independent newsrooms	$3-8/user/mo managed relay, $1k setup *Effort:* Medium (desktop app plus relay infrastructure needed) ⚠ GPL-3.0: shipped builds need source; Delta Chat is a brand
Email-oauth2-proxy simonrob/email-oauth2-proxy ★ 1.5k · Permissive Apache-2.0 · Tool · Fit 3/5	Local proxy that adds OAuth 2.0 login for legacy email clients. *Replaces:* Nylas, Aurinko, Microsoft legacy auth workarounds	IT teams keeping legacy email clients working with OAuth	Setup + support retainer Consulting/implementation	• OAuth bridge for legacy copier scanners • Legacy Outlook clients for accounting firms • Mail relay for old medical records software	$800-2,500 setup, $75/mo support per site *Effort:* Medium (per-provider OAuth app registration and support) ⚠ Apache-2.0: keep notice; each provider needs its own OAuth app
Mailpit axllent/mailpit ★ 10.9k · Permissive MIT · Tool · Fit 2/5	Email and SMTP testing tool with web UI and API for developers *Replaces:* Mailtrap, MailHog, Litmus	Developers, QA teams	Managed hosting Setup + support retainer Premium plugins/add-ons	• Hosted email testing for QA teams • Staging inbox for agencies • Email preview for devs *Angle:* Email testing SaaS for devs	$5-20/mo per team *Effort:* Medium (Single-user tool, simple to wrap) ⚠ MIT; easy but low willingness to pay
Himalaya pimalaya/himalaya ★ 7.6k · Permissive Apache-2.0 · Tool · Fit 2/5	Command-line email client for managing mailboxes from the terminal. *Replaces:* Mutt, Alpine	Terminal users and sysadmins managing mailboxes	Consulting/implementation Training/courses	• Terminal mail for sysadmins at MSPs • Scripted mailbox triage for support teams • CLI mail for data engineers scripting alerts	$1-3k per setup, $300 per training session *Effort:* Low (CLI tool, little product surface to sell) ⚠ Apache-2.0: keep notice; mail credentials need careful handling
MailKit jstedfast/MailKit ★ 6.9k · Permissive MIT · Library · Fit 2/5	Cross-platform .NET library for IMAP, POP3 and SMTP mail protocols. *Replaces:* Aspose.Email, Telerik email components	.NET developers building mail features	Consulting/implementation Setup + support retainer	• Email import for legal case management • Mailbox sync for CRM add-ons • Bounce handling for .NET newsletter tools	$3-10k per integration, support retainers *Effort:* Low (library embedded inside your .NET product) ⚠ MIT: keep notice; email privacy and protocol compliance apply
Twisted twisted/twisted ★ 6.0k · Check NOASSERTION · Framework · Fit 2/5	Event-driven networking engine for building Python servers and clients. *Replaces:* Tornado-based stacks, asyncio server frameworks	Python teams building custom network servers	Consulting/implementation Training/courses	• Custom TCP gateway for point-of-sale terminals • Protocol server for industrial sensors • Telephony gateway for small call centers	$5-15k per custom server build, training *Effort:* Low (framework, you build the product on top) ⚠ NOASSERTION license: verify first; Twisted is an established project name
Go-imap emersion/go-imap ★ 2.4k · Permissive MIT · Library · Fit 2/5	Go library implementing IMAP client and server protocols. *Replaces:* Commercial Go mail SDKs, Go mail server kits	Go developers building mail clients or servers	Consulting/implementation Setup + support retainer	• IMAP backend for custom helpdesk tools • Mail sync for Go-based CRM products • Mailbox gateway for regional ISPs	$5-15k per integration, support plans *Effort:* Low (Go library embedded in your own server) ⚠ MIT: keep notice; protocol work needs careful testing
Imbox martinrusev/imbox ★ 1.2k · Permissive MIT · Library · Fit 2/5	Python IMAP library aimed at agentic workflows and email parsing. *Replaces:* Mailparser.io, Zapier email triggers	Python developers automating inbox workflows	Consulting/implementation Setup + support retainer	• Invoice intake from email for accounting firms • Lead capture from inbound email for realtors • Ticket triage for small ecommerce shops	$1-4k per workflow integration, support plans *Effort:* Low (small library, you build workflows on top) ⚠ MIT: keep notice; email privacy and consent rules apply

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Spacedeck spacedeck/spacedeck-open ★ 1.1k · AGPL AGPL-3.0 · App · Fit 4/5	Web-based real-time collaborative whiteboard with rich media support *Replaces:* Miro, Mural, Lucidspark, FigJam	Teams, teachers, consultants, product companies	Managed hosting Vertical SaaS White-label reseller	• Whiteboards for online tutors • Workshop boards for consultants • Classroom boards for schools *Angle:* Visual collaboration for education	$5-12/user/mo, free tier *Effort:* Medium (Node app, themeable) ⚠ AGPL: must publish server-side modifications; old codebase
Excalidraw excalidraw/excalidraw ★ 135.3k · Permissive MIT · Tool · Fit 3/5	Browser whiteboard for hand-drawn style diagrams with real-time collaboration *Replaces:* Miro, Lucidchart, FigJam, Whimsical	Developers and teachers sketching diagrams	Managed hosting Premium plugins/add-ons Setup + support retainer	• Whiteboard for online tutors • Diagram embed for documentation platforms • Sketching room for workshop facilitators *Angle:* Branded collaborative whiteboard SaaS	$5-10/user/mo *Effort:* Medium (Embeddable React library, collab server separate) ⚠ MIT; Excalidraw+ is paid upstream, trademark
AFFiNE toeverything/AFFiNE ★ 74.3k · Check NOASSERTION · App · Fit 3/5	Knowledge base combining docs, whiteboards and databases with local-first sync *Replaces:* Notion, Miro, Coda, Obsidian	Creative teams and individuals wanting docs plus whiteboard	Managed hosting Setup + support retainer Premium plugins/add-ons	• Docs plus whiteboard for design studios • Planning workspace for indie game teams • Team notes for research labs *Angle:* Notion-plus-whiteboard workspace SaaS	$8-12/seat/mo *Effort:* High (Complex local-first stack, license mixed) ⚠ NOASSERTION: community vs enterprise parts; AFFiNE trademark
Rnote flxzt/rnote ★ 11.8k · GPL GPL-3.0 · App · Fit 3/5	Vector app for sketching and taking handwritten notes on Linux and Windows. *Replaces:* GoodNotes, Notability, OneNote	Students and professionals taking handwritten notes on Linux	Premium plugins/add-ons Consulting/implementation	• Handwritten notes for nursing students • Sketch notes for architecture studios • Lab notebooks for Linux research labs	$12 one-time desktop license, free core *Effort:* Medium (desktop-only, sync and mobile versions missing) ⚠ GPL-3.0: distributed builds ship source; small Linux-heavy market
Drawio jgraph/drawio ★ 9.2k · Permissive Apache-2.0 · Tool · Fit 3/5	Client-side diagram editor for flowcharts, UML, network and architecture diagrams *Replaces:* Lucidchart, Visio, Miro, Creately	Technical teams and documentation authors	Managed hosting Premium plugins/add-ons Setup + support retainer	• Diagram editor for Confluence-like wikis • Network diagrams for MSPs • Floor-plan sketching for event planners *Angle:* Diagramming hosted for enterprises	$3-8/user/mo or flat hosting fee *Effort:* Low (Static client app, storage integration needed) ⚠ Apache-2.0 permissive; draw.io and diagrams.net trademarks
LibreCAD LibreCAD/LibreCAD ★ 6.6k · Check NOASSERTION · App · Fit 3/5	Cross-platform 2D CAD program that reads and writes DXF and DWG files. *Replaces:* AutoCAD LT, DraftSight, Fusion 360 2D	Small shops and makers doing 2D drafting	Training/courses Setup + support retainer	• 2D drafting for sign shops • Floor plans for small cabinetmakers • Laser cut layouts for makerspaces	$5-15/mo support, $200 training per seat *Effort:* Medium (C++ desktop app, DWG format licensing limits) ⚠ NOASSERTION license: read first; DWG format licensing restrictions apply
Kroki yuzutech/kroki ★ 4.4k · Permissive MIT · Tool · Fit 3/5	Unified API that renders diagrams from text in many diagram languages *Replaces:* Lucidchart, Visio, draw.io	Teams, teachers, consultants, product companies	Managed hosting Vertical SaaS White-label reseller	• Whiteboards for online tutors • Workshop boards for consultants • Classroom boards for schools *Angle:* Diagram rendering API	$5-12/user/mo, free tier *Effort:* Low (stateless API, easy to host)
Storyboarder wonderunit/storyboarder ★ 3.9k · Check NONE · App · Fit 3/5	Desktop tool for storyboarding scenes with simple stick-figure drawings. *Replaces:* Storyboard Pro, Boords, Frame.io	Filmmakers and animators storyboarding scenes	Premium plugins/add-ons Training/courses	• Storyboards for indie film pitches • Shot lists for commercial directors • Scene planning for animation school classes	$20-40 one-time desktop, free core *Effort:* High (NONE license blocks any reuse without permission) ⚠ NONE license: no reuse rights; ask permission before rebranding
OpenBoard OpenBoard-org/OpenBoard ★ 3.1k · GPL GPL-3.0 · App · Fit 3/5	Desktop interactive whiteboard software for classrooms *Replaces:* SMART Notebook, Promethean ActivInspire, Miro	Teams, teachers, consultants, product companies	Managed hosting Vertical SaaS White-label reseller	• Whiteboards for online tutors • Workshop boards for consultants • Classroom boards for schools *Angle:* Interactive classroom board software	$5-12/user/mo, free tier *Effort:* Medium (Qt desktop app) ⚠ GPL-3.0; OpenBoard name is project's trademark

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Mypaint mypaint/mypaint ★ 3.0k · GPL GPL-2.0 · App · Fit 3/5	Drawing and painting program designed to work with graphics tablets. *Replaces:* Corel Painter, Clip Studio Paint	Digital painters using Wacom-style tablets on Linux	Premium plugins/add-ons Training/courses	• Brush packs for illustration students • Painting classes for hobby artists • Tablet painting tools for comic studios	$25-50 one-time brush pack bundles *Effort:* Medium (desktop painting app, niche Linux-leaning audience) ⚠ GPL-2.0: distributed builds ship source; brush assets have own licenses
WBO lovasoa/whitebophir ★ 2.7k · AGPL AGPL-3.0 · App · Fit 3/5	Simple collaborative online whiteboard that is easy to deploy *Replaces:* Miro, Jamboard, Microsoft Whiteboard	Teachers and small teams needing quick shared boards	Managed hosting White-label reseller Setup + support retainer	• Whiteboard rooms for online tutors • Shared boards for classroom use • Sketch boards for remote workshops *Angle:* Classroom whiteboards for schools	$3-8/mo per teacher *Effort:* Low (Small Node app, minimal features) ⚠ AGPL: publish server-side changes; WBO name trademark
Pencil pencil2d/pencil ★ 1.9k · GPL GPL-2.0 · App · Fit 3/5	Cross-platform 2D hand-drawn animation tool aimed at beginners. *Replaces:* Toon Boom Harmony, Adobe Animate, Krita animation	Beginner animators making 2D hand-drawn shorts	Training/courses Premium plugins/add-ons	• 2D animation course for art teachers • Animated explainers for small clinics • Frame animation tools for indie game artists	$15-30 one-time desktop, course bundles *Effort:* Medium (Qt desktop app, needs packaging and polish) ⚠ GPL-2.0: distributed builds ship source; Pencil2D is a project brand
Drawpile drawpile/Drawpile ★ 1.4k · GPL GPL-3.0 · App · Fit 3/5	Collaborative drawing program with shared canvas sessions *Replaces:* Miro, Figma, Procreate	Teams, teachers, consultants, product companies	Managed hosting Vertical SaaS White-label reseller	• Whiteboards for online tutors • Workshop boards for consultants • Classroom boards for schools *Angle:* Collaborative drawing sessions hosting	$5-12/user/mo, free tier *Effort:* Medium (desktop client plus server) ⚠ GPL-3.0; distributed apps must ship source
Mermaid mermaid-js/mermaid ★ 91.0k · Permissive MIT · Library · Fit 2/5	Generates flowcharts and sequence diagrams from markdown-like text *Replaces:* Lucidchart, Visio, draw.io	Teams, teachers, consultants, product companies	Managed hosting Vertical SaaS White-label reseller	• Whiteboards for online tutors • Workshop boards for consultants • Classroom boards for schools *Angle:* Diagram-as-code rendering service	$5-12/user/mo, free tier *Effort:* Low (web app, needs auth and billing)
tldraw tldraw/tldraw ★ 51.4k · Check NOASSERTION · Library · Fit 2/5	React SDK for infinite canvas whiteboard apps *Replaces:* Miro, FigJam, Lucidspark, Excalidraw	Teams, teachers, consultants, product companies	Managed hosting Vertical SaaS White-label reseller	• Whiteboards for online tutors • Workshop boards for consultants • Classroom boards for schools *Angle:* Embedded whiteboard SDK in apps	$5-12/user/mo, free tier *Effort:* Medium (SDK, build an app around it) ⚠ Custom tldraw license; production use needs paid key
Signature_pad szimek/signature_pad ★ 12.1k · Permissive MIT · Library · Fit 2/5	Small HTML5 canvas library for smooth signature drawing. *Replaces:* DocuSign signature widgets, SignRequest embeds	Web developers adding signature capture to forms	Consulting/implementation Setup + support retainer	• Signature capture for dental intake forms • Waiver signing for gyms and yoga studios • Delivery signatures for local courier services	$1-3k per form integration, support plans *Effort:* Low (tiny canvas library, styled with CSS) ⚠ MIT: keep notice; e-signature laws need a proper audit trail
Macaw exyte/Macaw ★ 6.0k · Permissive MIT · Library · Fit 2/5	Swift vector graphics library with SVG support for Apple platforms. *Replaces:* Core Graphics wrappers, commercial SVG rendering SDKs	Swift developers rendering SVG in iOS and macOS apps	Consulting/implementation Setup + support retainer	• SVG icons for restaurant menu apps • Vector maps for real estate apps • Drawing tools for kids' learning apps	$2-6k per app integration, support plans *Effort:* Low (Swift library, embed in your app) ⚠ MIT: keep notice; Apple platform review rules apply
Perfect-freehand steveruizok/perfect-freehand ★ 5.8k · Permissive MIT · Library · Fit 2/5	JavaScript library that turns pointer input into smooth pressure-sensitive strokes. *Replaces:* Excalidraw stroke engine, Fabric.js brushes	Web developers building drawing or annotation features	Consulting/implementation Setup + support retainer	• Stroke smoothing for classroom whiteboard apps • Annotation layer for floor plan markup • Handwriting feel for kids' drawing apps	$1-4k per integration, support plans *Effort:* Low (tiny MIT library, embed freely) ⚠ MIT: keep notice; few gotchas beyond normal JS packaging

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
NN-SVG alexlenail/NN-SVG ★ 5.7k · Permissive MIT · Tool · Fit 2/5	Web tool that draws publication-ready neural network diagrams as SVG. *Replaces:* Visio, draw.io diagrams, BioRender	ML researchers preparing paper figures	Vertical SaaS Training/courses	• Architecture figures for ML thesis writers • Model diagrams for AI startup pitch decks • Figure tool for research lab papers	$8-15/mo per user for hosted editor *Effort:* Low (web tool, mostly style and hosting changes) ⚠ MIT: free to rebrand; academic figures need correct attribution
Leaflet-geoman geoman-io/leaflet-geoman ★ 2.4k · Permissive MIT · Library · Fit 2/5	Leaflet plugin for drawing and editing map geometry layers. *Replaces:* Mapbox Draw, Esri editor widgets	Web GIS developers building map editors	Consulting/implementation Setup + support retainer	• Zone editor for property management portals • Delivery area mapper for local food chains • Service area drawing for landscaping companies	$2-6k per integration, support plans *Effort:* Low (JS plugin, embed in your mapping app) ⚠ MIT: keep notice; map tile provider terms apply separately
maker.js microsoft/maker.js ★ 2.0k · Permissive Apache-2.0 · Library · Fit 2/5	JavaScript library for 2D vector drawing and shapes for CNC and laser cutters. *Replaces:* Inkscape CAM plugins, Fusion 360 2D tools	Makers building CNC and laser cutting tools	Consulting/implementation Setup + support retainer	• Laser cut sign designers • Cabinet part generators for woodshops • Panel layout tool for furniture makers	$3-8k per tool build, support plans *Effort:* Low (JS library, you build the product on it) ⚠ Apache-2.0: keep notice; Microsoft name is a trademark, avoid it
Lazy-line-painter merri-ment/lazy-line-painter ★ 2.0k · Permissive MIT · Library · Fit 2/5	JavaScript library that animates SVG paths so they draw themselves. *Replaces:* Vivus, GSAP DrawSVG plugin	Front-end developers animating SVG on websites	Consulting/implementation Setup + support retainer	• Animated logo intros for law firm sites • Hand-drawn diagrams for online course pages • SVG animations for restaurant menu sites	$500-2k per site animation build *Effort:* Low (tiny MIT library, embed freely) ⚠ MIT: keep notice; low risk, animation only
Durdraw durdraw/durdraw ★ 1.9k · Permissive BSD-3-Clause · App · Fit 2/5	Terminal ASCII and ANSI art editor with animation and themes. *Replaces:* PabloDraw, TheDraw, Moebius	BBS artists and terminal art hobbyists	Premium plugins/add-ons Training/courses	• ANSI art tools for BBS sysops • Terminal banners for retro computing clubs • ASCII animations for terminal demo scenes	$10-20 one-time, font and theme packs *Effort:* Low (small terminal app, themes make it easy) ⚠ BSD-3: keep notice; niche market; check CP437 font licensing
Pointless kkoomen/pointless ★ 1.8k · GPL GPL-3.0 · App · Fit 2/5	Endless drawing canvas desktop app built with Tauri and React. *Replaces:* Miro, Excalidraw desktop, Milanote	Designers wanting an offline infinite sketch canvas	Premium plugins/add-ons Consulting/implementation	• Infinite canvas for architecture studio sketches • Mood boards for interior design firms • Brainstorm canvas for tabletop game designers	$8-15 one-time desktop, free core *Effort:* Medium (Tauri app, collaboration features missing) ⚠ GPL-3.0: distributed builds ship source; Tauri and React notices
Atrament jakubfiala/atrament ★ 1.8k · Permissive MIT · Library · Fit 2/5	Small JavaScript library for drawing and handwriting on HTML canvas. *Replaces:* Signature Pad, Fabric.js brushes	Web developers adding handwriting input	Consulting/implementation Setup + support retainer	• Handwritten notes in classroom web apps • Sketch input for telehealth intake forms • Doodle feedback for design review tools	$1-3k per feature integration *Effort:* Low (tiny MIT library, embed freely) ⚠ MIT: keep notice; few gotchas beyond normal canvas handling

Workflow Automation · 21

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Conductor conductor-oss/conductor ★ 32.4k · Permissive Apache-2.0 · Platform · Fit 3/5	Event-driven workflow engine for durable microservice orchestration with JSON workflows *Replaces:* Temporal, AWS Step Functions, Camunda	Backend teams, order management systems	Managed hosting Consulting/implementation Setup + support retainer	• Order workflow engine for ecommerce platforms • Claims orchestration for insurers • Provisioning workflows for telcos *Angle:* Microservice orchestration consulting	$300-2000/mo managed *Effort:* Medium (Java service, UI exists) ⚠ Netflix-originated; OSS fork of Orkes

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Temporal temporalio/temporal ★ 24.2k · Permissive MIT · Platform · Fit 3/5	Durable execution platform that runs long-lived workflows reliably across failures *Replaces:* AWS Step Functions, Camunda, Airflow	Backend engineers, fintech and platform teams	Managed hosting Consulting/implementation Setup + support retainer	• Payment retry workflows for fintechs • Booking sagas for travel platforms • Onboarding flows for lending startups *Angle:* Durable workflow hosting	$500-3000/mo managed *Effort:* High (Operations-heavy cluster, SDKs per language) ⚠ Temporal Cloud competes; Temporal trademark
Meshroom alicevision/Meshroom ★ 13.1k · Check NOASSERTION · App · Fit 3/5	Node-based photogrammetry app that builds 3D models from photos. *Replaces:* RealityCapture, Agisoft Metashape, Pix4D	3D artists and surveyors making photogrammetry models	Agency service Consulting/implementation	• 3D scans of heritage sites for museums • Product scans for online furniture shops • Site scans for roofing contractors	$300-800 per scan project, GPU workstation rental *Effort:* Medium (GPU-heavy pipeline, research-grade node UI) ⚠ NOASSERTION license: read first; AliceVision and Meshroom are brands
Pipedream Components PipedreamHQ/pipedream ★ 11.8k · Check NOASSERTION · Platform · Fit 3/5	Integration platform with code-friendly workflows and connectors to many APIs *Replaces:* Zapier, Make, Workato, Tray.io	Ops teams, DevOps teams, agencies	Managed hosting Consulting/implementation Vertical SaaS	• Automation for e-commerce stores • Ops automation for MSPs • Workflows for accounting firms *Angle:* Integration development services	$30-200/mo per workspace *Effort:* High (large connector library, license split) ⚠ Mixed license (components MIT, core proprietary); read license
Cadence cadence-workflow/cadence ★ 9.5k · Permissive Apache-2.0 · Platform · Fit 3/5	Distributed workflow orchestration engine for durable long-running business logic. *Replaces:* Temporal Cloud, AWS Step Functions, Azure Durable Functions	Platform teams running long-running business workflows	Managed hosting Consulting/implementation	• Order workflows for regional e-commerce brands • Claims workflows for insurance agencies • Onboarding workflows for SaaS startups	$500-3k/mo managed clusters, support plans *Effort:* Medium (clustered infrastructure, database operations expertise needed) ⚠ Apache-2.0: keep notices; Temporal is a competing brand, avoid naming
StackStorm StackStorm/st2 ★ 6.6k · Permissive Apache-2.0 · Platform · Fit 3/5	Event-driven automation engine for incident response, remediation and deployments *Replaces:* PagerDuty, ServiceNow Orchestration, Ansible Tower, Rundeck	Ops teams, DevOps teams, agencies	Managed hosting Consulting/implementation Vertical SaaS	• Automation for e-commerce stores • Ops automation for MSPs • Workflows for accounting firms *Angle:* IT ops automation consulting	$30-200/mo per workspace *Effort:* High (heavy Python stack, ops expertise)
Inngest inngest/inngest ★ 6.0k · Check NOASSERTION · Platform · Fit 3/5	Workflow orchestration with durable step functions and AI workflows *Replaces:* Temporal, Trigger.dev, AWS Step Functions	TypeScript developers	Managed hosting API/usage-based Setup + support retainer	• Durable workflows for fintech startups • AI pipelines for agencies • Job orchestration for SaaS *Angle:* Event-driven functions service	$20-250/mo by runs *Effort:* Medium (Self-host available, license ambiguous) ⚠ SSPL then delayed Apache; read license
Agenta Agenta-AI/agenta ★ 4.9k · Check NOASSERTION · Platform · Fit 3/5	Workspace where teams build, test and manage LLM apps and agents. *Replaces:* LangSmith, Langfuse Cloud, Humanloop	AI product teams building and evaluating LLM apps	Managed hosting Setup + support retainer	• Prompt evaluation for legal chatbot startups • Agent testing for customer support SaaS • Prompt management for ecommerce copilots	$49-299/mo per workspace, enterprise support *Effort:* Medium (LLM ops stack, evaluation logic, multi-service deployment) ⚠ NOASSERTION license: read first; LLM API costs and data privacy rules apply
Open-claude-cowork composio-community/open-claude-cowork ★ 4.3k · Permissive MIT · App · Fit 3/5	Open-source desktop agent workspace with 500+ SaaS app integrations. *Replaces:* Zapier, Make, Workato	Teams wanting an agent that works across SaaS tools	Managed hosting Setup + support retainer	• Agent workspace for accounting firms • Sales ops agent for B2B agencies • Support triage agent for ecommerce shops	$30-80/seat/mo hosted, $1k setup *Effort:* Medium (many SaaS credentials, security review, auth flows) ⚠ MIT: free to rebrand; Claude Cowork is an Anthropic trademark

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Argo-events argoproj/argo-events ★ 2.7k · **Permissive** Apache-2.0 · Tool · Fit 3/5	Kubernetes event-driven automation framework that triggers workflows from events. *Replaces:* AWS EventBridge, Azure Event Grid, Knative Eventing	Platform teams running event-triggered jobs on Kubernetes	Setup + support retainer Consulting/implementation	• Event triggers for media transcoding pipelines • Order event jobs for online stores • Batch triggers for lab data pipelines	$3-8k setup, $1k/mo managed support *Effort:* Medium (Kubernetes operator, cluster operations expertise needed) ⚠ Apache-2.0: keep notices; Argo is a CNCF project name
Doit pydoit/doit ★ 2.1k · **Permissive** MIT · Tool · Fit 3/5	Python command-line task runner for automating build and maintenance jobs. *Replaces:* Make, Invoke, Airflow for small jobs	Python developers automating build and data tasks	Consulting/implementation Training/courses	• Scheduled data jobs for small accounting firms • Build tasks for Python agencies • Batch scripts for research labs	$2-5k per automation setup, $300 training *Effort:* Low (mature Python CLI, easy to embed) ⚠ MIT: keep notice; little brand risk, mature project
flowgram.ai bytedance/flowgram.ai ★ 8.6k · **Permissive** MIT · Framework · Fit 2/5	Extensible workflow canvas framework for building AI workflow builders. *Replaces:* Dify canvas, Langflow UI	Teams building their own AI workflow builder UIs	Consulting/implementation Setup + support retainer	• Workflow builder for legal document automation • Canvas for AI agent builders • Form-driven flows for insurance intake	$8-20k per builder integration, support plans *Effort:* Medium (React canvas framework, heavy customization) ⚠ MIT: keep notice; ByteDance is a brand; docs mostly Chinese
N8n-skills czlonkowski/n8n-skills ★ 6.6k · **Permissive** MIT · Tool · Fit 2/5	Claude Code skillset for building reliable n8n workflows. *Replaces:* Zapier builder consultants, n8n template packs	Automation consultants using n8n with Claude Code	Training/courses Consulting/implementation	• n8n skills for Shopify ops teams • Workflow builds for dental office intake • Automation templates for property managers	$97-299 course, $1-3k workflow builds *Effort:* Low (skill files you rebrand as your own training) ⚠ MIT: free to rebrand; n8n has its own license terms, check them
Social-media-research-skills ScrapeCreators/social-media-research-skills ★ 5.9k · **Permissive** MIT · Tool · Fit 2/5	AI agent skills for social media research across major platforms, powered by ScrapeCreators. *Replaces:* Brandwatch, Meltwater, Sprout Social listening	Marketing teams researching social trends and competitors	API/usage-based Consulting/implementation	• Ad library research for DTC brands • Competitor teardowns for skincare startups • Trend reports for TikTok agencies	Pass-through API usage, $199/mo research bundle *Effort:* Low (skills depend on a vendor's paid data API) ⚠ MIT, but platform scraping may breach terms; ScrapeCreators is a vendor brand
Cc-wf-studio breaking-brake/cc-wf-studio ★ 5.5k · **Check** NOASSERTION · Tool · Fit 2/5	Unclear project: visual workflow studio for Claude Code, description is just a name.	Claude Code users wanting visual workflow editing	Premium plugins/add-ons Consulting/implementation	• Visual agent flows for dev agencies • Review pipeline builder for SaaS teams • Scripted build steps for indie game studios	$15-30/mo per seat, free local tier *Effort:* Medium (unclear scope, verify features before building) ⚠ NOASSERTION license; Claude is an Anthropic trademark; verify features first
Vibe-Skills foryourhealth111-pixel/Vibe-Skills ★ 3.8k · **Permissive** Apache-2.0 · Tool · Fit 2/5	Skill router and workflow orchestrator for AI agents; benchmark claims unverified.	AI agent builders routing many skills	Consulting/implementation Training/courses	• Skill routing for customer support agent teams • Workflow orchestration for legal intake bots • Agent routing for ecommerce ops	$1-3k setup, support retainers *Effort:* Low (routing layer, little standalone product surface) ⚠ Apache-2.0: keep notices; benchmark claims unverified; check model terms
Autonomous-Company MaxMiksa/Autonomous-Company ★ 3.2k · **Permissive** MIT · App · Fit 2/5	Runs AI agents around the clock on a personal PC to handle company-style tasks. *Replaces:* Devin, Lindy, Zapier agents	Solo founders wanting agents running tasks overnight	Consulting/implementation Setup + support retainer	• Overnight research agent for solo consultants • Lead follow-up agent for small realtors • Drafting agent for newsletter publishers	$20-50/mo per PC setup, support retainer *Effort:* Medium (agent scope vague, PC permissions and safety risk) ⚠ MIT: free to rebrand; autonomous agents take risky actions; model API costs

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Yao-meta-skill yaojingang/yao-meta-skill ★ 2.7k · **Permissive** MIT · Tool · Fit 2/5	Engineering, evaluation and governance framework for reusable AI agent skills. *Replaces:* Promptfoo-style eval suites, LangSmith evaluation	AI teams standardizing reusable agent skills	Consulting/implementation Training/courses	• Skill governance for insurance claims bots • Agent skill audits for ecommerce ops teams • Portable skills for legal intake agents	$2-5k per skill audit, $500 training per seat *Effort:* Low (methodology and templates, few code assets) ⚠ MIT: free to rebrand; methodology claims need independent validation
Danghuangshang wanikua/danghuangshang ★ 2.7k · **Permissive** MIT · Platform · Fit 2/5	Multi-agent collaboration system with governance-style roles, built on OpenClaw. *Replaces:* CrewAI hosted, AutoGen Studio	Teams coordinating several AI agents on tasks	Setup + support retainer Consulting/implementation	• Agent team for small accounting firms • Coordinated agents for ecommerce support • Agent roles for indie game QA	$500-2k setup, $100/mo support *Effort:* Medium (Chinese-first docs, upstream OpenClaw dependency) ⚠ MIT: free to rebrand; OpenClaw dependency; docs mostly Chinese
CodeMachine-CLI moazbuilds/CodeMachine-CLI ★ 2.5k · **Permissive** Apache-2.0 · Tool · Fit 2/5	CLI that orchestrates AI coding agents into repeatable long-running workflows. *Replaces:* Devin, Factory, Sweep	Developers running multi-step AI coding workflows	Setup + support retainer Training/courses	• Coding agent pipelines for agency dev teams • Migration runs for legacy code shops • Test-fix loops for small SaaS teams	$40-80/mo per developer seat *Effort:* Medium (CLI with agent API costs and guardrails needed) ⚠ Apache-2.0: keep notices; depends on paid model APIs; code safety review
Shepherd shepherd-agents/shepherd ★ 2.5k · **Permissive** MIT · Framework · Fit 2/5	Runtime that makes agent runs reversible through Git-like traces and fast forks. *Replaces:* Docker commit workflows, Temporal replay tooling	Agent platform teams needing replay and rollback	Consulting/implementation Setup + support retainer	• Replayable runs for insurance claims bots • Fork-and-test sandboxes for coding agents • Audit trails for finance reconciliation agents	$5-15k integration, support plans *Effort:* Medium (runtime infrastructure, deep agent integration needed) ⚠ MIT: keep notice; speedup and cache claims need verification

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
GDevelop 4ian/GDevelop ★ 28.5k · Check NOASSERTION · App · Fit 4/5	No-code 2D and 3D game engine with visual events and web export *Replaces:* Construct, Unity, GameMaker, Buildbox	Indie studios, schools, hobbyist developers	Training/courses Consulting/implementation Premium plugins/add-ons	• Game dev courses for teens • Porting studio for indie titles • Asset packs for engine users *Angle:* White-label no-code game builder for schools and brands	$20-60 per course or template *Effort:* Medium (desktop and web editor) ⚠ GDevelop trademark; custom licenses on parts; read license
Cocos Creator Engine cocos/cocos-engine ★ 9.9k · Check NOASSERTION · Platform · Fit 3/5	Engine behind Cocos Creator for 2D and 3D games with web and mobile export *Replaces:* Unity, Buildbox, GameMaker	Indie studios, schools, hobbyist developers	Training/courses Consulting/implementation Premium plugins/add-ons	• Game dev courses for teens • Porting studio for indie titles • Asset packs for engine users *Angle:* Playable ad production service for mobile advertisers	$20-60 per course or template *Effort:* Medium (editor is separate product) ⚠ Read license; Cocos Creator editor has own terms
Defold defold/defold ★ 6.5k · Check NOASSERTION · Platform · Fit 3/5	Free game engine with editor for desktop, mobile, console and web *Replaces:* Unity, Cocos Creator, GameMaker	Indie studios, schools, hobbyist developers	Training/courses Consulting/implementation Premium plugins/add-ons	• Game dev courses for teens • Porting studio for indie titles • Asset packs for engine users *Angle:* Mobile/HTML5 game studio with ad-monetized casual titles	$20-60 per course or template *Effort:* Medium (library or engine, services built around it) ⚠ Defold License is custom (Apache-based); read before use
Kaiju KaijuEngine/kaiju ★ 4.7k · Check NOASSERTION · Platform · Fit 3/5	Go game engine with Vulkan renderer and built-in editor for 2D and 3D. *Replaces:* Unity, Godot, Unreal Engine	Go developers building 2D and 3D games	Consulting/implementation Training/courses	• Interactive product visualizers for furniture makers • Training simulations for warehouse crews • Game prototypes for indie studios	$5-15k per custom build, training packs *Effort:* High (early engine, Vulkan complexity, small user base) ⚠ NOASSERTION license: read first; engine must be learned before selling
LayaAir layabox/LayaAir ★ 2.2k · Permissive MIT · Platform · Fit 3/5	2D and 3D rendering engine with an integrated development IDE. *Replaces:* Unity, Cocos Creator, Egret	Chinese and Asian studios making web and mini-game titles	Consulting/implementation Training/courses	• HTML5 mini-games for Chinese mini-game platforms • Interactive ads for Chinese brands • Web 3D showrooms for furniture retailers	$2-5k per game build, IDE training *Effort:* Medium (IDE and runtime tied to Chinese ecosystem tooling) ⚠ MIT: free to rebrand; mini-game platform rules vary; LayaBox is a brand
Castle-engine castle-engine/castle-engine ★ 1.3k · Check NOASSERTION · Platform · Fit 3/5	Cross-platform 2D and 3D game engine with visual editor and glTF support. *Replaces:* Unity, Godot, Unreal Engine	Pascal developers and indie studios making cross-platform games	Consulting/implementation Training/courses	• 3D product viewers for furniture retailers • IFC building walkthroughs for architecture firms • Training simulations for industrial plants	$3-8k per app build, Pascal training $400 per seat *Effort:* Medium (Pascal ecosystem, editor customization, per-platform builds) ⚠ NOASSERTION license: read first; console SDK NDAs may restrict distribution
libGDX libgdx/libgdx ★ 25.5k · Permissive Apache-2.0 · Framework · Fit 2/5	Java game framework for desktop, Android, iOS and HTML5 *Replaces:* Unity, Cocos Creator	Indie studios, schools, hobbyist developers	Training/courses Consulting/implementation Premium plugins/add-ons	• Game dev courses for teens • Porting studio for indie titles • Asset packs for engine users *Angle:* Cross-platform game agency building branded mobile games	$20-60 per course or template *Effort:* Low (library or engine, services built around it)

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Cocos2d-x cocos2d/cocos2d-x ★ 19.2k · Check NONE · Framework · Fit 2/5	C++ cross-platform 2D game framework and tools *Replaces:* Unity, GameMaker	Indie studios, schools, hobbyist developers	Training/courses Consulting/implementation Premium plugins/add-ons	• Game dev courses for teens • Porting studio for indie titles • Asset packs for engine users *Angle:* Mobile casual game factory with reskinnable templates	$20-60 per course or template *Effort:* Low (library or engine, services built around it) ⚠ No license declared; read license first
Pyxel kitao/pyxel ★ 18.6k · Check NOASSERTION · Framework · Fit 2/5	Retro game engine for Python with built-in pixel editor *Replaces:* PICO-8, Scratch, GameMaker	Indie studios, schools, hobbyist developers	Training/courses Consulting/implementation Premium plugins/add-ons	• Game dev courses for teens • Porting studio for indie titles • Asset packs for engine users *Angle:* Retro game workshops and classroom licenses	$20-60 per course or template *Effort:* Low (library or engine, services built around it) ⚠ MIT-like; read license (NOASSERTION)
MonoGame MonoGame/MonoGame ★ 14.6k · Check NOASSERTION · Framework · Fit 2/5	Cross-platform C# game framework continuing Microsoft XNA *Replaces:* Unity, Unreal, GameMaker	Indie studios, schools, hobbyist developers	Training/courses Consulting/implementation Premium plugins/add-ons	• Game dev courses for teens • Porting studio for indie titles • Asset packs for engine users *Angle:* Console porting services for indie XNA/MonoGame titles	$20-60 per course or template *Effort:* Low (library or engine, services built around it) ⚠ Console SDKs need platform NDAs
Ebitengine hajimehoshi/ebiten ★ 13.6k · Permissive Apache-2.0 · Framework · Fit 2/5	Simple 2D game engine for Go *Replaces:* Unity, GameMaker	Indie studios, schools, hobbyist developers	Training/courses Consulting/implementation Premium plugins/add-ons	• Game dev courses for teens • Porting studio for indie titles • Asset packs for engine users *Angle:* Go game studio porting titles to consoles and mobile	$20-60 per course or template *Effort:* Low (library or engine, services built around it)
SFML SFML/SFML ★ 12.1k · Permissive Zlib · Library · Fit 2/5	C++ multimedia library for windows, graphics, audio and networking *Replaces:* SDL commercial support, Unity	Indie studios, schools, hobbyist developers	Training/courses Consulting/implementation Premium plugins/add-ons	• Game dev courses for teens • Porting studio for indie titles • Asset packs for engine users *Angle:* C++ game dev education and template kits	$20-60 per course or template *Effort:* Low (library or engine, services built around it)
LOVE love2d/love ★ 8.9k · Check NOASSERTION · Framework · Fit 2/5	Lua 2D game framework for desktop and mobile *Replaces:* PICO-8, GameMaker	Indie studios, schools, hobbyist developers	Training/courses Consulting/implementation Premium plugins/add-ons	• Game dev courses for teens • Porting studio for indie titles • Asset packs for engine users *Angle:* Paid Lua game dev courses and template marketplace	$20-60 per course or template *Effort:* Low (library or engine, services built around it) ⚠ Zlib-style license; read file (NOASSERTION)
Macroquad not-fl3/macroquad ★ 4.7k · Permissive Apache-2.0 · Framework · Fit 2/5	Simple cross-platform game library for Rust *Replaces:* Unity, GameMaker	Indie studios, schools, hobbyist developers	Training/courses Consulting/implementation Premium plugins/add-ons	• Game dev courses for teens • Porting studio for indie titles • Asset packs for engine users *Angle:* Rust casual web/mobile game development services	$20-60 per course or template *Effort:* Low (library or engine, services built around it)
Heaps HeapsIO/heaps ★ 3.5k · Permissive MIT · Framework · Fit 2/5	Haxe game framework for high-performance 2D and 3D games *Replaces:* Unity, GameMaker	Indie studios, schools, hobbyist developers	Training/courses Consulting/implementation Premium plugins/add-ons	• Game dev courses for teens • Porting studio for indie titles • Asset packs for engine users *Angle:* High-performance 2D/3D titles; consulting for Haxe studios	$20-60 per course or template *Effort:* Low (library or engine, services built around it)
AndEngine nicolasgramlich/AndEngine ★ 3.2k · Permissive Apache-2.0 · Framework · Fit 2/5	Free 2D OpenGL game engine for Android developers. *Replaces:* Unity 2D, Cocos2d-x, Corona SDK	Android developers making 2D games	Consulting/implementation Setup + support retainer	• Kids' learning games for daycare chains • Trivia games for pub quiz apps • Ad-supported arcade apps for local arcades	$3-10k per game build, support plans *Effort:* Low (legacy Android library, older API targets) ⚠ Apache-2.0: keep notice; check Android API compatibility before use
FNA FNA-XNA/FNA ★ 3.1k · Check NONE · Framework · Fit 2/5	Open XNA4 reimplementation for porting games to modern platforms *Replaces:* Unity porting vendors	Indie studios, schools, hobbyist developers	Training/courses Consulting/implementation Premium plugins/add-ons	• Game dev courses for teens • Porting studio for indie titles • Asset packs for engine users *Angle:* Porting legacy XNA games to modern platforms as a service	$20-60 per course or template *Effort:* Low (library or engine, services built around it) ⚠ Mixed licenses (MS-PL, Ms-RL); read license first

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Korge korlibs/korge ★ 3.1k · Check NOASSERTION · Framework · Fit 2/5	Kotlin multiplatform 2D game engine for JVM, web, Android and iOS. *Replaces:* Unity 2D, Cocos2d-x, libGDX	Kotlin developers building multiplatform 2D games	Consulting/implementation Training/courses	• Kotlin game classes for university courses • Kid-friendly quiz games for museums • Cross-platform mini-games for regional publishers	$4-12k per multiplatform game build *Effort:* Low (Kotlin library, you ship your own game) ⚠ NOASSERTION license; verify before shipping; iOS builds need review
Solar2D coronalabs/corona ★ 2.9k · Permissive MIT · Framework · Fit 2/5	Solar2D, a Lua 2D engine for mobile games and apps *Replaces:* Unity, GameSalad, Buildbox	Indie studios, schools, hobbyist developers	Training/courses Consulting/implementation Premium plugins/add-ons	• Game dev courses for teens • Porting studio for indie titles • Asset packs for engine users *Angle:* Educational app and kids game production studio	$20-60 per course or template *Effort:* Low (library or engine, services built around it)
HaxeFlixel HaxeFlixel/flixel ★ 2.2k · Permissive MIT · Framework · Fit 2/5	Haxe 2D game engine with web, desktop and mobile export *Replaces:* Unity, GameMaker	Indie studios, schools, hobbyist developers	Training/courses Consulting/implementation Premium plugins/add-ons	• Game dev courses for teens • Porting studio for indie titles • Asset packs for engine users *Angle:* Retro game reskin studio shipping to web and Steam	$20-60 per course or template *Effort:* Low (library or engine, services built around it)
Arcade pythonarcade/arcade ★ 2.1k · Check NOASSERTION · Library · Fit 2/5	Python library for creating 2D arcade games, popular in education *Replaces:* Pygame, Scratch, Replit game templates	Indie studios, schools, hobbyist developers	Training/courses Consulting/implementation Premium plugins/add-ons	• Game dev courses for teens • Porting studio for indie titles • Asset packs for engine users *Angle:* Python game curriculum sold to coding schools	$20-60 per course or template *Effort:* Low (library or engine, services built around it) ⚠ Read license (NOASSERTION; MIT-style)
NCine nCine/nCine ★ 1.3k · Permissive MIT · Framework · Fit 2/5	Cross-platform C++ 2D game engine for desktop and mobile. *Replaces:* Cocos2d-x, Defold	C++ developers building cross-platform 2D games	Consulting/implementation Training/courses	• Arcade ports for regional museum game exhibits • Educational 2D games for elementary schools • Menu-driven 2D simulations for training labs	$4-12k per game port, $500 training *Effort:* Low (C++ engine, per-platform porting work) ⚠ MIT: keep notice; platform SDK terms apply for mobile builds
Coffee hecrj/coffee ★ 1.1k · Permissive MIT · Framework · Fit 2/5	Opinionated 2D game engine for Rust with a small, simple API. *Replaces:* Bevy 2D, Macroquad	Rust developers building small 2D games	Consulting/implementation Training/courses	• Rust teaching kits for coding bootcamps • Puzzle game prototypes for indie studios • Rust game labs for university courses	$2-5k per prototype, $800 per training cohort *Effort:* Low (small Rust engine, you build the game) ⚠ MIT: keep notice; limited engine maturity; Rust crate churn
Echo timi-liuliang/echo ★ 994 · Permissive MIT · Framework · Fit 2/5	Cross-platform 2D and 3D game engine written in C++. *Replaces:* Unity, Godot	C++ developers wanting an open engine for games	Consulting/implementation Training/courses	• Engine training for C++ game bootcamps • Custom 3D viewers for car dealerships • Small mobile games for regional publishers	$5-15k per custom build, training packs *Effort:* Medium (early-stage engine, editor maturity unclear) ⚠ MIT: keep notice; unclear maturity, verify before committing
Esengine esengine/esengine ★ 931 · Permissive MIT · Framework · Fit 2/5	TypeScript entity-component-system framework for web game development. *Replaces:* Phaser, PlayCanvas, Pixi-based game kits	TypeScript developers building web games	Consulting/implementation Setup + support retainer	• Web games for school reading programs • Interactive quiz games for corporate trainers • Browser mini-games for regional TV promotions	$3-8k per game build, support plans *Effort:* Low (framework, game product built on top) ⚠ MIT: keep notice; small community, maintenance risk
Usagi brettchalupa/usagi ★ 879 · Permissive Unlicense · Framework · Fit 2/5	Lua 2D engine for rapid prototyping with live reload and cross-platform export. *Replaces:* LOVE2D tooling, Defold	Hobbyists and game jam makers prototyping in Lua	Training/courses Consulting/implementation	• Game jam kits for school clubs • Lua prototyping courses for teen coders • Quick prototypes for indie studios	$30-60 course, prototype builds $1-2k *Effort:* Low (small Lua engine, easy to rename and rebrand) ⚠ Unlicense: public domain, no notice needed; repo is a mirror

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Litiengine gurkenlabs/litiengine ★ 841 · **Permissive** MIT · Library · Fit 2/5	Java 2D game engine for desktop games with tile maps and editor. *Replaces:* LibGDX, Slick2D	Java developers making 2D desktop games	Consulting/implementation Training/courses	• Java game classes for high schools • Tile-based training sims for warehouse staff • Tile-map kiosks for science museums	$3-8k per game build, classroom training *Effort:* Low (Java library, you build and theme game) ⚠ MIT: keep notice; Java runtime packaging needed for each OS
Quicksilver elliegoldstein/quicksilver ★ 778 · **Check** NOASSERTION · Framework · Fit 2/5	Simple framework for making 2D games on desktop and web. *Replaces:* Pico-8, LOVE2D, Phaser	Hobbyists making simple 2D games for desktop and web	Training/courses Consulting/implementation	• Browser game kits for after-school programs • Mini-games for kids' museum exhibits • Arcade builds for college game clubs	$500-2k per mini-game build, $300 workshop *Effort:* Low (small framework, you build the game on top) ⚠ NOASSERTION license: read first; verify before shipping commercial games
RogueSharp FaronBracy/RogueSharp ★ 638 · **Permissive** MIT · Library · Fit 2/5	.NET library for roguelike map generation, pathfinding and field-of-view. *Replaces:* libtcod, Unity roguelike kits	.NET developers making roguelike or tile games	Consulting/implementation Training/courses	• Dungeon generators for tabletop RPG tools • Map logic for C# training games • Pathfinding for tile-based simulation labs	$2-5k per integration, $400 training seat *Effort:* Low (library, you build the game on top) ⚠ MIT: keep notice; inspired by libtcod, respect its attribution
ct.js ct-js/ct-js ★ 349 · **Permissive** MIT · App · Fit 2/5	Desktop 2D game engine with visual editors for learning game development *Replaces:* GDevelop, Construct, GameMaker	Indie studios, schools, hobbyist developers	Training/courses Consulting/implementation Premium plugins/add-ons	• Game dev courses for teens • Porting studio for indie titles • Asset packs for engine users *Angle:* No-code game maker courses and asset packs	$20-60 per course or template *Effort:* Low (library or engine, services built around it)

3D Game Engines · 30

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Godot godotengine/godot ★ 119.7k · **Permissive** MIT · Platform · Fit 3/5	Full open game engine with editor for 2D and 3D, exports to all platforms *Replaces:* Unity, Unreal Engine, GameMaker	Game studios, simulation firms, educators	Consulting/implementation Training/courses Premium plugins/add-ons	• Training sims for factories • Engine support for small studios • Courses for aspiring game devs *Angle:* Sell branded engine builds, templates, and porting services to studios	$500-5k/mo support contracts *Effort:* High (large C++ editor, rebrand is costly) ⚠ Godot trademark; MIT code is permissive
Open 3D Engine o3de/o3de ★ 9.8k · **Check** NOASSERTION · Platform · Fit 3/5	Open 3D engine for AAA games and cinematic simulations *Replaces:* Unreal Engine, Unity, CryEngine	Game studios, simulation firms, educators	Consulting/implementation Training/courses Premium plugins/add-ons	• Training sims for factories • Engine support for small studios • Courses for aspiring game devs *Angle:* Offer O3DE-based simulation and AAA prototyping consulting	$500-5k/mo support contracts *Effort:* High (large C++ engine, heavy tooling) ⚠ Apache 2.0 or MIT dual; read license file
FlaxEngine FlaxEngine/FlaxEngine ★ 7.1k · **Check** NOASSERTION · Platform · Fit 3/5	Multi-platform 3D game engine with C# scripting and an editor. *Replaces:* Unity, Unreal Engine, Godot	C# developers making commercial 3D games	Consulting/implementation Training/courses	• 3D configurators for furniture brands • Training sims for industrial plants • Walkthroughs for real estate developers	$3-8k per project, training packs *Effort:* Medium (engine editor, license terms, C# tooling) ⚠ NOASSERTION license: read first; commercial royalty terms may apply
Redot-engine Redot-Engine/redot-engine ★ 6.2k · **Permissive** MIT · Platform · Fit 3/5	Open-source fork of Godot for 2D and 3D game development. *Replaces:* Unity, Godot Engine, Unreal Engine	Indie developers wanting a community-run open engine	Training/courses Consulting/implementation	• Godot-style training for game dev schools • Interactive 3D showrooms for furniture stores • 2D game prototypes for indie studios	$400-900 per course seat, support contracts *Effort:* Medium (large engine fork, renaming and branding work) ⚠ MIT: free to rebrand; Godot trademark concerns, avoid name confusion

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Spring spring/spring ★ 4.0k · Check NOASSERTION · Platform · Fit 3/5	Free cross-platform RTS game engine for community-built strategy games. *Replaces:* Unity RTS templates, StarCraft-style engines	RTS mod makers and strategy game communities	Premium plugins/add-ons Consulting/implementation	• RTS prototypes for wargame clubs • Tactical sims for emergency response trainers • Custom maps for local esports tournaments	$3-8k per game build, $500 training *Effort:* Medium (RTS engine, community content and asset licensing) ⚠ NOASSERTION license; mod and asset licenses vary; Spring is a brand
LumixEngine nem0/LumixEngine ★ 3.9k · Permissive MIT · Platform · Fit 3/5	C++ 3D game engine with integrated editor and open-source focus. *Replaces:* Unity, Unreal Engine, Godot	C++ developers wanting a small open 3D engine	Consulting/implementation Training/courses	• Interactive 3D tours for museums • Product configurators for furniture makers • Engine training for C++ game schools	$4-10k per project, training $500 *Effort:* Medium (C++ editor, smaller community, per-platform builds) ⚠ MIT: keep notice; small community, long-term maintenance risk
SpartanEngine PanosK92/SpartanEngine ★ 3.2k · Check NOASSERTION · Platform · Fit 3/5	C++ 3D game engine with path-traced global illumination and hardware ray tracing. *Replaces:* Unreal Engine, Unity HDRP	Graphics programmers and rendering researchers	Consulting/implementation Training/courses	• Path-traced product visuals for architecture firms • Rendering lessons for graphics courses • Realtime previews for automotive design studios	$5-15k per rendering project, training $800 *Effort:* High (complex renderer, GPU expertise, hardware ray tracing needs) ⚠ NOASSERTION license: read first; needs modern GPUs for ray tracing
Bevy bevyengine/bevy ★ 49.6k · Permissive Apache-2.0 · Framework · Fit 2/5	Data-driven Rust game engine using an entity component system *Replaces:* Unity, Unreal Engine	Game studios, simulation firms, educators	Consulting/implementation Training/courses Premium plugins/add-ons	• Training sims for factories • Engine support for small studios • Courses for aspiring game devs *Angle:* Paid Rust game dev courses, plugins and editor tooling	$500-5k/mo support contracts *Effort:* Low (large C++ codebase, heavy toolchain)
Raylib raysan5/raylib ★ 35.6k · Permissive Zlib · Library · Fit 2/5	Simple C library for videogame programming *Replaces:* Unity, SDL	Game studios, simulation firms, educators	Consulting/implementation Training/courses Premium plugins/add-ons	• Training sims for factories • Engine support for small studios • Courses for aspiring game devs *Angle:* Teach-game-programming bootcamps and paid starter kits	$500-5k/mo support contracts *Effort:* Low (large C++ codebase, heavy toolchain)
Flame flame-engine/flame ★ 10.8k · Permissive MIT · Framework · Fit 2/5	Flutter-based 2D game engine with components, effects and physics. *Replaces:* Unity 2D, Godot, Cocos2d	Flutter developers building casual 2D games	Consulting/implementation Setup + support retainer	• Flutter arcade games for mobile publishers • Interactive kids' stories for pediatric clinics • Mini-games for retail loyalty apps	$5-15k per game build, support plans *Effort:* Low (Flutter framework, you ship your own games) ⚠ MIT: keep notice; Flutter and Dart platform rules apply
Fyrox FyroxEngine/Fyrox ★ 9.7k · Permissive MIT · Framework · Fit 2/5	Rust 3D and 2D game engine with a scene editor *Replaces:* Unity, Godot	Game studios, simulation firms, educators	Consulting/implementation Training/courses Premium plugins/add-ons	• Training sims for factories • Engine support for small studios • Courses for aspiring game devs *Angle:* Rust engine with editor; sell commercial support and templates	$500-5k/mo support contracts *Effort:* Low (large C++ codebase, heavy toolchain)
Stride stride3d/stride ★ 7.9k · Permissive MIT · Framework · Fit 2/5	C# 3D game engine formerly Xenko, with editor *Replaces:* Unity, Unreal Engine	Game studios, simulation firms, educators	Consulting/implementation Training/courses Premium plugins/add-ons	• Training sims for factories • Engine support for small studios • Courses for aspiring game devs *Angle:* C# engine support contracts and asset store for .NET studios	$500-5k/mo support contracts *Effort:* Low (large C++ codebase, heavy toolchain)
Entitas sschmid/Entitas ★ 7.7k · Permissive MIT · Library · Fit 2/5	C# entity component system framework for Unity games. *Replaces:* Unity DOTS, Svelto.ECS	Unity developers building performance-heavy games	Consulting/implementation Training/courses	• ECS training for Unity studios • Simulation backends for industrial digital twins • Crowd simulations for city planning demos	$4-10k per integration, $1k training per seat *Effort:* Low (library embedded in Unity projects) ⚠ MIT: keep notice; Unity licensing applies to shipped games

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Wicked Engine turanszkij/WickedEngine ★ 7.3k · **Permissive** MIT · Framework · Fit 2/5	C++ 3D rendering and game engine with modern graphics features *Replaces:* Unity, Unreal Engine	Game studios, simulation firms, educators	Consulting/implementation Training/courses Premium plugins/add-ons	• Training sims for factories • Engine support for small studios • Courses for aspiring game devs *Angle:* License rendering tech for visualization products	$500-5k/mo support contracts *Effort:* Low (large C++ codebase, heavy toolchain)
Panda3D panda3d/panda3d ★ 5.3k · **Check** NOASSERTION · Framework · Fit 2/5	Python and C++ 3D game engine from Disney and CMU *Replaces:* Unity, Unreal Engine	Game studios, simulation firms, educators	Consulting/implementation Training/courses Premium plugins/add-ons	• Training sims for factories • Engine support for small studios • Courses for aspiring game devs *Angle:* Python 3D training simulations for enterprise and education	$500-5k/mo support contracts *Effort:* Low (large C++ codebase, heavy toolchain) ⚠ BSD-style; read license (NOASSERTION)
Mach hexops/mach ★ 4.9k · **Check** NOASSERTION · Framework · Fit 2/5	Zig game engine and graphics toolkit, still evolving. *Replaces:* Raylib, SDL-based toolkits	Zig developers building games and graphics tools	Consulting/implementation Training/courses	• Graphics tools for Zig hobbyist clubs • Data visualizers for scientific labs • Game prototypes for systems programming courses	$3-8k per engine integration, $500 training *Effort:* Medium (Zig language churn, small ecosystem) ⚠ NOASSERTION license; mirror repo; Zig version churn risk
Ggez ggez/ggez ★ 4.7k · **Permissive** MIT · Framework · Fit 2/5	Rust library for creating simple 2D games. *Replaces:* Macroquad, Bevy 2D	Rust hobbyists and educators making 2D games	Training/courses Consulting/implementation	• Rust game classes for high schools • 2D simulations for physics teachers • Interactive prototypes for escape-room designers	$500-1k per school workshop, $2k prototypes *Effort:* Low (library, you build the game on top) ⚠ MIT: keep notice; crate ecosystem churn and maintenance risk
OGRE OGRECave/ogre ★ 4.7k · **Permissive** MIT · Library · Fit 2/5	C++ 3D rendering engine used inside simulators and games *Replaces:* Unity, Unreal Engine	Game studios, simulation firms, educators	Consulting/implementation Training/courses Premium plugins/add-ons	• Training sims for factories • Engine support for small studios • Courses for aspiring game devs *Angle:* Rendering backend for branded simulators and digital twins	$500-5k/mo support contracts *Effort:* Low (large C++ codebase, heavy toolchain)
Pixel faiface/pixel ★ 4.5k · **Permissive** MIT · Library · Fit 2/5	Hand-crafted 2D game library written in Go. *Replaces:* Ebiten, raylib-go	Go developers making 2D games or tools	Consulting/implementation Training/courses	• Go game workshops for university clubs • 2D editors for map designers • Desktop visualizers for logistics analysts	$2-5k per tool build, $400 workshop *Effort:* Low (library, you build the product on top) ⚠ MIT: keep notice; check maintenance status before depending on it
jMonkeyEngine jMonkeyEngine/jmonkeyengine ★ 4.3k · **Permissive** BSD-3-Clause · Framework · Fit 2/5	Java 3D game development suite and engine *Replaces:* Unity, Unreal Engine	Game studios, simulation firms, educators	Consulting/implementation Training/courses Premium plugins/add-ons	• Training sims for factories • Engine support for small studios • Courses for aspiring game devs *Angle:* Java 3D game development agency and support plans	$500-5k/mo support contracts *Effort:* Low (large C++ codebase, heavy toolchain)
NoahGameFrame ketoo/NoahGameFrame ★ 4.2k · **Permissive** Apache-2.0 · Framework · Fit 2/5	C++ distributed game server framework for MMO and MOBA backends. *Replaces:* Photon Server, PlayFab, Nakama	MMO and MOBA studios building game server backends	Consulting/implementation Managed hosting	• Multiplayer backends for local esports leagues • Realtime servers for city-simulation games • Game servers for kids' educational MMOs	$15-40k per backend build, hosting per player count *Effort:* High (large C++ server codebase, scaling expertise needed) ⚠ Apache-2.0: keep notices; C# and Lua script claims need verification
Egret-core egret-labs/egret-core ★ 4.0k · **Check** NOASSERTION · Framework · Fit 2/5	Open HTML5 engine for building mobile games and apps on Android, iOS and Windows. *Replaces:* Cocos Creator, LayaAir	Chinese and Asian mobile game studios	Consulting/implementation Training/courses	• HTML5 mini-games for Chinese brand campaigns • Interactive ads for mobile app marketers • Kids' learning games for regional publishers	$3-10k per game build, training packs *Effort:* Medium (Chinese-first ecosystem, mobile packaging work) ⚠ NOASSERTION license: read first; Egret is a brand; check SDK terms

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Dear ImGui ocornut/imgui ★ 77.0k · **Permissive** MIT · Library · Fit 2/5	Dear ImGui, immediate-mode GUI library for C++ *Replaces:* Qt commercial, Unity IMGUI	Game developers, engine builders, tool makers	Consulting/implementation Training/courses Premium plugins/add-ons	• Physics integration for small studios • Debug tooling for engine teams • ECS courses for developers *Angle:* In-house game tools development	$2k-10k per integration *Effort:* Low (library, business is services)
Bullet bulletphysics/bullet3 ★ 14.8k · **Check** NOASSERTION · Library · Fit 2/5	Real-time collision detection and physics simulation SDK *Replaces:* Havok, PhysX	Game developers, engine builders, tool makers	Consulting/implementation Training/courses Premium plugins/add-ons	• Physics integration for small studios • Debug tooling for engine teams • ECS courses for developers *Angle:* Simulation and VR physics services	$2k-10k per integration *Effort:* Low (library, business is services) ⚠ Zlib; read license (NOASSERTION)
EnTT skypjack/entt ★ 13.2k · **Permissive** MIT · Library · Fit 2/5	Fast modern C++ entity component system *Replaces:* Unity DOTS	Game developers, engine builders, tool makers	Consulting/implementation Training/courses Premium plugins/add-ons	• Physics integration for small studios • Debug tooling for engine teams • ECS courses for developers *Angle:* ECS consulting for engines	$2k-10k per integration *Effort:* Low (library, business is services)

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Jolt Physics jrouwe/JoltPhysics ★ 12.2k · Permissive MIT · Library · Fit 2/5	Multi-core rigid body physics library in C++ *Replaces:* Havok, PhysX	Game developers, engine builders, tool makers	Consulting/implementation Training/courses Premium plugins/add-ons	• Physics integration for small studios • Debug tooling for engine teams • ECS courses for developers *Angle:* Physics integration consulting	$2k-10k per integration *Effort:* Low (library, business is services)
Box2D erincatto/box2d ★ 10.5k · Permissive MIT · Library · Fit 2/5	2D physics engine for games *Replaces:* Havok, PhysX 2D	Game developers, engine builders, tool makers	Consulting/implementation Training/courses Premium plugins/add-ons	• Physics integration for small studios • Debug tooling for engine teams • ECS courses for developers *Angle:* Physics-based casual games	$2k-10k per integration *Effort:* Low (library, business is services)
flecs SanderMertens/flecs ★ 8.8k · Check NOASSERTION · Library · Fit 2/5	Fast entity component system for C and C++ *Replaces:* Unity DOTS	Game developers, engine builders, tool makers	Consulting/implementation Training/courses Premium plugins/add-ons	• Physics integration for small studios • Debug tooling for engine teams • ECS courses for developers *Angle:* ECS-based simulation products	$2k-10k per integration *Effort:* Low (library, business is services) ⚠ Read license (NOASSERTION; MIT)
Rapier dimforge/rapier ★ 6.0k · Permissive Apache-2.0 · Library · Fit 2/5	Rust 2D and 3D physics engines *Replaces:* Havok, PhysX	Game developers, engine builders, tool makers	Consulting/implementation Training/courses Premium plugins/add-ons	• Physics integration for small studios • Debug tooling for engine teams • ECS courses for developers *Angle:* Web physics games	$2k-10k per integration *Effort:* Low (library, business is services)
Planck.js piqnt/planck.js ★ 5.3k · Permissive MIT · Library · Fit 2/5	2D JavaScript physics engine based on Box2D *Replaces:* Matter.js	Game developers, engine builders, tool makers	Consulting/implementation Training/courses Premium plugins/add-ons	• Physics integration for small studios • Debug tooling for engine teams • ECS courses for developers *Angle:* Physics puzzle web games	$2k-10k per integration *Effort:* Low (library, business is services)
cannon.js schteppe/cannon.js ★ 5.0k · Permissive MIT · Library · Fit 2/5	Lightweight 3D physics engine written in JavaScript for web apps. *Replaces:* Havok, Ammo.js, Rapier	Web developers adding 3D physics	Consulting/implementation Training/courses	• Physics integration for web product configurators • Three.js physics courses for web developers • Browser physics prototypes for agencies	Free MIT; $120-200/hr physics integration *Effort:* Low (Small JS library, MIT, drop-in) ⚠ MIT: keep notice; library may be unmaintained, verify upkeep
Chrono projectchrono/chrono ★ 3.1k · Permissive BSD-3-Clause · Library · Fit 2/5	C++ library for multiphysics and multibody dynamics simulation. *Replaces:* MSC Adams, Simpack	Engineering teams simulating vehicles and machines	Consulting/implementation Training/courses	• Vehicle dynamics consulting for automotive suppliers • Multibody simulation courses for engineering students • Machine simulation services for industrial designers	Free BSD; $200-300/hr simulation consulting *Effort:* High (Scientific C++ codebase, expert users only) ⚠ BSD-3: keep notice; large dependency tree, check each license
Bepuphysics2 bepu/bepuphysics2 ★ 3.0k · Permissive Apache-2.0 · Library · Fit 2/5	Pure C# real-time 3D physics library for game and simulation use. *Replaces:* Havok, Nvidia PhysX	C# game developers needing 3D physics	Consulting/implementation Training/courses	• Physics integration for Unity-free C# engines • Physics courses for .NET game devs • Physics tuning audits for simulation studios	Free Apache; $150/hr integration work *Effort:* Medium (Low-level physics API, expert integration) ⚠ Apache-2.0: keep notices; library, not turnkey product
p2.js schteppe/p2.js ★ 2.7k · Check NOASSERTION · Library · Fit 2/5	2D physics library for JavaScript games and simulations. *Replaces:* Box2D, Matter.js	Browser game developers needing 2D physics	Consulting/implementation Training/courses	• 2D physics for browser puzzle games • Physics demos for web game courses • Physics tuning for HTML5 arcade studios	Free library; $100-200/hr integration work *Effort:* Medium (Older library, check upkeep and license) ⚠ NOASSERTION: read license first; library may be unmaintained
Simbody simbody/simbody ★ 2.6k · Permissive Apache-2.0 · Library · Fit 2/5	C++ multibody dynamics library for vehicles, robots and biomechanics. *Replaces:* MSC Adams, Simscape	Biomechanics labs and robotics engineers	Consulting/implementation Training/courses	• Biomechanics simulation for sports labs • Robot dynamics consulting for research groups • Multibody training for engineering grad students	Free Apache; $200/hr simulation consulting *Effort:* High (Specialist C++ library, steep learning curve) ⚠ Apache-2.0: keep notices; check dependencies for licenses

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Cannon-es pmndrs/cannon-es ★ 2.1k · **Permissive** MIT · Library · Fit 2/5	Lightweight 3D physics engine in JavaScript *Replaces:* Ammo.js	Game developers, engine builders, tool makers	Consulting/implementation Training/courses Premium plugins/add-ons	• Physics integration for small studios • Debug tooling for engine teams • ECS courses for developers *Angle:* Physics web games for ads	$2k-10k per integration *Effort:* Low (library, business is services)
Reactphysics3d DanielChappuis/reactphysics3d ★ 1.8k · **Permissive** Zlib · Library · Fit 2/5	Open source C++ 3D physics engine library for games. *Replaces:* Havok, Nvidia PhysX	C++ game developers needing 3D physics	Consulting/implementation Training/courses	• Physics integration for C++ indie engines • Collision tuning audits for game studios • Physics courses for C++ game students	Free Zlib; $150-250/hr integration work *Effort:* Medium (Mature C++ library, integration work needed) ⚠ Zlib: keep notice; library only, not a turnkey product
Nphysics dimforge/nphysics ★ 1.6k · **Permissive** Apache-2.0 · Library · Fit 2/5	Rigid body physics engine for 2D and 3D simulation in Rust. *Replaces:* Havok, Nvidia PhysX	Rust developers building physics-based simulations	Consulting/implementation Training/courses	• Physics integration for Rust game studios • Rust simulation courses for robotics students • Physics tuning for Rust VFX prototypes	Free Apache; $150/hr integration work *Effort:* Medium (Rust library, project superseded in parts, verify upkeep) ⚠ Apache-2.0: keep notices; library only, verify maintenance
Dart dartsim/dart ★ 1.2k · **Permissive** BSD-2-Clause · Library · Fit 2/5	Dynamic animation and robotics toolkit for simulating articulated rigid bodies. *Replaces:* Simscape Multibody, MotionGenesis	Robotics labs and animation researchers	Consulting/implementation Training/courses	• Robot simulation consulting for research labs • Articulated body courses for robotics students • Animation physics services for research studios	Free BSD; $200/hr simulation consulting *Effort:* High (C++ toolkit, expert users, many dependencies) ⚠ BSD-2: keep notice; dependency licenses vary
Pymunk viblo/pymunk ★ 1.1k · **Permissive** MIT · Library · Fit 2/5	Pythonic 2D rigid body physics library for simple simulations.	Python developers building 2D physics demos	Training/courses Consulting/implementation	• Python physics courses for teen coders • 2D physics prototypes for education apps • Physics demo builds for science museums	Free MIT; $100-200 per course seat *Effort:* Low (Small Python library, easy to wrap) ⚠ MIT: keep notice; library only, not a product
Godot-rapier-physics appsinacup/godot-rapier-physics ★ 1.0k · **Permissive** MIT · Library · Fit 2/5	Godot physics addon using the Rapier engine for 2D and 3D games. *Replaces:* Godot Physics, Havok	Godot developers wanting stable physics	Premium plugins/add-ons Consulting/implementation	• Physics addon setup for Godot studios • Stable physics for Godot multiplayer teams • Physics migration services for Godot indies	Free MIT; $80-200 per-project physics setup *Effort:* Medium (Godot addon, Rust-backed build, version-tied) ⚠ MIT: keep notice; Godot is a trademark; Rapier is an open project
OimoPhysics saharan/OimoPhysics ★ 959 · **Permissive** MIT · Library · Fit 2/5	Cross-platform 3D physics engine for web and other targets. *Replaces:* Havok, Ammo.js	Web and cross-platform developers needing 3D physics	Consulting/implementation Training/courses	• Browser physics for product configurators • 3D physics courses for web developers • Physics prototypes for WebGL agencies	Free MIT; $120-200/hr physics integration *Effort:* Low (Small physics library, MIT, drop-in) ⚠ MIT: keep notice; library only, check current maintenance

Pixel Art & Sprite Tools · 24

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Piskel piskelapp/piskel ★ 13.0k · **Permissive** Apache-2.0 · App · Fit 3/5	Web-based pixel art and sprite editor *Replaces:* Aseprite, Pixilart	Pixel artists, indie developers, game jam teams	Managed hosting Content/membership Premium plugins/add-ons	• Browser pixel editor for schools • Sprite asset packs for indie devs • Team pixel art workspace for studios *Angle:* Hosted sprite editor with premium export	$5/mo pro tier, asset packs $10 *Effort:* Low (static web app, simple theming)

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Pixelorama Orama-Interactive/Pixelorama ★ 11.0k · Permissive MIT · App · Fit 3/5	Pixel art multitool built in Godot, desktop and web *Replaces:* Aseprite, Pyxel Edit	Pixel artists, indie developers, game jam teams	Managed hosting Content/membership Premium plugins/add-ons	• Browser pixel editor for schools • Sprite asset packs for indie devs • Team pixel art workspace for studios *Angle:* Pixel art editor; sell asset packs and courses	$5/mo pro tier, asset packs $10 *Effort:* Low (small web or desktop app, easy theming)
Krita KDE/krita ★ 10.7k · GPL GPL-3.0 · App · Fit 3/5	Professional free digital painting and illustration application *Replaces:* Adobe Photoshop, Clip Studio Paint, Procreate, Corel Painter	Digital artists and animators	Training/courses Content/membership Marketplace	• Krita courses for comic artists • Brush pack store for illustrators • Painting classes for hobbyists *Angle:* Digital painting training and game art courses	$29-79 per course *Effort:* High (Qt desktop app, builds per OS) ⚠ GPL-3.0; Krita trademark; no cloud features
Dicebear dicebear/dicebear ★ 10.0k · Permissive MIT · Library · Fit 3/5	Avatar generation library for designers and developers, with many styles. *Replaces:* Adobe avatar kits, Figma avatar plugins	Product teams needing generated user avatars	API/usage-based Consulting/implementation	• Generated avatars for SaaS onboarding • Avatar APIs for community forums • Custom avatar styles for brand design agencies	Free MIT; $49-199/mo hosted avatar API *Effort:* Low (Library and styles, easy to host and brand) ⚠ MIT: keep notice; some avatar styles carry their own licenses
LibreSprite LibreSprite/LibreSprite ★ 8.7k · GPL GPL-2.0 · App · Fit 3/5	Animated sprite editor, fork of Aseprite's last GPL version *Replaces:* Aseprite	Pixel artists, indie developers, game jam teams	Managed hosting Content/membership Premium plugins/add-ons	• Browser pixel editor for schools • Sprite asset packs for indie devs • Team pixel art workspace for studios *Angle:* Branded pixel art editor for schools	$5/mo pro tier, asset packs $10 *Effort:* Low (small web or desktop app, easy theming) ⚠ GPL-2.0; Aseprite trademark
Material Maker RodZill4/material-maker ★ 6.2k · Permissive MIT · App · Fit 3/5	Procedural texture authoring and 3D model painting tool on Godot *Replaces:* Substance Designer, Substance Painter	Pixel artists, indie developers, game jam teams	Managed hosting Content/membership Premium plugins/add-ons	• Browser pixel editor for schools • Sprite asset packs for indie devs • Team pixel art workspace for studios *Angle:* Procedural texture packs marketplace	$5/mo pro tier, asset packs $10 *Effort:* Medium (small web or desktop app, easy theming)
Free Texture Packer odrick/free-tex-packer ★ 1.3k · Permissive MIT · App · Fit 3/5	Free texture packer for sprite atlases *Replaces:* TexturePacker	Pixel artists, indie developers, game jam teams	Managed hosting Content/membership Premium plugins/add-ons	• Browser pixel editor for schools • Sprite asset packs for indie devs • Team pixel art workspace for studios *Angle:* Sprite sheet packing service for studios	$5/mo pro tier, asset packs $10 *Effort:* Low (small web or desktop app, easy theming)
Aseprite aseprite/aseprite ★ 40.8k · Check NONE · App · Fit 2/5	Animated sprite and pixel art editor for Windows, macOS and Linux. *Replaces:* Pyxel Edit, Photoshop	Pixel artists and indie game studios	Premium plugins/add-ons Training/courses	• Pixel art courses for indie game studios • Sprite pipeline setups for small teams • Animation plugin packs for pixel artists	Not open source; paid product, $20-30 license *Effort:* Medium (Source license restricts redistribution and forks) ⚠ NONE license: source not open for redistribution; Aseprite is a paid product
Star-Office-UI ringhyacinth/Star-Office-UI ★ 7.6k · Check NOASSERTION · App · Fit 2/5	Pixel office view that shows AI agent work states as characters and notes.	Teams wanting a visual status view for AI agents	Mobile app on top Premium plugins/add-ons	• Pixel office dashboards for remote agent teams • Agent status displays for startup standups • Pixel office skins for agent platforms	Free core; $10-20/mo hosted pixel office *Effort:* Medium (Art assets must be replaced for commercial use) ⚠ NOASSERTION: art non-commercial only; code MIT; replace art to sell
Clawd-on-desk rullerzhou-afk/clawd-on-desk ★ 6.7k · AGPL AGPL-3.0 · App · Fit 2/5	Pixel desktop pet that reacts to AI coding agents running on your computer. *Replaces:* Desktop pet apps	Developers using AI coding agents daily	Premium plugins/add-ons Mobile app on top	• Desktop pets for coding bootcamp students • Agent-status pets for dev teams • Pixel companions for indie hackers	Free AGPL; $3-5 paid character pack *Effort:* Medium (Desktop app, character art to rebuild) ⚠ AGPL: publish server changes; Claude and Codex are others' trademarks

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Pixel-art-react jvalen/pixel-art-react ★ 6.1k · **Permissive** MIT · App · Fit 2/5	Web app for pixel art animation and drawing, built with React. *Replaces:* Pixilart, Piskel	Hobby pixel artists and sprite makers	Mobile app on top Premium plugins/add-ons	• Browser pixel tools for classroom art lessons • Sprite editors for small game jam teams • Pixel art kits for craft brands	Free MIT; $4/mo pro export features *Effort:* Medium (Web app, needs UX and export polish) ⚠ MIT: keep notice; verify asset and font licenses
Pixelfx patch-gg/pixelfx ★ 5.8k · **Permissive** MIT · Library · Fit 2/5	Collection of 244 pixel art effects as small code snippets, plus a skill.	Game developers adding pixel effects	Premium plugins/add-ons Training/courses	• Effect packs for pixel-art game studios • Shader effect courses for indie devs • Effect libraries for web game agencies	Free MIT; $19-39 premium effect pack *Effort:* Low (Snippet library, easy to repackage) ⚠ MIT: keep notice; effect code, verify each snippet's source
Agent-sprite-forge 0x0funky/agent-sprite-forge ★ 5.4k · **Permissive** MIT · Tool · Fit 2/5	Agent skill that generates sprite sheets, transparent frames and animated GIFs. *Replaces:* Scenario.gg, Leonardo.ai	Indie game devs making 2D sprite assets	API/usage-based Setup + support retainer	• Sprite generation for mobile game studios • Animated GIF assets for marketing teams • Sprite sheets for pixel game jam teams	$0.10-0.30 per generated sprite sheet *Effort:* Medium (Depends on image model APIs, output needs cleanup) ⚠ MIT: keep notice; image model provider terms and output rights
Petdex crafter-station/petdex ★ 4.3k · **Permissive** MIT · Content · Fit 2/5	Public gallery of animated pets for many AI coding tools.	Developers customizing AI tool mascots	Marketplace Content/membership	• Pet marketplace for AI coding tool users • Animated mascot packs for dev tool companies • Gallery hosting for pixel artists	Free gallery; 15-20% creator marketplace fee *Effort:* Medium (Gallery and moderation, creator payouts) ⚠ MIT: keep notice; artwork rights need creator agreements
Sprite-gen aldegad/sprite-gen ★ 3.9k · **Permissive** Apache-2.0 · Tool · Fit 2/5	Pipeline to generate 2D sprites and animation atlases for game engines. *Replaces:* TexturePacker, Spine	Indie game developers needing sprite atlases	API/usage-based Consulting/implementation	• Sprite atlas pipelines for mobile game studios • Animation asset generation for 2D indie teams • Sprite pipeline setup for web game agencies	$200-600 per atlas pipeline setup *Effort:* Medium (Component-row pipeline, needs tuning per art style) ⚠ Apache-2.0: keep notices; TexturePacker and Spine are commercial brands
Rx cloudhead/rx ★ 3.5k · **GPL** GPL-3.0 · App · Fit 2/5	Modern, minimalist pixel editor for drawing sprites and icons. *Replaces:* Aseprite, Pyxel Edit	Pixel artists and icon designers	Premium plugins/add-ons Mobile app on top	• Icon editors for small design agencies • Pixel art tools for classroom art lessons • Sprite editors for indie game jam teams	Free GPL; $5-10 paid build *Effort:* Medium (Desktop editor, small team, rendering work) ⚠ GPL-3.0: ship source; Aseprite is a separate paid product
Poxi maierfelix/poxi ★ 2.8k · **Permissive** BSD-2-Clause · App · Fit 2/5	Flat pixel art editor *Replaces:* Aseprite	Pixel artists, indie developers, game jam teams	Managed hosting Content/membership Premium plugins/add-ons	• Browser pixel editor for schools • Sprite asset packs for indie devs • Team pixel art workspace for studios *Angle:* Web pixel art editor SaaS	$5/mo pro tier, asset packs $10 *Effort:* Low (small web or desktop app, easy theming)
obelisk.js nosir/obelisk.js ★ 2.3k · **Check** NOASSERTION · Library · Fit 2/5	JavaScript library for drawing pixel isometric graphics on HTML5 canvas.	Web developers making isometric pixel scenes	Consulting/implementation Training/courses	• Isometric map tools for browser city builders • Canvas courses for web devs • Pixel isometric widgets for web agencies	Free library; $100-200/hr custom scene build *Effort:* Low (Small canvas library, niche rendering) ⚠ NOASSERTION: read license first; small library, verify upkeep
Cytopia CytopiaTeam/Cytopia ★ 2.2k · **GPL** GPL-3.0 · Game · Fit 2/5	Open-source city building simulation game with trees, houses and offices. *Replaces:* SimCity, Cities: Skylines	City builder fans and casual strategy players	Mobile app on top Premium plugins/add-ons	• City builder mobile remakes for casual players • Map packs for city sim streamers • City builder kits for urban planning classes	Free GPL; $3-5 paid map or art pack *Effort:* High (Full game, art and sim systems, GPL distribution) ⚠ GPL-3.0: ship source; SimCity and Cities: Skylines are commercial brands

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Pixelit giventofly/pixelit ★ 1.8k · Permissive MIT · Tool · Fit 2/5	Turns any image into pixel art using a browser tool. *Replaces:* Pixelator web tools	Designers making pixel art from photos	Premium plugins/add-ons Mobile app on top	• Pixel portraits for event photo booths • Pixel art filters for social media teams • Pixel photo kits for craft shops	Free MIT; $2-4 one-time HD export *Effort:* Low (Simple image filter, easy to restyle) ⚠ MIT: keep notice; uploaded user photos need privacy handling
Starnet androoAGI/starnet ★ 1.8k · Permissive MIT · App · Fit 2/5	Local-first desktop harness that shows AI agents as pixel-art characters at work.	Developers running local AI agents	Premium plugins/add-ons Setup + support retainer	• Visual monitors for AI agent crews • Agent dashboards for indie hackers • Pixel status screens for remote teams	Free MIT; $10-20 per-seat pro tier *Effort:* Medium (Desktop harness, agent integrations change fast) ⚠ MIT: keep notice; agent actions carry security risk; BYO API key
Slate mitchcurtis/slate ★ 1.2k · GPL GPL-3.0 · App · Fit 2/5	Pixel art editor for tilesets and images *Replaces:* Aseprite	Pixel artists, indie developers, game jam teams	Managed hosting Content/membership Premium plugins/add-ons	• Browser pixel editor for schools • Sprite asset packs for indie devs • Team pixel art workspace for studios *Angle:* Desktop pixel editor for game teams	$5/mo pro tier, asset packs $10 *Effort:* Low (small web or desktop app, easy theming) ⚠ GPL-3.0
Stipple Effect stipple-effect/stipple-effect ★ 622 · Check NOASSERTION · App · Fit 2/5	Pixel art editor with animation and scripting *Replaces:* Aseprite	Pixel artists, indie developers, game jam teams	Managed hosting Content/membership Premium plugins/add-ons	• Browser pixel editor for schools • Sprite asset packs for indie devs • Team pixel art workspace for studios *Angle:* Pixel animation tool with premium features	$5/mo pro tier, asset packs $10 *Effort:* Low (small web or desktop app, easy theming) ⚠ Read license (NOASSERTION)
Pixel Art Together liveblocks/pixel-art-together ★ 215 · Permissive Apache-2.0 · Starter · Fit 2/5	Multiplayer pixel art editor demo powered by Liveblocks *Replaces:* Pixilart	Pixel artists, indie developers, game jam teams	Managed hosting Content/membership Premium plugins/add-ons	• Browser pixel editor for schools • Sprite asset packs for indie devs • Team pixel art workspace for studios *Angle:* Collaborative pixel art for classrooms	$5/mo pro tier, asset packs $10 *Effort:* Low (small web or desktop app, easy theming) ⚠ Needs Liveblocks service

Gods-eye-view bilawalsidhu/gods-eye-view ★ 63.3k · **Check** NOASSERTION · App · Fit 3/5	Browser-based 3D globe showing live open-source spatial intelligence data. *Replaces:* Google Earth Pro, Maxar Platform	OSINT analysts, journalists, logistics planners	Managed hosting API/usage-based	• Live shipping-lane tracking for logistics teams • Open-source conflict mapping for newsrooms • Satellite overlay dashboards for insurers	Free globe, $99/mo for team data feeds *Effort:* High (data licensing heavy, 3D rendering, many feeds) ⚠ NOASSERTION license, read first, satellite and map data licenses restrict redistribution
Supersplat playcanvas/supersplat ★ 10.6k · **Permissive** MIT · App · Fit 3/5	Browser editor for cleaning and editing 3D Gaussian splat scans. *Replaces:* Luma AI, Polycam editor	3D scanning studios, real-estate photographers, game artists	Managed hosting Premium plugins/add-ons	• Splat cleanup service for real-estate 3D tours • Gaussian splat editing for museum archives • Splat editing for game-asset studios	Free editor, $19/mo for hosted publishing *Effort:* Medium (browser app, file formats and publishing need work) ⚠ MIT fine, PlayCanvas is a company trademark
Speedscope jlfwong/speedscope ★ 6.8k · **Permissive** MIT · App · Fit 3/5	A fast, interactive web-based viewer for performance profiles. *Replaces:* Sentry profiling, Datadog continuous profiler	Performance engineers, backend teams, game developers	Managed hosting Consulting/implementation	• Hosted profile sharing for game studios • Performance review portal for SaaS teams • Profiler reports for embedded device makers	Free viewer, $29/mo hosted profile sharing *Effort:* Low (static web viewer, few backend needs) ⚠ MIT fine, profile data may contain sensitive code paths
Pannellum mpetroff/pannellum ★ 4.9k · **Permissive** MIT · Library · Fit 3/5	Lightweight free panorama viewer for embedding 360-degree photos in web pages. *Replaces:* Matterport, Ricoh Theta viewer	Real-estate photographers, tourism sites, museums	Managed hosting Setup + support retainer	• 360-degree property tours for real-estate agents • Virtual campus tours for universities • Panoramic museum exhibits for cultural venues	Free viewer, $29/mo hosted tour pages *Effort:* Low (drop-in viewer, mature, easy embed) ⚠ MIT fine, panorama images may carry photographer copyright
Word-atlas designfuchen/word-atlas ★ 4.4k · **Check** NOASSERTION · App · Fit 3/5	Illustrated IELTS vocabulary app: 7,298 words, audio, FSRS spaced-repetition review. *Replaces:* Quizlet, Anki	IELTS candidates, Chinese-speaking English learners	Mobile app on top Training/courses	• IELTS vocabulary for test-prep centers • Illustrated word cards for primary schools • Exam-prep vocab packs for study abroad agencies	Free app, $9.99 one-time for premium decks *Effort:* Medium (dataset CC BY, app needs content and audio) ⚠ NOASSERTION app license, CC BY 4.0 dataset needs attribution, audio rights check
PlayCanvas Editor playcanvas/editor ★ 1.4k · **Permissive** MIT · Platform · Fit 3/5	Browser-based visual editor for building WebGL, WebGPU and WebXR 3D apps *Replaces:* PlayCanvas cloud, Spline, Unity	3D web studios	Managed hosting White-label reseller Agency service	• White-label 3D editor for ad agencies • Branded product configurator builder • Private editor for training firms *Angle:* Host a branded collaborative web game editor SaaS	$99/mo per team *Effort:* High (Complex stack, collaboration backend) ⚠ MIT but PlayCanvas branding; multi-service backend needed

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
three.js mrdoob/three.js ★ 117.8k · **Permissive** MIT · Library · Fit 2/5	JavaScript 3D library for WebGL and WebGPU rendering *Replaces:* Unity WebGL, Sketchfab	Web developers, agencies	Agency service Consulting/implementation Training/courses	• 3D configurators for furniture retailers • Interactive museum web exhibits • Three.js training for design teams *Angle:* Immersive brand web experiences agency	$10-50k per project *Effort:* Medium (Library, no product built in) ⚠ MIT; no tm issue, ecosystem is large
PixiJS pixijs/pixijs ★ 48.6k · **Permissive** MIT · Library · Fit 2/5	Fast 2D WebGL rendering engine for HTML5 games and interactive content *Replaces:* Adobe Animate, Unity 2D	Web game developers	Agency service Consulting/implementation Training/courses	• Casual games for sweepstakes sites • Interactive ads for brands • Kids learning games for publishers *Angle:* Interactive web casual games for publishers and sweepstakes	$5-25k per game *Effort:* Medium (Renderer only, build game around) ⚠ MIT; gambling-related use has regulatory exposure
Phaser phaserjs/phaser ★ 40.7k · **Permissive** MIT · Framework · Fit 2/5	HTML5 2D game framework with canvas and WebGL rendering *Replaces:* Unity 2D, Construct	Web game studios	Agency service Training/courses Premium plugins/add-ons	• Branded advergames for restaurants • Phaser course for bootcamps • HTML5 casino-free arcade portals *Angle:* HTML5 advergame studio for brand marketing campaigns	$4-20k per game *Effort:* Medium (Framework, studio builds game) ⚠ MIT; Phaser name is a company mark
React Three Fiber pmndrs/react-three-fiber ★ 33.6k · **Permissive** MIT · Library · Fit 2/5	React renderer for three.js enabling declarative 3D scenes *Replaces:* Spline, Unity WebGL	React developers	Agency service Consulting/implementation Training/courses	• 3D product viewers for sneaker brands • Interactive portfolio sites for architects • R3F workshops for agencies *Angle:* 3D web game and experience agency for React teams	$8-40k per site *Effort:* Medium (Library for React teams) ⚠ MIT; requires three.js knowledge
Babylon.js BabylonJS/Babylon.js ★ 26.3k · **Permissive** Apache-2.0 · Framework · Fit 2/5	Full-featured web 3D engine with physics, GUI and XR support *Replaces:* Unity WebGL, PlayCanvas	Web 3D teams	Agency service Consulting/implementation Training/courses	• 3D car configurators for dealers • Digital twin viewers for factories • Browser VR training modules *Angle:* 3D product configurators and web games for retailers	$15-60k per project *Effort:* Medium (Engine, solutions built on top) ⚠ Apache-2.0; Microsoft-backed, stable
xterm.js xtermjs/xterm.js ★ 21.3k · **Permissive** MIT · Library · Fit 2/5	JavaScript terminal emulator component for embedding a terminal in web pages.	Web IDE builders, cloud console teams, SaaS developers	Consulting/implementation Setup + support retainer	• Browser terminals for cloud IDE startups • Web shells for hosting-panel vendors • Embedded terminals for online coding courses	Free library, $2k-10k per integration *Effort:* Low (mature component, embed-ready, little branding) ⚠ MIT fine, library only, no hosted terminal product included
Filament google/filament ★ 20.7k · **Permissive** Apache-2.0 · Library · Fit 2/5	Real-time physically based rendering engine for Android, iOS, desktop and web. *Replaces:* Unity HDRP, Unreal Engine	AR/3D app developers, product visualization teams	Consulting/implementation Setup + support retainer	• Product configurators for furniture retailers • AR previews for e-commerce brands • Medical 3D viewers for device makers	Free library, $5k-20k per integration *Effort:* High (C++ rendering engine, expert integration) ⚠ Apache-2.0 fine, graphics expertise needed, platform SDK rules apply
Tfjs tensorflow/tfjs ★ 19.2k · **Permissive** Apache-2.0 · Library · Fit 2/5	JavaScript library for training and deploying machine learning models in the browser. *Replaces:* AWS SageMaker, Azure ML	Web ML developers, edge AI product teams	Consulting/implementation Setup + support retainer	• In-browser pose detection for fitness apps • On-device classifiers for privacy-focused apps • Browser ML tutorials for web developers	Free library, $3k-15k per deployment project *Effort:* Medium (JS library, model conversion and tuning needed) ⚠ Apache-2.0 fine, TensorFlow is a Google trademark, model licenses vary
plotly.py plotly/plotly.py ★ 18.9k · **Permissive** MIT · Library · Fit 2/5	Interactive graphing library for Python with charts and dashboards. *Replaces:* Tableau, Power BI	Data analysts, Python dashboard builders, researchers	Consulting/implementation Training/courses	• Interactive reporting for hospital quality teams • Plotly dashboards for agricultural co-ops • Python chart training for finance analysts	Free library, $1.5k-5k per dashboard build *Effort:* Low (mature library, theming via templates) ⚠ MIT fine, Plotly name is a company trademark, Dash Enterprise is separate

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Matter.js liabru/matter-js ★ 18.6k · Permissive MIT · Library · Fit 2/5	2D rigid body physics engine for the web *Replaces:* Box2D licensed SDKs	Web game developers	Agency service Training/courses Premium plugins/add-ons	• Physics puzzle games for brand sites • Physics lessons for STEM classrooms • Interactive banner ads with physics *Angle:* Physics puzzle games for web portals and ads	$3-10k per game *Effort:* Medium (Physics only, needs renderer) ⚠ MIT; maintenance slow
Bgfx bkaradzic/bgfx ★ 17.6k · Permissive BSD-2-Clause · Library · Fit 2/5	Cross-platform graphics rendering library that works with any engine or framework.	Game engine developers, graphics middleware teams	Consulting/implementation Training/courses	• Graphics backends for indie game engines • Rendering middleware for embedded HMI vendors • Graphics API courses for engine programmers	Free library, $8k-25k per engine port *Effort:* High (C++ graphics middleware, expert integration) ⚠ BSD-2-Clause, keep notices, graphics driver bugs vary per platform
PlayCanvas Engine playcanvas/engine ★ 17.2k · Permissive MIT · Framework · Fit 2/5	WebGL/WebGPU/WebXR game and 3D runtime for browser-based experiences *Replaces:* Unity WebGL, Spline	Web 3D studios	Agency service Consulting/implementation Training/courses	• Playable ads for mobile game publishers • 3D product viewers for retail • WebXR training demos for HR *Angle:* Self-hosted playable ad and 3D web game platform	$10-40k per project *Effort:* Medium (Runtime only, editor is commercial) ⚠ MIT engine; PlayCanvas editor hosting is separate service
gpu.js gpujs/gpu.js ★ 15.5k · Permissive MIT · Library · Fit 2/5	JavaScript library that runs numeric kernels on the GPU with a CPU fallback.	Browser scientific computing teams, visualization developers	Consulting/implementation Training/courses	• GPU image filters for browser photo editors • Client-side simulations for lab education • In-browser physics tools for engineering students	Free library, $5k per GPU integration *Effort:* Medium (JS library, WebGL compatibility testing needed) ⚠ MIT fine, GPU driver and browser differences cause bugs
deck.gl visgl/deck.gl ★ 14.7k · Permissive MIT · Framework · Fit 2/5	WebGL2 framework for large-scale data visualization on maps and 3D. *Replaces:* ArcGIS, Tableau maps	GIS analysts, logistics dashboard teams, urban planners	Consulting/implementation Premium plugins/add-ons	• Fleet-tracking maps for last-mile carriers • Urban mobility heatmaps for city planners • 3D sales territory maps for field-sales teams	Free library, $8k-30k per dashboard build *Effort:* High (WebGL expert integration, large data tuning) ⚠ MIT fine, base map tiles and providers carry separate terms
G2 antvis/G2 ★ 12.7k · Permissive MIT · Library · Fit 2/5	Concise, progressive visualization grammar library for building charts in JavaScript. *Replaces:* Highcharts, Tableau	Frontend developers, BI dashboard teams	Consulting/implementation Premium plugins/add-ons	• Chart components for fintech dashboards • Charting kits for SaaS analytics products • Chart widgets for school data portals	Free library, $3k-12k per dashboard integration *Effort:* Low (JS library, chart themes adjustable) ⚠ MIT fine, library only, dashboard UI and design work still needed
sigma.js jacomyal/sigma.js ★ 12.2k · Permissive MIT · Library · Fit 2/5	JavaScript library for rendering large graphs of thousands of nodes and edges in browsers. *Replaces:* Cambridge Intelligence KeyLines, Linkurious	Data analysts, network-science teams, fraud investigators	Consulting/implementation Premium plugins/add-ons	• Fraud-ring graph viewers for fintech compliance teams • Supply-chain network maps for logistics firms • Citation graph explorers for research libraries	Free library, $4k-15k per graph integration *Effort:* Medium (JS library, graph layout tuning needed) ⚠ MIT fine, library only, dashboard and data-licensing work remain
React-map-gl visgl/react-map-gl ★ 8.5k · Check NOASSERTION · Library · Fit 2/5	React wrapper around MapboxGL JS for building interactive map components. *Replaces:* Google Maps Platform, Mapbox Studio	React developers building map apps, logistics dashboards	Consulting/implementation Setup + support retainer	• Delivery-zone maps for food delivery startups • Property listing maps for real-estate sites • Store-locator widgets for retail chains	Free library, $3k-10k per map integration *Effort:* Low (React wrapper, mature, widely used) ⚠ NOASSERTION license, read first, Mapbox tiles and token terms apply

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Threeui MengTo/threeui ★ 7.1k · **Permissive** MIT · Library · Fit 2/5	Open-source catalog of live interactive 3D UI components built with Three.js. *Replaces:* Spline, Unicorn Studio	Creative developers, web agencies, 3D product teams	Premium plugins/add-ons Content/membership	• Premium 3D UI kits for creative agencies • Interactive 3D menus for product launch sites • Component packs for Three.js freelancers	Free catalog, $49 premium component bundle *Effort:* Low (component catalog, easy to package) ⚠ MIT fine, component catalog only, check contributor licenses
melonJS melonjs/melonJS ★ 6.4k · **Permissive** MIT · Framework · Fit 2/5	Lightweight HTML5 game engine with physics, Tiled maps and glTF support *Replaces:* Construct, GameMaker web	Indie web game developers	Agency service Training/courses Premium plugins/add-ons	• Instant-play games for portal publishers • Tiled-map platformer templates • Game jam coaching for schools *Angle:* Lightweight HTML5 games for instant-play portals	$3-9k per game *Effort:* Medium (Engine, game built on top) ⚠ MIT; small community
Cobe shuding/cobe ★ 6.0k · **Permissive** MIT · Library · Fit 2/5	Tiny 5KB WebGL globe library for embedding interactive 3D globes in web pages. *Replaces:* Highcharts Maps, Google Earth embeds	Web designers, SaaS landing pages, marketing teams	Premium plugins/add-ons Consulting/implementation	• Animated globes for logistics landing pages • Interactive world-presence maps for agencies • Donor-map globes for charity websites	Free library, $79 globe theme pack *Effort:* Low (tiny library, easy visual theming) ⚠ MIT fine, library only, globe data sources have own terms
Hilo hiloteam/Hilo ★ 5.9k · **Permissive** MIT · Framework · Fit 2/5	Cross-platform HTML5 game development framework for web and mini-game targets. *Replaces:* Cocos Creator, Egret Engine	HTML5 game studios, mini-game developers	Consulting/implementation Training/courses	• Mini-game porting for WeChat platforms • HTML5 game courses for Chinese bootcamps • Ad-supported game template kits for studios	Free framework, $999 studio support plan *Effort:* High (Chinese-language stack, many platform SDKs) ⚠ MIT fine, mini-game platform SDK terms apply, Chinese-only docs
Dsh-wallpaper-engine elysia395/dsh-wallpaper-engine ★ 5.7k · **Permissive** MIT · App · Fit 2/5	Browser app that renders Wallpaper Engine scene wallpapers with WebGL. *Replaces:* Wallpaper Engine, Lively Wallpaper	Wallpaper Engine users, desktop customization fans	Premium plugins/add-ons Content/membership	• Animated wallpaper packs for streamers' desktops • Browser wallpaper kiosks for cafes • Live scene backgrounds for stream overlays	Free app, $3 one-time for asset packs *Effort:* High (reverse-engineered scene formats, WebGL rendering) ⚠ MIT fine, imported Wallpaper Engine scenes stay creator-copyrighted
Regl regl-project/regl ★ 5.6k · **Permissive** MIT · Library · Fit 2/5	Functional WebGL library that wraps raw WebGL in a simpler declarative API.	Graphics programmers, data visualization developers	Consulting/implementation Training/courses	• WebGL courses for creative coders • GPU plots for scientific dashboards • Browser shader tools for design studios	Free library, $6k per WebGL rendering build *Effort:* Medium (small library, graphics expertise required) ⚠ MIT fine, library only, WebGL driver quirks across devices
GlslViewer patriciogonzalezvivo/glslViewer ★ 5.4k · **Permissive** BSD-3-Clause · Tool · Fit 2/5	Console-based GLSL shader sandbox for previewing 2D and 3D shaders. *Replaces:* TouchDesigner, Unity Shader Graph	Shader artists, creative coders, VJs	Training/courses Premium plugins/add-ons	• Shader courses for VJ and creative coders • Generative visuals for live music events • GLSL training for game art teams	Free tool, $99 course bundle on shaders *Effort:* Medium (console tool, shaders need UI wrapping) ⚠ BSD-3 fine, shader examples may carry individual authors' licenses
Keras-js transcranial/keras-js ★ 5.0k · **Permissive** MIT · Library · Fit 2/5	Runs Keras models in the browser with WebGL GPU acceleration.	Web developers adding ML inference, browser AI teams	Consulting/implementation Setup + support retainer	• In-browser Keras classifiers for privacy-first apps • Client-side image tagging for photo apps • Browser model demos for ML hiring teams	Free library, $4k per browser ML integration *Effort:* Medium (project maintenance uncertain, model conversion needed) ⚠ MIT fine, Keras and TensorFlow trademarks, model weights may have own licenses

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
LittleJS KilledByAPixel/LittleJS ★ 4.4k · **Permissive** MIT · Framework · Fit 2/5	Tiny 2D and 3D HTML5 game engine with no dependencies *Replaces:* Phaser, Construct	Jam developers, ad creators	Agency service Premium plugins/add-ons Training/courses	• Tiny playable ads under size limits • Game jam starter bundles • Newsletter mini-games for creators *Angle:* Tiny web games for embedded promotions and newsletters	$2-6k per mini-game *Effort:* Low (Tiny dependency-free, easy to embed) ⚠ MIT; thin documentation for production use
Vizceral Netflix/vizceral ★ 4.1k · **Permissive** Apache-2.0 · Library · Fit 2/5	WebGL visualization library for displaying animated traffic graphs between services. *Replaces:* Datadog service maps, New Relic maps	SRE teams, network operations centers, platform engineers	Consulting/implementation Setup + support retainer	• Traffic graphs for telecom network operations centers • Live service maps for fintech SRE teams • Animated CDN flow views for media companies	Free library, $8k-20k per dashboard integration *Effort:* Medium (WebGL library, needs data adapters) ⚠ Apache-2.0 fine, Netflix name is a trademark, no hosted product included
Shaders paper-design/shaders ★ 3.9k · **Permissive** Apache-2.0 · Library · Fit 2/5	Zero-dependency canvas shader components installable from npm, designable in Paper. *Replaces:* Spline, Unicorn Studio	Landing-page designers, web agencies, UI designers	Premium plugins/add-ons Agency service	• Animated hero backgrounds for SaaS launches • Shader-based brand graphics for agencies • Canvas shader kits for portfolio sites	Free npm package, $49 premium shader packs *Effort:* Low (zero-dependency package, easy to skin) ⚠ Apache-2.0 fine, Paper design tool terms separate from library
Excalibur excaliburjs/Excalibur ★ 2.4k · **Permissive** BSD-2-Clause · Framework · Fit 2/5	TypeScript 2D game engine for the web *Replaces:* Phaser, Construct	TypeScript game developers	Premium plugins/add-ons Training/courses Agency service	• TypeScript game templates for indies • Excalibur course for web devs • Educational browser games for edtech *Angle:* TypeScript game templates sold to indie developers	$29 template pack *Effort:* Medium (Engine, templates are the product) ⚠ BSD-2-Clause; smaller ecosystem
nunuStudio tentone/nunuStudio ★ 2.2k · **Permissive** MIT · Platform · Fit 2/5	Web-based 3D game and WebXR editor with scene tools *Replaces:* Unity, PlayCanvas editor	Hobby 3D creators	Managed hosting Agency service Vertical SaaS	• Hosted 3D showroom builder for galleries • Classroom 3D editor for tech schools • Browser VR scene builder for real estate *Angle:* Hosted visual 3D web app editor for agencies	$9/mo creator *Effort:* High (Stale desktop-style editor) ⚠ MIT; sparse maintenance
KAPLAY kaplayjs/kaplay ★ 1.8k · **Permissive** MIT · Library · Fit 2/5	JavaScript and TypeScript game library aimed at beginners *Replaces:* Scratch, Construct	Beginner game makers	Training/courses Premium plugins/add-ons Agency service	• Kids coding classes using Kaplay • Game jam kit for libraries • Mini-game commissions for brands *Angle:* Beginner game creation platform for schools	$15/mo club per student *Effort:* Medium (Library plus learning content) ⚠ MIT; fork of Kaboom, check asset licenses
Kontra straker/kontra ★ 1.1k · **Permissive** MIT · Library · Fit 2/5	Lightweight JavaScript micro-library for tiny games like js13k entries *Replaces:* Phaser, Construct	js13k competitors, ad makers	Premium plugins/add-ons Training/courses Agency service	• Micro-games for newsletter ads • Size-limited playable banners • Tiny game workshop for teens *Angle:* Micro-game builder for marketing microsites	$29 course *Effort:* Low (Tiny lib, trivial to bundle) ⚠ MIT; limited features

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Piper TTS ARCHIVED rhasspy/piper ★ 11.3k · Permissive MIT · Tool · Fit 4/5	Fast offline neural text-to-speech system with many voices *Replaces:* ElevenLabs, Amazon Polly, Google TTS	App makers, accessibility vendors	API/usage-based Managed hosting Setup + support retainer	• Offline voice reader for blind users • TTS API for audiobook indies • Voice announcements for hotel kiosks *Angle:* Offline voice for assistive apps	$0.50 per 1k chars *Effort:* Medium (CLI engine, needs API wrapper) ⚠ MIT; some voice models carry their own licences
Cboard cboard-org/cboard ★ 766 · GPL GPL-3.0 · App · Fit 4/5	Browser AAC communication board with text-to-speech for speech-impaired users *Replaces:* Proloquo2Go, TouchChat, Grid 3	Speech therapists, special schools	Vertical SaaS White-label reseller Mobile app on top	• AAC boards for autism clinics • Bilingual communication boards for refugee centers • Pediatric hospital communication tablets *Angle:* AAC communication app for special-needs schools	$7/mo per user, school licences *Effort:* Medium (PWA, needs content and multi-user admin) ⚠ GPL-3.0; symbol sets have separate licences
Whisper openai/whisper ★ 112.2k · Permissive MIT · Model · Fit 3/5	OpenAI general speech recognition model for transcription and translation *Replaces:* Otter.ai, Rev, Descript, Trint, AssemblyAI	Developers building transcription tools	API/usage-based Vertical SaaS Managed hosting	• Meeting transcripts for law firms • Podcast transcripts for creators • Lecture captions for universities *Angle:* Captioning service for deaf users	$0.006-0.02 per audio minute *Effort:* Medium (Model repo, wrap in API, queue, UI) ⚠ MIT; OpenAI trademark; no diarization, slow on CPU
Vosk alphacep/vosk-api ★ 15.2k · Permissive Apache-2.0 · Library · Fit 3/5	Offline speech recognition API with small models for mobile and embedded devices *Replaces:* Google Speech API, Nuance, Deepgram	Embedded and mobile developers	API/usage-based Mobile app on top Hardware kits/assembly	• Offline voice commands for smart displays • Dictation for rugged tablets • Voice control for kiosks *Angle:* Offline speech recognition for accessibility apps	$0.002-0.008 per audio minute *Effort:* Medium (Library with models, build service) ⚠ Apache-2.0; accuracy lower than Whisper-class models
axe-core dequelabs/axe-core ★ 7.8k · Weak copyleft MPL-2.0 · Library · Fit 3/5	Accessibility rules engine for automated web UI WCAG testing *Replaces:* Deque axe DevTools, Siteimprove, AudioEye	Web teams, agencies	Vertical SaaS Agency service API/usage-based	• Accessibility monitoring for municipal sites • WCAG audit reports for e-commerce • Accessibility CI checks for agencies *Angle:* WCAG compliance scanning SaaS	$49-199/mo per site *Effort:* Medium (Library, need scanning and reporting layer) ⚠ MPL-2.0; axe brand owned by Deque
Pa11y pa11y/pa11y ★ 4.6k · Weak copyleft LGPL-3.0 · Tool · Fit 3/5	Automated accessibility testing command-line tool and dashboard *Replaces:* Siteimprove, Level Access, UserWay	Web agencies, compliance teams	Vertical SaaS Agency service Managed hosting	• Accessibility checks for council websites • Monthly WCAG report for law firms • Accessibility scanner for Shopify stores *Angle:* Accessibility monitoring service	$39/mo per site *Effort:* Medium (Node CLI plus dashboard add-on) ⚠ LGPL-3.0; keep library modifications open
Accessibility-agents Community-Access/accessibility-agents ★ 436 · Permissive MIT · Tool · Fit 3/5	WCAG 2.2 AA accessibility review skills and scanners for AI coding assistants. *Replaces:* Deque axe DevTools, Siteimprove	Web dev teams, agencies, accessibility consultants	Consulting/implementation Premium plugins/add-ons	• Accessibility gates for agency code reviews • WCAG checks for public-sector web teams • AI-assisted audits for fintech front-ends	Free core, $29/mo per team for reports *Effort:* Low (skill files and scripts, minimal UI) ⚠ MIT fine, AI tool vendors' terms apply, WCAG claims need expert review

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Asterics Grid asterics/AsTeRICS-Grid ★ ? · Check NONE · App · Fit 3/5	Offline-capable AAC grid communication boards in the browser *Replaces:* Grid 3, TouchChat, Proloquo	AAC users, therapists	Vertical SaaS Setup + support retainer Training/courses	• AAC grids for stroke rehab centers • Therapist board library subscription • Training workshop for school speech teams *Angle:* AAC grid boards for therapists	$5/mo per user *Effort:* Medium (Web app, add admin layer) ⚠ License marked NONE; confirm before commercial use
eSpeak NG espeak-ng/espeak-ng ★ 7.0k · GPL GPL-3.0 · Library · Fit 2/5	Compact multilingual speech synthesizer supporting over 100 languages *Replaces:* Polly, Google TTS	Assistive tech developers	Consulting/implementation Setup + support retainer API/usage-based	• Minority-language voice builds for NGOs • Embedded speech for kiosks • Screen-reader voices for rare languages *Angle:* Multilingual TTS for accessibility apps	$5k per language voice *Effort:* High (Robotic voice, C library) ⚠ GPL-3.0; viral for distributed apps
NVDA nvaccess/nvda ★ 2.7k · Check NOASSERTION · App · Fit 2/5	Free screen reader for Windows *Replaces:* JAWS, Window-Eyes	Blind Windows users	Training/courses Consulting/implementation Setup + support retainer	• NVDA training for government staff • Add-on development for specialized software • Employer accessibility setup service *Angle:* Screen reader training and support	$60 per session *Effort:* High (Windows desktop app, community brand) ⚠ NVDA is a registered mark; GPL with exceptions, flagged
Translate sign/translate ★ 798 · Check NOASSERTION · App · Fit 2/5	Real-time sign language translation tool that converts signing to text. *Replaces:* Ava captioning, video relay service providers	Deaf and hard-of-hearing users, employers, clinics	API/usage-based Setup + support retainer	• Live sign captions for hospital intake desks • Real-time interpreting support for council meetings • Sign-to-text kiosks for public transit	Free demo, $0.05 per minute of translation *Effort:* High (ML sign models, accuracy and language variants) ⚠ NOASSERTION license, read first, medical and legal interpreting rules apply
Sign-Language-Interpreter-using-Deep-Learning harshbg/Sign-Language-Interpreter-using-Deep-Learning ★ 777 · Permissive MIT · Model · Fit 2/5	Deep-learning sign language interpreter that reads live camera video into text. *Replaces:* Video relay service providers	Deaf community apps, school accessibility teams	Consulting/implementation API/usage-based	• Classroom sign-to-text tools for deaf students • Webcam sign captions for remote job interviews • Sign recognition demos for accessibility vendors	Free model, $5k integration for schools *Effort:* High (deep-learning model, dataset and accuracy work) ⚠ MIT fine, training datasets may carry separate licenses, accuracy claims need validation
Project Gameface ARCHIVED google/project-gameface ★ 631 · Permissive Apache-2.0 · Tool · Fit 2/5	Hands-free mouse control using head movement and facial expressions *Replaces:* Tobii, Camera Mouse	Users with motor disabilities	Setup + support retainer Consulting/implementation Hardware kits/assembly	• Head-tracking kit for quadriplegic users • Gaming accessibility setup for veteran groups • Hands-free kiosk controls for makerspaces *Angle:* Hands-free control for disabled users	$99 setup service *Effort:* High (Research-grade, needs polish) ⚠ Apache-2.0; medical claims need care
Guidepup guidepup/guidepup ★ 592 · Permissive MIT · Library · Fit 2/5	Node.js library that automates screen readers to test web and app accessibility. *Replaces:* Deque axe DevTools, BrowserStack accessibility	Accessibility QA teams, web agencies, enterprise developers	Consulting/implementation Training/courses	• Screen-reader testing for government web teams • Accessibility QA contracts for fintech apps • Screen-reader test courses for QA engineers	Free library, $6k-18k accessibility audit project *Effort:* Medium (screen reader automation, OS-specific setup) ⚠ MIT fine, library only, screen reader behavior varies by OS
Neverclick LazoVelko/neverclick ★ 491 · Check NONE · App · Fit 2/5	Keyboard-driven mouse control using local computer vision. *Replaces:* Dragon NaturallySpeaking, Tobii Dynavox	Users with motor impairments, power users	Premium plugins/add-ons Setup + support retainer	• Hands-free desktop control for motor-impaired users • Vision-based input for RSI-affected office workers • Accessibility setup help for disability services	Free app, $19 one-time for setup support *Effort:* High (computer vision accuracy, OS-level input and permissions) ⚠ NONE license, read first, accessibility claims need real user testing

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Sign-language-translator sign-language-translator/sign-language-translator ★ 380 · **Permissive** Apache-2.0 · Library · Fit 2/5	Python library and framework for building custom sign language translators using AI.	Deaf-tech startups, accessibility researchers	Consulting/implementation Training/courses	• Sign-language model builds for deaf-tech startups • Accessibility research workshops for universities • Custom sign translators for public-service kiosks	Free library, $8k-25k per custom translator *Effort:* High (ML models, dataset collection, accuracy validation) ⚠ Apache-2.0 fine, sign datasets have own licenses, accuracy claims need validation
Sign-Language-To-Text-Conversion emnikhil/Sign-Language-To-Text-Conversion ★ 363 · **Permissive** MIT · App · Fit 2/5	Real-time camera system that turns hand gestures into text, words and sentences.	Deaf students, sign language learners, classroom teachers	Training/courses Premium plugins/add-ons	• Sign-language learning apps for schools • Gesture-to-text kiosks for service desks • Sign practice tools for ASL classes	Free app, $4.99 for practice packs *Effort:* Medium (computer vision pipeline, accuracy testing needed) ⚠ MIT fine, gesture datasets may carry licenses, accuracy claims need validation
Clicky-windows Bitshank-2338/clicky-windows ★ 305 · **Permissive** MIT · App · Fit 2/5	Free offline AI assistant for Windows that reads screen, hears questions and speaks answers. *Replaces:* Microsoft Copilot, Apple Siri	Windows users needing hands-free help, low-vision users	Premium plugins/add-ons Setup + support retainer	• Screen-reading help for low-vision seniors • Local AI helpdesk for small offices • Offline voice help for call-centre trainees	Free app, $29 one-time for pro voices *Effort:* Medium (Windows app, local models, install support) ⚠ MIT fine, local model licenses vary, Ollama and model weights need checks
AIGlasses_for_navigation DresdenGman/AIGlasses_for_navigation ★ 270 · **Permissive** MIT · Hardware · Fit 2/5	Open-source AI navigation glasses under $35 that describe scenes and admit uncertainty. *Replaces:* OrCam MyEye, Envision Glasses	Blind and low-vision users, mobility trainers	Hardware kits/assembly Setup + support retainer	• DIY navigation kits for mobility-training charities • Low-cost assistive glasses for rehab clinics • Community build workshops for accessibility makerspaces	$35 kit, $99 assembled with support *Effort:* High (hardware safety testing, medical-adjacent claims) ⚠ MIT fine, safety-critical navigation claims need liability cover and testing
Voqal voqal/voqal ★ 195 · **Permissive** Apache-2.0 · Platform · Fit 2/5	Voice-native AI agent platform for building voice-first assistant apps. *Replaces:* Vapi, Retell AI	Voice app developers, contact-centre automation teams	API/usage-based Consulting/implementation	• Voice booking agents for dental clinics • Voice intake agents for legal firms • Phone agents for local delivery services	Free framework, $0.08 per voice minute *Effort:* Medium (voice pipeline, telephony and model integration) ⚠ Apache-2.0 fine, telephony and voice-recording consent rules apply
Odilia odilia-app/odilia ★ 173 · **Permissive** MIT · App · Fit 2/5	Fast screen reader for *nix desktops. *Replaces:* JAWS, Dolphin ScreenReader	Linux users with visual impairments, accessibility agencies	Setup + support retainer Premium plugins/add-ons	• Linux screen reader support for public libraries • Accessibility setup for nonprofit desktops • Linux accessibility training for vocational schools	Free app, $49/yr for managed desktop setup *Effort:* High (Linux accessibility APIs, audio and braille support) ⚠ MIT fine, accessibility claims need real-user testing, braille drivers vary
Virtual-screen-reader guidepup/virtual-screen-reader ★ 158 · **Permissive** MIT · Tool · Fit 2/5	Screen reader simulator for testing how apps and web pages read aloud.	Accessibility QA testers, web developers	Training/courses Consulting/implementation	• Screen-reader QA training for web teams • Accessibility test kits for government sites • Virtual reader checks for fintech QA	Free tool, $4k-12k accessibility QA audit *Effort:* Low (single testing library, simulator only) ⚠ MIT fine, simulator is not a real screen reader, misses real-user issues

Agriculture & Farm · 19

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Hortusfox danielbrendel/hortusfox-web ★ 1.7k · Permissive MIT · App · Fit 4/5	Self-hosted collaborative plant care tracker with reminders and chat *Replaces:* Planta, Greg, PictureThis	Plant enthusiasts, nurseries	Managed hosting Vertical SaaS White-label reseller	• Plant care portal for garden centers • Office plant maintenance tracker for interior landscapers • Plant shop customer care app *Angle:* Plant care app for nurseries	$5/mo per household *Effort:* Low (PHP/Laravel app, theming simple) ⚠ MIT; HortusFox name small brand
farmOS farmOS/farmOS ★ 1.4k · GPL GPL-2.0 · Platform · Fit 4/5	Web-based farm record keeping for crops, livestock, logs and maps *Replaces:* Farmbrite, Granular, FarmLogs	Small diversified farms	Managed hosting Vertical SaaS Consulting/implementation	• Hosted farm records for organic CSA farms • Vineyard operations log • Compliance recordkeeping for livestock producers *Angle:* Hosted farm records for growers	$25-75/mo per farm *Effort:* Medium (Drupal-based, modular) ⚠ GPL-2.0; multi-farm hosting needs ops
Mycodo kizniche/Mycodo ★ 3.3k · GPL GPL-3.0 · Platform · Fit 3/5	Raspberry Pi sensor and relay environmental monitoring and control system *Replaces:* Growlink, TrolMaster, Inkbird	Greenhouse growers, mushroom farmers	Setup + support retainer Hardware kits/assembly Local service business	• Mushroom fruiting room controllers • Reptile habitat monitoring kits • Craft brewery fermentation temperature control *Angle:* Greenhouse automation installs	$499 installed kit *Effort:* Medium (Python/Pi stack, custom hardware) ⚠ GPL-3.0; electrical safety on installs
Plant-it MDeLuise/plant-it ★ 1.4k · GPL GPL-3.0 · App · Fit 3/5	Open-source Android gardening companion with plant tracking and reminders *Replaces:* Planta, Greg	Home gardeners	Mobile app on top Managed hosting White-label reseller	• Care app for plant retailer customers • Succulent subscription box companion • Garden club shared plant log *Angle:* Plant care tracker for garden centers	$2/mo premium *Effort:* Medium (Android plus self-hosted server) ⚠ GPL-3.0; distributed apps must share source
FarmBot Web App FarmBot/Farmbot-Web-App ★ 977 · Permissive MIT · Platform · Fit 3/5	Web app and API for controlling FarmBot robotic garden machines *Replaces:* FarmBot Cloud, Farmbot Genesis	Home growers, edu labs	Hardware kits/assembly Managed hosting Setup + support retainer	• Robot garden installs for restaurants • School STEM farm lab packages • Managed FarmBot cloud for makerspaces *Angle:* Robotic garden SaaS	$20/mo hosted, kit extra *Effort:* High (Needs hardware, complex backend) ⚠ FarmBot name trademark; hardware licensed separately
Tania usetania/tania-core ★ 824 · Permissive Apache-2.0 · App · Fit 3/5	Farm management planner for smallholder crops, tasks and inventory *Replaces:* Farmbrite, AgriWebb	Hobbyist and small farmers	Vertical SaaS Managed hosting Consulting/implementation	• Market garden planner for CSA growers • Greenhouse task scheduling for nurseries • Urban rooftop farm tracker *Angle:* Small farm planner subscription	$15/mo per farm *Effort:* Medium (Go/Vue, development paused) ⚠ Apache-2.0; project stagnant, plan to maintain
ODK Collect getodk/collect ★ 801 · Check NOASSERTION · App · Fit 3/5	Android app for filling out surveys and data collection forms offline *Replaces:* KoBoToolbox, SurveyCTO, Fulcrum	NGOs, field researchers	Setup + support retainer Vertical SaaS Training/courses	• Offline crop survey tool for agri NGOs • Health household survey service • Soil sampling forms for agronomists *Angle:* Field surveys for agri NGOs	$150/mo per project *Effort:* Medium (Android app plus ODK Central backend) ⚠ License flagged NOASSERTION; ODK trademark
OpenWeedLocator geezacoleman/OpenWeedLocator ★ 506 · Permissive MIT · Hardware · Fit 3/5	Open-source low-cost camera device that detects weeds in crops and fallow fields. *Replaces:* Carbon Robotics LaserWeeder, Blue River See and Spray	Farmers, weed-control contractors, agtech startups	Hardware kits/assembly Setup + support retainer	• Spot-spray kits for organic vegetable farms • Weed-detection rigs for fallow-field contractors • Camera weed-scouting service for small grain farms	$300-800 device kit, $50/mo model updates *Effort:* High (field hardware, spray actuation, weather durability) ⚠ MIT fine, agricultural chemical use regulated, field hardware liability
ODK Central getodk/central ★ 232 · Permissive Apache-2.0 · Platform · Fit 3/5	Server for ODK data collection with mobile form support *Replaces:* SurveyCTO, KoboToolbox, Qualtrics	NGOs, researchers	Managed hosting Setup + support retainer Consulting/implementation	• Field surveys for NGOs • Health data collection • Census tools for research *Angle:* Hosted data collection for agri projects	$50-300/mo *Effort:* Medium (Mature server, mobile clients separate) ⚠ Apache; ODK trademark

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
ApsimX APSIMInitiative/ApsimX ★ 220 · Check NOASSERTION · Tool · Fit 3/5	Next-generation APSIM crop and farm systems simulator.	Agronomists, farm consultants, crop researchers	Consulting/implementation Training/courses	• Crop-model consulting for seed companies • APSIM training for agronomy graduate students • Farm scenario modelling for lenders	Free OSS, consulting from $180/hr *Effort:* High (C# scientific model, agronomy expertise needed) ⚠ NOASSERTION license, read first, scientific models need validation
KoboToolbox kobotoolbox/kpi ★ 189 · AGPL AGPL-3.0 · App · Fit 3/5	Server for KoboToolbox data collection forms and APIs *Replaces:* SurveyCTO, ODK, Qualtrics	Humanitarian NGOs, researchers	Managed hosting Setup + support retainer Consulting/implementation	• Field data for NGOs • Hosted Kobo for researchers • Surveys for humanitarian teams *Angle:* Managed survey platform for NGOs	$50-300/mo *Effort:* High (Multi-service stack) ⚠ AGPL, publish modifications; KoboToolbox trademark
farmOS Field Kit farmOS/field-kit ★ 69 · GPL GPL-3.0 · App · Fit 3/5	Offline-first mobile companion for farmOS for field logging *Replaces:* Farmbrite mobile, Trimble Ag	Farm crews, agronomists	Mobile app on top Setup + support retainer Managed hosting	• Offline scouting app for orchards • Crew log app for vegetable farms • Pasture rotation notes for ranchers *Angle:* Branded field app for agronomists	$8/mo per farm *Effort:* Medium (Companion app, farmOS needed) ⚠ GPL-3.0; shares farmOS licensing and dependency
Farm-Data-Relay-System timmbogner/Farm-Data-Relay-System ★ 629 · Permissive MIT · Hardware · Fit 2/5	System that relays farm sensor data over ESP-NOW, LoRa and other protocols without WiFi. *Replaces:* Campbell Scientific loggers, Davis telemetry	Farmers, irrigation contractors, remote site monitors	Hardware kits/assembly Setup + support retainer	• LoRa soil-sensor kits for vineyard owners • Remote water-tank monitoring for ranches • Field-sensor relays for farm co-ops	$150-400 per node kit, support plan $30/mo *Effort:* High (embedded firmware, radio certification, field support) ⚠ MIT fine, radio frequency rules vary by country, certification needed
Pyafipws reingart/pyafipws ★ 366 · Weak copyleft LGPL-3.0 · Library · Fit 2/5	Python web-service toolkit for Argentina's AFIP electronic invoicing and tax services. *Replaces:* Facturante, Xubio	Argentine accountants, billing software vendors, SMEs	Consulting/implementation Setup + support retainer	• AFIP invoicing integration for Argentine retailers • Electronic invoicing plugins for Argentine ERPs • Tax-compliance setup for Buenos Aires accountants	Free library, $80/mo per company integration *Effort:* Medium (Spanish-only, AFIP specs change often) ⚠ LGPL-3.0 fine, AFIP spec changes break integrations, certificates regulated
Geodata rspatial/geodata ★ 201 · GPL GPL-3.0 · Tool · Fit 2/5	R package that downloads geographic datasets such as climate and elevation layers.	Ecologists, GIS analysts, climate researchers	Consulting/implementation Training/courses	• Climate layers for crop-insurance modellers • Elevation data pipelines for land developers • R geodata courses for environmental consultants	Free package, $1.5k per data pipeline build *Effort:* Low (R package, no UI, nothing to theme) ⚠ GPL-3.0 fine, upstream dataset licenses such as WorldClim vary
AgriTech omroy07/AgriTech ★ 128 · Check NOASSERTION · App · Fit 2/5	AI-powered web platform for crop recommendations, yield prediction, disease detection and collaboration. *Replaces:* Plantix, Farmers Edge	Smallholder farmers, agri-cooperatives, student projects	Setup + support retainer Premium plugins/add-ons	• Crop advisory portal for district cooperatives • Disease-alert tool for coffee growers • Yield forecasting dashboard for grain traders	Free tier, $5/mo per farm for alerts *Effort:* High (AI model accuracy, local crop data, many features) ⚠ NOASSERTION license, read first, crop advice liability, accuracy claims
FS25_SoilFertilizer Realistic-Farming/FS25_SoilFertilizer ★ 117 · Check NOASSERTION · Game · Fit 2/5	Farming Simulator 25 mod that tracks soil nutrients and depletion per field.	Farming Simulator players, simulation streamers	Premium plugins/add-ons Content/membership	• Soil-management mod packs for FS25 servers • Crop-rotation guides for simulation streamers • Multiplayer farm rules for FS25 communities	Free mod, $4.99 for premium crop packs *Effort:* Medium (game mod, depends on Giants Software APIs) ⚠ NOASSERTION license, read first, Farming Simulator is Giants Software IP

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Eodal EOA-team/eodal ★ 99 · GPL GPL-3.0 · Library · Fit 2/5	Python library for analysing Earth observation and satellite imagery data. *Replaces:* Sentinel Hub, Planet Analytics	Remote-sensing analysts, agri-analytics firms	Consulting/implementation Setup + support retainer	• Crop health monitoring for regional agencies • Satellite change detection for insurers • Remote-sensing workshops for university geography	Free library, $6k per satellite analytics project *Effort:* Medium (Python library, satellite data licensing varies) ⚠ GPL-3.0 fine, satellite data providers impose their own usage terms
Agribound montimaj/agribound ★ 98 · Permissive Apache-2.0 · Tool · Fit 2/5	AI toolkit that delineates agricultural field boundaries from satellite imagery. *Replaces:* Planet, Descartes Labs	Crop insurers, farm-subsidy agencies, agtech analytics firms	API/usage-based Consulting/implementation	• Field-boundary maps for subsidy compliance checks • Parcel digitisation for land-registry offices • Boundary datasets for precision-ag startups	Free toolkit, $0.02 per hectare API *Effort:* High (foundation-model pipelines, satellite data costs) ⚠ Apache-2.0 fine, satellite and training data licenses vary by region

App Analytics & Attribution · 11

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
React-native-inappbrowser proyecto26/react-native-inappbrowser ★ 1.4k · Permissive MIT · Library · Fit 2/5	React Native library for opening in-app browser tabs on Android and iOS.	React Native app developers	Consulting/implementation Premium plugins/add-ons	• In-app login flows for fintech apps • Checkout browser embeds for mobile shops • OAuth browser flows for healthcare apps	Free library, $2k-6k per integration *Effort:* Low (single-purpose library, nothing to theme) ⚠ MIT fine, library only, platform browser behavior varies
React-native-branch-deep-linking-attribution BranchMetrics/react-native-branch-deep-linking-attribution ★ 538 · Permissive MIT · Library · Fit 2/5	Branch React Native SDK for deep linking and attribution across mobile app install flows. *Replaces:* AppsFlyer, Adjust, Singular	Mobile growth teams, app marketers, React Native developers	Consulting/implementation Agency service	• Deep-link setup for mobile agencies • Attribution audits for D2C app brands • Deferred deep-link setup for travel apps	Free SDK, $1.5k-5k per attribution setup *Effort:* Medium (SDK wraps Branch service, vendor account needed) ⚠ MIT fine, Branch is a trademark, SDK needs vendor account and terms
OpenLinkWith tasomaniac/OpenLinkWith ★ 456 · Permissive Apache-2.0 · App · Fit 2/5	Android app that opens the current web page in another installed app.	Android power users, mobile developers	Premium plugins/add-ons Mobile app on top	• App-routing tool for enterprise Android fleets • Link routing for Android QA teams • Browser-to-app handoff for news apps	Free app, $1.99 one-time for routing rules *Effort:* Low (small Android app, simple scope) ⚠ Apache-2.0 fine, Android intent handling depends on OS rule changes
Context-cite MadryLab/context-cite ★ 343 · Permissive MIT · Tool · Fit 2/5	Python tool that attributes LLM-generated statements back to the context they came from.	RAG product teams, AI compliance teams	Consulting/implementation API/usage-based	• Source citations for legal-tech RAG chatbots • LLM citation audits for compliance teams • Grounded answers for enterprise knowledge bots	Free library, $8k per RAG citation integration *Effort:* Medium (research code, LLM API costs) ⚠ MIT fine, attribution accuracy claims need evaluation, LLM API terms apply
Gplay-scraper Mohammedcha/gplay-scraper ★ 313 · Permissive MIT · Library · Fit 2/5	Python library that scrapes Google Play app listings, reviews and metadata. *Replaces:* Sensor Tower, AppTweak	App marketers, ASO consultants, market researchers	API/usage-based Consulting/implementation	• Review monitoring for consumer-app brands • ASO benchmarking for indie app studios • Competitor app tracking for fintech teams	Free library, $49/mo hosted scraping API *Effort:* Medium (scraper, Google Play changes often) ⚠ MIT fine, Google Play scraping may breach Google terms

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
React-native-detour software-mansion-labs/react-native-detour ★ 286 · **Permissive** MIT · Library · Fit 2/5	React Native SDK for deferred deep links with expo-router integration. *Replaces:* Branch.io, AppsFlyer	Expo app developers, mobile growth teams	Consulting/implementation Agency service	• Deferred deep links for Expo onboarding flows • Invite-link onboarding for social apps • Referral-link setup for Expo marketplace apps	Free SDK, $1.5k per onboarding integration *Effort:* Low (small SDK, Expo-specific wiring) ⚠ MIT fine, deferred deep link attribution depends on platform rules
Zennit chr5tphr/zennit ★ 248 · **Weak copyleft** LGPL-3.0 · Library · Fit 2/5	Python framework using PyTorch to explain neural networks with attribution methods like LRP. *Replaces:* Fiddler AI, Arize AI	ML engineers, regulated-industry AI teams, auditors	Consulting/implementation Training/courses	• Explainable-AI audits for lending model teams • LRP training for medical-imaging researchers • XAI workshops for banking model-risk teams	Free library, $12k per model explainability audit *Effort:* Medium (PyTorch library, model-specific tuning needed) ⚠ LGPL-3.0 fine, explainability claims in regulated settings need expert validation
Trak MadryLab/trak ★ 248 · **Permissive** MIT · Library · Fit 2/5	Fast PyTorch method for attributing neural network predictions to training data points. *Replaces:* Fiddler AI	ML researchers, data-quality teams, AI auditors	Consulting/implementation API/usage-based	• Training-data audits for dataset vendors • Data debugging services for vision startups • Mislabel detection for annotation teams	Free library, $6k per data audit engagement *Effort:* Medium (research PyTorch library, compute-heavy) ⚠ MIT fine, attribution results depend on model and training setup
Gov4git gov4git/gov4git ★ 216 · **Check** NOASSERTION · Framework · Fit 2/5	Decentralized governance tool for Git communities, run through repositories. *Replaces:* Snapshot, Aragon	Open-source foundations, DAO operators, Git communities	Consulting/implementation Setup + support retainer	• Git-based voting for open-source foundations • Proposal workflows for DAO working groups • Governance setup for community software projects	Free OSS, $3k setup for community governance *Effort:* High (Git-native governance, crypto-adjacent, unusual UX) ⚠ NOASSERTION license, read first, crypto-adjacent governance may face regulation
Cffconvert citation-file-format/cffconvert ★ 143 · **Permissive** Apache-2.0 · Tool · Fit 2/5	Command-line tool that validates and converts CITATION.cff citation files.	Research software engineers, repository maintainers	Consulting/implementation Training/courses	• Citation-file CI checks for research labs • Software citation setup for university repos • CFF validation services for journal publishers	Free CLI, $1k per repository compliance setup *Effort:* Low (small CLI, single-purpose) ⚠ Apache-2.0 fine, depends on CFF spec governance and version changes
Zennit-crp rachtibat/zennit-crp ★ 141 · **Check** NOASSERTION · Tool · Fit 2/5	Explainable AI toolkit for concept relevance propagation and relevance maximization in neural networks.	AI researchers, regulated-industry model auditors	Consulting/implementation Training/courses	• Concept-level audits for medical-AI vendors • XAI courses for graduate ML students • Model debugging workshops for fintech teams	Free toolkit, $10k per model audit project *Effort:* High (research toolkit, PyTorch expertise, model-specific) ⚠ NOASSERTION license, read first, research code, explainability claims need validation

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Vaultwarden dani-garcia/vaultwarden ★ 70.4k · **AGPL** AGPL-3.0 · App · Fit 5/5	Lightweight server compatible with Bitwarden clients for password management *Replaces:* Bitwarden, 1Password, LastPass, Dashlane	Families, small teams, MSPs	Managed hosting Setup + support retainer White-label reseller	• Managed password vaults for MSP clients • Family vault hosting • Password manager for accounting firms *Angle:* Lightweight password vault hosting	$2-5/user/mo *Effort:* Medium (Works with official clients, limited branding) ⚠ AGPL, publish modifications; Bitwarden trademark and client licensing

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Keycloak keycloak/keycloak ★ 37.7k · Permissive Apache-2.0 · Platform · Fit 4/5	Identity and access management server with SSO, OIDC, SAML, user federation and admin console *Replaces:* Auth0, Okta, Azure AD B2C, Ping Identity	Enterprises, SaaS vendors, governments	Managed hosting Consulting/implementation Setup + support retainer	• Managed Keycloak for healthcare SaaS • SSO migration for Okta-priced startups • Multi-tenant realms for B2B vendors *Angle:* Managed IAM for client apps	$100-1000/mo per realm *Effort:* Medium (Themes and realms, Java stack) ⚠ CNCF trademark; Red Hat SSO is commercial downstream
Authentik goauthentik/authentik ★ 26.3k · Check NOASSERTION · Platform · Fit 4/5	Identity provider with SSO, flows, MFA and user management for apps *Replaces:* Okta, Auth0, Azure AD, Keycloak	IT teams, MSPs, SaaS vendors	Managed hosting Setup + support retainer White-label reseller	• Managed SSO for MSP clients • Customer identity for B2B SaaS • Campus SSO for schools *Angle:* Hosted identity provider for SMBs	$200-800/mo managed *Effort:* Medium (Branding and tenants supported) ⚠ Enterprise features licensed separately; NOASSERTION
Zitadel zitadel/zitadel ★ 15.5k · AGPL AGPL-3.0 · Platform · Fit 4/5	Identity infrastructure with multi-tenant organizations, SSO, passkeys and audit trails *Replaces:* Auth0, Okta, Clerk, Firebase Auth	B2B SaaS vendors, enterprises	Managed hosting White-label reseller Setup + support retainer	• Customer identity for B2B SaaS • Multi-org auth for vertical SaaS • Swiss-hosted identity for banks *Angle:* Identity SaaS for B2B apps	$50-500/mo by MAU *Effort:* Medium (Native multi-tenancy, branding per org) ⚠ AGPL requires publishing modifications; Zitadel trademark
privacyIDEA privacyidea/privacyidea ★ 1.8k · AGPL AGPL-3.0 · Platform · Fit 4/5	Modular multi-factor authentication server supporting OTP, FIDO and hardware tokens *Replaces:* Duo, Okta Verify, RSA SecurID	Mid-size enterprises, MSPs	Managed hosting Setup + support retainer White-label reseller	• Managed MFA for law firms • Token management for small banks • MFA for school districts *Angle:* MFA server for enterprises	$1-3/mo per user *Effort:* Medium (Python server, enterprise features paid upstream) ⚠ AGPL-3.0; privacyIDEA name belongs to NetKnights
Authelia authelia/authelia ★ 29.6k · Permissive Apache-2.0 · App · Fit 3/5	Single sign-on and multi-factor authentication portal in front of reverse proxies *Replaces:* Okta, Cloudflare Access, Authentik, Duo	Homelabbers, small IT teams	Setup + support retainer Managed hosting Consulting/implementation	• SSO for small design studios • MFA gateway for self-hosted stacks • Access portal for private communities *Angle:* SSO and 2FA gateway as managed service	$99-299 setup *Effort:* Medium (Config-file driven, no tenancy) ⚠ Apache-2; no admin UI for users
Bitwarden Server bitwarden/server ★ 20.6k · Check NOASSERTION · Platform · Fit 3/5	Bitwarden backend API and database for password management *Replaces:* 1Password, LastPass, Dashlane	Companies, MSPs	Managed hosting Setup + support retainer White-label reseller	• Hosted vaults for MSP clients • Compliance vaults for law firms • Password manager for clinics *Angle:* Managed password manager hosting	$3-6/user/mo *Effort:* High (Heavy .NET stack, license restrictions) ⚠ Bitwarden License restricts competing hosted use; trademark, read license
Aegis beemdevelopment/Aegis ★ 13.5k · GPL GPL-3.0 · App · Fit 3/5	Android 2FA authenticator with encrypted vault and backups *Replaces:* Google Authenticator, Authy	Privacy-conscious Android users	Mobile app on top White-label reseller Premium plugins/add-ons	• Branded 2FA for credit unions • Staff authenticator for MSPs • Cloud backup add-on for Aegis users *Angle:* Branded authenticator for enterprises	$2/yr backup *Effort:* Medium (Android only, store policy) ⚠ GPL-3.0; Aegis name is project mark
Authenticator Authenticator-Extension/Authenticator ★ 4.8k · Permissive MIT · App · Fit 3/5	Browser extension that generates 2-step verification codes in your browser. *Replaces:* Authy, 1Password TOTP	Privacy-minded users, small teams, browser users	Premium plugins/add-ons Setup + support retainer	• Team 2FA setup for small agencies • Browser 2FA for enterprise helpdesks • Encrypted sync add-on for families	Free extension, $3/mo for encrypted sync *Effort:* Medium (extension store review, encryption and sync design) ⚠ MIT fine, 2FA secrets handling is security-critical, audit before selling
Stratum stratumauth/app ★ 4.6k · GPL GPL-3.0 · App · Fit 3/5	Android and Wear OS two-factor authenticator *Replaces:* Google Authenticator, Authy	Android users with smartwatches	Mobile app on top White-label reseller Premium plugins/add-ons	• Wear OS 2FA for field workers • Branded authenticator for SaaS vendors • Enterprise-managed 2FA backups *Angle:* Branded authenticator app	$1/mo premium *Effort:* Medium (Android app, simple codebase) ⚠ GPL-3.0 must share distributed source

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
2FAuth Bubka/2FAuth ★ 4.2k · AGPL AGPL-3.0 · App · Fit 3/5	Self-hosted web app to manage two-factor authentication accounts and generate security codes. *Replaces:* Authy, 1Password	Self-hosting users, small IT teams, privacy-minded households	Managed hosting Setup + support retainer	• Managed 2FA vaults for small law firms • Self-hosted 2FA for home-lab communities • Hosted 2FA admin for MSP clients	Free self-host, $9/mo managed instance *Effort:* Medium (web app, hosting setup, secret handling) ⚠ AGPL-3.0 must publish server modifications, 2FA secret storage carries liability
Authorizer authorizerdev/authorizer ★ 2.1k · Permissive Apache-2.0 · Platform · Fit 3/5	Self-hosted, open-source authentication and authorization server deployable with Docker. *Replaces:* Auth0, Clerk, Okta	SaaS startups, self-hosting teams, privacy-driven companies	Managed hosting Setup + support retainer	• Managed auth for EU-data-residency startups • Self-hosted login for internal dev platforms • Auth servers for regulated healthcare apps	Free self-host, $199/mo managed auth cluster *Effort:* Medium (auth server, docs and SDK polish needed) ⚠ Apache-2.0 fine, auth security audits and compliance certifications are your job
2FAS Android twofas/2fas-android ★ 1.6k · GPL GPL-3.0 · App · Fit 3/5	Android source for 2FAS two-factor authenticator app *Replaces:* Google Authenticator, Authy	Consumers	Mobile app on top White-label reseller Premium plugins/add-ons	• Employer-branded authenticator • Bank-branded OTP app • Family backup service for authenticator users *Angle:* White-label 2FA app	$2/yr sync *Effort:* Medium (Native Android, backend optional) ⚠ GPL-3.0; 2FAS name and logo are trademarks
2FAS iOS twofas/2fas-ios ★ 759 · GPL GPL-3.0 · App · Fit 3/5	iOS source for 2FAS two-factor authenticator app *Replaces:* Google Authenticator, Authy	iPhone users	Mobile app on top White-label reseller Premium plugins/add-ons	• iOS authenticator for companies • Secure-vault upsell for iPhone families • Branded OTP for fintech apps *Angle:* Branded iOS authenticator	$2/yr sync *Effort:* Medium (Native iOS, App Store review) ⚠ GPL-3.0 conflicts with App Store distribution; trademark
FreeOTP Plus helloworld1/FreeOTPPlus ★ 750 · Permissive Apache-2.0 · App · Fit 3/5	Feature-rich Android fork of FreeOTP for one-time-password authentication *Replaces:* Google Authenticator, Duo Mobile	Android users, small IT teams	Mobile app on top Setup + support retainer White-label reseller	• MSP-branded OTP app • School staff 2FA rollout • Small clinic authentication kits *Angle:* Open authenticator for organizations	$1/user/mo managed *Effort:* Medium (Android app, minimal backend) ⚠ Apache-2.0; FreeOTP is Red Hat origin, avoid name
Input-otp guilhermerodz/input-otp ★ 3.3k · Permissive MIT · Library · Fit 2/5	Accessible, unstyled React input component for one-time passcodes.	React developers, SaaS product teams	Premium plugins/add-ons Consulting/implementation	• OTP inputs for fintech login flows • Accessible code entry for healthcare portals • Passcode widgets for SaaS design systems	Free component, $39 styled OTP kit *Effort:* Low (tiny React component, styling is yours) ⚠ MIT fine, component only, accessibility claims need testing
Otplib yeojz/otplib ★ 2.3k · Permissive MIT · Library · Fit 2/5	Node.js and browser library for generating and verifying HOTP, TOTP and Google Authenticator codes. *Replaces:* Authy SDK, Twilio Verify	Backend developers, SaaS auth teams	Consulting/implementation Setup + support retainer	• 2FA integration for B2B SaaS login flows • TOTP modules for Node.js fintech backends • 2FA setup kits for small agencies	Free library, $1.5k per 2FA integration *Effort:* Low (small library, auth flows need wiring) ⚠ MIT fine, library only, 2FA security reviews needed before production
Streamlit-Authenticator mkhorasani/Streamlit-Authenticator ★ 2.1k · Permissive MIT · Library · Fit 2/5	Python module that manages user login and access in Streamlit applications. *Replaces:* Auth0, Streamlit Cloud auth	Streamlit developers, internal-tool builders	Consulting/implementation Premium plugins/add-ons	• Login gates for Streamlit analytics dashboards • Access control for internal data-science apps • Client portal logins for consulting firms	Free module, $499 setup for client portals *Effort:* Low (small Python module, simple auth flows) ⚠ MIT fine, password storage and session security need review

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Google-authenticator-libpam google/google-authenticator-libpam ★ 2.0k · **Permissive** Apache-2.0 · Tool · Fit 2/5	PAM module that adds Google Authenticator time-based codes to Linux logins. *Replaces:* Duo Security, RSA SecurID	Linux sysadmins, small hosting providers, SSH server operators	Setup + support retainer Consulting/implementation	• SSH 2FA setup for small hosting firms • Lab server 2FA hardening for universities • Bastion-host MFA for indie SaaS	Free module, $350 per server hardening *Effort:* Medium (PAM config, Linux distro differences) ⚠ Apache-2.0 fine, Google Authenticator is a Google brand, login lockout risk
Google2fa antonioribeiro/google2fa ★ 2.0k · **Permissive** MIT · Library · Fit 2/5	PHP package for generating and verifying one-time passwords compatible with Google Authenticator.	PHP developers, Laravel agencies	Consulting/implementation Premium plugins/add-ons	• 2FA setup for Laravel client portals • Authenticator flows for PHP membership sites • Laravel 2FA packs for web agencies	Free package, $499 Laravel 2FA setup *Effort:* Low (small PHP package, drop-in) ⚠ MIT fine, package only, Laravel version support must be tracked
Extract_otp_secrets scito/extract_otp_secrets ★ 1.7k · **GPL** GPL-3.0 · Tool · Fit 2/5	Tool that extracts OTP secrets from QR codes exported by two-factor authentication apps.	Users migrating 2FA apps, IT migration teams	Setup + support retainer Consulting/implementation	• 2FA migration help for IT helpdesks • Authenticator move service for remote workers • Account-recovery setup for small firms	Free tool, $99 per migration support session *Effort:* Low (single script, CLI, sensitive data handling) ⚠ GPL-3.0 fine, handling 2FA secrets carries high liability and misuse risk
Otp.NET kspearrin/Otp.NET ★ 1.3k · **Permissive** MIT · Library · Fit 2/5	.NET library implementing TOTP and HOTP for two-factor authentication codes.	.NET developers, enterprise app teams	Consulting/implementation Setup + support retainer	• 2FA integration for .NET line-of-business apps • TOTP setup for .NET clinic software • Enterprise 2FA add-ons for ERP vendors	Free library, $1.5k per .NET 2FA integration *Effort:* Low (small .NET library, integration-focused) ⚠ MIT fine, library only, security review needed before enterprise rollout
Steamguard-cli dyc3/steamguard-cli ★ 1.1k · **GPL** GPL-3.0 · Tool · Fit 2/5	Linux command-line tool that generates Steam Guard codes and manages Steam trade confirmations.	Steam traders, Linux gamers, trading-card sellers	Premium plugins/add-ons Setup + support retainer	• Trade-confirmation tools for card sellers • Steam Guard helper for Linux gaming cafes • Market automation support for trading communities	Free CLI, $4.99 one-time for GUI wrapper *Effort:* Medium (CLI tool, Steam auth flows change, security-sensitive) ⚠ GPL-3.0 fine, Valve ToS restricts automation, Steam Guard secrets are risky
Aws-mfa broamski/aws-mfa ★ 1.1k · **Permissive** MIT · Tool · Fit 2/5	Command-line tool that manages AWS MFA credentials and temporary session tokens. *Replaces:* Okta AWS access, Teleport	AWS engineers, DevOps teams, cloud security teams	Setup + support retainer Consulting/implementation	• AWS MFA setup for DevOps consultancies • Cloud access hardening for mid-size firms • MFA onboarding for AWS contractor teams	Free CLI, $1.5k per AWS access setup *Effort:* Low (small CLI, AWS-specific workflow) ⚠ MIT fine, AWS is an Amazon trademark, credential handling is security-critical
Google2fa-laravel antonioribeiro/google2fa-laravel ★ 1.1k · **Permissive** MIT · Library · Fit 2/5	Laravel package that adds Google Authenticator one-time password support to apps.	Laravel developers, PHP agencies	Consulting/implementation Premium plugins/add-ons	• 2FA setup for Laravel SaaS products • Laravel login hardening for agencies • Authenticator add-ons for Laravel membership sites	Free package, $399 Laravel 2FA setup *Effort:* Low (small Laravel package, drop-in) ⚠ MIT fine, Laravel-specific, check compatibility with current versions

Baby & Parenting · 5

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Babybuddy babybuddy/babybuddy ★ 2.9k · Permissive BSD-2-Clause · App · Fit 3/5	Self-hosted baby tracker that logs sleep, feedings, diapers and tummy time for caregivers. *Replaces:* Baby Tracker app, Huckleberry	New parents, nannies, daycare staff	Managed hosting Premium plugins/add-ons	• Managed baby-log hosting for nanny agencies • Shared caregiver logs for co-parenting families • Daycare feeding logs for early-years centers	Free self-host, $5/mo managed family account *Effort:* Medium (Django app, multi-user accounts, health-adjacent data) ⚠ BSD-2 fine, baby health data privacy rules like GDPR apply
Fate babyname/fate ★ 2.4k · Permissive MIT · App · Fit 2/5	Modern Chinese name creation tool for parents choosing baby names. *Replaces:* BabyCenter name tool, Nameberry	Expecting parents, Chinese-speaking families	Mobile app on top Premium plugins/add-ons	• Chinese name packs for expecting parents • Name-fortune reports for baby-shower planners • Bilingual baby-name tools for diaspora families	Free tool, $4.99 one-time for name reports *Effort:* Medium (Chinese-language UI, name data, culture-specific) ⚠ MIT fine, scientific-sounding name claims risk consumer-protection complaints
Sprout-track Oak-and-Sprout/sprout-track ★ 402 · Check NOASSERTION · App · Fit 2/5	Baby tracker for diapers, feedings, naps, pumping and other newborn activities. *Replaces:* Baby Tracker app, Huckleberry	New parents, lactation consultants, pediatric clinics	Managed hosting Premium plugins/add-ons	• Pumping logs for lactation consultants • Newborn activity logs for pediatric clinics • Sleep and feeding logs for twin-parent groups	Free app, $6/mo for shared family logs *Effort:* Medium (app with multi-user logging, data-privacy needs) ⚠ NOASSERTION license, read first, baby health data privacy rules apply
Find-my-kids t0mer/Find-my-kids ★ 66 · Permissive Apache-2.0 · App · Fit 2/5	Self-hosted WhatsApp bot that finds your kids in group photos using local face recognition. *Replaces:* Google Photos, Amazon Rekognition	Parents of school kids, school photo-day teams	Setup + support retainer Premium plugins/add-ons	• Photo-day sorting for school PTAs • Sports-club photo delivery for parents • Event photo distribution for summer camps	Free self-host, $29 setup for school groups *Effort:* High (facial data privacy, WhatsApp API, child-photo consent) ⚠ Apache-2.0 fine, biometric and children's photo laws like GDPR and BIPA apply
Boob-o-clock liviro/boob-o-clock ★ 35 · Permissive MIT · App · Fit 2/5	Self-hosted dark-mode baby tracker for logging infant days and nights. *Replaces:* Baby Tracker app, Huckleberry	Sleep-deprived parents, self-hosting families	Managed hosting Premium plugins/add-ons	• Night-feed logs for sleep-deprived parents • Self-hosted baby logs for privacy-focused families • Dark-mode tracker themes for baby-app makers	Free self-host, $4/mo managed family instance *Effort:* Low (small self-hosted app, dark theme already) ⚠ MIT fine, baby health data privacy considerations apply

Browsers · 33

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Zen Browser zen-browser/desktop ★ 45.6k · Weak copyleft MPL-2.0 · App · Fit 4/5	Firefox-based desktop browser with workspaces and customization *Replaces:* Arc, Chrome, Opera	Power users	White-label reseller Premium plugins/add-ons Managed hosting	• Branded Firefox for company intranets • Theme store for tabbed workspaces • Restricted kids browser *Angle:* Branded productivity browser	$4/mo sync, $2-5 themes *Effort:* High (Firefox fork, constant rebase) ⚠ MPL-2.0; Firefox trademark and sync endpoints
Chrome-devtools-mcp ChromeDevTools/chrome-devtools-mcp ★ 54.9k · Permissive Apache-2.0 · Tool · Fit 3/5	Chrome DevTools exposed as an MCP server for coding agents. *Replaces:* BrowserStack, Sauce Labs	AI coding teams, QA automation engineers, web agencies	Consulting/implementation Training/courses	• Agent-driven QA for SaaS release teams • Browser debugging workshops for AI-coding teams • Automated page audits for agency web builds	Free server, $2k-8k agent QA setup *Effort:* Medium (MCP server, Chrome version and agent integration) ⚠ Apache-2.0 fine, Chrome DevTools is a Google trademark, Chrome versions shift

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Ungoogled Chromium ungoogled-software/ungoogled-chromium ★ 28.2k · **Permissive** BSD-3-Clause · App · Fit 3/5	Chromium build with Google integration removed for privacy *Replaces:* Chrome, Edge	Privacy-focused users	White-label reseller Setup + support retainer Consulting/implementation	• Hardened browser images for law firms • Kiosk browser builds for libraries • Managed browser for journalists *Angle:* Private-label secure browser	$30/yr per seat *Effort:* High (Chromium patch set, heavy builds) ⚠ BSD-3-Clause; Chromium update treadmill
Chromium chromium/chromium ★ 25.3k · **Permissive** BSD-3-Clause · App · Fit 3/5	Official GitHub mirror of the Chromium browser source code. *Replaces:* Google Chrome, Microsoft Edge	Browser vendors, embedded browser teams, kiosk makers	Consulting/implementation Setup + support retainer	• Kiosk browser builds for retail chains • Hardened Chromium for regulated enterprises • Embedded browser support for industrial HMIs	Free source, $50k+ per custom browser build *Effort:* High (massive C++ codebase, build infrastructure, patch maintenance) ⚠ BSD-3 license, Chrome trademarks restricted, security patch burden is yours
Brave Browser brave/brave-browser ★ 24.1k · **Weak copyleft** MPL-2.0 · App · Fit 3/5	Privacy browser based on Chromium with built-in ad blocking and rewards *Replaces:* Chrome, Edge, Opera	Mainstream privacy users	White-label reseller Mobile app on top Consulting/implementation	• Branded privacy browser for ISPs • Kids safe browser with filters • Enterprise-managed browser for schools *Angle:* Rebranded privacy browser with ads revenue	$3/mo per seat *Effort:* High (Huge Chromium fork, partner deals) ⚠ Brave name and logo trademarked; Rewards is a service
SingleFile gildas-lormeau/SingleFile ★ 22.9k · **AGPL** AGPL-3.0 · App · Fit 3/5	Browser extension that saves a complete web page as a single faithful HTML file. *Replaces:* Evernote Web Clipper, Pocket, Instapaper	Researchers, archivists, legal teams, students	Premium plugins/add-ons Managed hosting	• Web-page archiving for legal discovery teams • Citation snapshots for academic researchers • Web evidence capture for compliance teams	Free extension, $5/mo for team archive sync *Effort:* Medium (browser extension, store review, archive hosting) ⚠ AGPL-3.0 must publish server changes, archiving copyrighted pages has limits
Helium imputnet/helium ★ 22.5k · **GPL** GPL-3.0 · App · Fit 3/5	Private, fast and honest web browser. *Replaces:* Brave, Opera	Privacy-minded users, companies seeking managed browsers	Premium plugins/add-ons Setup + support retainer	• Privacy browser builds for law firms • Locked-down browsers for school districts • Private browsing setup for journalists	Free browser, $4/seat/mo managed policies *Effort:* High (browser fork, Chromium maintenance, security patching) ⚠ GPL-3.0 must ship source, browser name trademark, Chromium security patch burden
Javascript-obfuscator javascript-obfuscator/javascript-obfuscator ★ 16.3k · **Permissive** BSD-2-Clause · Tool · Fit 3/5	JavaScript obfuscator that makes source code harder to read for Node.js and browser builds. *Replaces:* JScrambler	Frontend teams protecting IP, SaaS vendors, game studios	Premium plugins/add-ons Setup + support retainer	• Client-side code protection for fintech widgets • Obfuscated game scripts for browser-game studios • Anti-scraping JS hardening for ticketing sites	Free core, $99/mo per team for support *Effort:* Low (CLI and npm package, config-driven) ⚠ BSD-2 fine, obfuscation is not security, legal use cases vary
BrowserOS browseros-ai/BrowserOS ★ 14.3k · **AGPL** AGPL-3.0 · App · Fit 3/5	Open-source agentic browser with built-in AI agents for web tasks. *Replaces:* ChatGPT Atlas, Perplexity Comet, Dia	Knowledge workers, researchers, privacy-minded AI users	Premium plugins/add-ons Managed hosting	• Agentic browsers for research analysts • Agent browsers for sales prospecting teams • AI browser builds for enterprise compliance teams	Free browser, $12/mo for team agent plans *Effort:* High (browser fork, agent safety, AI provider integrations) ⚠ AGPL-3.0 must publish server changes, Chromium-based fork, name trademark
Min minbrowser/min ★ 9.2k · **Permissive** Apache-2.0 · App · Fit 3/5	Minimal Electron browser with built-in ad blocking and tab search *Replaces:* Chrome, Safari	Minimal-browser fans	White-label reseller Premium plugins/add-ons Setup + support retainer	• Kiosk browser for museum exhibits • Branded school browser • Distraction-free research browser for students *Angle:* Minimal browser for kiosks	$15 one-off licence *Effort:* Medium (Electron app, easy rebrand) ⚠ Apache-2.0; Min name small mark

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Floorp Floorp-Projects/Floorp ★ 8.5k · **Weak copyleft** MPL-2.0 · App · Fit 3/5	Firefox derivative with extra customization and workspaces *Replaces:* Firefox, Edge	Customization-minded users	White-label reseller Setup + support retainer Premium plugins/add-ons	• Company-branded Firefox with preset policies • Sidebar workflow browser for researchers • Japanese-market managed browser *Angle:* Custom Firefox fork for companies	$3/mo per seat *Effort:* High (Firefox fork, rebasing effort) ⚠ MPL-2.0; Firefox trademark restrictions
Cromite uazo/cromite ★ 8.5k · **GPL** GPL-3.0 · App · Fit 3/5	Chromium-based Android browser fork with ad blocking and privacy hardening *Replaces:* Chrome Android, Brave	Android privacy users	White-label reseller Setup + support retainer Mobile app on top	• Hardened browser for activists • Branded browser for kiosk tablets • Enterprise browser preloads for Android fleets *Angle:* Hardened browser for enterprises	$25/device/yr *Effort:* High (Chromium patches on Android) ⚠ GPL-3.0; Chromium rebase upkeep
Ladybird LadybirdBrowser/ladybird ★ 66.9k · **Permissive** BSD-2-Clause · Platform · Fit 2/5	Independent from-scratch web browser engine and browser *Replaces:* Chrome, Safari, Edge	Browser engineers, privacy users	Consulting/implementation Training/courses Premium plugins/add-ons	• Embedded renderer consulting for appliances • Browser-engine training workshop • Web compatibility testing service *Angle:* Embedded browser engine consulting	$150/hr *Effort:* High (Huge C++ engine, incomplete) ⚠ BSD-2-Clause; not production ready for end users
Monaco-editor microsoft/monaco-editor ★ 47.0k · **Permissive** MIT · Library · Fit 2/5	Browser code editor component that powers VS Code's editing experience in web apps. *Replaces:* CodeSandbox embeds, Replit editor	Web IDE builders, online-coding course platforms, SaaS admins	Consulting/implementation Setup + support retainer	• Browser SQL editors for analytics SaaS • Config editors for DevOps dashboards • Online coding exercises for bootcamps	Free library, $5k-20k per editor integration *Effort:* Medium (mature editor component, language tooling needed) ⚠ MIT fine, library only, avoid implying VS Code affiliation
Servo servo/servo ★ 38.4k · **Weak copyleft** MPL-2.0 · Framework · Fit 2/5	Lightweight, high-performance web engine for embedding web technologies in applications. *Replaces:* Electron, Chromium Embedded Framework	Desktop app developers, embedded device makers	Consulting/implementation Training/courses	• Embedded web UIs for kiosk makers • Lightweight desktop shells for internal tools • Browser-engine training for systems programmers	Free engine, $15k-40k per embedding project *Effort:* High (Rust browser engine, embedding APIs still maturing) ⚠ MPL-2.0 file-level copyleft, fine for embedding, web compatibility gaps remain
Avalonia AvaloniaUI/Avalonia ★ 31.8k · **Permissive** MIT · Framework · Fit 2/5	Cross-platform .NET UI framework for desktop, mobile, embedded and WebAssembly apps using C# and XAML. *Replaces:* Telerik UI for XAML, DevExpress WPF	.NET desktop teams, cross-platform app vendors	Premium plugins/add-ons Setup + support retainer	• Industrial HMI apps for factory software vendors • Cross-platform POS apps for retail chains • XAML control packs for .NET UI studios	Free framework, $499/yr premium control pack *Effort:* Medium (mature framework, theming and control packs needed) ⚠ MIT fine, Avalonia is a company trademark, commercial support tiers exist
Slate ianstormtaylor/slate ★ 31.7k · **Permissive** MIT · Library · Fit 2/5	Customizable framework for building rich text editors, currently in beta. *Replaces:* CKEditor, TipTap Pro	React developers building editors, SaaS product teams	Consulting/implementation Premium plugins/add-ons	• Rich-text editors for legal document SaaS • Editor widgets for CMS vendors • Custom note editors for healthcare charting	Free library, $6k-18k per editor build *Effort:* Medium (React framework, editor UX work needed) ⚠ MIT fine, library in beta, editor bugs and API changes possible
Fingerprintjs fingerprintjs/fingerprintjs ★ 28.7k · **Permissive** MIT · Library · Fit 2/5	Browser fingerprinting library that identifies returning visitors for fraud and analytics use. *Replaces:* Sift, Riskified, Arkose Labs	Fraud teams, ad-tech firms, e-commerce risk teams	Setup + support retainer API/usage-based	• Account-takeover checks for online banks • Promo-abuse detection for e-commerce stores • Bot-traffic signals for ticketing sites	Free library, $299/mo per 100k identifications *Effort:* Medium (fingerprinting accuracy, privacy compliance review) ⚠ MIT fine, device fingerprinting raises GDPR and ePrivacy consent issues

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Mocha mochajs/mocha ★ 22.9k · **Permissive** MIT · Library · Fit 2/5	Node.js and browser test framework for writing and running JavaScript unit tests. *Replaces:* Jest, Cypress Cloud	JavaScript developers, QA engineers, CI teams	Consulting/implementation Training/courses	• Test-suite audits for JavaScript agencies • CI test setup for Node startups • Testing courses for JavaScript bootcamps	Free framework, $2k-6k per test-suite audit *Effort:* Low (mature framework, minimal branding needed) ⚠ MIT fine, library only, dev-tool market is crowded
Ego-lite citrolabs/ego-lite ★ 22.0k · **Permissive** MIT · App · Fit 2/5	Fast browser for AI agents that shares your logged-in browser state for automation. *Replaces:* Browserbase, Anchor Browser	AI agent developers, RPA teams, QA automation teams	API/usage-based Managed hosting	• Logged-in browser agents for sales ops teams • Browser automation for e-commerce price checks • Agent-ready browsers for research assistants	Free OSS, $0.02 per agent browser minute *Effort:* High (browser build, session security, agent integrations) ⚠ MIT fine, sharing logged-in sessions with agents is high-risk, check site ToS
Carbonyl fathyb/carbonyl ★ 19.6k · **Permissive** BSD-3-Clause · App · Fit 2/5	Chromium browser that runs inside a terminal window.	Terminal power users, developers, DevOps engineers	Premium plugins/add-ons Consulting/implementation	• Terminal browsers for SSH-only ops teams • Terminal web previews for CI pipelines • Browser-in-terminal kits for CLI tool makers	Free OSS, $1.5k per SSH-browser integration *Effort:* High (Chromium build, terminal rendering limits) ⚠ BSD-3 fine, Chromium build is heavy, Chrome trademarks not licensed
Gotty yudai/gotty ★ 19.6k · **Permissive** MIT · Tool · Fit 2/5	Shares a terminal session as a web application for browser access. *Replaces:* Teleport, Warpgate	DevOps teams, teachers running shared terminals, CTF hosts	Managed hosting Setup + support retainer	• Browser terminals for coding bootcamps • Shared lab terminals for university courses • Web shells for CTF competition hosts	Free CLI, $99/mo managed browser terminals *Effort:* Low (single binary, minimal UI) ⚠ MIT fine, exposing shells on the web is a major security risk
transformers.js huggingface/transformers.js ★ 16.4k · **Permissive** Apache-2.0 · Library · Fit 2/5	JavaScript library for running Transformers machine-learning models directly in the browser. *Replaces:* OpenAI API, Google Cloud Vertex AI	Web developers adding local AI, privacy-first app teams	Consulting/implementation Setup + support retainer	• Offline text tagging for privacy-first note apps • In-browser translation for language-learning sites • Local summarizers for newsroom CMS tools	Free library, $6k-18k per browser AI build *Effort:* Medium (model size and browser memory limits) ⚠ Apache-2.0 fine, Hugging Face is a trademark, model weights have separate licenses
Faker faker-js/faker ★ 15.5k · **Check** NOASSERTION · Library · Fit 2/5	Generates realistic fake data such as names, addresses and records for browser and Node.js. *Replaces:* Mockaroo, Tonic.ai	Test-data engineers, QA teams, app developers	Consulting/implementation Training/courses	• Synthetic test data for fintech QA teams • Seed data for e-commerce staging environments • Demo datasets for sales engineering teams	Free library, $3k-12k per test-data setup *Effort:* Low (mature library, locale data, minimal branding) ⚠ NOASSERTION license, read first, locale datasets may carry separate terms
Feathers feathersjs/feathers ★ 15.3k · **Permissive** MIT · Framework · Fit 2/5	API and real-time application framework for Node.js services. *Replaces:* Firebase, Pusher	Node.js backend teams, real-time app startups	Consulting/implementation Training/courses	• Real-time chat backends for community apps • Live dashboards for logistics startups • REST and sockets backends for mobile startups	Free framework, $4k-15k per backend build *Effort:* Low (mature framework, backend work needed) ⚠ MIT fine, framework only, backend hosting is your problem
brain.js BrainJS/brain.js ★ 14.9k · **Permissive** MIT · Library · Fit 2/5	GPU-accelerated neural network library in JavaScript for browsers and Node.js. *Replaces:* Google Cloud AutoML	JavaScript developers, ML education teams	Training/courses Consulting/implementation	• Neural nets for JavaScript bootcamps • Browser-based classifiers for classroom demos • Small prediction models for web-app features	Free library, $79 course bundle on JS ML *Effort:* Medium (small model library, accuracy tuning needed) ⚠ MIT fine, library only, limited scale for modern deep learning

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Browserify browserify/browserify ★ 14.7k · **Permissive** MIT · Tool · Fit 2/5	Bundler that lets browser code use Node.js-style require() by packaging modules.	Legacy frontend teams, JavaScript build engineers	Consulting/implementation Setup + support retainer	• Legacy build migrations for enterprise frontends • Bundling audits for agency codebases • Build-tool modernization for older SaaS apps	Free tool, $4k-12k per legacy build migration *Effort:* Low (mature bundler, legacy scope) ⚠ MIT fine, legacy tool largely superseded by newer bundlers
HackBrowserData moonD4rk/HackBrowserData ★ 14.7k · **Permissive** MIT · Tool · Fit 2/5	Decrypts and exports browser passwords, cookies and history from many browsers.	Forensic investigators, incident responders, red teams	Consulting/implementation Training/courses	• Browser forensics training for incident responders • Endpoint evidence collection for law firms • Credential-exposure audits for IT teams	Free tool, $5k-20k per forensic engagement *Effort:* Medium (credential-extraction code, legal use restrictions) ⚠ MIT fine, credential-extraction tools are dual-use, misuse is a criminal offense
Kysely kysely-org/kysely ★ 14.3k · **Permissive** MIT · Library · Fit 2/5	Type-safe TypeScript SQL query builder. *Replaces:* Prisma, Hasura	TypeScript backend teams, SaaS developers	Consulting/implementation Setup + support retainer	• Type-safe database layers for fintech APIs • SQL query audits for TypeScript agencies • Migration help for legacy Node apps	Free library, $3k-10k per data-layer migration *Effort:* Low (mature library, database work is per-project) ⚠ MIT fine, library only, database-specific dialect quirks apply
Firefox-ios mozilla-mobile/firefox-ios ★ 13.1k · **Weak copyleft** MPL-2.0 · App · Fit 2/5	Mozilla's Firefox browser source code for iOS devices. *Replaces:* Safari, Chrome for iOS	iOS browser startups, privacy-app developers	Mobile app on top Consulting/implementation	• Privacy browser builds for iOS startups • Branded iOS browser for media companies • Kiosk browser apps for iOS retail	Free source, $30k+ per branded browser build *Effort:* High (Gecko codebase, App Store rules, Firefox trademarks) ⚠ MPL-2.0 file-level copyleft, Firefox name and logo are Mozilla trademarks
Thorium Alex313031/thorium ★ 7.6k · **Permissive** BSD-3-Clause · App · Fit 2/5	Optimized Chromium fork with performance and codec tweaks *Replaces:* Chrome, Edge	Performance-seeking users	White-label reseller Setup + support retainer Consulting/implementation	• Low-latency browser builds for trading desks • Linux ARM browser builds for thin clients • Branded gaming browser *Angle:* Performance browser builds	$20 per seat *Effort:* High (Heavy Chromium builds) ⚠ BSD-3-Clause; single maintainer, update lag
Iceraven fork-maintainers/iceraven-browser ★ 6.6k · **Check** NONE · App · Fit 2/5	Firefox for Android fork enabling extra add-ons *Replaces:* Firefox Android, Chrome Android	Android Firefox users	Mobile app on top Setup + support retainer White-label reseller	• Add-on curated browser for older phones • Branded browser for tablets in schools • Privacy browser preload for rental phones *Angle:* Mobile browser with add-ons	$2 one-off *Effort:* High (Fenix fork, rebase-heavy) ⚠ License marked NONE but MPL base; Firefox trademark
DuckDuckGo Android duckduckgo/Android ★ 4.9k · **Permissive** Apache-2.0 · App · Fit 2/5	DuckDuckGo privacy browser app for Android *Replaces:* Chrome Android, Safari	Privacy-minded users	Mobile app on top White-label reseller Consulting/implementation	• Reference for private search browsers • Branded privacy browser for telecoms • Anti-tracking browser for kids *Angle:* Privacy browser reference for brands	$2/mo premium *Effort:* High (Search deal and brand-tied) ⚠ DuckDuckGo name and logo trademarks; Apache-2.0

Car & Vehicle Apps · 12

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Ddt4all cedricp/ddt4all ★ 1.9k · GPL GPL-3.0 · Tool · Fit 2/5	Desktop OBD diagnostic tool for reading and clearing car fault codes. *Replaces:* Autel MaxiSys, Launch X431	Car owners, independent garages, DIY mechanics	Premium plugins/add-ons Setup + support retainer	• Diagnostic setup help for independent garages • Fault-code help for DIY car owners • Vehicle-profile tools for indie workshops	Free tool, $19/yr for vehicle profile packs *Effort:* Medium (Windows desktop app, vehicle-specific protocols) ⚠ GPL-3.0 fine, manufacturer trademarks and ECU-tampering rules apply
ELMduino PowerBroker2/ELMduino ★ 944 · Permissive MIT · Library · Fit 2/5	Arduino library for connecting to OBD-II Bluetooth scanners in car hacking projects.	Arduino makers, automotive hobbyists, dashboard builders	Hardware kits/assembly Premium plugins/add-ons	• Custom car dashboards for hobby drivers • OBD gauge kits for classic car clubs • Telemetry boxes for track-day enthusiasts	Free library, $79 dashboard gauge kit *Effort:* Medium (Arduino library, hardware and Bluetooth compatibility) ⚠ MIT fine, library only, car-data use must respect vehicle safety rules
Python-udsoncan pylessard/python-udsoncan ★ 741 · Permissive MIT · Library · Fit 2/5	Python implementation of the UDS ISO 14229 diagnostic protocol for automotive ECUs. *Replaces:* Vector CANoe, Softing diagnostic tools	Automotive test engineers, ECU developers	Consulting/implementation Training/courses	• UDS test automation for ECU suppliers • Diagnostics scripting for automotive QA labs • UDS courses for automotive engineering students	Free library, $5k-15k per ECU test setup *Effort:* Medium (protocol library, ECU-specific test setup) ⚠ MIT fine, ISO 14229 spec is paid, ECU access needs authorization
Obdium provrb/obdium ★ 453 · GPL GPL-3.0 · App · Fit 2/5	Free, open-source on-board diagnostics software for reading car engine data. *Replaces:* Torque Pro, OBD Auto Doctor	Car owners, mechanics, OBD-II hobbyists	Mobile app on top Premium plugins/add-ons	• Driver-data apps for performance car clubs • Engine-data logs for independent mechanics • OBD dashboards for fleet drivers	Free app, $4.99 one-time for pro dashboards *Effort:* Medium (OBD protocol handling, vehicle variability) ⚠ GPL-3.0 fine, vehicle location and driving data are personal data
Python-can-isotp pylessard/python-can-isotp ★ 315 · Permissive MIT · Library · Fit 2/5	Python package implementing the ISO-TP ISO 15765 transport protocol over CAN bus. *Replaces:* Vector CANoe, Kvaser tools	Embedded engineers, automotive ECU teams, robotics makers	Consulting/implementation Training/courses	• CAN transport setup for robotics makers • ISO-TP training for embedded engineers • CAN bus debugging for EV retrofit shops	Free library, $3k-10k per CAN integration *Effort:* Low (small library, CAN hardware needs test benches) ⚠ MIT fine, library only, CAN safety work needs qualified test benches
Obd2-mqtt adlerre/obd2-mqtt ★ 278 · GPL GPL-3.0 · Tool · Fit 2/5	Bridge that publishes OBD-II car data to MQTT for Home Assistant dashboards. *Replaces:* Torque Pro, OBD Fusion	Home Assistant users, car-data hobbyists	Premium plugins/add-ons Setup + support retainer	• Car dashboards for Home Assistant installers • Vehicle sensors for smart-home energy tracking • Garage-based car telemetry for family fleets	Free bridge, $99 install for dashboards *Effort:* Low (small bridge, Home Assistant-specific) ⚠ GPL-3.0 fine, vehicle location data is personal data needing care
Hudiy wiboma/hudiy ★ 271 · Check NONE · Platform · Fit 2/5	Full-featured software platform for building Linux-based car head units. *Replaces:* Android Automotive, QNX	Aftermarket head-unit makers, car-audio installers	Hardware kits/assembly Setup + support retainer	• Linux head units for aftermarket car-audio shops • Custom dashboards for fleet vehicles • Retrofit head-unit kits for classic cars	Free platform, $199 per licensed head unit *Effort:* High (in-car safety, hardware variety, Linux driver work) ⚠ NONE license, read first, in-car software may need automaker and safety approvals
LTSupportAutomotive mickeyl/LTSupportAutomotive ★ 255 · Permissive MIT · Library · Fit 2/5	iOS, watchOS and macOS library for OBD2 connections, VIN decoding and related car data.	iOS car-app developers, telematics startups	Consulting/implementation Premium plugins/add-ons	• OBD apps for used-car buyers • Apple Watch car dashboards for drivers • VIN lookup features for car marketplaces	Free library, $2k-6k per iOS integration *Effort:* Low (Swift library, small, platform-specific) ⚠ MIT fine, library only, Apple platform only, VIN data sources vary

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Elmobd rzetterberg/elmobd ★ 250 · **Permissive** MIT · Library · Fit 2/5	Go library for talking to cars over the OBD-II protocol using ELM327 adapters.	Go developers, telematics startups	Consulting/implementation Setup + support retainer	• Go telematics backends for fleet startups • OBD data collectors for insurance pilots • Car-data services for mechanic apps	Free library, $3k per telematics integration *Effort:* Low (small Go library, adapter-dependent) ⚠ MIT fine, library only, car data adapters vary in reliability
OBD2_K-line_Reader muki01/OBD2_K-line_Reader ★ 244 · **GPL** GPL-3.0 · Tool · Fit 2/5	OBD2 K-line reader supporting ISO9141 and ISO14230 using ESP32 or Arduino boards. *Replaces:* Autel scanners, Launch X431	Classic-car owners, DIY mechanics, makers	Hardware kits/assembly Premium plugins/add-ons	• K-line scanners for classic car clubs • DIY OBD boards for garage makers • Pre-OBD2 diagnostic kits for older cars	$39-69 DIY reader kit, free firmware *Effort:* Medium (microcontroller firmware, car protocol variability) ⚠ GPL-3.0 fine, hardware kits need CE and FCC, car diagnostics liability
Kotlin-obd-api eltonvs/kotlin-obd-api ★ 237 · **Permissive** Apache-2.0 · Library · Fit 2/5	Kotlin OBD-II API for reading engine data.	Android developers, telematics app teams	Consulting/implementation Setup + support retainer	• Android OBD apps for used-car inspectors • Engine-data apps for rideshare drivers • Mobile OBD dashboards for fleet operators	Free library, $2k-8k per Android integration *Effort:* Low (Kotlin library, small Android surface) ⚠ Apache-2.0 fine, library only, OBD adapter quirks vary by vehicle
Iso15765-canbus devcoons/iso15765-canbus ★ 200 · **AGPL** AGPL-3.0 · Library · Fit 2/5	C implementation of the ISO 15765-2 transport protocol for CAN bus messaging. *Replaces:* Vector CANoe, PEAK tools	Embedded firmware teams, automotive ECU suppliers	Consulting/implementation Setup + support retainer	• CAN transport firmware for EV battery makers • ECU messaging stacks for motorcycle makers • Embedded CAN libraries for industrial vendors	Free library, $8k-20k per firmware integration *Effort:* Medium (embedded C, CAN hardware testing) ⚠ AGPL-3.0 network clause, product firmware distribution obligations apply

Car Sharing & Micromobility · 9

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Transitland-atlas transitland/transitland-atlas ★ 199 · **Permissive** CC-BY-4.0 · Content · Fit 3/5	Open directory of mobility feeds and operators that powers Transitland v1 and v2. *Replaces:* Remix, Trillium Transit	Transit agencies, transit-app developers, urban planners	API/usage-based Consulting/implementation	• Transit feed catalogs for trip-planner apps • Feed-monitoring service for transit agencies • GTFS data audits for city transit consultants	Free directory, $2k-8k per feed integration *Effort:* Medium (data catalog, feed quality and licensing varies) ⚠ CC-BY-4.0 needs attribution, individual transit feed licenses differ
OpenSourceBikeShare cyklokoalicia/OpenSourceBikeShare ★ 183 · **GPL** GPL-3.0 · App · Fit 3/5	Low-cost open-source bike-sharing system built in the EU. *Replaces:* Donkey Republic, Nextbike	Bike-share operators, municipalities, campus transport teams	Managed hosting Hardware kits/assembly	• Campus bike-share for universities • Low-cost bike-share pilots for small towns • Bike docking hardware kits for EU cities	Free software, $12k-40k per bike-share pilot *Effort:* High (hardware docking stations, ops and payments) ⚠ GPL-3.0 fine, payment and transport regulations vary by city
FlowKit Flowminder/FlowKit ★ 97 · **Weak copyleft** MPL-2.0 · Tool · Fit 3/5	Toolkit for analysing call-detail records from mobile networks for mobility insights. *Replaces:* Teralytics, Cuebiq	Humanitarian NGOs, public-health agencies, telecom analytics teams	Consulting/implementation Setup + support retainer	• Mobility analysis for disaster-response NGOs • Population movement reports for public-health agencies • CDR analytics pilots for telecom operators	Free toolkit, $20k-60k per deployment *Effort:* High (privacy-sensitive CDR data, telecom partner integration) ⚠ MPL-2.0 file-level copyleft, call records are personal data under GDPR
City2graph c2g-dev/city2graph ★ 2.0k · **Permissive** BSD-3-Clause · Library · Fit 2/5	Python library that turns geospatial relations into graphs for graph neural networks. *Replaces:* ArcGIS Network Analyst	Urban planners, GIS researchers, mobility analysts	Consulting/implementation Training/courses	• Spatial graph models for urban transit planners • Graph features for retail-site selection • GNN workshops for geospatial data science teams	Free library, $4k-12k per spatial analysis project *Effort:* Medium (research-style library, GNN expertise needed) ⚠ BSD-3 fine, library only, geospatial data licensing varies by source

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Amset hackingmaterials/amset ★ 164 · Check NOASSERTION · Tool · Fit 2/5	Electronic transport property calculations from first-principles simulations. *Replaces:* VASP-based workflows, Materials Studio	Materials scientists, battery researchers, semiconductor R&D	Consulting/implementation Training/courses	• Transport calculations for battery startups • Thermoelectric material screening for R&D labs • Materials-simulation courses for PhD students	Free code, $8k-25k per materials screening project *Effort:* High (scientific Python code, DFT expertise required) ⚠ NOASSERTION license, read first, depends on DFT codes with own licenses
LPSim Xuan-1998/LPSim ★ 76 · Check NOASSERTION · Tool · Fit 2/5	Multi-GPU simulator for large-scale network flow and agent-based optimization. *Replaces:* PTV Vissim, Aimsun	Transport planners, mobility researchers, ride-hailing dispatch teams	Consulting/implementation API/usage-based	• Dispatch simulation for ride-hailing startups • Traffic-flow studies for city transport agencies • Fleet routing simulations for delivery firms	Free OSS, $10k-40k per city simulation study *Effort:* High (multi-GPU research code, city-scale data prep) ⚠ NOASSERTION license, read first, GPU hardware needs and research-grade reliability
flowmapblue.R FlowmapBlue/flowmapblue.R ★ 71 · Check NOASSERTION · Library · Fit 2/5	R widget for embedding Flowmap.blue origin-destination flow maps. *Replaces:* Tableau, ArcGIS Flow Map	R analysts, migration researchers, urban geographers	Training/courses Consulting/implementation	• Flow-map courses for R analysts • Migration flow reports for city planners • Commuter flow maps for transit consultants	Free widget, $1.5k per custom flow report *Effort:* Low (R widget, map styling and data prep) ⚠ NOASSERTION license, read first, Flowmap.blue service and map tile terms apply
Transitland-lib interline-io/transitland-lib ★ 53 · Check NOASSERTION · Library · Fit 2/5	Library and tool for reading, writing and processing transit feed data. *Replaces:* Remix, Trillium Transit	Transit agencies, GTFS tool vendors, transit-app developers	Consulting/implementation Setup + support retainer	• GTFS cleanup services for small transit agencies • Feed-merge tooling for regional transit planners • GTFS validation pipelines for transit-app startups	Free tool, $3k-10k per GTFS pipeline setup *Effort:* Medium (transit data tooling, GTFS edge cases) ⚠ NOASSERTION license, read first, GTFS feed licenses vary by agency
Spanishoddata rOpenSpain/spanishoddata ★ 48 · Check NOASSERTION · Library · Fit 2/5	R package giving access to Spanish open mobility datasets derived from mobile phone data.	Spanish urban planners, transport researchers, journalists	Consulting/implementation Training/courses	• Mobility datasets for Madrid transit consultants • Movement-pattern courses for Spanish geography students • Mobility dashboards for Spanish regional governments	Free data access, $3k per city mobility study *Effort:* Low (R package, data pipeline, Spanish docs) ⚠ NOASSERTION license, read first, Spanish source data terms restrict redistribution

Church & Community · 15

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
ChurchCRM ChurchCRM/CRM ★ 989 · Permissive MIT · App · Fit 4/5	Free church management for people, groups, events, attendance and giving *Replaces:* Planning Center, Breeze, Pushpay, Church Community Builder	Churches, ministries	Managed hosting Setup + support retainer Vertical SaaS	• Church management for small congregations • Parish software for Spanish-speaking churches • Giving tracker for ministries *Angle:* Hosted church management SaaS	$15-49/mo per church *Effort:* Medium (PHP app, single church per install) ⚠ MIT; donation compliance varies
CiviCRM civicrm/civicrm-core ★ 796 · AGPL AGPL-3.0 · Platform · Fit 4/5	Constituent relationship management for nonprofits with contacts, donations, events and memberships *Replaces:* Salesforce Nonprofit, Bloomerang, Neon CRM, Blackbaud	Nonprofits and membership associations	Managed hosting Consulting/implementation Setup + support retainer	• CRM for animal shelters • Member management for trade associations • Donor tracking for faith groups *Angle:* Nonprofit CRM hosting	$100-500/mo per organization *Effort:* Medium (Runs inside Drupal or WordPress, deep config) ⚠ AGPL: publish server-side changes; CiviCRM trademark

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Rock RMS SparkDevNetwork/Rock ★ 701 · Check NONE · Platform · Fit 4/5	Church management system with CMS and relationship management *Replaces:* Planning Center, Pushpay, Church Community Builder	Large churches, ministries	Managed hosting Consulting/implementation Setup + support retainer	• Hosted Rock for churches • Church website and ChMS bundle • Rock migration services *Angle:* Church platform deployments	$100-400/mo per church *Effort:* High (Large .NET platform, multi-site) ⚠ License NONE in metadata but Rock RMS license exists, read first
OpenPetra openpetra/openpetra ★ 117 · GPL GPL-3.0 · Platform · Fit 4/5	CRM and ERP for charities and NGOs with donor and accounting modules *Replaces:* Salesforce NPSP, Blackbaud, Donorfy	Charities, mission organizations	Managed hosting Vertical SaaS Setup + support retainer	• Hosted donor CRM for small missions • Accounting for church networks • Sponsorship tracking for orphanages *Angle:* Charity donor management SaaS	$49-199/mo per org *Effort:* High (Large .NET app, accounting rules) ⚠ GPL-3.0; localized accounting needs review
And-bible AndBible/and-bible ★ 828 · GPL GPL-3.0 · App · Fit 3/5	Android Bible study app. *Replaces:* Logos Bible App, Olive Tree	Bible students, pastors, seminary students	Mobile app on top Premium plugins/add-ons	• Study app for small-group Bible classes • Bible study tools for seminary students • Multilingual Bible apps for mission churches	Free app, $4.99 one-time for premium modules *Effort:* Medium (Android app, Bible module formats and licensing) ⚠ GPL-3.0 fine, Bible translations have individual copyrights, check each
Bibletime bibletime/bibletime ★ 418 · GPL GPL-2.0 · App · Fit 3/5	Cross-platform desktop Bible study tool. *Replaces:* Logos Bible Software, Accordance	Pastors, theology students, Bible scholars	Premium plugins/add-ons Training/courses	• Bible-study courses for seminary students • Desktop study tools for pastors' libraries • Commentary modules for Bible teachers	Free app, $19 one-time for premium modules *Effort:* Medium (C++ desktop app, module formats) ⚠ GPL-2.0 fine, Bible module texts carry individual copyrights and licenses
Androidbible yukuku/androidbible ★ 366 · Permissive Apache-2.0 · App · Fit 3/5	Open-source Bible app for Android devices. *Replaces:* YouVersion Bible, Logos Bible App	Android Bible readers, church groups	Mobile app on top Premium plugins/add-ons	• Bible reading app for small-group churches • Verse-share app for youth ministries • Bible app skins for church denominations	Free app, $2.99 for denominational skins *Effort:* Medium (Android app, translation modules and branding) ⚠ Apache-2.0 fine, Bible translation texts have separate copyrights, check each
Ezra-bible-app ezra-bible-app/ezra-bible-app ★ 238 · GPL GPL-2.0 · App · Fit 3/5	Modern Bible app for desktop, tablet and mobile focused on topical study. *Replaces:* Logos, Accordance	Pastors, Bible teachers, study-group leaders	Premium plugins/add-ons Training/courses	• Topical study guides for pastors • Small-group Bible study curricula • Bible-topic courses for lay leaders	Free app, $5 one-time for study modules *Effort:* Medium (cross-platform app, Bible module licensing) ⚠ GPL-2.0 fine, Bible module texts have separate copyrights to check
Abibliadigital omarciovsena/abibliadigital ★ 1.0k · Permissive BSD-2-Clause · Platform · Fit 2/5	RESTful API serving Bible text and verse lookups for apps. *Replaces:* API.Bible, Bible Gateway API	Church app developers, Bible-study app makers	API/usage-based Managed hosting	• Verse-lookup APIs for church websites • Scripture search for Portuguese-speaking churches • Bible API for sermon-note apps	Free tier, $29/mo for higher API limits *Effort:* Low (small API service, Portuguese-language docs) ⚠ BSD-2 fine, Bible translation texts carry separate licenses, check each version
Bible_api seven1m/bible_api ★ 847 · Permissive MIT · Platform · Fit 2/5	Ruby web app that serves a JSON API for open and public domain Bibles. *Replaces:* Bible Gateway API, Logos API	Bible app developers, church tech teams	Managed hosting API/usage-based	• Public-domain Bible APIs for church websites • Bible JSON feeds for devotional apps • Self-hosted Bible APIs for seminaries	Free self-host, $39/mo managed Bible API *Effort:* Low (Ruby app, public-domain texts, minimal UI) ⚠ MIT fine, public-domain texts are free, check translation-specific terms

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Bible thiagobodruk/bible ★ 784 · **Permissive** MIT · Content · Fit 2/5	Bible text in JSON and XML across 141 versions and 85 languages for apps and datasets.	App developers, NLP researchers, Bible-app builders	API/usage-based Consulting/implementation	• Multilingual verse datasets for NLP labs • Bible JSON feeds for mission-church apps • Verse-search data for devotional apps	Free dataset, $2k-8k per multilingual data delivery *Effort:* Low (data files, minimal product layer) ⚠ MIT fine, individual Bible translations have separate copyrights, check each
Bible-api wldeh/bible-api ★ 539 · **Check** NONE · Platform · Fit 2/5	Free unlimited Bible API with access to over 200 versions and languages. *Replaces:* API.Bible, Bible Gateway API	Church website builders, Bible app developers	API/usage-based Managed hosting	• Multilingual verse APIs for global ministries • Bible widgets for church websites • Verse-of-the-day APIs for devotional apps	Free API, $49/mo for guaranteed uptime *Effort:* Low (API service, docs and uptime are the work) ⚠ NONE license, read first, Bible translation licenses vary by version
Theographic-bible-metadata robertrouse/theographic-bible-metadata ★ 368 · **Weak copyleft** CC-BY-SA-4.0 · Content · Fit 2/5	Knowledge graph of biblical people, places, periods and passages.	Bible-study app developers, digital humanities researchers	API/usage-based Consulting/implementation	• Entity graphs for Bible-study apps • Biblical-people datasets for humanities courses • Place-linked Bible maps for mission agencies	Free dataset, $3k per custom graph integration *Effort:* Medium (graph data model, metadata curation needed) ⚠ CC-BY-SA-4.0 share-alike applies to derived graphs, attribution required
Obsidian-bible-reference tim-hub/obsidian-bible-reference ★ 348 · **Permissive** MIT · Tool · Fit 2/5	Obsidian plugin for Bible study notes with verse and reference suggestions. *Replaces:* Logos Notes, Accordance	Bible students, sermon writers, Obsidian users	Premium plugins/add-ons Training/courses	• Sermon-prep templates for Obsidian users • Bible-study note kits for small groups • Verse-linked study courses for pastors	Free plugin, $12 one-time for template packs *Effort:* Low (small Obsidian plugin, Bible text data) ⚠ MIT fine, Bible text sources carry own licenses, Obsidian is a trademark
bible.rs DSpeckhals/bible.rs ★ 229 · **Permissive** MIT · Platform · Fit 2/5	Bible server written in Rust using Actix Web and Diesel. *Replaces:* API.Bible	Rust backend developers, Bible app builders	Managed hosting Consulting/implementation	• Self-hosted Bible APIs for Rust shops • Scripture servers for small church networks • Bible backends for offline church apps	Free server, $1.5k per Bible backend setup *Effort:* Medium (Rust backend, database schema and text licensing) ⚠ MIT fine, Bible text data needs separate licensing checks

Formbricks formbricks/formbricks ★ 13.2k · **Check** NOASSERTION · App · Fit 5/5	Survey and in-app feedback platform with targeting, analytics and link surveys *Replaces:* Qualtrics, SurveyMonkey, Typeform, Hotjar Surveys	Product teams and customer experience managers	Managed hosting Vertical SaaS Setup + support retainer	• NPS surveys for SaaS startups • Patient feedback for clinics • Event feedback forms for conference organizers *Angle:* Survey and feedback SaaS	$0-49/mo per workspace, usage tiers *Effort:* Medium (Multi-tenant ready, enterprise features gated) ⚠ NOASSERTION: AGPL core plus commercial ee folder; Formbricks trademark
HeyForm heyform/heyform ★ 9.1k · **AGPL** AGPL-3.0 · App · Fit 4/5	Open-source form builder with conversational forms *Replaces:* Typeform, Google Forms, Jotform, Tally	Marketers, agencies, startups	Managed hosting White-label reseller Vertical SaaS	• Intake forms for law firms • Lead forms for realtors • Quiz forms for coaches *Angle:* Form builder SaaS for agencies	$12-49/mo *Effort:* Medium (Workspaces built in) ⚠ AGPL, publish modifications
Fider getfider/fider ★ 4.6k · **AGPL** AGPL-3.0 · App · Fit 4/5	Open platform to collect and prioritize customer feedback *Replaces:* Canny, UserVoice, ProductBoard, Nolt	SaaS companies, product teams	Managed hosting White-label reseller Vertical SaaS	• Feedback boards for indie SaaS • Roadmaps for game studios • Idea boards for municipalities *Angle:* Feedback portal for public services	$15-49/mo per board *Effort:* Low (Multi-tenant mode, themeable) ⚠ AGPL, publish modifications; Fider trademark

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
SecureDrop freedomofpress/securedrop ★ 3.9k · **Check** NOASSERTION · Platform · Fit 4/5	Secure whistleblower submission system for newsrooms *Replaces:* Signal tip lines, Hushmail	News organizations	Setup + support retainer Managed hosting Consulting/implementation	• Tip line setup for local newsrooms • Whistleblower line for NGOs • Hosted source-intake for law firms *Angle:* Secure tip line for newsrooms	$2-5k install, $200/mo *Effort:* High (Air-gapped hardware workflow) ⚠ AGPL license; SecureDrop name trademarked; high security burden
LimeSurvey LimeSurvey/LimeSurvey ★ 3.8k · **Check** NOASSERTION · App · Fit 4/5	Survey platform with advanced logic and multilingual surveys *Replaces:* SurveyMonkey, Typeform, Qualtrics	Researchers, universities, enterprises	Managed hosting Setup + support retainer Consulting/implementation	• Survey hosting for researchers • HR surveys for SMBs • Multilingual surveys for NGOs *Angle:* Hosted survey platform for governments	$19-99/mo *Effort:* Medium (Mature PHP, dated UI) ⚠ GPL (NOASSERTION), fine for hosting; LimeSurvey trademark
GlobaLeaks globaleaks/globaleaks ★ ? · **Check** NONE · Platform · Fit 4/5	Whistleblowing platform for organizations with anonymous reports *Replaces:* NAVEX, WhistleB, EQS Integrity Line	Compliance teams, NGOs	Managed hosting Setup + support retainer White-label reseller	• EU whistleblower directive hosting for SMBs • Anonymous reporting for school boards • Compliance line for municipalities *Angle:* Whistleblowing platform for compliance	$100-300/mo per org *Effort:* Medium (Python app, deployable) ⚠ License not stated; AGPL upstream, verify; legal reporting rules
Boinc BOINC/boinc ★ 2.5k · **Weak copyleft** LGPL-3.0 · Platform · Fit 3/5	Open-source software for volunteer and grid computing. *Replaces:* AWS Batch, Azure Batch	Research labs, science projects, volunteer-computing communities	Managed hosting Consulting/implementation	• Volunteer computing for university research labs • Grid computing setup for science nonprofits • Distributed batch compute for biotech labs	Free software, $5k-20k per grid setup *Effort:* High (C++ middleware, project-specific app integration) ⚠ LGPL-3.0 fine, volunteer computing needs security and trust controls
ProofMode guardianproject/proofmode-android ★ 266 · **GPL** GPL-3.0 · App · Fit 3/5	Android app that adds verifiable proof metadata to photos and videos *Replaces:* Truepic, Eyewitness to Atrocities	Journalists, human rights groups	Mobile app on top Setup + support retainer White-label reseller	• Evidence capture for insurance claims • Verified photo app for property inspectors • Field media provenance for NGOs *Angle:* Verified media capture for NGOs	$3/user/mo *Effort:* Medium (Android app, verification backend) ⚠ GPL-3.0 source obligations; ProofMode name
Wq wq/wq ★ 264 · **Permissive** MIT · Framework · Fit 3/5	Modular framework for web and native apps that collect mobile survey and geospatial field data. *Replaces:* Esri Survey123, Fulcrum	Field-data NGOs, environmental monitoring teams, public-health surveyors	Consulting/implementation Setup + support retainer	• Mobile water-sampling forms for NGO monitoring • Offline survey apps for public-health campaigns • Geospatial inspection apps for municipal teams	Free framework, $8k-25k per field-data deployment *Effort:* High (Django backend, offline sync, native app work) ⚠ MIT fine, field data privacy rules apply, Esri is a trademark
Tella Horizontal-org/Tella-Android ★ 117 · **Permissive** MIT · App · Fit 3/5	Android app for secure capture and encrypted storage of sensitive evidence *Replaces:* Signal, Truepic	Human rights defenders	Setup + support retainer White-label reseller Consulting/implementation	• Secure reporting app for press unions • Branded evidence vault for NGOs • Labor rights evidence capture *Angle:* Secure evidence documentation for journalists	$1k setup, support retainer *Effort:* Medium (Android app, server optional) ⚠ Tella trademark by Horizontal; high-risk users liability
Enketo enketo/enketo ★ 42 · **Permissive** Apache-2.0 · Library · Fit 3/5	Web form engine for ODK XForms that works offline *Replaces:* KoBoToolbox, Typeform, SurveyCTO	Survey NGOs, researchers	Managed hosting Vertical SaaS Consulting/implementation	• Offline field inspection forms for utilities • Health survey forms for NGOs • Crop disease scouting forms *Angle:* Offline web forms for field reporting	$49/mo hosted *Effort:* Medium (XForms engine, needs backend) ⚠ Apache-2.0; XForms complexity
Open-Gamma-Detector OpenGammaProject/Open-Gamma-Detector ★ 386 · **GPL** GPL-3.0 · Hardware · Fit 2/5	DIY open hardware gamma-ray spectrometer built from a NaI scintillator, SiPM and Raspberry Pi Pico. *Replaces:* Mirion Technologies detectors, Ortec spectrometers	Radiation hobbyists, school science labs, university physics	Hardware kits/assembly Training/courses	• Radiation-physics kits for school science labs • Gamma spectrometer workshops for physics students • Background-radiation kits for maker spaces	$180-300 kit, free firmware and software *Effort:* High (radiation hardware, calibration, safety certification) ⚠ GPL-3.0 fine, radiation detector sales need certification and export checks

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Pyinaturalist pyinat/pyinaturalist ★ 189 · **Permissive** MIT · Library · Fit 2/5	Python client for the iNaturalist biodiversity observation API.	Biodiversity researchers, nature apps, citizen-science developers	Consulting/implementation Training/courses	• Species-observation tools for nature reserves • Bird-count data pipelines for ecology labs • iNaturalist data scripts for school nature clubs	Free library, $2k-6k per biodiversity data project *Effort:* Low (small API client, iNaturalist terms apply) ⚠ MIT fine, iNaturalist API terms and photo licenses limit commercial reuse
Deep-smoke-machine CMU-CREATE-Lab/deep-smoke-machine ★ 125 · **Permissive** BSD-3-Clause · Model · Fit 2/5	Deep learning models and dataset for recognizing industrial smoke emissions from video. *Replaces:* Continuous emissions monitoring systems	Environmental regulators, factory compliance teams, air-quality NGOs	API/usage-based Consulting/implementation	• Smoke-camera monitoring for steel plants • Emission video audits for air-quality NGOs • Industrial camera alerts for regional regulators	Free model, $3k-10k per site monitoring setup *Effort:* High (video models, site-specific calibration, dataset licensing) ⚠ BSD-3 fine, emissions claims need regulatory validation, dataset terms check
wq.app wq/wq.app ★ 122 · **Permissive** MIT · Library · Fit 2/5	JavaScript framework for offline-first web and native apps that collect geospatial field data. *Replaces:* Esri Survey123 mobile, Fulcrum	Field-app developers, NGO data teams	Consulting/implementation Setup + support retainer	• Offline field apps for conservation NGOs • Mobile inspection apps for municipal crews • Offline-first apps for rural health workers	Free library, $6k-18k per field app build *Effort:* High (JavaScript framework, offline sync, native packaging) ⚠ MIT fine, library only, offline data sync and privacy need careful design
wq.db wq/wq.db ★ 119 · **Permissive** MIT · Library · Fit 2/5	Django REST framework extension for building field-data apps for geospatial and citizen-science projects. *Replaces:* Esri ArcGIS Enterprise, Fulcrum API	Django developers, NGO data teams	Consulting/implementation Setup + support retainer	• Django backends for conservation field apps • Citizen-science data APIs for university labs • Geospatial survey backends for municipal teams	Free library, $5k-15k per backend build *Effort:* Medium (Django backend, schema design for survey data) ⚠ MIT fine, library only, geospatial survey data privacy rules apply
KnowFlow_AWM KnowFlow/KnowFlow_AWM ★ 100 · **Check** NONE · Hardware · Fit 2/5	Open-source automatic water-monitoring device that gives everyone first-hand water quality data. *Replaces:* YSI water-quality sondes, Hach monitoring	Community water groups, environmental NGOs, municipal utilities	Hardware kits/assembly Setup + support retainer	• River monitoring kits for watershed NGOs • Aquaculture water sensors for fish farms • School water-testing kits for science labs	$400-900 device kit, $60/mo data support *Effort:* High (sensor calibration, water-chemistry validity, field hardware) ⚠ NONE license, read first, water-quality claims need certified calibration before regulatory use
Open-humans OpenHumans/open-humans ★ 87 · **Permissive** MIT · Platform · Fit 2/5	Codebase powering the Open Humans personal-data research platform.	Health-research groups, citizen-science projects, participant-data teams	Managed hosting Consulting/implementation	• Participant data portals for citizen-science studies • Consent-managed data donation for research labs • Personal-data research platforms for universities	Free core, $1k-4k/mo managed research instance *Effort:* High (consent, privacy and health-data compliance) ⚠ MIT fine, health and personal-data consent rules GDPR and HIPAA apply heavily
POCS panoptes/POCS ★ 84 · **Permissive** MIT · Tool · Fit 2/5	Observatory control system for the PANOPTES citizen-science project that helps find exoplanets.	Amateur astronomers, observatory operators, citizen-science groups	Consulting/implementation Setup + support retainer	• Robotic telescope setup for school observatories • Observatory automation for amateur clubs • Exoplanet-survey setup for university outreach	Free software, $3k-10k per observatory setup *Effort:* High (hardware-specific observatory control, astronomy expertise) ⚠ MIT fine, observatory hardware safety and remote-operation risks need care

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Emissions-api emissions-api/emissions-api ★ 78 · Permissive MIT · Platform · Fit 2/5	Web API for easy access to satellite-based emissions data. *Replaces:* Kayrros, Carbon Mapper	ESG analysts, climate-finance teams, carbon-market researchers	API/usage-based Consulting/implementation	• Methane feeds for oil-and-gas ESG teams • Facility emissions data for carbon-market traders • Satellite emissions checks for insurers	Free tier, $499/mo for ESG data API *Effort:* Medium (data pipelines, satellite licensing, API docs) ⚠ MIT fine, upstream satellite and emissions datasets carry their own terms
Rmap r-map/rmap ★ 55 · Check NONE · Platform · Fit 2/5	Participatory environmental monitoring platform for citizen-collected measurements. *Replaces:* Airly, IQAir	Environmental NGOs, citizen-science groups, Italian municipalities	Managed hosting Setup + support retainer	• Air-monitoring networks for Italian municipalities • Participatory air-quality mapping for schools • Community water monitoring for river associations	Free platform, €500/mo managed deployment *Effort:* Medium (Italian docs, sensor integrations, NGO onboarding) ⚠ NONE license, read first, Italian-language docs, public-sector data rules may apply
OpenDosimeter OpenDosimeter/OpenDosimeter ★ 55 · GPL GPL-3.0 · Hardware · Fit 2/5	Open-source low-cost battery-powered personal X-ray dosimeter built on a custom PCB. *Replaces:* Mirion dosimeters, Landauer dosimetry services	Radiation workers, hospital staff, hobby radiation monitors	Hardware kits/assembly Setup + support retainer	• Personal dosimeter kits for hobby monitoring groups • Low-cost dosimetry for vet clinics • Radiation-safety training kits for science classes	$120-200 DIY kit, dose-calibration service $50 *Effort:* High (radiation accuracy, calibration, regulatory standards) ⚠ GPL-3.0 fine, safety dosimeters need calibration and regulatory compliance

Core Banking · 17

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Apache Fineract apache/fineract ★ 2.6k · Permissive Apache-2.0 · Platform · Fit 4/5	Core banking and microfinance ledger platform with loans and savings *Replaces:* Temenos, Mambu, Finastra	Microfinance institutions, SACCOs	Managed hosting Consulting/implementation Vertical SaaS	• Core banking for village savings groups • Loan management for credit unions • Pawn lending ledger *Angle:* Hosted core banking for credit unions and MFIs	$500-2k/mo per institution *Effort:* High (Java platform, compliance integrations) ⚠ Apache-2.0; regulated financial operations
Marble checkmarble/marble ★ 618 · Check NOASSERTION · App · Fit 4/5	Real-time decision engine for fraud detection and AML monitoring *Replaces:* Sardine, Unit21, ComplyAdvantage	Neobanks, payment companies	Managed hosting Vertical SaaS Setup + support retainer	• Transaction monitoring for crypto exchanges • Fraud rules for BNPL lenders • AML screening for money transfer shops *Angle:* Transaction monitoring for neobanks	$500-3k/mo per client *Effort:* Medium (Docker stack, rules engine) ⚠ License flagged NOASSERTION; compliance legal duty
Mifos Web App openMF/web-app ★ 395 · Weak copyleft MPL-2.0 · App · Fit 4/5	Web UI for Mifos X microfinance platform on Fineract *Replaces:* Mambu, Temenos	Microfinance institutions	Managed hosting Vertical SaaS Setup + support retainer	• Loan officer portal for village banks • Group lending dashboard for NGOs • Savings group admin for cooperatives *Angle:* Back-office portal for lenders	$299/mo per MFI *Effort:* Medium (Angular UI, needs Fineract backend) ⚠ MPL-2.0; Mifos trademark held by foundation
Frappe Lending frappe/lending ★ 366 · GPL GPL-3.0 · App · Fit 4/5	Loan management app for ERPNext covering applications, repayments and interest *Replaces:* LendingKart, Mambu, Finastra	NBFCs, small lenders	Managed hosting Vertical SaaS Consulting/implementation	• Loan app for gold lenders • Chit fund tracker • Auto-finance back office *Angle:* Loan management SaaS for NBFCs	$99-499/mo *Effort:* Medium (Frappe app, ERPNext dependency) ⚠ GPL-3.0; regulatory configuration per country
OBP-API OpenBankProject/OBP-API ★ 1.7k · AGPL AGPL-3.0 · Platform · Fit 3/5	Open banking API layer supporting PSD2 and XS2A for banks *Replaces:* Mulesoft, Token.io, Tink	Banks, fintech developers	Managed hosting Consulting/implementation API/usage-based	• PSD2 sandbox for regional banks • Open banking gateway for credit unions • Developer portal for bank APIs *Angle:* Open banking API layer for banks	$2-10k/mo per bank *Effort:* High (Scala, heavy regulatory integration) ⚠ AGPL-3.0; commercial licence offered; regulated use

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Tirreno tirrenotechnologies/tirreno ★ 1.6k · **AGPL** AGPL-3.0 · Platform · Fit 3/5	Open-source security framework for event tracking, risk scoring and threat detection in your systems. *Replaces:* Sift, Splunk Enterprise Security	SaaS security teams, fraud-prevention teams, online retailers	Managed hosting Setup + support retainer	• Login risk scoring for online marketplaces • Account-abuse detection for SaaS platforms • Threat tracking for crypto exchange signups	Free self-host, $499/mo managed threat monitoring *Effort:* Medium (event pipelines, risk models, data integrations) ⚠ AGPL-3.0 must publish server changes, tracked events are personal data
Moov Watchman moov-io/watchman ★ 518 · **Permissive** Apache-2.0 · Tool · Fit 3/5	Search service for OFAC and global sanctions watchlists *Replaces:* ComplyAdvantage, Dow Jones Risk, LexisNexis	Fintechs, money service businesses	API/usage-based Managed hosting Vertical SaaS	• Sanctions screening for money transfer shops • Vendor screening for importers • Customer checks for crypto OTC desks *Angle:* Sanctions screening SaaS for fintechs	$99-499/mo *Effort:* Medium (Go service, data refresh needed) ⚠ Apache-2.0; sanctions list accuracy is legal risk
banking.js euforic/banking.js ★ 645 · **Check** NONE · Library · Fit 2/5	Node.js library for pulling bank transactions and balances through bank APIs. *Replaces:* Plaid, Finicity, TrueLayer	Fintech app developers, personal-finance tools	API/usage-based Consulting/implementation	• Transaction feeds for personal-finance apps • Balance checks for small-business accountants • Bank data aggregation for lending startups	Free library, $0.10 per linked account monthly *Effort:* High (bank-by-bank connectors, reliability and consent) ⚠ NONE license, read first, bank-data scraping may breach terms and open-banking rules
Moov ACH moov-io/ach ★ 572 · **Permissive** Apache-2.0 · Library · Fit 2/5	Go library and HTTP server to read, write and validate ACH files *Replaces:* Plaid Transfer, Dwolla, Modern Treasury	Fintech developers	API/usage-based Consulting/implementation Setup + support retainer	• ACH file validator for payroll apps • Bank file converter for accountants • ACH ops tooling for credit unions *Angle:* ACH file processing for payment startups	$0.01 per file check *Effort:* Medium (Library, needs bank connection) ⚠ Apache-2.0; ACH rules compliance on user
Python-fints raphaelm/python-fints ★ 430 · **Weak copyleft** LGPL-3.0 · Library · Fit 2/5	Pure-Python FinTS implementation, formerly known as HBCI, for bank connectivity. *Replaces:* Finapi, Figo	German fintech startups, accounting software vendors	API/usage-based Consulting/implementation	• Bank-sync features for German accounting tools • FinTS connectors for German SME invoicing apps • Account reconciliation for Austrian tax advisers	Free library, $3k-12k per bank connector project *Effort:* Medium (German bank protocol, per-bank quirks, PSD2 changes) ⚠ LGPL-3.0 fine, PSD2 rules change, banking credentials need secure handling
iso20022.js svapnil/iso20022.js ★ 394 · **Permissive** MIT · Library · Fit 2/5	JavaScript library creating ACH, SEPA, SWIFT and other payment messages and processing bank statements. *Replaces:* Modern Treasury, Form3	Payments engineers, fintech startups, treasury teams	Consulting/implementation Setup + support retainer	• Payment-file generators for payroll software • SEPA and ACH files for small-business accounting • Bank statement parsers for expense-tool startups	Free library, $5k-15k per payment integration *Effort:* Medium (payment standards, bank-specific rules, testing) ⚠ MIT fine, payment rules vary by country, errors carry financial risk
Ofxtools csingley/ofxtools ★ 349 · **Check** NOASSERTION · Library · Fit 2/5	Python library for reading and writing OFX bank and investment statement files. *Replaces:* Quicken, Xero bank feeds	Personal-finance tool builders, accountants, bookkeepers	Consulting/implementation Setup + support retainer	• OFX imports for bookkeeping firms • Brokerage statement parsers for finance apps • Investment tracking imports for personal-finance tools	Free library, $2k-6k per statement import tool *Effort:* Low (Python library, format-specific, small surface) ⚠ NOASSERTION license, read first, OFX is a standard, bank files may differ

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Frida-intercept-encrypted-api yazgx97/frida-intercept-encrypted-api ★ 335 · **Permissive** MIT · Tool · Fit 2/5	Frida-based tool that intercepts encrypted API traffic in mobile apps. *Replaces:* Burp Suite Professional, Charles Proxy	Mobile security testers, app-audit consultants	Training/courses Consulting/implementation	• Mobile app security audits for fintech companies • Pentest training for mobile security teams • Certified app-security courses for QA engineers	Free tool, $3k-10k per authorized app audit *Effort:* High (Frida hooks, app-specific bypass work) ⚠ MIT fine, bypassing app protections may violate app terms and computer-misuse laws
Avanza fhqvst/avanza ★ 248 · **Permissive** MIT · Library · Fit 2/5	JavaScript client for the unofficial Avanza stock trading API. *Replaces:* Interactive Brokers API, Nordnet API	Retail trading app developers, Swedish fintech teams	API/usage-based Consulting/implementation	• Portfolio trackers for Swedish savers • Trading-alert bots for retail investors • Portfolio analytics for Swedish financial advisers	Free library, $49/mo hosted portfolio API *Effort:* High (unofficial API, broker terms, auth changes) ⚠ MIT fine, unofficial broker API, trading automation may breach broker terms
Public bian-official/public ★ 214 · **Permissive** Apache-2.0 · Content · Fit 2/5	Repository of BIAN banking architecture artefacts, currently the BIAN Semantic APIs.	Bank architects, core-banking vendors, fintech CTOs	Consulting/implementation Training/courses	• BIAN architecture courses for bank IT staff • Semantic API mapping for core-banking migrations • Bank target-architecture workshops for CIO teams	Free artefacts, $25k-80k per architecture engagement *Effort:* High (enterprise architecture artefacts, bank domain depth) ⚠ Apache-2.0 fine, BIAN is a standards body, check trademark use
Core-banking-prototype-laravel FinAegis/core-banking-prototype-laravel ★ 209 · **Check** NOASSERTION · Platform · Fit 2/5	Open-source core banking platform with 61 DDD domains, event sourcing and a GraphQL API. *Replaces:* Temenos, Thought Machine, Mambu	Fintech startups, neobanks, credit unions	Managed hosting Setup + support retainer	• Core banking for credit-union digital migrations • Multi-asset ledgers for crypto-fintech startups • Neobank backend for regional fintech licenses	Free core, $5k-20k per bank deployment *Effort:* High (huge domain surface, banking compliance, Laravel) ⚠ NOASSERTION license, read first, banking licensing and audits are regulated
Mifos Android Client openMF/android-client ★ ? · **Check** NONE · App · Fit 2/5	Android field officer app for Mifos microfinance operations *Replaces:* Mambu mobile, SafeSave tools	Microfinance field agents	Mobile app on top Setup + support retainer White-label reseller	• Collections app for village agents • Group meeting data capture app • Loan application kiosk for cooperatives *Angle:* Field officer app for microlenders	$5/agent/mo *Effort:* Medium (Needs Mifos backend) ⚠ License unknown here, check repo; Mifos trademark

Cross-Platform Frameworks · 22

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Yazi sxyazi/yazi ★ 43.3k · **Permissive** MIT · App · Fit 3/5	Fast terminal file manager written in Rust, built on async I/O. *Replaces:* Total Commander, Directory Opus	Terminal power users, developers, sysadmins	Premium plugins/add-ons Consulting/implementation	• Terminal file tools for DevOps teams • Yazi plugin packs for power users • Remote-server file workflows for sysadmins	Free app, $19 one-time for plugin packs *Effort:* Medium (Rust TUI, plugin ecosystem, cross-OS quirks) ⚠ MIT fine, terminal tools are a crowded niche, plugin code licenses vary
Vim vim/vim ★ 41.2k · **Check** Vim · App · Fit 3/5	Official Vim repository for the classic modal text editor used in terminals. *Replaces:* Sublime Text, JetBrains IDEs	Developers, system administrators, terminal users	Training/courses Premium plugins/add-ons	• Vim training for developer teams • Vim plugin packs for enterprise engineers • Vim cheat-sheet courses for sysadmins	Free editor, $99 course bundle on Vim *Effort:* Low (mature editor, branding is the only work) ⚠ Vim license is charityware, name use and distribution terms apply

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Spacedrive spacedriveapp/spacedrive ★ 39.5k · **Permissive** Apache-2.0 · App · Fit 3/5	Cross-platform file explorer built on a virtual distributed filesystem in Rust. *Replaces:* Dropbox, Google Drive	Creative teams, photographers, multi-device households	Managed hosting Premium plugins/add-ons	• Multi-device file hubs for photo studios • Distributed storage for small creative agencies • Family file libraries across devices	Free app, $5/mo for managed cloud sync *Effort:* High (Rust core, sync and cross-device storage engineering) ⚠ Apache-2.0 fine, sync products carry data-security and privacy duties
Etcher balena-io/etcher ★ 34.7k · **Permissive** Apache-2.0 · App · Fit 3/5	Desktop app that flashes OS images onto SD cards and USB drives safely.	Raspberry Pi makers, IT technicians, school IT teams	Premium plugins/add-ons Setup + support retainer	• Imaging support for school IT departments • Device-flashing kits for maker spaces • Enterprise device imaging for kiosk fleets	Free app, $15/yr for fleet imaging features *Effort:* Medium (desktop app, cross-OS drive handling) ⚠ Apache-2.0 fine, balena is a company trademark, device-flashing data-loss risk
DevToys DevToys-app/DevToys ★ 32.2k · **Permissive** MIT · App · Fit 3/5	Desktop Swiss Army knife of developer utilities. *Replaces:* Dash by Kapeli, Paw	Web developers, DevOps engineers, QA testers	Premium plugins/add-ons Training/courses	• Developer toolkits for bootcamp graduates • Encoding and JSON tools for QA teams • Dev utilities bundles for IT consultants	Free app, $9.99 one-time for pro plugins *Effort:* Medium (desktop app, tool plugin catalog) ⚠ MIT fine, many utilities duplicate free web tools, differentiation needed
Micro micro-editor/micro ★ 29.8k · **Permissive** MIT · App · Fit 3/5	Modern, intuitive terminal text editor.	Terminal users, sysadmins, developers	Training/courses Premium plugins/add-ons	• Terminal editor training for sysadmins • Editor plugin packs for DevOps teams • Remote-server editing setup for hosting firms	Free editor, $7 one-time for plugin bundle *Effort:* Low (mature editor, branding and plugins) ⚠ MIT fine, editor market is crowded, value comes from plugins and support
Gopeed GopeedLab/gopeed ★ 27.5k · **GPL** GPL-3.0 · App · Fit 3/5	Fast cross-platform download manager for HTTP, BitTorrent, magnet and ed2k links. *Replaces:* Internet Download Manager	Power users, media archivists, developers	Premium plugins/add-ons Mobile app on top	• Large-file download tools for IT teams • Batch media download tools for archivists • Torrent-and-HTTP downloads for remote teams	Free app, $9.99 one-time for team features *Effort:* Medium (Go and Flutter app, bundled downloader protocols) ⚠ GPL-3.0 fine, BitTorrent and ed2k use may infringe copyright
Coreutils uutils/coreutils ★ 24.3k · **Permissive** MIT · Tool · Fit 3/5	Cross-platform Rust rewrite of the GNU coreutils.	Linux distributors, enterprise OS teams, embedded systems	Consulting/implementation Setup + support retainer	• Rust coreutils for security-focused distros • Enterprise OS support for Rust toolchains • Embedded Rust userland for IoT firmware	Free software, $20k-60k per distro integration *Effort:* Medium (Rust rewrite, GNU compatibility edge cases) ⚠ MIT fine, script compatibility with GNU behaviour varies by flag
Flutter flutter/flutter ★ 181.1k · **Permissive** BSD-3-Clause · Framework · Fit 2/5	Cross-platform UI framework for building apps for mobile, web and desktop. *Replaces:* Appcelerator Titanium, Ionic Appflow	Mobile app agencies, startups, enterprise app teams	Agency service Consulting/implementation	• Flutter app builds for local retail chains • Cross-platform field-service apps for utilities • Flutter training for mobile agencies	Free framework, $8k-30k per mobile app build *Effort:* Medium (Dart codebase, platform plugins and store compliance) ⚠ BSD-3 fine, Flutter and Dart are Google trademarks, plugin licenses vary
React-native react/react-native ★ 126.9k · **Permissive** MIT · Framework · Fit 2/5	Framework for building native applications using React. *Replaces:* Flutter, Xamarin	React developers, mobile app agencies, startups	Agency service Consulting/implementation	• React Native apps for local restaurant groups • Cross-platform field apps for healthcare teams • React Native training for mobile agencies	Free framework, $10k-35k per mobile app build *Effort:* Medium (mature framework, many native modules to vet) ⚠ MIT fine, React and React Native are Meta trademarks, module licenses vary

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
Uni-app dcloudio/uni-app ★ 41.6k · Permissive Apache-2.0 · Framework · Fit 2/5	Cross-platform framework for building apps with Vue.js. *Replaces:* Taro, Ionic	Chinese app agencies, Vue developers, mini-program teams	Agency service Consulting/implementation	• Mini-program builds for Chinese retail brands • Vue-based apps for local service businesses • Cross-platform training for Vue agencies	Free framework, $5k-20k per multi-platform app *Effort:* Medium (Vue framework, platform-specific compile targets) ⚠ Apache-2.0 fine, WeChat and other store rules apply to mini-program builds
Fyne fyne-io/fyne ★ 28.8k · Permissive BSD-3-Clause · Framework · Fit 2/5	Cross-platform Go GUI toolkit inspired by Material Design. *Replaces:* Qt commercial licenses	Go developers, internal-tool builders, embedded UI teams	Consulting/implementation Training/courses	• Go desktop tools for ops teams • Material-style kiosk UIs for retailers • Go GUI training for backend engineers	Free toolkit, $8k-25k per Go desktop app *Effort:* Medium (Go GUI toolkit, theming and mobile packaging) ⚠ BSD-3 fine, mobile store packaging rules apply, check Fyne naming
SteamTools BeyondDimension/SteamTools ★ 27.4k · GPL GPL-3.0 · App · Fit 2/5	Open-source cross-platform multi-function Steam toolbox.	Steam power users, PC gaming communities	Premium plugins/add-ons Content/membership	• Steam account tools for gaming cafes • Steam network tools for Chinese-speaking gamers • Steam utility packs for PC gaming clubs	Free app, $3/mo for cloud sync features *Effort:* High (Steam network changes, Windows-heavy stack) ⚠ GPL-3.0 fine, Valve trademarks, network tools may breach Steam terms
Flatbuffers google/flatbuffers ★ 26.6k · Permissive Apache-2.0 · Library · Fit 2/5	Memory-efficient serialization library for performance-sensitive apps.	Backend and game engineers, embedded systems teams	Consulting/implementation Training/courses	• Fast serialization for game-server backends • Binary message formats for IoT device makers • Serialization training for C++ engineers	Free library, $5k-15k per protocol integration *Effort:* Low (mature library, schema tooling, no UI) ⚠ Apache-2.0 fine, library only, Google name is a trademark
Fmt fmtlib/fmt ★ 25.9k · Permissive MIT · Library · Fit 2/5	Modern C++ formatting library, the basis for std::format.	C++ developers, embedded firmware teams, game engineers	Consulting/implementation Training/courses	• C++ formatting audits for embedded firmware teams • Logging formatter setup for game studios • Modern C++ training for legacy codebases	Free library, $3k-12k per C++ migration project *Effort:* Low (mature C++ library, minimal UI) ⚠ MIT fine, library only, C++ expertise needed for integration
React-native-elements react-native-elements/react-native-elements ★ 25.9k · Permissive MIT · Library · Fit 2/5	Cross-platform React Native UI toolkit with ready-made components. *Replaces:* Tamagui Pro, NativeBase Pro	React Native app developers, mobile agencies	Consulting/implementation Premium plugins/add-ons	• Component kits for fintech mobile apps • UI kits for restaurant ordering apps • Design-system kits for mobile agencies	Free library, $79 premium component kit *Effort:* Low (component library, mature, easy to skin) ⚠ MIT fine, library only, component designs need your own brand work
NativeScript NativeScript/NativeScript ★ 25.7k · Permissive MIT · Framework · Fit 2/5	Framework for writing native mobile apps in TypeScript and other languages. *Replaces:* React Native, Xamarin	TypeScript mobile teams, Angular developers, enterprise app teams	Agency service Consulting/implementation	• Angular mobile apps for enterprise field teams • Native-feel TypeScript apps for regional retailers • NativeScript training for Angular developers	Free framework, $12k-35k per native app build *Effort:* Medium (native API bindings, platform-specific code) ⚠ Apache-2.0 fine, native plugin licenses vary, store rules apply
Notable notable/notable ★ 23.5k · Check NONE · App · Fit 2/5	Markdown-based note-taking app. *Replaces:* Notion, Obsidian Sync, Bear	Writers, students, knowledge workers	Premium plugins/add-ons Managed hosting	• Markdown notes for technical writing teams • Research note libraries for graduate students • Team wiki sync for small law firms	Free app, $5/mo for team sync *Effort:* Medium (note app, sync and collaboration gaps) ⚠ NONE license, read first, note-app market is crowded, sync needs data-privacy work

Project	What it does	Customers	Business models	Niche ideas	Pricing · effort · gotchas
React-native-web necolas/react-native-web ★ 22.2k · Permissive MIT · Library · Fit 2/5	Library that renders React Native components for the web using React DOM.	React Native teams going web, cross-platform agencies	Consulting/implementation Agency service	• Web ports of mobile apps for retailers • React Native web builds for SaaS startups • Cross-platform UI migrations for agencies	Free library, $6k-18k per web port *Effort:* Medium (web port edge cases, styling differences) ⚠ MIT fine, library only, native-web feature gaps need testing
